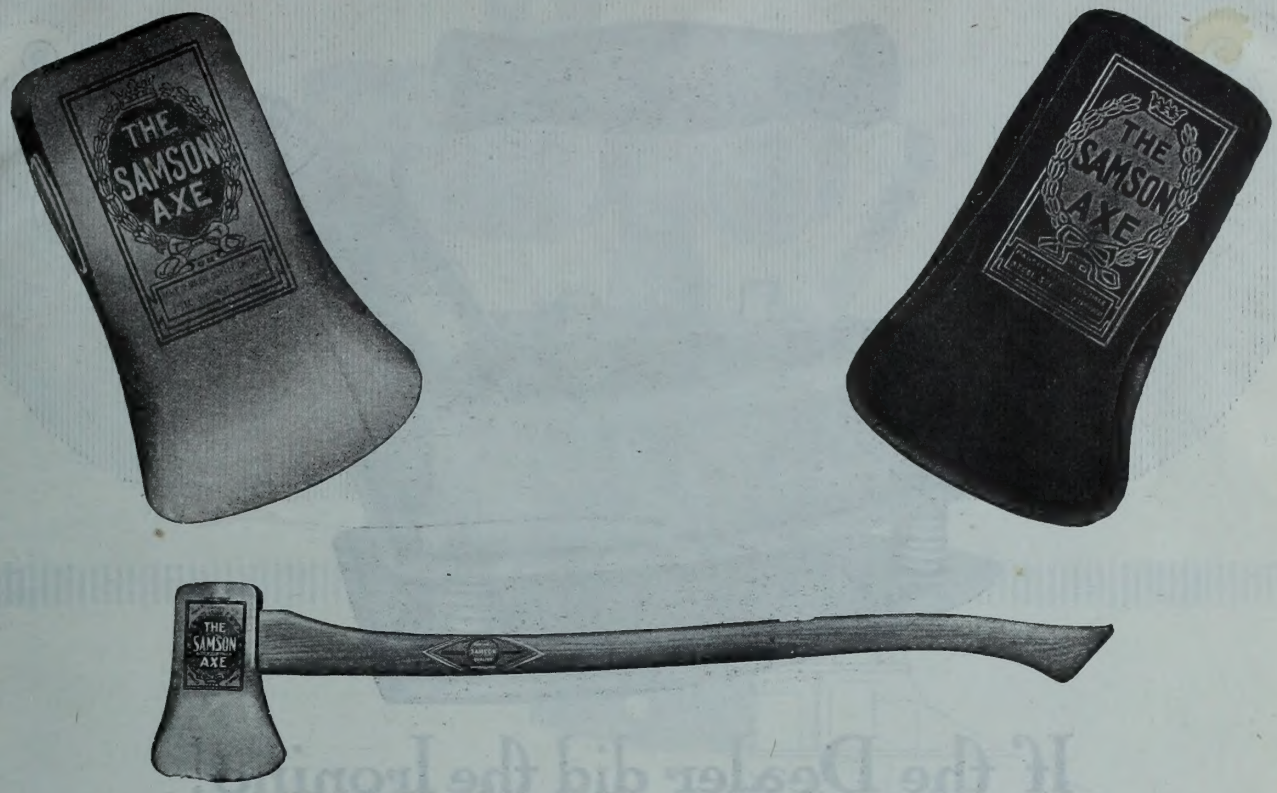
An All-Year Seller

WE do not know where the idea originated—but it is a fact that some merchants regard Dye Soaps as "Season Sellers"—a proposition that "goes big" only in the Summer.



Whatever may have been the case heretofore, there is now at least one Dye Soap that refuses to be classed as a mere "warm weather friend."

Aladdin is going big the whole year through. Your customers require this most wonderful of Dye Soaps for their blouses, underwear and household draperies—just as much to-day as in the month of July.

Aladdin is advertised as strongly to the public in January as in any other month. All it needs is a place on your counter—it will swell your January sales and profits if you give it a fair chance.

If the Dealer did the Ironing!

IF the dealer could do a little sample ironing in the store, it would be easy to convince any woman of the quick-heating, smooth-working qualities of the Universal Iron.

In the store, the Universal is but well designed, well finished metal—cold, inanimate, unresponsive. But in the home, on the ironing board, it quickens into life—a life of service.

After all, the Universal isn't metal; it isn't theory; it isn't what ingenuity designs and skill executes. The Universal Iron is Service itself—hot, dependable, continuous Service throughout years of ironing days.

The Universal is the result of slighting nothing, taking nothing for granted, proving everything. Nonstopping satisfaction goes with every sale and a liberal profit to the dealer.

"America" Trolley Hanger

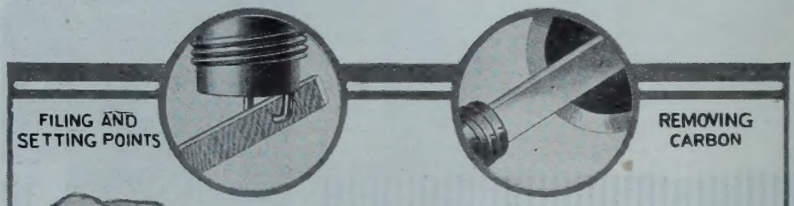
Largest Hanger Sales in the Dominion

The America is easily the most popular for warehouse, factory, garage and barn doors. America operates in the Hatch Trolley Track—the only track supported by the famous corrugated track brackets. Much stronger and better than the plain track brackets.

The America moves smoothly on tandem trucks and hardened roller bearings. Apron 6 in. long, 3¼ in. wide. This efficient hanger appeals to customers because of the simple adjustments, anti-friction, forged steel yokes, and ability to stand hard usage.

With each pair of Hangers are included two End Caps, Bolts for Hangers and Lag Screws for Brackets.

Packed one pair in a box complete with Screws and Bolts.



Weight per dozen pairs, without Brackets, 95 pounds.

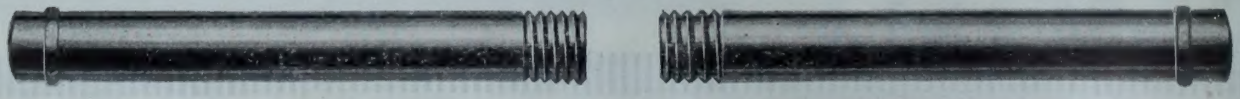
DISSTON
"KLEEN-SPARK"

DIRTY Spark Plugs, due to carbon deposit from combustion of oil and gas, are a great source of annoyance. They result in misfiring and consequent loss of power.

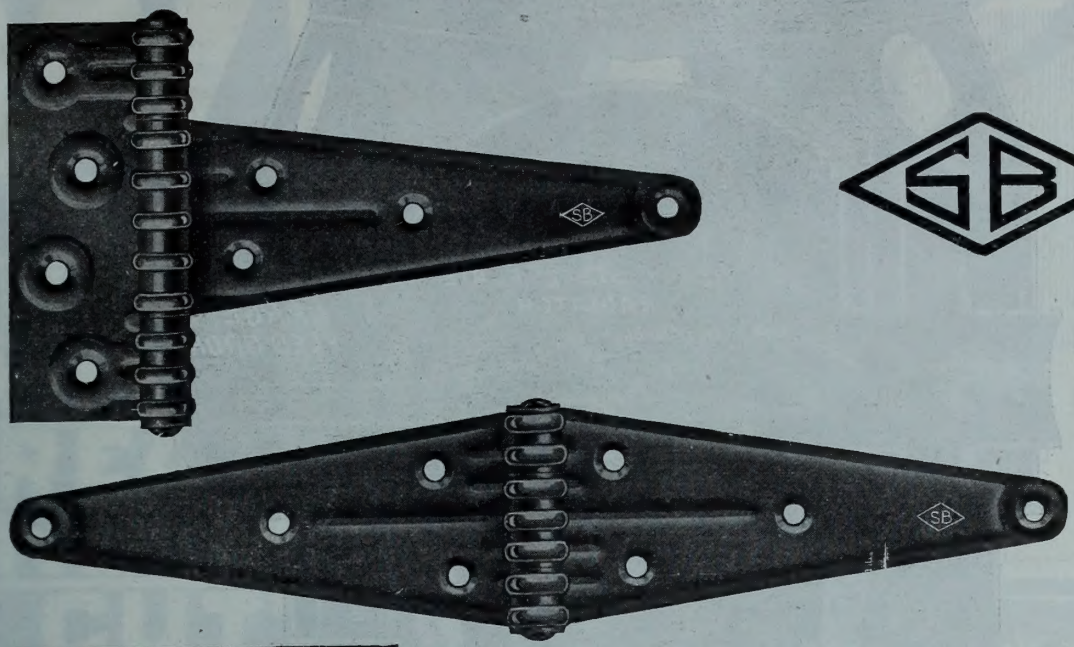
Disston, realizing the need of a compact, complete, efficient tool for the purpose of cleaning spark plugs, has invented the "Kleen Spark." It is a double tool in **one piece,** one end a magneto file and the other end a knife blade. Handle covers fit over either end. The tool assembled is not much larger than a pencil.

Scrape the carbon from inside the porcelain with the knife blade. Clean and sharpen up the pitted points with the file, then reset, using the thickness of file as a gauge for the proper distance between contact points to get the best results from the spark. The end of the file is beveled like a chisel for cleaning gummy, oily surfaces of delicate mechanisms.



Automobilists, motor-cyclists, motor launch devotees, aviators, farmers for their tractors, engineers and mechanics, in fact anyone working around an engine finds that this tool fills a long-felt want.

The "Kleen Spark" Tools are mounted one dozen on an attractive display card as illustrated. They have proved to be an exceptionally popular tool wherever shown.



Ask your jobber or write to us for complete information

Some of the Popular Lines

No. 210 Corrugated T-Hinge (Bulk)—A strong, neat, light hinge which is replacing the heavy type hinge. The corrugations strengthen it. The finish is better than the old type iron hinge.

No. 215 Corrugated Strap Hinges (Bulk)—A far superior hinge to the old type, both in weight and finish—corrugations strengthen the hinge, lighter in weight, can be used in place of the heavy type.

No. 1215 Japanned Trap Door Rings — Size 3½″ Wrought Steel Flush Trap Door Rings, Baked Japan Finish. Packed ½ dozen in carton with japanned screws. Supplied also in galvanized or plated finish at additional cost.

No. 1205 Chest Handles—Made of best quality deep drawing steel, with heavy, easy grip handle, japanned. Also supplied in galvanized or plated finish at additional cost. Packed ¼ dozen pairs in box with screws.

No. 815 Wrought Steel Safety Hasps—Finished in Bright, Japan or Galvanized, made of wrought steel with hinged joints and concealed screw holes, which make it safe. Made in sizes 3″, 4½″ and 6″. Packed one dozen in carton.

Many Distinctive Features Now Embodied in the New Idea Warm Air Furnace

The NEW IDEA contains more heating service than any other furnace. The large, roomy ashpit prevents the ashes from banking up and burning out the grates.

FIRE POT: The NEW IDEA has a heavy flanged cast fire pot which is guaranteed for five years.

GRATE: One of the biggest features in connection with this furnace is the Ball Bearing Duplex Grate, so simple in construction that a child can operate it. By the use of the Duplex Grate, ashes and clinkers can be dumped easily and with no waste of the live coals. This grate is of solid, substantial construction and built of honest material to withstand constant heat and wear.

The NEW IDEA is a furnace you can absolutely recommend to your customers without fear of a come-back.

We would like to give you further information and send you a catalogue with full description and illustrations, or we will send one of our representatives to see you if you wish. We are at present in a position to supply your immediate needs. Send us your order at once.

Plymouth Rope

Manila Fiber Is Compressed into Bales Weighing 280 Pounds and Measuring 12 Cubic Feet

AFTER grading, Manila hemp is compressed into bales by hydro-electric presses. These bales weigh approximately 280 pounds and measure 12 cubic feet. It is in this form that the Manila hemp of commerce eventually reaches the rope-maker, each individual bale being covered with straw matting as a protection in transit. Thousands of bales of Manila fiber are consumed each week in the manufacture of Plymouth Rope and many thousands of bales are available in our warehouses at all times, properly classified and tagged to insure the **uniform** quality of our cordage products, and which could not be accomplished otherwise.

When placing orders for rope with your jobber, do not simply ask for "Pure Manila," but specify PLYMOUTH and thus secure the greatest amount of rope value and satisfaction for your customers. PLYMOUTH Rope is an article that can be handled as a profitable specialty on a price-per-foot basis and by utilizing the free Window Display Service that will be furnished on request.

New Customers Become Steady Ones

The surest way to convert a new glove or mitt customer into a permanent one is to sell him

Tapatco Gloves and Mitts

If he is a mechanic, lumberman, railwayman, machinist or a farmer, Tapatco Gloves and Mitts will please him right down to the ground. An increasing percentage of Tapatco Gloves and Mitts have found their way into the machine shop and this in itself is significant, because a glove or mitt that will stand the "gaff" of a machine shop—where they handle the heaviest kind of work—will stand any test a glove could be put to.

STYLES:

Gauntlet, Knit Wrist and Band Top. In Heavy, Medium and Light Weights. Also Leather Tip and Leather-faced Gloves, Jersey Gloves and Mitts in Tan, Slate or Oxford. Made of best grade Cantons.

Hitch your sales to Tapatco—good profits are yours.

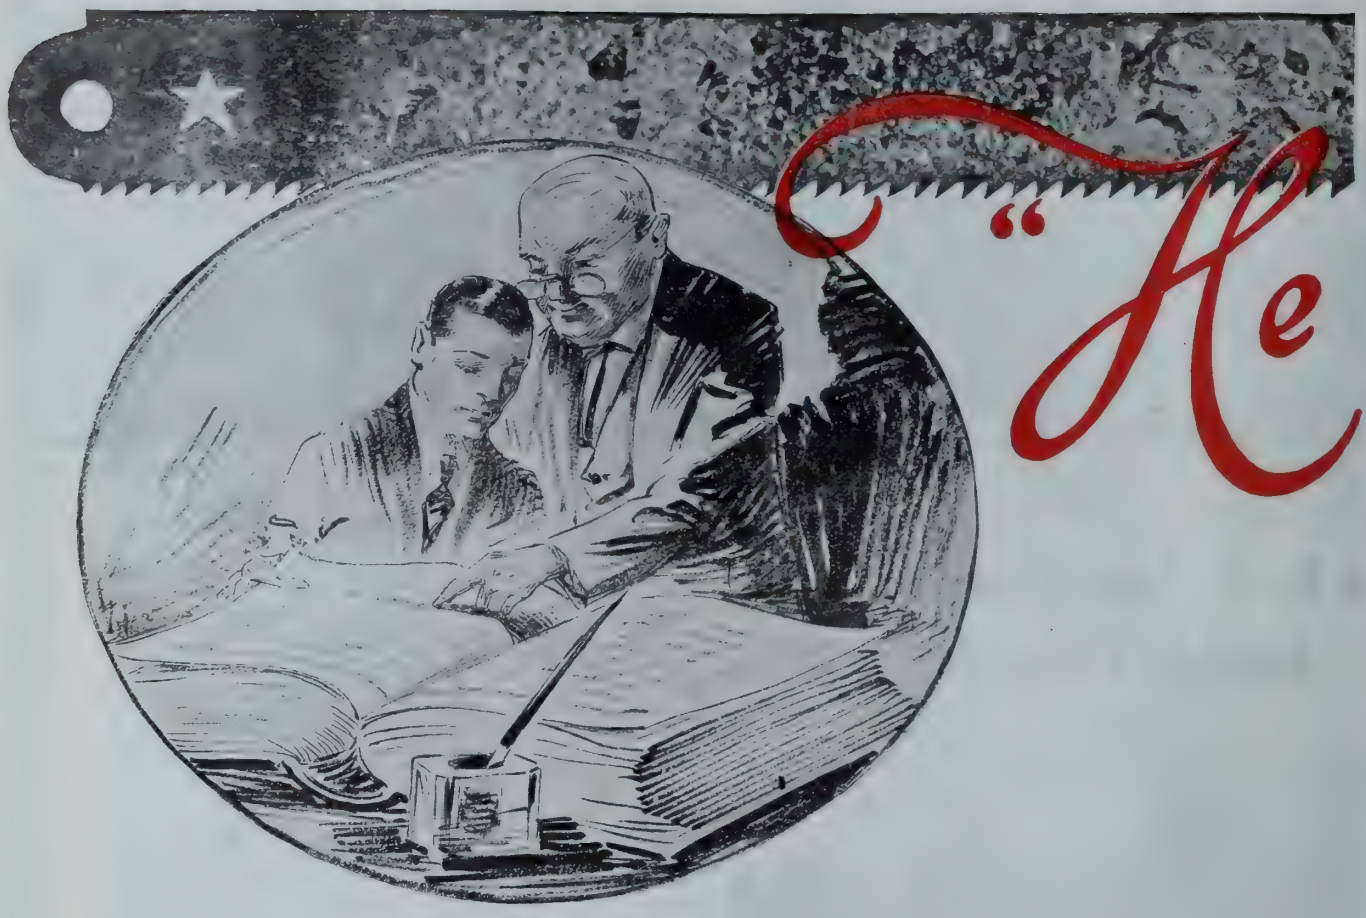
Story for Week Dated January 1st, 1921 Being No. 38 in the Series

An E. B. Eddy Company Lumber Camp in the Bush

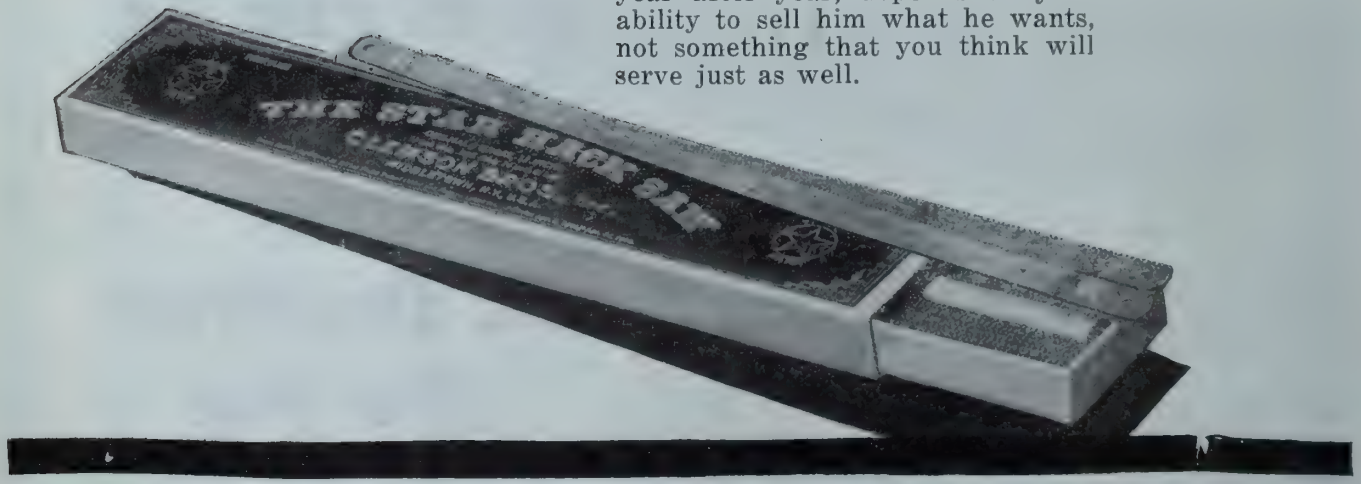
INDUSTRIAL operations of the E. B. Eddy Company at Hull are housed in the most modern factory buildings, with every mechanical device to ensure perfection of product, as you have seen to some extent, and will see still further in this series. But the little old log cabin has still a place in Canadian industry, as the picture reveals.

This is a typical Eddy Company lumber camp, built of the sort of logs that can be made into matches, paper or indurated ware by the Eddy processes. But these logs instead of being rafted down the river to Hull, remain in the bush furnishing shelter for the lumbermen. They are the outposts of Eddy Company enterprise away out in the timber limits.



Eddy matches; Eddy paper bags, and tissue papers; Eddy indurated ware, are by their wide distribution through the clear channels of the Canadian retail trade so familiar to so many people that one is apt to forget their origin in the timber that is one of Canada's most valuable natural resources. The picture of the little old log cabin near where saw and axe are plied constantly to supply raw material for the busy Eddy plant, will remind you.

The E. B. Eddy Co. Wish You a Happy and Prosperous New Year



If interested tear out this page and place with letters to be answered.

"He

LOOK over your ledger some day and pick out your best customers. Likely enough their profit-making connection started with the purchase of some small article like Star Hack Saws.

The satisfaction that brings back your customer day after day, and year after year, depends on your ability to sell him what he wants, not something that you think will serve just as well.

STAR HACK

started with Star Hack Saws"

Experience shows that repeat sales come from selling standard goods which sell best because their high quality is so well known it needs no proof.

For 37 years Star Hack Saws have been the largest selling blades because they are known to give so much better metal cutting results than any other saws.

Scarcely a hardware store or supply house in the country but has its stock of Star Saws in the famous green box. To thousands of dealers and users the Star is literally the only hack saw they know.

Old friends of the Star have been interested in our announcement that we who have made Star Hack Saws since 1883 have taken over the marketing of them as well. Which is part of our policy of getting Star quality even more widely known and appreciated than it is now. As part of this policy our national advertising for the coming year will be carried out on a wider and more dominating scale than ever before. And our sales co-operation with you will be as complete as we can make it.

In ordering through distributors, be sure you get "Star." Your inquiries and direct orders should be sent to this office, where they will have prompt attention.

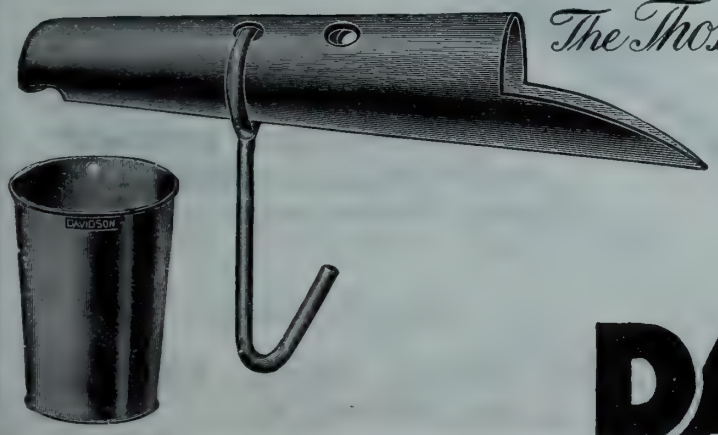
Sap Buckets and Spouts



How about Stock *For* Spring Trade?

Have you anticipated your requirements for the Spring yet? Many lines will need restocking—this week we draw your attention to Davidson's Sap Buckets and Spouts, which are big sellers on account of their quality and reliability.

Sap Buckets are stocked in plain tin, terne plate and galvanized iron—in all sizes. These galvanized buckets are very durable because they are rustless—they are made of black sheets and galvanized by hot process, thereby ensuring well-filled seams, which leave no place for moisture to lodge and corrode.

The "Sterling" Leaded Spout is also rustless, and, consequently, is a far superior article on account of being less harmful to the tree than other makes.

An inquiry will receive prompt attention.

Make More Money— Sell Decorative Wall Burlap

How many prospects have you, who would, if only they knew its advantages, purchase Decorative Burlap for use on many jobs they are undertaking? Have you counted them yet?

Take the house builder, for instance. He will plan beforehand what kind of finish he will adopt for his kitchen, his dining room, halls, and living room. He is a real prospect for

Decorative Wall Burlap

On the walls of these rooms, it will afford the house owner a satisfying, economical, sanitary and attractive finish. Not only so, but as fancy dictates, the finish may be easily and quickly changed by painting, giving the owner a decidedly new effect in a given room.

Decorative Wall Burlap keeps out draughts and cold. Is easily cleaned by passing damp cloth over surface.

Other prospects for you, Mr. Hardware Merchant, are the proprietors of halls, pool rooms, offices and stores. All of them afford you the chance to reap new business, and thus swell your profits. Our stocks are now complete—and your wants may be supplied in Drab, Green, White and Double-sized.

Sizes — 30 or 60 yard lengths; 30, 36, 45, 54, 60, 72, 90 inch widths, or may be had in desired widths.

The Trade Outlook for 1921

Galvanized Sheets May Soon Reach Price Equal to That of Early Last Year—Prices on Some Lines Lower Than Normal Level to be Finally Settled on—Merchants Not Overstocked and Heavy Requirements to be Met Later—Stove Manufacturers Cleaned Out of Stock—Expect Large Brush Demand in Spring

DEALING with conditions and the outlook as affecting galvanized sheets, A. T. Enlow, president Dominion Sheet Metal Corporation, Ltd., Hamilton, Ont., stated to Hardware and Metal that a great deal of the comment appearing in the press concerning reduced prices on steel products was getting to retail dealers and is apt to give rise to some misapprehension.

"It is true," said Mr. Enlow, "that a good many of the United States producers are now meeting United States Steel Corporation prices, but as a matter of fact little or no business is being done and the wholesaler has in his stock sheets which cost him considerably more than on the new basis and naturally is disinclined to get down to that basis at one swoop. He did not go up in a single sustained flight but by jerks, and it is only fair to him that he come down in the same way.

Prices Below Those of October and November

"We can say, however, with assurance that prices are now considerably below the topnotch ruling in October and November and, based on the cost of new material when same comes in, believe that galvanized sheets will be selling to the trade in the very near future at prices about equal to those in effect early last year.

"On January 3rd, you will note that No. 28 U. S. gauge premier galvanized sheets were selling in Toronto at an average price $9.90 per 100 pounds and while exchange is considerably higher now than at that time, we believe that galvanized sheets will before long be selling in the neighborhood of 9 cents per pound to the dealers, on which basis he will be saving from 25 to 30 per cent. over recent prices.

"It is possible that as time proceeds and especially if wages generally decrease, this may be somewhat reduced, but the railroads and other important factors would have to join in the wage reduction and as time progresses the buyer will be in position to judge for himself as to when the bottom is reached.

When Will Bottom Be Reached

"It is well, however, to remember that Russell Sage, the fox of Wall Street, stated that the reason more people did not become rich in Wall Street was because few recognize when the top and bottom points have been reached and that anyone could become wealthy who bought at the bottom and sold at the top.

"We have been somewhat conservative for the last several months and have urged caution in buying and on the basis of the above price, believe that any dealer will be justified in laying in his requirements for spring use and that the general good of the country will be conserved if we all buy reasonably and sell reasonably and any dealer who is able to effect a saving in buying should pass same on largely to his customers, thus creating more business."

Builders' Hardware, Tools, Etc.

Stating that his firm, like other manufacturers, find that prices are too high, J. M. Taylor, president Taylor-Forbes Co., Ltd., Guelph, Ont., analyzes the situation as follows:

"Prices are high because the cost of production is high, but we cannot reduce them at present as it would be unwise in our opinion to lower the rate of wages until foodstuffs, clothing and other absolute necessities are considerably reduced and at present the reduction is not perceptible, and then again raw materials such as pig iron, steel plates, etc., have to come down considerably before it will affect the costs in general hardware lines.

Opinions of authorities on the paint, varnish, oil and turpentine situation and outlook for 1921 are to be found in the paint section of this issue.

"Just as promptly as we find there is an opportunity or necessity for reducing the price of any line the trade will promptly have the benefit of such reduction.

"Meantime we believe the present prices will be maintained for a considerable time yet."

Electrical Goods

Dealing with conditions in the electrical trade, A. Pritzker, manager the National Electric Heating Co., Ltd., Toronto, states as follows:

"We are of the opinion that some prices at the present time are lower than they should be. Conditions at the present time are not at all natural and on account of the slump a good many retailers, wholesalers and manufacturers were forced to reduce prices beyond the point at which a slight profit is made and in many cases goods are being sold at a loss. A condition of this kind cannot last very long. We feel quite confident that things will be going back to normal in the very near future, at which time some prices will again advance somewhat.

Basic Factor Is Labor

"The basic factor for all cost is labor, and this has not been reduced very much. It is true that in some cases there has been a reduction of anywhere from 10 to 20 per cent. So there can only be a corresponding reduction in the price of the commodity into which the labor enters.

"An important factor in connection with cost in Canada at the present time is exchange. If the rate of exchange will remain as at present there is bound to be an advance on a good many commodities. If, however, it recedes it will naturally then keep prices at a lower level.

"Another important factor is the high freight rate, which almost counterbalances any reduction in wages. It must be conceded that to have normal conditions a drastic reduction cannot be made on wages any more than a reduction on

the finished commodity which has resulted in the bad conditions at the present time.

"Regarding our own particular line, there is no possibility of a reduction in price, at least not for some time to come.

"There is every possibility of big building activity in the coming spring and this will help considerable to stabilize conditions and will tend to keep prices firm."

Active Stove Season

Pointing out that the season just closing has been an active one for stove business, B. C. Beach, manager Beach Foundry, Ltd., Ottawa, states to Hardware and Metal as follows:

"The past season has been so active that it has left us without any stock on hand. This means that we will be busy for some time building up a stock. On account of the rush of business this season we were compelled to take our travellers off the road early in November and, therefore, are not just able to give as full a report on prospects for business for the next few months as we would otherwise be able to do.

"Might say, however, that our head salesman last week made a five days' trip to a representative district in order to size up the situation and he reports: 'With few exceptions the trade is now carrying very low stocks of stoves, ranges, etc., but as there is so much talk about readjustment of prices I expect orders booked for the next few months will not be large, but on the whole a fair demand.'"

Another opinion on the stove and furnace business is that from C. A. Lusby, secretary Amherst Foundry Co., Ltd., Amherst, N.S., as follows:

"In stoves and hot air furnaces, business during the past few months has been very good. We find, however, that recently the market has dropped off almost altogether and we think it will be very quiet along this line for the next few months. Of course, the autumn is the time when most of the business in this line is done. We think business will be very quiet for the next few months but it will probably pick up again during next summer and autumn.

Sanitary Goods

"Our principal business is manufacturing sanitary enamelled goods. The market for these goods depends very largely on building operations throughout the country, which have been of very small extent during the past year, owing largely to the high cost of materials used in the construction of buildings. Notwithstanding this, business has been fairly good with us along this line, but it has now ceased almost entirely. We think during the next few months business will be very quiet, but when raw materials used in building decline in prices, there should be a good demand for enamelled sanitary goods, as there is a great need of building throughout the country."

Expect Large Brush Demand in Spring

Pointing out that the brush industry has experienced a heavy demand for its products during the past year, J. C. Boeckh, secretary-treasurer of the Boeckh Co., Ltd., Toronto, makes the following statement:

"During the past year brush demand has been such that manufacturers could hardly cope with it, but there is now a tendency on the part of retailers to refrain from placing orders for immediate delivery. Confidence in the future is shown by the large amount of business for the spring of 1921 placed with us.

"Prices of raw materials, which have been advancing during the last few years, are now practically stationary but the tendency to reduction is not as yet noticeable to any extent. Materials are still scarce and are likely to be so for some time, though we have, in one or two instances, been able to get materials at slightly lower prices, due to buying in more favorable markets.

No Reduction in Wages

"Labor is more plentiful, but no reduction in wages has taken place, and as long as the demand for our products continues, it is not likely that wages can be reduced.

"Prices of our products have advanced during the past year due to the greatly increased cost of materials, labor and expenses, etc., and while we do not look for any further advances reductions of any moment are not likely to take place.

"Information we have received shows stocks of brushes in the hands of the dealers to be light in most places and, therefore, we anticipate a large demand next spring, as there is very urgent need of more buildings of all kinds and the repainting of buildings, etc., has been deferred for so long that the time is at hand that a great deal of painting will have to be done to preserve them from a state of absolute decay."

Long Period of Depression Is Unlikely

Intervals of Revival May Be Short Until General Lower Level of Merchandise Prices is Reached — Slackening in Wholesale Trade

(Statement made to Hardware and Metal by P. Howland, president H. S. Howland Sons & Co., and president Imperial Bank of Canada)

DEALING with conditions from the standpoint of the wholesale hardware trade, Peleg Howland, president of H. S. Howland Sons & Co., Ltd., Toronto, points out that wholesale business was good in 1920, at least until the end of November, and that the year will very likely show satisfactory results to those engaged in it. Business during that period, it is stated, was done with safety and payments on the whole were good. Speaking of the outlook, Mr. Howland states as follows:

"Since the end of November there has been a perceptible slackening as compared with a year ago, and it is anticipated that the coming year will be one of decreased sales. Reports, however, from the country indicate that merchants are not overstocked, nor can I conceive that the wants of the consuming public have been fully supplied. Of course, the reduced returns for nearly all the natural products of the country, which are really the basis of our prosperity, must curtail the capacity to buy, but with the shortage of housing, the needs of railroads that have to be supplied, and the general activities which can only be stopped in part, I cannot see how we can remain in a depressed condition as regards trade for a long period; though our intervals of revival will be, I think, short, until cheaper labor and greater production per unit bring about a general lower level of prices of merchandise. When a level has been reached that begets confidence, then and only then, will there be an outlet for the full energy and enterprise of the people, and the return of what we call prosperity.

"It is to be hoped that in the period approaching, our Governments, not only the Dominion, but the municipal and provincial, will exercise the strictest economy. I can conceive of nothing that would give so much heart as the beginning of a steady reduction of our huge war debt.

"Can we hope, too, for simpler methods of taxation and the avoidance of those that promote dishonesty, hamper trade, and impose heavy burdens of expense in their operation?

"Also is it too much to expect that Government regulation of business will be avoided and that trade will be allowed to seek its natural channels, unhampered, under which condition it flourishes best. Prosperity comes with the distribution and exchange, in the cheapest possible way, of the products of the different classes of labor."

OVERPRODUCTION HAS PRODUCED DULLNESS IN COPPER

In a recent interview an authority stated that overproduction in the past is one of the principal causes for the prevailing dull state in the copper market. Buyers knowing that there are large surplus stocks are consequently restricting their purchases but, it was stated, what consumers fail to realize is, that if producers were to tie up their surplus stocks, which they can do, the present rate of production would hardly suffice to take care of their needs. These needs will be augmented in the near future a thousand fold, according to this authority.

Increasing Turnover in Readjustment Period

Making Accurate Inventory, Keeping Accounting Records and Close Watching of Credit Accounts Will Put Business on Better Basis and Help Towards Bigger Turnover and Larger Percentage of Profit

WAYS of increasing the turnover during a period of readjustment such as business is now passing through, are eagerly sought by merchants of every trade. In this connection it is evident that, apart from special efforts in selling, the keeping of an accurate and up-to-date accounting of the business is one of the most important things to be kept in mind. An inventory should be taken which will show the merchant exactly where he stood at the end of 1920; what lines were the best sellers and which the slow movers. This information will help the merchant to plan his business for 1921 in such a way as to increase his turnover. Keeping the business in liquid shape by urgent attention to collection of accounts puts the merchant in a position to take best advantage of the information which his accounting system gives him as to the best merchandising plan for him to follow.

A number of good plans of inventory in the hardware store have been outlined in Hardware and Metal, one plan in particular being outlined fully in last week's issue. The past year has been a good one for the hardware trade as a whole, despite the falling off in general business and many merchants have stated to Hardware and Metal that business for certain periods of 1920 was much in excess of that done in the same period in 1919. The outlook for 1921 is thought to be very good and undoubtedly a return to more normal conditions in business and certain industries will bring a good volume of business to the hardware stores. With this in view it is more than ever necessary that every hardware merchant should get away to a good start early in the new year. His records should tell him what he has on hand, what his requirements will be and what he is not going to need.

Set Definite Date for Inventory

A plan followed by some merchants is to set a definite date on which the inventory will be written up and then plan to have the stock cleaned up and sorted out well in advance in order to facilitate the actual recording of it. The plan of placing a sticker on each container is followed, in order to show the contents and marginal space left so that note may be made of anything taken from stock. This plan is followed so that when stock is actually taken everything is in good shape.

A good system must be followed in writing down the records in order that no part of the stock will be missed. Each shelf should be marked in some way as it is recorded and the section may then be marked when each shelf has been taken. Selling goods from stock already taken is the part which causes some trouble and in order to overcome this some merchants follow the plan of using the slip wherever possible such as in the case of drawers, but where the goods are on shelves a slip may be tacked up either on the left or right hand side of the section and note made of any goods taken from that section. If a number of cases have been opened of a certain line of goods and only a few taken from each it would be well to fill up as many cases as possible to standard measures so that there will be fewer odds and ends to be considered.

A Good Time to Clean House

Inventory time is a good time to clean house. The dead stock can be collected and laid out on tables and form the basis of some special sales to liven up business early in the new year. Many hardware merchants will be surprised at the large amount of dead stock which they have accumulated and at this time when credit accommodation is being discouraged it will be a good thing for the merchant to turn such stocks into cash as quickly as possible.

It has been found to be good policy to check up the store by sections. This not only facilitates the work by dividing it into smaller units but the records taken in this way will make easier any subsequent reference because of fire, burglary, etc.

The work of posting ledgers and taking balances should all be cleaned up in the office and an accurate record taken of cash on hand and in bank. As soon as the data of the wholesale and retail ledgers is ascertained the work of making extensions of the stock can be done. The aim is, of course, that every article be priced at the amount it cost at time of purchase, or if it has declined, to price it at replacement cost.

Where it is necessary to make an estimate of stock on hand the estimate should always be conservative. If there are damaged goods they should be recorded at somewhere near their real value.

Clean Out Shelf Warmers

Merchandising experts argue that there is a certain time limit within which all goods should be sold through the retail hardware trade. If the goods remain on the shelves longer than that length of time they are bearing a portion of overhead costs which new goods should be bearing. Hence the reason for getting actively behind any line of goods which threatened to become a shelf warmer. These facts influence the value of stock on hand. Thus if you have goods enough to cover normal sales for five months ahead, that stock should be taken in at not more than 80 per cent. of its replacement value. Such facing of plain facts indicates the disadvantage of overbuying and is but one of the important points which an accurate inventory will show.

A Plan for Reducing Book Accounts

THE sending out of monthly statements of accounts is a plan advocated by one hardware merchant who was much troubled with long standing accounts. There are few merchants who do not see the value of cutting out a large portion of their book accounts and the plan followed by this store will be helpful to others.

At the end of each month this firm sends an itemized statement of account to every customer who has bought goods during the preceding thirty days. For the purpose a loose-leaf ledger is used. A white and a buff-colored page are given each account. Every morning the charge sales of the previous day are posted to the accounts, a carbon sheet being used to post both sheets at once. The buff sheets are perforated along the margin and at the end of each month these sheets are torn out, folded and addressed (full name and address is on each sheet). It takes this firm but an hour or two on the last day of each month to send all the statements out in this way.

When the plan was first started this firm sent out printed slips stating that the sheet was sent for the purpose of verification. To any customers who complained that the plan seemed to question their veracity it was explained that the firm would not have trusted them in the first place if such was the intention. It was then explained that the idea of the plan was merely to keep the books straight. This merchant is very enthusiastic over the plan and thinks it is one which would be adopted to advantage by many other hardware merchants, particularly at this time.

How Merchants Have Improved Collections

A Toronto Hardware Merchant Put in a Bookkeeper and in Six Months Paid Off Mortgage Held as Security by the Wholesale—Another Puts Drafts in Bank and Increases Collection Allowance as an Incentive.

"DO NOT seek further credit accommodation from your bank, but seek the co-operation of the bank in collecting accounts receivable." Such is the advice to the hardware trade from the credit manager of one Toronto wholesale hardware firm, in view of the recent increase in the tendency to overlook collection of book accounts with the consequent tightening of available funds and the inability of the merchant to take his cash discounts or to meet his obligations when due.

In this connection the suggestion is made that merchants take their books to their banker and check over the list of accounts and get the benefit of the banker's knowledge of the various accounts. A decision can then be arrived at as to the best means of collection. An opportunity should be had of stating the true facts of the case to the negligent customer and if he then fails to make even a partial adjustment the plan has been followed with good success of placing a draft in the bank covering the amount in arrears. Some dealers have followed the plan of offering the banker ½ per cent. on such collections in place of the usual ¼ per cent., as an added incentive to arrange settlement.

Speeds Up Action

In connection with this plan it is thought that the customer is more likely to take action on the matter when in the hands of the bank than on reminders from the merchant. Another point emphasized was that seeking the co-operation of the banker in this manner would tend to strengthen the bonds of interest between merchant and banker with the resultant increasing of good faith between them, an advantage to both concerned. Such action is advised firstly in connection with long standing accounts. The plan of offering a discount for cash is being followed by dealers in some communities, but it is not thought to be necessary or advisable except perhaps in some isolated cases.

The volume of hardware business is said to be well maintained, and the only apparent difficulty seems to be in connection with the settlement of accounts, so that the dealer will be enabled to carry sufficient size and range of stock to maintain business, and so that he may be enabled to take advantage of cash discounts.

More Pronounced in City

The condition outlined is confirmed by the credit manager of another wholesale hardware firm, who advises that it is more pronounced in the city than in the rural districts. This is taken to be significant in view of the fact that city dealers have possibly more facilities for the collection of such accounts.

This official suggests that dealers will find it profitable to devote more attention to the accounting end of their business at the present time. He cites the case of one Toronto dealer whose trade included plumbing, tinsmithing and other such departments and required more attention than could be given by the proprietor. His wife was called upon to look after the store trade, the accounts were neglected and the wholesale firm found it necessary to hold two mortgages on the store property as security. This dealer was advised that he was doing too much and not paying sufficient attention to the business details.

Installs a Bookkeeper

About six months ago this advice was acted upon and a girl bookkeeper was installed at a nominal salary. Since that time this business has been put upon a much sounder basis than before. Not only have the merchants' accounts been met readily, allowing him to take advantage of cash discounts, but he has made sufficient to allow him to pay off one of the mortgages against his property. This case demonstrates the advantages of systematic handling of accounts.

Under present conditions when it is more difficult than usual to collect accounts, and when the dealer must keep his business in as liquid a condition as possible the suggestion is made that many dealers could profitably install a bookkeeper at a moderate salary to make collections. Customers will soon come to appreciate the fact that they are dealing with a modern business institution and the result will be what the dealer needs to help him safely over the period of readjustment.

Wholesale Hardware Assn. Members Discuss Business and Price Outlook

MONTREAL.—Col. Robert Starke, president of the Canadian Wholesale Hardware Association, gave a banquet to a number of the members, including some of their friendly associates, at the St. James Club, Montreal, Que. The meeting was quite informal and was to discuss the business and price outlook for 1921. Opinions were exchanged quite freely, and in a manner that made the meeting a success.

Very interesting and instructive talks were given by visitors, and the consensus of opinion was that it was not to be expected that there would be big business in the first months of the year, but that later business would be satisfactory. In so far as the banks were concerned, it was felt that they would stand behind the legitimate merchant who has not been speculating.

No Return of Prices to Pre-War Levels

It was almost unanimously felt that prices would not go back to pre-war levels, and that while there would be readjustments from time to time, there would not be any sudden slumps in prices, but rather a gradual downward trend to a firm basis. There will be some lines of merchandise, it was stated, that will not see any change in price for a long time to come, such as tinware, enamelware, boilers, etc., and that any changes when they do come will be gradual.

Among those present were Col. Robert Starke, Starke-Seybold, Ltd.; J. C. Seybold, Starke-Seybold, Ltd.; H. B. Seybold, Starke-Seybold, Ltd.; George Caverhill, Caverhill Learmont Co., Ltd.; Thos. Birkett, Thos. Birkett & Co.; Mr. Prudholme, Prudholme & Fils; Jos. Dowling, Caverhill Learmont Co., Ltd.; Ross McMaster, G. M. Steel Co. of Canada; Mr. Henwood, Bank of Toronto; Mr. Waldie, Colonial Iron & Steel Co.; B. Peck, Peck Rolling Mills; Geo. Davis, Frothingham & Workman, Ltd.; Edward Goodwill, Thos. Davidson Mfg. Co., Ltd.

The Steel Corporation's Proportion

The percentage of the total steel ingot production of the U. S. that was made by the United States Steel Corporation has been as follows in the years named:

1902..67.0%	1914..51.8%	1917..46.6%
1912..55.9	1915..52.4	1918..45.4
1913..55.0	1916..50.5	1919..51.1

The percentages here given do not agree with certain percentages that have been published, because the other percentages compare the Steel Corporation's output of ingots with the country's total of steel castings and ingots, obviously an incorrect comparison because the Steel Corporation is not a factor in steel castings.

As to the Steel Corporation's proportion of the total capacity, a safe figure to take for a basis of comparison is the proportion of production shown for 1918, 45.4 per cent.

Aftermath of Luxury Taxes

No Refund of Licenses Fee or for Extra Perforators—No Refund of Tax on Articles Returned After December 20th

A NUMBER of interesting points have arisen following the elimination of the luxury taxes on lines sold in the hardware trade and some information of value to merchants is outlined herewith as a result of an interview by Hardware and Metal with the Collector of Inland Revenue at Toronto.

The stamp perforators which have been loaned to holders of retailers' licenses are to be withdrawn by local collectors and retained pending receipt of further instructions. Perforators which were purchased by holders of retailers' licenses are not returnable nor is the purchase price subject to refund.

Discontinue Issuing Retailers' Licenses

The issuance of retailers' licenses will be discontinued, as will the issuance of manufacturers' licenses to manufacturers of articles upon which the tax has been remitted. Fees for such licenses obtained before the 20th of December are not subject to refund.

Regarding the redeeming of stamps used for the luxury taxes, the regulation states, "Unused and uncancelled stamps in the hands of dealers on the 20th inst. (December) are refundable at their face value; application for refund shall be submitted through the Collectors of Inland Revenue in the regular manner and shall be accompanied by the unused stamps, with statement showing the number of each denomination of stamps, also the total value represented thereby."

Stamps Cancelled But Not Used

The question of redeeming stamps already cancelled but not used, such as in the case of large stores which had a limited number of cancelling machines and which cancelled a number of stamps in advance and supplied them to various departments in the store, was brought to the attention of the Collector. He replied that this plan was only followed in a limited number of cases and special permission was secured in those cases to follow the plan outlined. Where such permission was given the stamps though cancelled will be redeemed, though claim for refund should be made separately from that made for uncancelled stamps.

No Refund on Goods Returned After December 20th

Regarding the refund of luxury tax on goods returned to the vendor, a regulation provides that "the luxury tax paid upon articles which are returned to the vendor on or after the 20th of December is not subject to refund."

Dealing with the claim of automobile dealers for the refund of luxury tax already paid on automobiles in stock it was pointed out by officials of the Inland Revenue Department that while it would be establishing a dangerous precedent to allow refund of such taxes yet the representations carried a good deal of weight, and as it was a very important financial consideration to many dealers, the tax making an average increase of about $150 in the price of an automobile, special consideration would likely be given their case at the special hearing this week.

A point which should be watched carefully by hardware merchants is the practice of allowing a discount of the amount of the luxury tax from the present price plus tax on an article. It is evident that the merchant following this plan will be losing money. If an article costs $15 plus ten per cent. tax, total $16.50, and the retailer marks the price down the same percentage it will bring the price to $14.85 or 15 cents less than he would originally charge without the tax.

Effective Displaying of Cutlery

Some Ideas in Window Display of Knives, Razors, etc., as Adopted by London Hardware Merchants

TWO very effective, yet strikingly different ways of displaying pocket knives are to be seen in the windows of London hardware stores.

Right in the centre of the display in one of the windows of the Purdom Hardware Co. is a little glass stand which looks very much like the bottom part of a tumbler. Fastened to the top of it is a ball of cork about three inches in diameter. Into this ball are stuck about fifty pocket knives of all sorts and sizes with the open blades flashing. The whole display is right under the eyes of prospective buyers. It is striking, attractive and extremely simple.

Another very simple little display arrangement in the same window is used to show razor strops and razors to advantage. Right in the two front corners screw eyes have been placed about eighteen inches apart in the wood work. Into these have been inserted heavy gauge brass wires about fourteen inches long. These wires resemble very much the nickelled racks found on many stoves used for drying towels and other things. They are of course much lighter and may be taken out in a couple of seconds. From the six wires in the Purdom window are suspended razor strops and razors, the latter being hung by simply bending the blades back. Both the razors and the strops make a fine showing and they are close to the prospective customer's eyes.

Another simple and attractive method of displaying pocket cutlery is used by the Cowan Hardware Co. From wires suspended from the ceiling of the window a board about eight feet long and four inches wide is hung. The board is covered neatly with black cloth and every half inch or so knives are placed. They are all open and are fastened to the board. They make a very fine showing and stand out strikingly.

Exports of Canadian Hardware to the United Kingdom

Following figures show comparative value of exports of Canadian hardware to the United Kingdom in 1918 and 1919, figures for which have just been completed:

	1918	1919
Tubes, pipes, fittings of iron and steel, wrought	£ 3,968	£ 77,195
Cast iron and steel pipes	.....	6,114
Wire—including uninsulated electric wire	76,844	151,517
Wire rods	42,062	230,871
Wire nails	429,257	493,564
Copper, unwrought	.....	171,685
Metal, unwrought, unenumerated	1,794,546	652,133
Cutlery	17,268	364,346
Hollowware, wrought, enameled	.....	63,247
Painters' colors and pigments—nickel oxide	84,855	30,656
White lead	.....	56,628
Colors and pigments, unenumerated	84,412	119,156
Auto accessories	15,755	429,690
Ammunition—shot and shell	35,663,558	5,811,363
Brooms and brushes	.....	17,615
Cordage and binder twine	.....	37,055
Lamps and lanterns	3,574	19,871
Toys	1,314	26,838

Advertising Suggestions for January

SLEIGHS FOR BOYS AND GIRLS

Now is the time to buy a SLEIGH, when our Big Assortment gives you a Good Choice.

These Sleighs are made with Steel Runners, and highly Painted and Varnished on Hardwood. This style is made in Five Sizes—each size is different in some respects.

Prices 70c, 90c, $1.00, $1.85, $3.85

BOB SLEIGHS

Say, boys, how about a Pair of Bobs? Made of Best Quality Hardwood Sleighs, hand rail on both sides, and the whole set painted Red. Price $10.00

STEERING SLEIGHS

Just the right Sleigh for a Boy or Girl—may be steered by feet. Very strongly made; made in Six Sizes—one for the Little Ones as well as the Bigger Ones.

Prices $1.50, $1.65, $1.95, $2.25, $2.75, $4.25

Peterboro Hardware Co. Ltd.

Winter Sports

BOYS! Have you bought your skates and sleigh yet? Have you got a new hockey stick & a puck?

Just as soon as the ice will bear you want to be ready for a skate. Come in and see us we have everything you need for winter sports.

Boys' Sleighs of All Kinds

Boy's Coasters with round spring shoes.

28x10 in.	30x10 in.	36x11 in.	42x11 in.
$1.00	$1.75	$2.35	$2.50

Flexible Flyers 32x12 in. $3.25 37x12 in. $4.00

STANN SKATES

Only the celebrated Stann skates used by professional skaters sold here. Acme Clamp Skates $2 per pair. Boys Hockey Club $2.00 per pair.

"ACADIA"

It's light weight and graceful outline make it a popular ladies Skate

Nickel Plated $2.50

E. Fletcher & Co.

Quality Hardware

Winter sporting goods are featured in these suggestions. Sleighs for boys and girls, with suitable illustrations are shown in the ad. by Peterboro Hardware Co., Ltd., Peterboro, Ont. Hockey sticks, pucks, etc., are added in the ad. by Nellis Hardware Co., Vermilion, Alta. Skates are illustrated in the ad. by E. Fletcher & Co., Humboldt, Sask. Snowshoes, skiis, bobsleighs, skating goods, etc., can also be mentioned in such ads.

Annual Sale of Ranges and Heaters in Progress

Every Stove Wears a Tag

Look for them, these bright red cards showing the regular and SALE pricing in large figures.

Every stove on sale. Every price a bargain. Big plain price figures.

Stove Display Upstairs

Apart from the windows, no stoves are displayed downstairs. Walk right through the store. The second floor is our stove display room.

The largest and best assorted stock of stoves in Saskatchewan on sale.

THE FAMOUS "KOOTENAY"

Red Tag Price

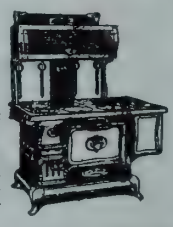
$126

An easy lifter in the world of splendid ranges. The body, flues and oven are built of ARMCO iron, 99% pure, offering greatest resistance to rust and gases. Full steel top, six 9-inch holes, large oven. High closet and copper reservoir included.

THE KOOTENAY LASTS A LIFETIME

Part of the policy of the SASKATOON HARDWARE CO. LTD. is never to carry over seasonable goods if price reductions will sell them. Each year we hold a clearance sale of stoves and heaters. This year it is a good month earlier, due to backward conditions.

This is not a PANIC sale. Lower prices will undoubtedly come sooner or later, but the sale markings on these stoves are less than replacement prices.



Stoves and ranges are SAFE BUYING at our sale markings. You can get no better quality at considerably higher cost in this province. All stoves on sale until cleared out. Mail orders filled in rotation with the privilege of returning money if stove required is sold out.

Stove and Range Sale Starts Tuesday Morning 9 A.M.

McCLARY'S "GARRY" RANGE

Red Tag Price

$99

A popular range built to supply the demand for an all steel range, combining the latest and best features, and selling at a moderate price. The GARRY is an excellent cooker, has 20-inch oven Steel throughout, 6-hole size. Duplex grates for coal or wood, copper reservoir and high closet.

Garry Range—The same range exactly, but without the reservoir. Only $85.50

McClary's Regina Range

Designed to meet the demand for a lighter range at a moderate price. Blue polished steel throughout, trimmed with plain nickel facings. Large oven roller grates. Extended and high closet. Red Tag Price $84.25

See the Home Triumph

For the average home there is no better range made. Light, moderately priced, handsome appearance, easily kept clean. Steel throughout, 6 holes, large oven, roller grates no reservoir, with high closet. Red Tag Price $85

AIR TIGHT HEATERS

A heater for the bachelor or small cottage. Heat any place thoroughly in a few minutes. Sheet steel body, airtight dampers, nicely finished

No. 1	No. 2	No. 3
15 inches high. Red Tag Price	18 inches high Red Tag Price	21 inches high Red Tag Price
$3.00	$3.50	$4.00

COMPARE OUR PRICES

Oak Heaters

A big showing of the favorite heater in this western country. The Oak heater is beautifully made ornamental, nickel trimmed steel body mica panes in fire door.

No. 19 CANADIAN OAK is 43 inches high 17 inches wide with 8 pieces of mica in the door. Red Tag Price only $26

FITZ HOT STORM—This is a big efficient heater in a more substantial style, than the ordinary Oak. Suitable for large rooms. Red Tag Price $49

TORTOISE—A large size heater store, after the style of the Quebec, in that it is fire brick lined. Red Tag Price $25

EBONY OAK—A great little oak style heater, plain design. A durable economical stove. Red Tag Price $11

Only Two Left

FIRECO REG.

Note the Price Tickets

Here is a range that will hold fire for 24 hours. It is made purposely to economise on fuel. Where the ordinary range uses two pails of coal the FIRECO does more cooking and throws more heat on one.

Highest grade steel throughout. Positively air-proof unless you open the drafts. There is no other range just like a FIRECO.

Just two left in stock. Ask to see them. Red Tag Clearance Price

$135

SASKATOON HARDWARE

EST. 1903 PHONE 3128

THE RED FRONT HARDWARE STORE

Second Avenue. Next Western Hotel

"SAVE IT'S COST"

Quebec Heaters

A heater stove that is lined with highest grade fire brick that is air-tight unless the dampers are open will certainly throw more heat on less coal. Handsomely designed stoves. Rolled steel body. Nickeled drafts.

No. 12 flat grate 12 inches high with extra deep fire pot. Red Tag Price $13.50

No. 14—This is a type of Quebec without grates. The best for soft coal burning. Red Tag Price $12.00

No. 13, slightly smaller, for little rooms. No grates. Red Tag Price $10.00

No. 15 60—A Quebec with the roller draw centre grate. Large size. Red Tag Price $20.00

A HANDSOME RANGE

Household Queen

This is a fully steel range selling at a low price, polished top, 6 hole size, large oven, large copper reservoir, high closet. Very plain nickel trimmings, easily kept bright and clean. Red Tag Price $95

FOR SMALL FAMILIES

Transcon Range

The range that will suit the small family who do not need the larger sizes 4 nine-inch holes, otherwise exactly the same as any of our other ranges with high closet, no reservoir. Red Tag Price $84

A Range and Heater Combined

With fuel so high in price the COMPOSITE RANGE-HEATER will fill the bill for the small family. It is like a Quebec heater with a small range on top. 4 holes, perfect cooking and baking. Heats and cooks on the one fuel. Takes little room in a kitchen. Ask to see it. Priced $69.00

An annual sale of ranges and heaters is outlined in this stove ad. by Saskatoon Hardware Co., Ltd., Saskatoon, Sask. A great many lines of stoves, ranges and heaters are illustrated, and each is plainly price marked. The plan of numbering various styles of stoves in the descriptive matter in the ad. is followed, the corresponding number being placed on the stove on display so the customer will have no trouble linking up the ad. with the stove.

Display Suggestions for January

The mid-winter season is the one in which electric lighting fixtures are used the most. Table lamps, ceiling and wall fixtures should be shown illuminated. Percolators, toasters, grills and other appliances are very handy in preparing hot lunches during the cold weather and their respective uses can be shown effectively.

Stoves and ranges along with certain articles of kitchen utensils are good lines to emphasize during the winter months, for it is then that the question of replacing su h lines is uppermost. Stoves can be shown to good advantage in the windows each plainly price marked.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations.

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, JANUARY 1, 1921

DESPITE exchange rates and other handicaps, Canadian firms are active in developing export connections. Our exports to Britain have increased $23,000,000 and to foreign countries $77,000,000 over last year. Some administrative body to make financial arrangements with foreign countries in the interests of Canadian exporters is urgently needed.

* * *

AN indication that the buying power of the public for hardware lines has not materially lessened is found in the fact that many hardware merchants report the biggest Christmas trade in their history last week, despite the fact that in many sections severe weather made Christmas shopping a last minute rush.

* * *

THE downward sweep of values since midsummer has carried prices of various fibres down from a relatively strong position to price basis lower than for from four to six years, some prices being back to that ruling on July 1, 1914. A review of the past year in the fibre industry, as given elsewhere in this issue, makes interesting reading.

The Past Year

SURVEYING developments in the Candian hardware trade during the year just closed it is evident that for the most part merchants in this line of business have made a very creditable showing in the face of difficulties which have beset business in general as result of readjustment conditions. Hardware prices were not subject to artificial inflation to any great extent owing to the fact that it is a necessary line as compared with luxuries, and the urgency of price reduction now is therefore not so great. Confirmation of the firmness which has characterized most hardware lines throughout 1920 is found in the fact that of sixty-six basic lines, taking 100 as an index figure representing the price of the article in January, 1920, the present average value is equivalent to a figure of 111. Taking the year as a whole it is therefore evident that despite the period of price reducing, average hardware values are 11 per cent. higher at the end of 1920 than at the beginning. Of course declines are becoming more general but they are very gradual and it is not expected they will, therefore, cause any chaos in trade.

Hardware stocks are generally smaller now than earlier in the year and a hand to mouth buying policy will probably be continued until buyers decide that values have reached what will be considered as a normal level. Collections were good up until the last few weeks in the year when an increasing tendency to ask for credit accommodation was noted. Close attention to accounting methods and collection of accounts has been strongly advocated to offset any serious effects from this condition. Summarizing the situation it is therefore evident that the hardware trade is very favorably situated and in good position to plan for bigger business in 1921.

The Outlook

CONFIDENCE that Canadian business is fundamentally sound, and optimism that 1921 will see trade put upon a sounder basis with larger volume of business, is the keynote of the opinions of manufacturers and wholesalers as expressed to Hardware and Metal and reprinted in this issue. It is held by one authority that best results will be achieved in the forthcoming year by dealers passing on to their customers any saving that can be effected in buying, in the interests of a bigger volume of trade. In some lines it is held that present prices justify merchants laying in supplies for spring use. Such action combined with a plan of buying reasonably and selling reasonably would, it is thought, solve much of the present difficulty.

Failure to realize when the top and bottom points have been reached is no doubt a big influence in continuing the so-called "buyers' strike" in the face of drastic price reduction. It is largely a question of where the adjustment should begin. There are some who do not think it good policy to reduce wages until the cost of living declines, but it is doubtful if this plan would bring a reduction in cost of living for wages represent a very large part of present prices on practically all commodities.

Revival of business in good volume in the spring is expected by a number of manufacturers, the opinion being that by then, if not before, buyers will find that the prevailing price levels justify laying in stock in anticipation of greater buying activity as the new year develops.

Aftermath of the Luxury Tax

WHILE the hardware trade has been elated to see the removal of the burdensome luxury taxes and are little disposed to find fault on this score, yet it is nevertheless a fact that the unsatisfactory handling of this measure which has been evident since it was introduced is still to be seen in the closing-up stages of this piece of legislation. Retailers' license fees are not to be refunded though the work of registration has just been completed and the licenses were to be good until the end of the fiscal year. No further use is evident for the perforators purchased and distributed to retailers in all parts of the country and no refund will be given for extra perforators purchased in large stores where more than one machine was necessary. Refund will be allowed only for uncancelled luxury stamps except in the case of stores given special permission to cancel a certain number of stamps prior to use, such permission being granted where an insufficient number of machines were in use.

The automobile dealers are pressing for a refund of luxury tax and they undoubtedly have a good claim, as they would stand to lose an average of $150 per car now in stock. It is a question, however, if the granting of a refund would not establish a precedent which the Government would have difficulty in breaking away from in the event, for instance, of a change in tariff or any other form of customs or excise tax.

Though the luxury tax is gone this iniquitous measure will not soon be forgotten.

Completing Plans for Hardware Convention

Executive Committee of Ontario Retail Hardware Association Meets in Hamilton to Complete Plans for Program and Exhibition —Seventy Concessions for Exhibits

THE Executive Committee of the Ontario Retail Hardware Association met in Hamilton, Ont., this week and completed arrangements for the exhibition to be held in the Armories on James Street, North, in connection with the annual convention to be held from February 14 to 17 inclusive. From the plan it is evident that there are about seventy concessions to be sold to exhibitors. These concessions vary in size but for the most part are 10x12 ft. or 10x15 ft. Secretary Macpherson states that from present indications the exhibition will be the best and most interesting in the history of the association.

HOLD ALL MEETINGS AT ARMORIES

At the meeting of the executive committee in Hamilton the plans made by the Hamilton members, following instructions given at the last regular meeting, were confirmed. The course decided upon was to hold all meetings in the convention hall of the armories where the committee rooms and exhibit hall allow all departments to be concentrated. No meetings will be held at the Royal Connaught Hotel.

Plans have been made for decorating the armories and an orchestra has been secured to render music during the afternoon.

Twice as many booths for exhibits are available this year as compared with last convention; they are larger, more uniform and all on one floor.

"Prospects are splendid for a good convention, we took up all the complaints of previous years and endeavored to make our plans so that they would be rectified," said George May, Vice-President of the Association, to Hardware and Metal. Concentrating all points of interest under one roof is expected to make the convention more effective.

Talk on Co-Operative Buying

Mr.. Hargreaves, of the Drug Trading Company, has consented to give a talk on co-operative buying and a number of prominent trade representatives have been secured to address the convention on various topics of interest to the hardware merchant.

Permanent Secretary

The question of appointing a permanent secretary for the association has received a good deal of attention recently at the hands of members and this will be one of the most important topics to be considered at the convention. The actual decision to appoint Secretary Macpherson as permanent secretary has been made but definite action has been held up pending a satisfactory disposition of Mr. Macpherson's hardware business in Prescott, Ont. President Wanless of the association will address the convention on the work of the secretary as a permanent official.

Important Merchandising Problems

The fullest opportunity is to be given for a free discussion of all trade questions. With the removal of the luxury taxes on hardware lines, one large source of contention which would have received much attention at the convention has been removed. There are many other important matters before the hardware trade at the present moment having to do with merchandising conditions in the period of readjustment and an open discussion of these points will no doubt prove a big help to all concerned.

Manufacturers and Wholesalers to Speak

Much valuable information is always given by representatives of manufacturers and wholesalers who address the convention and this will be an important feature at this year's convention. The "Iron and Steel Market," "Wholesale Trade," "The Retail Trade," "Paints and Oil," "Save the Surface," will be some of the subjects dealt with in this way.

Some of the other topics of interest to hardware merchants at the present time, and which will be dealt with by authorities on the various subjects include: Mutual fire insurance as adopted by retail merchants in other parts of the country; local retail advertising; chain stores; co-operative stores, etc.

Educational work through the medium of the moving picture will also be a feature of the program this year. This will apply to the manufacture of rope and binder twine and other industrial activities.

SYNOPSIS OF PROGRAM FOR 16TH ANNUAL CONVENTION OF ONTARIO RETAIL HARDWARE ASSOCIATION IN HAMILTON, ONT., FEB. 14-17

Association Headquarters—Royal Connaught Hotel

Exhibition Headquarters—Armories Bldg., James St. North

Monday, February 14th

2.30 p.m. Meeting of Executive—Royal Connaught Hotel.
4.00 p.m. Registration and enrolment of members.
7.30 p.m. Open session—Reception and smoker. Moving picture "Industrial."

Tuesday, February 15th

9.00 a.m. Opening of business sessions.
9.30 a.m. Greetings from mayor, wholesalers and manufacturers.
10.00 a.m. Addresses of president, secretary, treasurer, auditor's report, receipt and disposal of officers' reports, appointment of resolutions and convention committees.
1.30 p.m. to 6 p.m. Inspection of exhibits in Armories building.
7.30 p.m. Executive committee report on permanent secretaryship. Address by President Wanless, "A conception of the duties and scope of an association secretary." "What the secretary owes to the members and what members owe to the secretary," by Secretary Macpherson.
8.00 p.m. Notice of motion from 1920 convention. Full discussion and disposal of reports of executive committee. Nomination of officers.
8.30 p.m. "A game of cards." Every card will be headed, "What I want to know about the hardware business." All questions will be answered first by the members and then by the chairman or secretary.

Wednesday, February 16th

9.00 a.m. Report of convention committees.
9.30 a.m. Business prospects for 1921 by representative speakers.
11.00 a.m. Address by representatives of "Save the Surface" campaign committee.
11.30 a.m. Address on mutual fire insurance as carried by retail associations.
1.30 p.m. to 6 p.m. Visit exhibits in armories. Special attractions and music.

11.00 a.m. Exhibition hour. Short addresses by exhibitors on selling goods.
12.00 a.m. Entertainment.
1.30 p.m. to 6 p.m. Visit exhibits in armories.
7.30 p.m. A talk on advertising.
8.00 p.m. Question box. Answers to card questions.
9.00 p.m. Moving picture. "A film story on rope and binder twine manufacture." Smoker.

News of Western Canada

Interesting Programme for Sales Convention of J. H. Ashdown Hardware Co.

WINNIPEG, MAN.—The week of January 3 will be a busy one for the sales staff of the J. H. Ashdown Hardware Company, Ltd., it being the occasion of the "Diamond A Sales Convention for 1921." An interesting and instructive program has been arranged starting at 9 a.m. on Monday morning with a "get together" in Hall No. 3 North West Commercial Travellers Building, C. H. S. Bamford, sales manager, in charge. An address entitled "The Manufacture of Steel and Iron" will be given at this session by A. J. Wood, Western Manager Steel Company of Canada, to be followed by F. J. C. Cox, secretary of the North West Commercial Travellers' Association, on the subject "Some Commercial Traveller's Problems."

Opening the afternoon session R. A. Essex will speak on "Buckeye Incubators," the product of the firm he represents. At 2.30 p.m., H. F. Moulden will speak on "Wizard Washing Machines," to be followed by a demonstration of Weaver Garage Equipment by P. A. C. McIntyre.

Tuesday

Opening the Tuesday morning session there will be a film story of Plymouth rope and binder twine at the National Theatre. W. G. McMahon, of the Plymouth Cordage Co., in charge. A film story of Solex Lamps will be shown at 11 a.m., W. G. Draper representing the company. T. H. Van Horn, sales manager, Harvey Spring & Forging Co., Racine, Wis., will open the afternoon session with an address on "Harvey boltless springs," following which R. Allen, of the Oneida Community Ltd., will speak on "Oneida Community products." At 3.30 p.m. a demonstration of "Florence Oil Stoves" will be given and a demonstration by a special factory representative at McClary's warehouse. Addresses will be given by Messrs. Clarke and Kennedy.

Wednesday

The Wednesday session will be opened by C. A. Dana Redmond, advertising manager of the Boston Varnish Company, speaking on "Kyanize Products." He will be followed by W. H. Cunningham, Kasement Dore Co., who will deal with Kasement Skrene Dores. In the afternoon T. F. Shurly, of T. F. Shurly Co., Ltd., St. Catharines, Ont., will speak on "X Saws" followed by an address on "Burgess Batteries," by C. F. Burgess Laboratories, Madison, Wis. At 4 p.m. the subject of "Hoyt Electrical Instruments" will be dealt with by a special representative of the Burton Rogers Co., Boston, Mass.

Thursday

Thursday session will be opened by C. L. McMullen, general sales manager of Fuller & Johnston Co., Madison, Wis., speaking on "Fuller & Johnston Gasoline Engines," to be followed by A. B. Maurer, of Taylor Instrument Co., Rochester, N. Y., speaking on "Thermometers." The afternoon session on Thursday will be opened by Mr. Daly, of K. & S. Tire and Rubber Goods, Ltd., Toronto, speaking on "K. & S. Tires and Tubes," to be followed by Messrs. Rhame and John Carlind, of the Lunkenheimer Company, Cincinnati, Ohio, speaking on "Lukenheimer Valves."

Friday

"Enterprise" ranges, stoves and heaters will be dealt with by D. S. Fisher, of the Enterprise Foundry Company at the Friday morning session, a film being shown at the National Theatre. The afternoon session will be opened with addresses on "Diamond A paint," by Mr. Black, general manager, Mr. De Merrall, western manager, Mr. Webb, sales manager Martin Senour Company. At 3.30 p.m. "Champion Blowers and Forges" will be the subject, dealt with by Mr. Hertzler, to be followed by R. H. Conley, speaking on "Remington U.M.C. and Automobile Lines."

Saturday

The convention will be addressed on Saturday morning as follows:—9 a.m., Mr. Hutchison; 10 a.m., Mr. A. E. Dykes; 11 a.m., Mr. McIntyre; 1.30 p.m., Mr. Maitland.

Thos. Pearson Elected to B. C. Legislature

VANCOUVER, B.C.—Thos. Pearson, manager of R. C. Jamieson & Co., Ltd., British Columbia branch, was elected a member of the British Columbia Legislature at the recent elections held in December. Mr. Pearson has been connected with R. C. Jamieson & Co. for over 38 years, starting in September, 1882, filling positions of shipper, superintendent, travelling salesman and branch manager. He has been a member of the Point Grey, B.C., Council for four years and is Reeve for 1920 of the municipality having a population of between 15,000 and 20,000.

TO KEEP WINDOWS FROM FROSTING

Dealing further with this subject and supplementing the information in a previous issue of Hardware and Metal, the following letter tells of the plan adopted in the retail stores in Winnipeg and Calgary of the J. H. Ashdown Hardware Co.:—

Hardware and Metal,
143-153 University Avenue,
Toronto, Ont.

Gentlemen:—

Replying to yours of the 26th. Our windows, both in Winnipeg and Calgary, are closed in completely top, bottom and back. There are air vents at the bottom and top of the glass, which allow the outside air to circulate through the window. This keeps our window "rooms" as cold as the weather outside and therefore the glass does not frost over. On very cold days, when the door leading to the windows is open for changing display and the warm air from the store gets in, the windows frost over, but this quickly disappears when the work is completed and the windows are closed up again.

Considering the wonderful selling value of a window display, we think it money well spent in building the windows with good backgrounds, to enable their use the year round.

Yours truly,
The J. H. Ashdown Hardware Co., Ltd.

Now a Member of British Columbia Legislature

Vancouver, B.C. (Special).—Jas. Ramsay, of Vancouver, was recently elected to the British Columbia Legislature. Mr.

JAMES RAMSAY

Ramsay, as president of Ramsay Bros. & Co., Ltd., has been seventeen years in public life in Vancouver and has filled the various positions of school trustee, alderman, president of the Board of Trade, vice-president of the B.C. Branch C.M.A., and a number of other offices in civic and philanthropic organizations. Mr. Ramsay is on the aldermanic board in Vancouver this year, holding the chairmanship of the finance committee. Many matters dealing with retail interests have come up and Mr. Ramsay has shown a sympathy and knowledge of retailing problems that so often are lacking in public officials.

With his recent election to the B.C. House, Mr. Ramsay has maintained his unique record of never being defeated. He is Liberal in politics, Conservative in policies, Presbyterian in religion.

Western Man Promoted

T. Gibson Hall, Saskatoon, Sask., has been promoted to the position of sales manager for McCaskey Systems, Limited, Galt, Ont., manufacturers of credit register systems and counter check books. Mr. Hall has been acting as traveller in Saskatchewan for the past two years and takes his new position January 1, at the head office, Galt, Ont.

Western Notes

Penticton, B.C.—W. M. Ross has opened a hardware business.

Taber, Alberta.—The Sheills Hardware Limited has been incroporated.

Maclean, Alberta.—The Cunningham Hardware have succeeded the Cunningham-McLarty Hardware Co.

Kandahar, Sask.—Caskey & MacDonnell have succeeded R. E. Beaton, Stenen, Sask., in the hardware business.

Calgary, Alberta.—The stock of the Marshall Bevers Hardware, Ltd., at the Noble Hotel Building store, has been removed to 1205 First Street West.

Winnipeg.—A. F. McDermid, of Wood Vallance, Ltd. staff, accompanied by Mrs. McDermid, will spend their Christmas holidays in the East.

Winnipeg. — F. J. Scott, of Wood Vallance, Ltd. staff, underwent a slight operation but has completely recovered and is around again.

Winnipeg.—F. W. McGuire, sales manager for Wood, Vallance, Limited, is the proud father of a new baby girl. He is busy receiving the congratulations of all the travelling salesmen and staff.

Winnipeg.—The following travelling salesmen of Wood, Vallance, Ltd., have returned to their homes after enjoying one of the most successful conventions in the history of the firm: M. P. Barnes, Moose Jaw; A. T. Redmond, Saskatoon; W. Dawson, Edmonton; H. H. Hughes, Saskatoon.

Imperial Varnish and Color Co., Link Up With Miller-Morse Co.

The Imperial Varnish and Color Co., Limited, Toronto, have linked up with Miller Morse Hardware Co., Ltd, Winnipeg, Man., for distribution of all their products in the Prairie Provinces and from Port Arthur West in Ontario. It is the intention of the Miller Morse Hardware Co. to lay special emphasis on the distribution of Floglaze throughout this territory. They will carry a complete stock of the more important lines at the outset.

WINNIPEG PAINT & GLASS CO. SALES STAFF CONVENTION

Members of the sales staff of the Winnipeg Paint & Glass Co., Ltd., Winnipeg, Man., who attended the 11th annual convention in Winnipeg as outlined in last week's issue of Hardware and Metal. Front row sitting (left to right)—E. J. Gregory, B. Woolley, B. Marley, E. Shav e,H. B. Dale, sales manager, Winnipeg Paint & Varnish Co.; R. T. Anderson, manager Saskatoon branch; J. H. Clark, M. B. Sainsbury, J. R. Norwell. Second row sitting (left to right)—R. A. Patterson, W. H. Teskey, A. J. Stroud, E. L. Sauder, managing director; J. S. McDiarmid, A. J. Webb, Martin-Senour, Winnipeg, manager; W. R. Brockie, Edmonton manager; W. H. Smith, C. Brown. Third row standing (left to right)—H. C. Hutchcriff, Calgary manager; W. R. Pottruff, E. Jarman, R. T. Mitchell, F. Dry, A. E. Hay, Canadian sales manager Pratt & Lambert; J. W. Crooks, R. E. Pinkerton, Swift Current manager; R. A. Falconer, H. J. Loney, Chas. Whetham, J. R. Ellis. Back row standing (left to right)—C. S. McDiarmid, T. G. Sutherland, J. R. Meldrum, W. T. Murray, J. J. Phillips, B. T. Stephenson, J. E. Wright, H. C. Reilly, W. T. Robinson, John Drewe, E. Miller.

Events in the Trade

Business Changes

Glencoe, Ont.—R. A. Eddie, hardware merchant, has sold his business to W. Edwards.

Niagara Falls Centre, Ont.—A. E. McEvers, hardware merchant, has sold to Smith & Swayzie.

Obituary

Thorold, Ont.—Mrs. L. I. Hunt, wife of the late L. I. Hunt and mother of Wm. H. Hunt, of the firm of L. I. Hunt & Son, plumbers and hardware, died last week.

Personal

Montreal.—E. D. Ranck, Coleman Lamp Co., Ltd., Toronto, was a visitor in Montreal this week.

Woodstock Hardware Store Entered by Burglars

Woodstock.—The first burglary reported in this city in months occurred this week at the store of Davidson & McGinnis, hardware merchants. When the store was opened it was found that burglars had gained entrance from a cellar window and ransacked the store from top to bottom.

Two New Directors of A. C. Leslie & Co.

Montreal. — At the annual meeting of A. C. Leslie & Co., Limited, Montreal, the following two new directors were elected. Forrester B. Leslie, sales manager, who has been with the company since 1896, except for an interval of a few years. George B. Ball, senior, Toronto representative, who has been with the company for 15 years, and who is one of the best known and most popular salesmen in the trade in Ontario.

Sales Convention of Starke-Seybold, Ltd.

Montreal.—Starke-Seybold, Ltd., are holding a convention of their salesmen, the travelling men having come in from their territories for this purpose. The convention is held in the company's offices, and will finish up with the annual banquet being held at the Engineers' Club. Besides the various executives addressing the men a number of manufacturers are giving demonstrations and sales talks on their lines of merchandise. These are not only very interesting but are constructive, and give the salesmen the opportunity of securing information in detail on such lines.

Electrical Appliance Dealers Object to Hydro Shop

St. Thomas.—The Hydro-Electric Shop as a competitor with the local merchants doing business in similar lines is not appreciated by the St. Thomas tradespeople. Complaint comes from the dealers that in the underselling of some articles at the Hydro Shop the merchants are actually paying the commissioners for the maintenance of this commercial undertaking through the prices exacted from them by the commission for light and power.

The merchants dealing in electrical supplies are few, they say, and cannot exert the same influence on the "powers" as perhaps business men in other lines. But they do insist that the hydro-electric commission should confine its activities to that for which the department was created. The addition of a stock of dry goods and boots and shoes, a shopman says, would be just as much within the province of the commissioners as dealing in other supplies. But a departure of the kind suggested would raise a howl from the competing merchants that would shut every hydro shop carried on under the auspices of the commission.

Belgian Commercial Fair

The second yearly commercial fair of Brussels, Belgium, will be held in that city in April next. Canada having exported to Belgium over forty million dollars worth of goods in the past year, manufacturers in this country will probably be interested in this fair. The Belgian Consul General for Canada, at Ottawa, can supply all details.

Tire Production Low

It is competently estimated that the tire companies of the United States, big and little, are today producing at the rate of not over 6,000,000 tires per annum, or less than 20 per cent. of the normal consumption demand of the country.

The minimum consumption today, allowing for the increased use of cord tires and the superior wearing qualities of fabric tires as compared with the infancy days of the industry, is placed at 30,000,000 tires a year. As long ago as 1917, 27,000,000 tires were turned out, and in the meantime automobile registrations have increased by over 3,000,000 cars.

Given an open winter, such as now prevails, and a reasonably early spring, executives of the leading tires companies of the United States are said to figure that by next summer, August 1, when the new automobile year opens, terrific inroads will have been made upon the surplus of tires.

Commercial Travelers Elect Officers

Toronto.—Walter Moore, the late first vice-president of the Commercial Travellers' Association, was elected by acclamation to the office of president for the ensuing year. Harry Dodgson was selected as first and Joe Zammers as second vice-president; E. Fielding, treasurer; and James Sargent, secretary. Owing to illness, Mr. Sargent was unable to attend the convention, and a resolution of sympathy for him was passed.

The following members of the board were also elected: John Everatt, John Cormack, C. A. E. Colwell, Geo. L. Wilmott, J. G. Cane, R. G. Hector, Benj. Miller, J. Davis and W. H. Judge.

Ottawa Commercial Travellers Elect Officers

The annual meeting of the Commercial Travellers' Association of Ottawa was held recently, when the election of officers constituted the chief business of the gathering. The new officers elected were: President, Bert C. Gamble; vice-president, T. A. Crown; secretary, R. S. Mitchell; executive committee, R. M. Cochrane, Charles Devlin, M. Larose, H. Levigne, N. Boileau and H. Nesbitt.

The association will petition the city council of Ottawa to be allowed to vote in the municipal elections three days before election day. Officially it is stated that there are some 600 travellers resident in Ottawa, and unless this concession is made many of them must lose their votes.

Drastic "Gun" Regulations

Toronto.—In view of the great increase in crime recently the Chief of Police draws special attention to regulations concerning the carrying of firearms, especially to a section of the order which makes it a criminal offence to sell a rifle without a permit. Persons who have revolvers or guns are also forbidden to loan them, without first securing from the Police Department a permit to do so.

Following is a list of weapons for which a permit is required before they can legally be carried:

Pistol, revolver, sheath knife, dagger, stiletto, metal knuckers, skull-cracker, rifle, bomb, machine-gun, or any airgun, or device or contrivance for muffling or stopping the sound of them.

Claims Increased Exports

That Canadian export trade is not falling behind is the substance of a statement issued by Mr. A. Marshall, of the Commercial Intelligence Department, C.M.A.

"More money has been spent by Canadian manufacturers in the last two years," he states, "in developing export trade than in the ten years before the war. There are now 1,000 doing export trade, as against 200 or 300 before the war. The proportion of export compared with import goods has increased from 5 per cent. in 1880 to 43 per cent. in 1919."

The exchange rates in Britain and France have hit Canadian exports to those countries, but Canada's exports to Britain have increased by $23,000,000 and to foreign countries by $77,000,000 over last year.

"It is practically suicide for individual companies to trade with countries where financial and business conditions are unstable," he says, and advocates some administrative organization to superintend credit operations based on bonds issued by individual countries now in financial straits, covering the national assets.

Sales and Other Tax Returns in Manitoba

Winnipeg.—More than $3,000,000 was collected by the Inland Revenue Department in the district of Manitoba during the current year. Total collections for the months from January 1 to November 30 amount to $3,097,181. December revenue is estimated so far at $280,000, but the figures are not yet complete. Of the total amount collected during the year, $2,521,483 was derived from excise war taxes. Sales tax brought in $1,083,434.

Embargo on Steel Plants

Moncton, N.B.—Railwaymen on the eastern C.N.R. lines have refused to handle or haul freight to or from the plants of the Dominion Steel Corporation and Nova Scotia Steel & Coal Co., whose brotherhood employees in yard service have been on strike for over a month. Assistant Manager L. S. Brown intimates that the decision of the brotherhood regarding an embargo has been submitted to President Hanna, but no word regarding it has yet been received.

News of the Maritimes

R. M. A. Engages Detectives to Patrol Stores During Christmas Rush—St. John Clerks Plan Big Time—Co-operate for Protection Against Thieves

ST. JOHN, N.B.—News of the removal of the luxury tax was received with a great deal of satisfaction by St. John merchants. The St. John Branch of the Retail Merchants' Association have been putting up a strong fight against this tax, and impressed the Minister of Finance at the time of his St. John visit very forcibly with their determination to have the tax taken off. As soon as the news was received, the merchants at once had large placards placed in their windows announcing the fact. Some used special spaces in the newspapers.

Good Christmas Trade

Hardware merchants of St. John all report as being well satisfied with the Christmas business. Some of the stores have had record sales for the holiday season, sales in many cases being higher than last year, which was acknowledged by all to be the record year. As a protection against pilfering during rush hours, the Retail Merchants' Association engaged detectives to patrol the stores. These detectives were strangers to St. John, and amusing mistakes were made by some of the clerks who noticed different persons spending a good deal of time in stores without making any purchase. In one or two cases the detectives had to declare their identity to avoid being arrested for acting in a suspicious manner. Business blocks are being watched by plain clothes men engaged by local merchants, who are taking time by the forelock to prevent if possible any attempt to break into their premises. The crime wave sweeping over the country, and the appearance in this city of characters that have aroused suspicion has caused these merchants to band together in establishing this protection. Fortunately, St. John has escaped any serious depredations at the hands of professional crooks, and if "eternal vigilance" counts for aught, they will not get a start here.

Clerks Plan Big Time

The St. John Hardware Clerks' Association is planning for a big time in the near future. Last year they held a banquet about this time, which was attended by about three hundred hardware clerks and addressed by prominent local hardware merchants. It has been experienced that these affairs have a tendency to boost the spirit of co-operation between employer and employee. Realizing that the object of the Hardware Clerks' Association is to promote co-operation, the hardware merchants have on former occasions assisted any affair by giving substantially of presents and prizes for sporting events.

Moncton Merchants Had Good Christmas Business

Moncton, N.B.—Local hardware merchants report an exceptionally good business at Christmas and in many cases they state business was the best this year of any time in their history. This was particularly true of the hardware business. The campaigns instituted a few years ago to educate the public towards looking upon the hardware store as a natural place to go when useful gifts were required, has brought bigger returns each year. The slogan "Give something useful" had good effect, for there was even less tendency to buy extravagant gifts this year than before. Electrical goods, chinaware, silverware, kitchen utensils, razors, lunch kits, and winter sporting goods were all actively dealt in. Sheffield cutlery proved popular in Christmas business.

Moncton, N.B.—Commercial men will be glad to know that the New Brunswick Hotel is to be formally reopened on New Year's Eve after having been closed for several months.

New Pocket Flash Lamp

Of English invention is a wet battery pocket electric flash light that will burn steadily for ten hours and which can be recharged from an electric light socket.

Keep These Dates Open
February 14-15-16-17

There will be many interesting and instructive features at the 16th annual convention of the Ontario Retail Hardware Association to be held at the James St. Armories, Hamilton, Ont., on the above dates.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

A new catalog has just been issued by the L. S. Starrett Co., Athol, Mass., makers of mechanics' and machinists' tools. This catalog is not only an improvement over previous issues in appearance and arrangement, but also contains information about more than twenty new tools.

Among the changes noted is an improved Universal protractor, No. 359. The dial is graduated round the entire circle, and is equipped with one vernier and adjustments are controlled from the centre of the tool.

New micrometer calipers shown are No. 24A, fitted with a stiffening rod and especially adapted to the tire industry in measuring tire molds; No. 230M, a micrometer caliper with frame cut out for use in places where the ordinary tool cannot be used; No. 463, a caliper head which it is claimed can be easily attached to a tool or machine when a fine measurement is required. Nos. 463M and 464 are similar to No. 463, but with metric graduations.

Nos. 226K and 226L are other new micrometer calipers adapted for general use and said to be easily set and read.

New tools numbered 272M and 279 are metric fillets or radius gauges of 18 and 20 leaves of improved design.

Other new lines include V blocks and clamps No. 278, new firm joint dividers made in 3", 6", and 12" sizes, and No. 494D, a new set of toolmakers' buttons.

Besides the illustrations and full descriptions of every tool listed, a useful feature of the catalog is the inclusion of sets of tables comprising wire gauges, decimal equivalents, conversion tables, sizes and speed of drills, tables of different systems of measurement, etc.

Hardware dealers are invited to write for a copy.

Trade Enquiries

Names and addresses of enquirers can be obtained only by those interested in such lines upon application to Hardware and Metal. Please quote reference number when requiring addresses.

2595. **Colliery rails and tubs.**—A Manchester firm are open to consider offers of colliery rails and tubs.

2596. **Castings.**—A Manchester firm are in the market for malleable iron and steel castings.

2598. **Asbestos.**—A British subject, established in Spain for over thirty years, at present manager for an important British association, and who has been connected with several substantial undertakings, desires to secure the exclusive agency for Spain and Portugal for exclusive selling rights for an important asbestos manufacturing firm in Canada.

2602. **Paints and varnishes.**—A firm of merchants and commission agents in Constantinople desire to receive particulars from Canadian exporters of paint and varnishes.

IRON, STEEL AND METALS SHOULD BE IN DEMAND DURING YEAR 1921

By W. S. LESLIE, of the A. C. Leslie & Co., Montreal

THE past year has been one of great changes in the metal market, some of these having proved disastrous to many manufacturers and dealers.

In iron and steel the scarcity prevailing at the end of last year was continued for the greater part of 1920, this condition being intensified by transportation difficulties, especially by the long drawn out strike of switchmen in the United States and also by the shortage of fuel. This shortage resulted in an abnormal advance in price of coal and coke, which forced makers who did not control their own supply to further advance their prices for iron and steel products, and, while the United States Steel Corporation steadily maintained their prices, they were unable to keep up with their deliveries and even buyers who had contracts running at moderate prices were obliged to go into the market and pay heavy premiums for prompt or fairly prompt delivery. For the past few months, however, transportation conditions have been about normal and the fuel situation having been considerably relieved, makers have greatly improved their deliveries, and on this account the premiums commonly paid have been greatly reduced. In fact, the market is getting down to a point somewhere near the level established by the Steel Corporation.

This downward movement has been quickened and carried farther than would naturally have been the case by extensive cancellations and postponing of deliveries on the part of buyers, chiefly in the automobile and allied industries, and these conditions have naturally made buyers hold back and probably they are carrying this policy to an extreme.

British manufacturers were able during the year to regain some of their lost trade in Canada, being assisted by the scarcity of American material and the low rate of Sterling exchange. Great Britain also, and probably their products, will be more in evidence in the coming year. Already a considerable quantity of galvanized and a smaller quantity of black sheets and tinplates have been imported and prices now being quoted are interesting for delivery at points where freight rate favors British imports.

The high price of fuel, however, in Great Britain and a shortage of pig iron have prevented any reduction in prices of the less manufactured forms of iron and steel that would make shipments to Canada possible.

The course of the non-ferrous metals has been most erratic. For the first five or six months of the year, tin, copper, lead, spelter and other metals were all very strong, though prices of some, more especially copper and spelter, were not abnormal compared with pre-war levels. A very serious slump, however, has since taken place in all these metals and values have apparently been carried lower than cost of production justifies, with the possible exception of lead, the supplies of which are comparatively small. Financial reasons, coupled with the fact that these metals are speculated in very heavily, account largely for the continued slump, and while there should undoubtedly be a good reaction in price of these metals, it is a question how soon this will take place. Certainly there must be more confidence than now exists before the market will be stabilized.

From what I have said the present would appear to be a time for buyers to continue a cautious policy in purchasing without allowing themselves to run out of supplies, but there is no reason why the demand for iron, steel and all other metals should not be good during the coming year, as there is a large amount of buying to be done when buyers have sufficient confidence, and are able to finance their requirements.

Twenty Years Ago

Items of interest reprinted from the Hardware and Metal file of January 5, 1901:

"After an interview with the New Brunswick Government, Messrs. Chas. Burrill and B. F. Pearson, directors of The Dominion Iron and Steel Co., are reported to have said that within a year they would be building steel ships at St. John and Halifax."

* * *

"Notice is given in the Official Gazette that application will be made to the Quebec Legislature by Henry Miles, importer; F. W. Evans; Charles Chaput, merchant; J. W. Knox, merchant; G. E. Drummond, manufacturer, all of Montreal, for a bill to incorporate them and others under the name of the "Montreal Business Men's League."

* * *

"The Thos. Davidson Manufacturing Co., Ltd., Montreal, have undoubtedly reached a high standard of excellence in their enamelled and embossing department. Hardware and Metal has just received from them a calendar which has enamelled in six colors a face of an Indian chief in war dress."

* * *

"During the holidays the McClary Mfg. Co. have had a large staff at work making numerous changes to their factory at London. They have also made large additions to warehouse and factory."

* * *

"Replying to a deputation Premier Roblin, of Manitoba, promised to have a railway built from Brandon towards Virden, reaching the boundary of the province, and to have it ready for operation in time to haul out next season's grain."

* * *

"The twenty-eighth annual banquet of The Dominion Commercial Travellers' Association was held in the Place Viger Hotel, Montreal, on Saturday evening. There were about 200 guests present. The new president, T. L. Paton, occupied the chair."

U. S. Independents Drop Nail Prices

INDEPENDENT companies which have been holding nails at $3.75 per base keg are now willing to book at the $3.25 price. The action has been accompanied by an adoption of the old card of extras on wire. Independent makers of hoops and bands have also dropped to the Steel Corporation level, says the Iron Age.

In taking account of conditions as the new year comes in, the iron and steel trade sees no prospect of a buying spurt for some weeks. The flood of shipments from mills of accumulated and current output following the release of cars restricted up to that time to coal carrying has placed in large consumers' yards somewhat more material than they were able to dispose of, especially with the curtailment in general demand.

This condition has encouraged the postponement of buying. Until a belief in the fairness and stability of the present prices is established, no return to activity appears likely. The independent makers consider they have done their part by discounting reduced manufacturing costs when they dropped to the Steel Corporation price levels.

The last week of the year is marked by production at full blast by the Steel Corporation and by total idleness of some independent plants and varying rates for others up to perhaps 55 per cent. or an average of about 25 per cent. for the independents and not much over 54 per cent for all the mills. The first week of 1921 will be better in that accumulated orders will call some mills into operation.

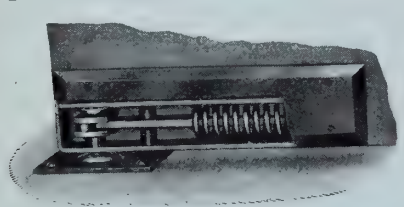
New Alcohol Sales Order

THE Canadian Department of Inland Revenue has issued orders with regard to the sale and designations for denatured alcohol. The new regulations do away with the word alcohol in the designation altogether and define the methods to be used in denaturing and the terms to be used in selling the material. The department, according to the statement which was forwarded to the collectors of the various districts, has decided to authorize the manufacture and sale of a grade of specially denatured alcohol which will be known as "Grade No. 1 Iodine."

The regulations provide that this grade may be sold only to firms or persons holding permits. Special provisions are made to provide that the alcohol shall be absolutely unfitted for use as a beverage, the formula for its manufacture containing directions that each one hundred pounds shall be mixed with two and one-half pounds of resublimated iodine and one and one-half pounds of potassium iodine. These regulations effectually prevent the use of the material for other than manufacturing purposes. They further prevent its being sold under the misnomer alcohol with disastrous effects to anyone attempting to make it potable.

Make Twine From Flax Fibre

INVESTIGATIONS commenced by the Saskatchewan Grain Growers' Association to determine the possibilities of recovering and utilizing straw from flax grown for seed production have been continued by the Federal Department of Agriculture. The objects of this work were to ascertain the value of the conclusions reached in previous investigations, to discover some means of deseeding the Western flax straw without materially injuring the fibre, and to obtain cost figures on the various processes in the utilizing of the fibre into cordage, felt twine and other products. The investigations included a comparison between matured straw and straw frozen before maturity. The conclusions drawn in regard to these qualities were that green straw could not be decorticated, and that fully matured straw was slightly better than almost mature frozen straw for fibre production. The fibre ultimately obtained was chemically treated in specially prepared vats by a fermentative process, which requires only a few hours. After thus being treated, the fibre was shipped to a cordage factory, where it was carded, twisted, scrubbed and baled into binder twine. The twine has not been tested sufficiently under field conditions to justify a pronounced statement. It was 4-ply twine running 650 feet to the pound, and was reported to have a tensile strength of about forty-five pounds. Commercial twine and rope were also made, but definite conclusions regarding their value have not been established. Waste material was found useful for felting purposes, and when mixed with 20 per cent. of cow hair, it could be used for insulating. In these experiments 77 tons of flax straw taken from 173 acres gave 17 1-2 tons of raw fibre, which, when further refined, produced 347 bales of 90 pounds each of treated fibre. From 123 of these bales there was manufactured 5,987 pounds of cordage. With regard to the cost of production, it has been worked out that one ton of straw of seed-producing flax will give 249 pounds of binder twine and 142 pounds of felting material, and that the binder twine was manufactured by the process followed at a cost of 13.54 cents per pound, and commercial twine for 20.54 cents per pound. These figures, it may be stated, do not take into consideration what may be regarded as overhead charges on capital expenditure, nor can they be considered conclusive.



New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

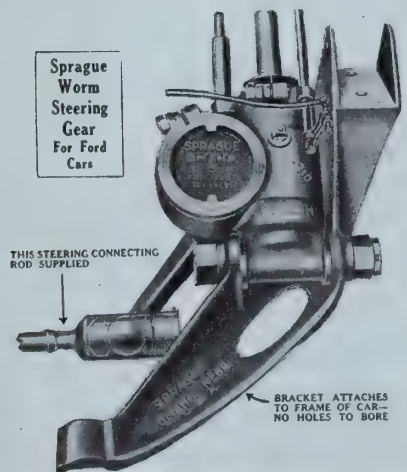
NO. 800 SURFACE FLOOR HINGE

The new No. 800 surface floor spring hinge introduced by the Lawson Mfg. Co., 228-230 W. Superior Street, Chicago, Ill., is now being offered to the Canadian trade.

This hinge, though lighter than similar hinges of this type, is said to embody

Surface Floor Hinge

scientific principles of design which give it greater strength and longer service.



The ball bearing is at the top where it should be to carry the weight, and this arrangement also keeps it up out of the dirt and prevents clogging, and gives a snappy action at all times.

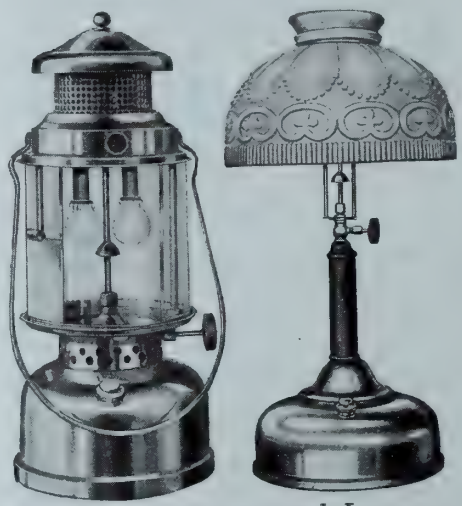
Wear is claimed to be reduced to a minimum by having all the moving parts, rollers, pins, plunger, and center guide roller hardened by a special process. The hinge is quickly and easily applied and is furnished with bevelled edged side plates and in all standard finishes.

The No. 800 hinge is suitable for doors 1⅛ to 1¾ inches thick and of standard size.

SPRAGUE WORM STEERING GEAR FOR FORD CARS

The new model "M" Sprague worm steering gear for Ford cars is about to be placed on the market by the Sprague Tire & Rubber Co., Omaha, Neb.

Sprague Stearing Gear



This gear is said to be the only one of its kind manufactured for Fords. With this gear it is claimed that a Ford car can be driven with one hand over rough roads, eliminating strain and vibration and giving driver control of the car at all times. There is said to be no locking over centre, and front wheels respond to movement of steering wheel.

Internal springs at each end of drag link take up shock and vibration and a strong spider gear enables steering wheel and shaft to turn evenly.

The gear can be installed in car in about one hour without drilling holes or cutting connecting or timer rod.

"NULITE" LAMPS AND LANTERNS

The National Stamping & Electric Works, 410-424 S. Clinton St., Chicago,

"Nulite" Lantern and Lamp

Ill., are offering to the Canadian trade the "Nulite" Match-lite Lamp and Lantern.

The "Nulite" lamp is said to give a light that is twenty times as powerful as an ordinary wick coal oil lamp and to give user a lamp without wick, chimney, smoke, smell, dirt or grease.

The operating expense is claimed to be insignificant compared to the convenience, as one filling or three pints of ordinary gasoline will produce a 400-candle power light for 14 hours.

The lamp lights quickly with a match, has an embossed white shade and is moderately priced.

The Match-lite lantern is stated to be unaffected by high wind, rain, snow or sleet and can be carried through the fiercest storm, making it an ideal lantern for the farmer, dairyman, and night watchman. For campers, sportsmen and street lighting it is said to be invaluable, in small towns and summer resorts.

It lights quickly with a match without the need of torch or alcohol, and will give, it is claimed, a 400 c.p. light on one filling for 13 hours at the cost of one quart of motor gasoline.

RIE NIE FAN BELTS

The Durkee-Attwood Co., Minneapolis, Minn., are the makers of the Rie Nie flat and round fan belts.

The vee-round belt is so constructed that in bending over the pulley the belt

Rie Nie Round Belt

widens out and wedges itself into the V, eliminating all slippage, it is stated.

Rie Nie round belts will wear uniformly, it is claimed, as there is nothing to unravel or come apart.

The flat belt has a wrapped edge, which prevents ply separation, and adds to the strength and life of the belt, the makers claim.

Both belts are endless, and it is further claimed that they have enough give to be

Rie Nie Flat Belt

self-adjustable, all permanent stretch having been removed, and a special treatment of the fabric has made them oil, heat and waterproof. These belts are made up in standard sizes.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

SUMMARIZING price tendencies on hardware during the year just closed it is evident that prices have, on the whole, been subject to no drastic reduction. Sixty-six staple lines of hardware show an average increase of 11 per cent. in price during the year. Manufacturers and wholesalers express optimism regarding the trade outlook for 1921. It is the opinion of some authorities that large profits will be a thing of the past and that it will pay merchants in the interests of a bigger volume of trade, to pass along to the customer any special saving that can be effected in buying. Christmas trade was reported by a number of merchants as heavier this year than for some years past, some say it was the largest in their history. This is taken as evidence that public buying power is not greatly lessened and that when normal levels are reached this fact will make itself felt. This week lower prices are quoted on cut and wire nails, drills, carpenters' tools, cotter pins, carpet sweepers, door hangers and track. Bar iron and steel continues easier. Manufacturers and wholesalers are now engaged in taking their annual inventories.

Montreal Markets

MONTREAL, Dec. 30.—The changes this week include lower prices on bar iron and steel, slight reductions in bit stock and straight and taper shank drills. Cut nails show a reduction of about 5 per cent. and wire nails 8 per cent, and cotter pins are 10 per cent. lower. New lists are out on Stanley Rule and Level Co.'s lines, and are understood to be slightly lower in prices, but owing to rates of exchange it is uncertain what the effect will be on Canadian prices at present. Pipe continues scarce and prices are unchanged. Ingot metals are continuing to ease in price but market is dull at present.

Change in Price on Drills Noted

Montreal.

DRILLS.—There has been a price adjustment made this week on drills. The change is slight, but it is to be noted that it is a reduction.

Straight, taper shank, jobbers, wire gauge, Coe and Prentice, 37½ per cent. disc.

Bit stock, and wood boring drills, 42½ per cent. disc.

Ratchet drills, 12½ per cent. adv. on list.

10% *Reduction in Price on Cotter Pins*

Montreal.

COTTER PINS have been reduced in price, and jobbers are now quoting 82½ and 10 per cent. disc.

Nail Prices Have Been Lowered

Montreal.

NAILS.—A reduction of 50 cents per 100 lbs. has been made in wire nails quotations and new base price is $9.50. Cut nails have been reduced 30 cents and the new base price is $6.60. There is little movement at the present time and it would not be surprising if further adjustments were made.

Iron and Steel Prices Are Lower

Montreal.

IRON AND STEEL.—The situation of the iron and steel mills in the U. S. A. is now reflected in the revised prices that are being quoted locally. During the last few years the independent mills were oversold and some buyers paid big premiums to get priority shipments. These mills are now seeking business and are making prices to stimulate business. It is not expected, however, that there will be any big or continued changes in prices downward, though there may be slight concessions later.

IRON AND STEEL

Common bar iron, 100 lbs.	4 55
Refined iron	6 05
Iron finish machinery steel	4 60
Mild steel	4 55
Band steel	4 55
Single reeled machinery steel	6 80

Harrow tooth steel	4 70
Mining tool steel, per lb.	4 70
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

NOTE—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

New Prices Announced on Stanley Goods

Montreal.

STANLEY RULE AND LEVEL CO.—It is announced that the Stanley Rule & Level Co. have issued a new price list and that the price changes are downward. Just what effect this will have on the Canadian market cannot be determined at this time, as doubtless the high exchange will be a big factor in determining the selling prices.

No Change in Pipe Situation

Montreal.

PIPE.—There is a continued scarcity in pipe, particularly galvanized. It is very difficult to secure supplies, and there is a fair movement at this season. There is no change in price.

Quotations will be found on current market pages.

Scrap Metal Market Dull at Present.

Montreal.

OLD SCRAP.—There has been further declines in prices on some lines of old scrap, with little business offering at this time. Toronto prices are regarded as too high yet and will decline further. It is expected, however, that there will be a good movement in these lines dur-

ing the first quarter of 1921, and that there may be a firmer tone to prices.

DEALER'S BUYING PRICES.

Automobile tires	0 75

Reduced Prices on Carpet Sweepers

Montreal.

CARPET SWEEPERS.—A new price list has been issued on Bissell carpet sweepers and slight reductions have been made on these lines.

The vacuum sweepers show a larger price decline. New prices will be found on current market quotation pages.

Ingot Metals Are Reported Quiet

Montreal.

INGOT METALS.—Prices if anything are rather lower, and as matters are it is impossible to say what levels they are going to. The question of costs does not enter into the matter at all. While they are certainly cheap the fact has no bearing on the situation at present.

TIN.—Owing to the holiday season in London this metal is very quiet, and there is not likely to be any change until after the first of the new year. The price shows a little weakness and is quoted locally at 42c pound.

COPPER has touched a new low level, and it would appear that prices will be still lower. Local prices are "Electro," 19c, and "Casting," 18¾c pound.

LEAD.—There has been no change in the price of lead and it is quoted at 7¼c pound.

SPELTER is easier in price and is being quoted locally at 7¾c pound.

ANTIMONY.—There is nothing new to report on this metal and the price locally is 8¼c, which is unchanged.

ALUMINUM is very quiet and the price remains the same as previously quoted at 35c pound.

Toronto Markets

TORONTO, Dec. 30.—The chief features of the week are the new prices on building papers, roofings and wire nails. New quotations are lower and the reductions made range from 10 to 30 per cent. Reductions have been made also on barn and parlor door hangers and track, and new prices on Stanley Rule & Level Co. lines show some lower quotations. Dart Unions have been revised and are lower, and some lines of Jenkins valves are reduced in price. Many of the wholesalers are taking inventories, and retailers generally are about to do so if they have not already started, and with travellers mostly off the road until the new year business is on the light side. The Christmas trade was reported to be good.

Bar Iron Holds at Recent Change

Toronto.

BAR IRON AND STEEL.—Business is quiet in iron and steel and wholesalers generally are stock-taking. Bar iron mills in the U.S. are reported to have scarcely any orders for the first quarter of the year and further curtailments are probable. Prices are holding at the recent decline and little change is expected at the present. Quotations are the following:

IRON AND STEEL

Common bar steel, 3-16 in. dia. and lighter.	$ 5 50
Common bar steel, ¼ in. and heavier	4 75
Common bar iron, 3-16 in. dia. and lighter.	5 50
Common bar iron, ¼ in. and heavier	4 75
Angle base	6 00
Horseshoe iron	6 00
Tire steel	5 95
Band steel	6 50
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	28 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	6 00
Norway iron	15 00
Toe caulk iron	6 70
Hoop steel	7 50

Building Papers Reduced; Tarred Felts Lower

Toronto.

BUILDING PAPERS, FELTS AND ROOFINGS.—Reductions have been made on building papers and dry and tarred sheathings are from 10 to 25 per cent. lower in price. Tarred felt has been lowered approximately 12 per cent. and carpet felt is about 25 per cent. less in price. Some lines of ready roofing are also lower. Following are new quotations on some of these lines:

Cyclone Brand, per roll	1 65
Cyclone Brand, Tarred, per roll.	1 70
Joliette Sheathing, per roll	1 10
Do., Tarred, per roll	1 45
Surprise Brand, roll	1 15
Monarch Brand, white, 100 lbs.	8 75
Do., grey, per 100 lbs.	6 75
Spruce Brand, 36" and 72", per 100 lbs.	9 75
Carpet Felt, per 100 lbs.	6 50
Tarred Felt, Black Diamond Brd., per 100 lbs.	5 35
2-ply Ready Roofing, per square	2 18
3-ply, Ready Roofing, per square	2 60

No Change in Gasoline or Coal Oil

Toronto.

GASOLINE AND COAL OIL. — No change has been made this week on coal oil or gasoline and prices are holding steady at 28 and 31 cents for coal oil and 42 cents for motor grade gasoline. The demand is lighter, but it said to be sesonably good.

Soil Pipe and Fittings; Sales Light; Prices Hold

Toronto.

SOIL PIPE AND FITTINGS.—Sales are lighter on these now and little business is expected during the next month or so. No changes are made in prices, and little is anticipated. Quotations are as per market pages.

A Lower Quotation on Welded Boiler

Toronto.

RANGE BOILERS. — A seasonable demand is reported on range boilers, but sales are not large at present. Prices are holding firm with the exception that an easier price is quoted on the 30 gallon standard electric welded boiler which is being quoted at $13.50, or a reduction of $1.50 from previous quotations. Quotations are the following:

Range Boilers—	Standard	Ex.Heavy
30-gallon	$15 00	$18 00
35-gallon	18 00	21 00
40-gallon	20 00	23 00
52-gallon	25 00	29 00
66-gallon	35 00	40 00
82-gallon	42 00	48 00
100-gallon	55 00	65 00
120-gallon	70 00	80 00

Small Demand Now For Eave Trough

Toronto.

CONDUCTOR PIPE AND EAVE-TROUGH.—Not much business is being done at present in conductor pipe or trough. Prices are holding unchanged at 25 per cent. above list. Quotations will be found on current market pages.

Conductor Elbows Are Held Unchanged

Toronto.

CONDUCTOR ELBOWS. — With conductor pipe there is a smaller demand for conductor elbows just now and sales are light. Prices are unchanged and 50 per cent. is quoted above list.

Cotton Waste Prices Are Unchanged

Toronto.

COTTON WASTE.—The raw cotton market continues to fluctuate from day to day, but no further change has been made in waste prices. New lists are probable in the next two or three weeeks and will likely show an easing. Present quotations are as per market pages.

Lower Quotations on Door Hangers

Toronto.

DOOR HANGERS AND TRACK. — Some lower quotations have been made on the door hangers and track made by the Canadian Richards Wilcox Co., and reductions are approximately 10 per cent.

Stanley Lines Revised; Some Reductions

Toronto.

CARPENTER'S TOOLS. — Revised prices have been issued on some lines manufactured by the Stanley Rule and Level Co., and new quotations show some reductions.

Light Sales of Tubes; Prices Unchanged

Toronto.

BOILER TUBES.—No changes have been made in quotations on boiler tubes. Sales are light at the present and stocks are said to be sufficient for all normal demands. Following are quotations:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1 inch	$28 00	$.....
1¼ inch	32 00	.....
1½ inch	33 00	.....
1¾ inch	35 00	.....
2 inch	35 00	30 00
2¼ inch	38 00	32 00
2½ inch	46 00	36 00
3 inch	54 00	45 75
3½ inch	70 00	49 00
4 inch	96 00	63 00

Compression Goods Slow; Some Valves Reduced

Toronto.

COMPRESSION GOODS. — There is no change in bath cocks or stop and waste cocks. Some lines of valves are reduced in price and new quotations are made on Jenkins globe and gate valves. The demand for compression work is lighter at present. Wholesalers' stocks are in fair shape and though prices generally are holding on these lines many look for a gradual lowering on brass goods in the near future. Present quotations are as under:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	28-30%
Flatway stop and waste cocks, standard	25%
Roundaway stop and waste cocks, standard	25%
Brass steam cocks, standard	add 10%
Globe, angle and check valves, standard	add 5%
J.M.T.	plus 10%

Hardware Prices During the Past Year

Average Increase Over Eleven Per Cent.—Iron and Steel Products and Woodenware Show Fewest Declines

A comparison of 66 staple hardware lines with prices quoted on January 1, 1920, shows an average increase of over 11 per cent. at the present time compared with prices of a year ago.

There is a downward tendency in most lines, but iron and steel manufactured products are among the last to feel it, and some of these goods have shown advances during the past week or so.

In the accompanying table 100 is taken as the index figure, and an advance of 25 per cent. would be shown by the figures 125. Similarly a decrease in price of 20 per cent. is recorded by the figures 80.

The advance on products of iron and steel average 16 per cent., and woodenware shows an increase of 30 per cent. All ingot metals excepting aluminum have declined recently, but except in the case of a few brass lines and some lead products the declines have not yet reached the manufactured articles. The same is true of iron and steel goods, as although pig iron has had a downward trend for some while, the price is still above that prevailing a year ago.

Cotton goods show a decided decline, rope is lower, and turpentine and linseed oil are practically half the price of a year ago. Coal oil and gasoline are about 30 per cent. higher than they were last January, and lubricating oils about 50 per cent.

Roofings and building papers advanced from 25 to 50 per cent. during the year, but have just declined from 15 to 30 per cent., so do not show such a big increase.

Other products, such as black and galvanized sheets and bar iron also show smaller increases now than would have been the case two or three months back.

Corrugated Sheet Prices Show No Change

Toronto.

CORRUGATED SHEETS.—The demand for corrugated sheets is seasonably quieter now, and little business is expected for the present. Prices are holding unchanged, but an easing of prices may be possible later, it is thought. General quotations are as follows:

Corrugated Sheets—	Per 100 Sq. Ft.
No. 28 gauge	12 00
No. 26 gauge	12 75
No. 24 gauge	18 75
No. 22 gauge	22 25
No. 20 gauge	26 50
No. 18 gauge	32 75

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Wrought Pipe Holds; But Demand Less

Toronto.

WROUGHT PIPE. — The demand for pipe is smaller now, but a fair sorting up is still reported. Stocks have been low and are gradually getting into better shape, but some of the smaller sizes are somewhat scarce. Prices are holding firm without change, and across the line pipe is the one product that a two price standard still prevails on, as the independents' prices are down to the Steel Corporation levels on practically all lines except pipe, although some price cutting has been reported recently there. List No. 46 is still in effect and is as per current market quotation pages.

Fittings Sales Smaller; Dart Unions Lowered

Toronto.

PIPE FITTINGS. — There have been no further changes in the quotations on pipe fittings, except that Dart Unions have been revised in price and are now easier. From 1-4 inch to 2 inch are now 20 per cent. off list and 1-8 inch and 2 1-2 inches to 4 inches are less 8 per cent. Galvanized are 30 per cent. above black prices. Supplies of fittings have improved and there is no talk of shortage now. Present quotations are as follows:

PIPE FITTINGS

	Net
Cast iron fittings	15%
Plugs	17½%
Bushings	30%
Unions ¼" to 2"	25%

Do., running thread	20%
Couplings, 4-in. and under	

MALLEABLE FITTINGS

Class A.	0 70	0 80
Class B	0 30	0 40
Class C	0 20	0 30

Rope Sales Light; Prices Are Unchanged

Toronto.

ROPE.—There is little doing in the rope line at present. Travellers are off the road until after the new year, and sales are not likely to be much improved for a week or two. The recent reductions in prices are expected to help business and bookings this next month should show considerable improvement. Quotations are unchanged and are to be found on current market pages.

DROP OF 50 CENTS PER KEG ON NAILS

A drop of fifty cents per keg has been made on nails the latter part of this week, bringing the base price in Toronto to $5.75.

Nail Prices Down; Drop of 50c

Toronto.

NAILS. — A reduction of 50 cents per keg has been made in the price of wire nails and new base price is now $5.75. This is the first change in wire nail prices for several months. The demand is smaller now and stocks are in better conditions, but are not large.

Asbestos Prices Are Holding Firm

Toronto.

ASBESTOS. — Prices are holding firm on all asbestos products and no change is anticipated at the present time. Business is reported as having been good in the various lines, but sales are smaller now. The quotations on asbestos sheathing range from $12.00 to $15.00 per 100 pounds, according to grade.

Brass Curtain Rods Some Reductions

Toronto.

BRASS CURTAIN RODS. — From 5 to 10 per cent. reduction has been made on certain lines of brass curtain rods and fixtures. These changes are due to lower prices on raw materials.

Fencing and Wire Prices Are Firm

Toronto.

FENCING AND WIRE. — Prices on wire and fencing continue to be firm. Quotations are issued for wire fencing and gates for next season, but barbed wire prices are not yet quoted. It is expected that these will be issued within the next few weeks.

Sheets Show Little Change; Sales Are Smaller

Toronto.

SHEETS AND PLATES.—Little that is new is noted this week on sheets or plates. Business is lighter, but is not expected at this period of the year. Inventories are being taken by many at present and stocks are reported to be light. There is a range between high and low quotations, and it is possible to get better figures for quantities. While the sheet mills report a reduction in operations there are some mills that are still at full or nearly full capacity. The tinplate market continues weak with little buying. Present quotations are as follows:

PLATES

10 gauge	7 50	....
12 gauge	7 55	....
14 gauge	7 60	....
16 gauge	7 70	....

BLACK SHEETS

14 gauge	8 35	9 30
16 gauge	8 40	9 40
18-20 gauge	8 45	9 45
22-24 gauge	8 50	9 50
26 gauge	8 55	9 55
28 gauge	8 65	9 65

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	9 90	11 30	10 00	11 35
U.S. 28	9 50	10 90	9 60	11 05

16	8 90	10 30	9 00	10 45
12 and 14	8 75	10 15	8 85	10 30

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Lead Products Holding; Seasonable Demand

Toronto.

LEAD PRODUCTS. — Sales of lead products though smaller are reported to be seasonably fair. Prices have been reduced with the declines in primary markets and this may have helped sales. Lead is stated to have been a little more active in outside markets, but is still unsettled. Some look for lower prices yet on lead, but on the other hand the bottom is thought to have been reached by others. A big producer states that if it were not for the fact that most lead ores contain silver the majority of the lead mines would have to close down at present unproductive prices. No further changes are recorded and prices are the following:

Lead pipe, list, per lb.	0 14½
Lead waste pipe, list, per lb.	15½
Do., over 8 in., list, per lb.	16½
Lead pipe is subject to a discount of 10%.

Small Business in Scrap Metal Market

Toronto.

WASTE MATERIALS.—The scrap metal market continues to be weak and dull. Sales have been fewer and the undertone of the market has been firm at last levels quoted. Quotations are very largely nominal. Wrought iron scrap and stove plate are holding fairly firm, but red and yellow scrap are weaker.

Heavy lead scrap has moved downwards. There is little business reported and quotations are the following:

WASTE MATERIAL

No. 2 busheling	....	$13 00
Stove plate, per ton	24 00	25 00
Yellow brass	7 00	8 00
Red brass	....	12 50
No. 1 machinery cast	34 00	35 00
Heavy melting steel	18 00	19 00
Heavy copper	0 11½	0 12½
Scrap zinc	3 75	4 25
Light brass	0 04½	0 05
R.Rd. wrought iron, No. 1, gr. ton	23 50	24 50
Scrap Pipe	10 75	11 25
Heavy lead pipe	4 00	4 25
Old rubbers, boots and shoes	0 03	0 04
Overseas lumbermen's rubber boots	0 02	0 03
Bicycle tires	0 01	0 01½
Tea lead	2 00	2 25
Automobile tires	0 75	1 25

Bissell Carpet Sweepers Lower in Price

Toronto.

BISSELL CARPET SWEEPERS.—New price lists have been issued on Bissell carpet sweepers and take effect January 1st. The new quotations constitute a reduction of from $2 to $3 on the regular sweepers and from $16 to $20 per dozen on the vacuum sweepers. New prices are as follows:

SWEEPERS, CARPET

	Per doz.
American Queen	$ 60 00
Club, japd.	120 00
Champion, japd.	45 00
Grand, japd.	68 00
Grand Rapids, nick.	55 00
Do., japd.	50 00
Parlor Queen, nick.	62 00
Princess, nick.	57 00
Sandard, japd.	46 00
Universal, nick.	53 00
Do., japd.	48 00

Ingots Still Quiet; Lead and Spelter Down

Toronto.

INGOT METALS.—Markets continue dull in ingot metals and little trading is reported during the past week. Lead and spelter are down to lower levels, and copper shows extreme dullness. Little activity is expected for a while, but at present rate of exchange it is pointed out that quotations are at a low level.

TIN.—Buying in this metal has been negligible lately. The slump continues in outside markets, and London values touched new low levels for the year. Little improvement in consumption is expected before the turn of the year. Quotations are held from 44 to 46 cents.

COPPER.—This metal remains dull and there is a downward trend in outside markets. The production of this metal is expected to exceed that of last year in spite of a drastic curtailment during the past few months. Local quotations remain unchanged and 19 cents is asked for casting copper.

LEAD.—Declines mark this metal in all markets. A little more enquiry is reported, but market is still dull. Quotations here are reduced again and present price is $7.00.

SPELTER.—Lower quotations mark spelter this week, and market is dull and weak. Prices are down 25 cents to $7.75.

ANTIMONY. — Dull without change is the report on antimony and quotations are from 8 to 9 cents.

ALUMINUM.—This metal continues dull here and unchanged, but a little lower price is noted on U.S. markets and prices there are the lowest they have been for five years. Quotations locally are 37 to 39 cents.

London Markets

LONDON, ONT., Dec. 30.—Christmas business continued good here right up to the last, and merchants are well satisfied with the volume of trade. Price changes are few this week as is usual after the holidays. Many wholesale houses as well as retail stores are taking stock and others will be starting the first of the year. Nearly all travellers are in this week and orders are expected to be rather light. Collections are said to be good.

Linseed Oil Sales Light; Price Unchanged

London, Ont.

LINSEED OIL.—The price of linseed oil is remaining firm and there is no change this week. Sales at present are very light and there is little doing.

Prices are the following:

	Raw, Gal.	Boiled, Gal.
1 to 2 bbls.	$1 17	$1 20
3 to 5 bbls.	1 16	1 19
6 to 9 bbls.	1 14	1 17

Less barrels, add 15c per gal.

Small Demand For Turps.; Down Ten Cents

London, Ont.

TURPENTINE.—The demand for turpentine is small just now, and sales are light. The price this week has dropped 10 cents, and new quotations are the following.

	Imp. Gal.
1 barrel lots	1 55
2 to 4 barrel lots	1 54
5 gal. lots	1 70

Wire Nails Reduced; Sales Lighter

London, Ont.

WIRE NAILS.—A new base price has been made of $5.75 per keg on wire nails. This is a reduction of 50 cents per keg. Cut nails are quoted at $7.50.

White Lead in Oil; No Change

London, Ont.

WHITE LEAD IN OIL.—Sales of white lead are quiet now, and prices are holding unchanged.

Quotations are as below:

	Tons	Less tons
Pure, per 100 lbs.	18 20	18 55
Elephant, per 100 lbs.	18 70	19 05

Hockey Sticks in Demand; Stocks Are Light

London, Ont.

HOCKEY STICKS.—There is a good demand for hockey sticks at the present time, but stocks are light, and manufacturers are behind with orders.

Following are the prices on some of these lines:

Youths, $2.90 doz.; Special Seconds, $4.25; Dominion Special, $5.50; Hespeler Special, $7.80; D.W.S., Hand Made, $10.80.

Seasonable Demand For Window Glass

London, Ont.

GLASS.—The sale of window glass is seasonably good here at the present time. No change has taken place in price and quotations are still 30 per cent. off case list for boxes of single or double diamond, and 40 and 10 per cent. off cut light list.

Putty Sales Fair; Price Unchanged

London, Ont.

PUTTY.—A fair sale of putty is noted just now, and prices are holding firm.

Quotations on standard and pure are the following.

PUTTY—	Per 100 lbs.
Standard, 100-lb. drums	8 05
Do., 25-lb. drums	8 30
Pure, 100-lb. drums	10 55
Do., 25-lb. drums	10 80

Sales and Stocks of Skates Improve

London, Ont.

SKATES.— The colder weather has improved the demand for skates, and manufacturers are shipping out supplies in better quantities now.

The Starr make is quoted at 30 per cent. off list.

Skate Straps Selling; Present Quotations

London, Ont.

SKATE STRAPS.— These goods are selling well now, and following are prices quoted for web and leather straps.

Solid Leather, 21 in., $1.60 doz. pr.; 24 in., $1.90; 27 in., $2.20; Canvas or Web, 21 in., $2.10; 24 in., $2.35; 30 in., $2.60.

Reduction Made on Richards Wilcox Hangers

London, Ont.

DOOR HANGERS AND TRACK.—A reduction of about 10 per cent. has been made in the price of Richards Wilcox barn door hangers, parlor door hangers and track.

Auto Accessories Are Held Unchanged

London, Ont.

AUTO ACCESSORIES.—The various

lines of auto accessories made by the Canadian Richards Wilcox Co. are unchanged in price. The price reductions made in lines manufactured by this company do not include the auto accessories.

Sales Good of Snow Shovels

London, Ont.

SNOW SHOVELS.—This week has seen a good run on snow shovels and sales have been brisk. Prices on the following makes are given.

Prince, or No. 20, $11.25 doz.; Queen, or No. 30, $12.50; King, or No. 40, $15; Moose, or No. 50, $18.75; Arctic or Wrico, $4.90.

Polishing Mops Are Moving Well

London, Ont.

POLISHING MOPS.—There has been a good demand for polishing mops and the following prices are quoted:

O Cedar, No. 15, $10 per dozen; Nos. 1, 3, 5, 14, $16
Liquid Veneer, $20.
Above prices include handles.

Lanterns and Globes Meeting Fair Demand

London, Ont.

LANTERNS AND GLOBES.—There is a good sale for these now and quotations on the short or long pattern tin bodied lantern are $15.00 per dozen. Long or short globes sell at $2.00 per dozen, one dozen to case; 3 doz. to case, $1.80 per doz.; and 6 doz. to case at $1.60 per doz.

Washing Machine Business Very Good

London, Ont.

WASHING MACHINES.—The washing machine business has been good. Sales are made at list less 20 per cent. and quotations on electric washers are Seafoam list, $120.00; and New Century, $160.00, list, both less 20 per cent.

Sales on above, and other makes, have been good this fall and winter.

Rope Sales Quiet; Prices Hold

London, Ont.

ROPE.—Sales of rope are light at the present time and prices are holding unchanged.

Quotations are the following.

Pure Manilla, lb., base	0 29½
Beaver Manila, lb., base	0 23
New Zealand Hemp, lb. base	0 23
Sisal, lb. base	0 21
Cotton, lb., base	0 57

New Lower Prices on Building Papers

London, Ont.

BUILDING PAPERS. — A reduction has been made in the price of building papers, tarred, felt and carpet felt. The new prices are considerably lower and are as follows: Building papers, per roll, D1 $1.65, D2 $1.10; tarred fibre, E1 $1.70, E2 $1.45; tarred felt, per 100 lbs., $5.85; carpet felt, $6.50.

Methylated Spirits Selling Well

London, Ont.

METHYLATED SPIRITS.—Sales of this product for anti-freeze mixtures are good just now and price quoted is $1.90 per gallon.

Lower Quotations on Carpet Sweepers

London, Ont.

BISSELL CARPET SWEEPERS.—New prices are announced on carpet sweepers and show variations of from $2 to $3 per dozen on the ordinary sweeper and bigger declines on the vacuum sweeper. New prices are quoted in current market pages.

Winnipeg Markets

WINNIPEG, Dec. 30.—Business is reported fairly good and as travellers are not on the road orders are coming in as good as can be expected. The feature this week was the drop of 10 cents per gallon on linseed oil. Turpentine remains firm. Plate mirrors and plate glass have shown a decline of 10 per cent. and 5 per cent. Ordinary glass remains unchanged. Oil coated burlap dropped 6 cents per square yard and is now quoted in roll lots at 43 cents in less quantities 45. Cotton rope, cotton clothes lines, sash cord and awning cord have been reduced in price again. Curling brooms have also declined and it will be interesting to note that the Luxury Tax has been taken off curling stones, especially just now as the curling season is getting well under way. Prices for the most part are remaining firm and no changes of any consequence are expected before the first of the new year.

Linseed Oil Drops Ten Cents Per Gallon

Winnipeg.

LINSEED OIL.—Linseed oil during the week dropped ten cents per gallon and raw is now quoted at $1.27 and boiled at $1.30. It is stated that this rate is only for immediate shipments.

Turpentine Prices Holding Firm

Winnipeg.

TURPENTINE. — There has been practically no change in the turpentine situation since our last report and turpentine remains very firm at $2.50 per gallon.

Plate Glass Prices Are Lower

Winnipeg.

PLATE GLASS.—There has been a drop of 10 per cent. on plated mirrors and 5 per cent. on plate glass during the week, the discount on same now being from 15 to 20 per cent. Ordinary glass shows no change.

Drop in the Price of Cotton Twine

Winnipeg.

COTTON TWINE.—Another revision in the price of cotton twine has lowered quotations considerably, and the following are the new prices: 3 ply, in balls, 50 cents per pound; 4 ply, in balls, 55 cents per pound; 3 ply, in cones, 48 cents per pound; 4 ply, in cones, 52 cents per pound.

Curling Brooms Decline in Price

Winnipeg.

CURLING BROOMS. — During the week curling brooms have declined $2.00 per dozen. As the curling season is just about starting it is interesting to note that the luxury tax has also been lifted off curling stones.

Oil Coated Burlap Now Lower

Winnipeg.

BURLAP.—There has been a drop of 6 cents per square yard on oil coated burlap and it is now quoted at 43 cents per yard in rolls and 45 cents per yard in less quantities.

Carpet Sweepers Reduced in Price

Winnipeg.

CARPET SWEEPERS. — The various lines of carpet sweepers made by the Bissell Co. have been revised in price and show reductions. Following are the new quotations: Grand Rapids, nickeled, $109 per dozen; Household, japanned, $97; and Superba, nickeled, $123.

Candle Wick Packing Lower in Price

Winnipeg.

CANDLE WICK.—There has been a reduction in the price of candle wick packing and it is now selling at 55 cents per pound.

Sash and Awning Cord Reduced Again

Winnipeg.

SASH CORD AND AWNING CORD. —Quotations have been reduced again on sash and awning cord, and new prices are as follows:

Sash Cord, in hanks.—No. 6, 73½c per lb.; No. 7, 72½c; No. 8, 71½c; No. 9, 71½c. In Coils: No. 8, 71½c; No. 10, 71½c; No. 12, 71½c.

Awning Cord—White: No. 4, $4.28 per doz.; No. 5, $16.20. Drab: No. 4, $4.95 per doz; No. 5, $19.35.

Pittsburgh Markets

PITTSBURGH, Dec. 30.—The market continues dull and the bulk of the independent mills are idle and there seems some doubt whether there will be much resumption at the beginning of the year. On the other hand the Steel Corporation is operating at nearly full capacity. Prices on finished steel are holding better than was expected, but many think that there will be reductions before there is any general buying movement.

Pipe mills have been running fairly well on orders in hand and prices of independents remain at $7 to $10 above Corporation prices.

Pig iron markets show but little quotable price changes. These may come, it is thought, about the first week of the new year, when many coke contracts are renewed.

PITTSBURGH, December 30. — The great majority of the independent steel mills are practically idle this holiday week. Some had previously closed, but the bulk of the closing was done Christmas Eve. At some of the plants there were intimations that there might be resumption Monday, January 3, but it is very doubtful whether there will be much resumption at that time. A mill would not resume unless it had accumulated a fair volume of specifications during the period of idleness, as all the mills that closed had first completed all business on books. Then there is the matter of wages, as most of the independents are disposed to reduce the rate. In the past two weeks, prior to this week, operations by the independents, considering that some were closed entirely, probably averaged between 30 and 35 per cent. This week, with few plants running at all, and then only at low rates, the average of the whole is probably under 10 per cent.

The United States Steel Corporation has closed a plant or department here and there for the holiday week, not on account of lack of orders, but for the purpose of making necessary repairs or to allow one department to catch up with another. The major portions of the Pennsylvania tube works in Pittsburgh and National tube works at McKeesport are down for the week, one to make repairs and the other to allow finishing departments to work up stock, accumulated by the primary operations getting ahead. Apart from temporary closings this week the Steel Corporation is operating at over 90 per cent., or at a better rate than its average during the first ten months of the year.

Wages

It seems to be an established fact that the Steel Corporation will not reduce wages at this time, or until there has been a material change in conditions, particularly the corporation's own position, from that now existing. The independents are strongly disposed to reduce wages, but the Steel Corporation leadership, quite conspicuous in the various wage advances of the past five years, is absent. Furthermore, the independents do not confer together on any subject, either prices or wages, that having been considered undesirable for years on account of the state of public sentiment. Thus there is no opportunity for the rise of a general policy and each independent has to "go it alone." A few of the mills have taken action already. The Midvale Steel & Ordnance Company has made reductions at its Johnstown and Coatesville works, in Pennsylvania, the Wheeling Steel Corporation, operating chiefly in the Wheeling, W. Va., district, and a plant at Buffalo have lately announced reductions, to be effective this week, averaging about 20 per cent., with elimination of overtime payments in addition. Possibly some additional announcements will be made this week. A common guess is that many independents will announce wage reductions before they resume operations, the time of resumption being uncertain. If this proves to be the case it is probable that by about the middle of January the majority of independents will have announced wage reductions.

The problem is a difficult one for the independents. There is the lack of Steel Corporation leadership, already mentioned, on which the independents have so often depended, in various matters, in the past. Then there is the difficulty that while in some respects January 1 seems a good date for a wage reduction, the cost of living has been decreasing more or less steadily and further declines are expected in the future, while furthermore men would be more ready to accept a reduction after they had had a period of idleness. In particular, the cost of living depends largely on retail

(Continued on Page 62)

Building Papers and Felts Reduced

Some Lines of Roofings are Cheaper—Lower Prices on Tools and Door Hinges

ALMOST interesting feature of the market is the reduction made in the price of building papers and felt roofings. The declines range from 15 to 30 per cent. and include dry and tarred sheathings, spruce sheathings, tarred felts and some grades of felt roofings.

These lines have been constantly advancing in price during the past six years, and the increase over pre-war figures has been considerable. On August 1, 1914, No. 2 dry building paper was quoted at 35 cents per roll—the recent price was $1.50, and No. 2 tarred advanced 43 cents to $1.70. In other words, it has been costing $4.28 and $3.95 respectively to purchase what could formerly be obtained for one dollar.

Cheaper Materials An Incentive to Build

Lower costs of building materials are undoubtedly an incentive to build, and in spite of an increase throughout Canada during the present year in building it is certain that building of every description has been held back in the hope of prices coming down, and there is a marked shortage of houses in practically every city and town. There is scarcely any doubt that with cheaper materials the coming year will see a large demand for all classes of building material and hardware, and will give employment to many workers.

Door Hangers and Some Tools Lower

Fewer price changes are noted this week and one of the reasons is probably that this is the time of the year when inventories are usually taken. There are indications, however, that many manufactured hardware lines which have been holding firmly and have shown increases from time to time have reached the peak and from now on seem likely to have a downward tendency. Some lines of door hangers and track have been reduced about 10 per cent. and more significant is the revision in some lines of tools, which are reported lower. As hardware dealers well know, tools have made big increase in price in the past few years. Some lines of valves are lower and it seems probable that brass goods may be revised and lower prices are possible.

1921 Outlook for Paint, Oil and Turpentine

Temporary Falling off in Paint Trade Gives Manufacturers Chance to Improve Plant Efficiency and Equipment — Expect Good Trade in Paint and Varnish—Large Production of Turpentine and Rosin in Last Harvest—Lower Prices Next Season if Production is Large

SPEAKING of conditions in the paint and varnish industry and with regard to the outlook, G. Henderson, president of Brandram-Henderson, Ltd., Montreal, gives the following statement to Hardware and Metal:

"In view of the elimination of conditions existing a year ago with regard to the uncompromising attitude of labor and the difficulties of getting adequate supplies of raw materials promptly, I believe that the present temporary falling off in demand will enable the manufacturer to consider more closely the source of supply and quality of his raw materials, and also to give more care to the perfection of the equipment of his plant. In addition he can devote more attention to the improvement of efficiency in the personnel he employs.

"I anticipate, so far as the white lead, paint and varnish industry is concerned, a wide demand for our products during the coming year. The economic reasons for the judicious application of paints and varnishes to all kinds of buildings, inside and out, are everywhere being realized, due, undoubtedly, to the influence of the 'Save the Surface' campaign, and any falling off in consumption of our products in construction work, which is quiet at the present time, should be entirely offset by the requirements of those who realize the value of protection for buildings and equipment already constructed."

Mistake to Let Paint Stock Run Low

In speaking of the trade outlook as regards paint and varnish, Royal Cluxton, manager of the Canada Paint Company, Montreal, drew the attention of Hardware and Metal to the following statement made by James Simpson, vice-president of Marshall Fields, Chicago: "The greatest mistake a merchant can make at this time is to let his stock run low." He cites the following incident to illustrate the point. "During the panic of 1893 a merchant opened up business in a town where older agents had got cold feet and were not buying. The new but optimistic merchant kept on buying, kept his stock filled in and bright looking; he was the smallest merchant in town then, but to-day he is the largest."

Speaking further of conditions, Mr. Cluxton stated as follows:

"Business this spring is going to be bigger and better than last year, but every merchant to get his share must order now. If buying is put off it will make it impossible for the manufacturer to give service.

"Never in the history of Canada have crops been so large.

"Never in our history has there been so much money in circulation.

"There has been a little let up in buying by the public on account of price adjustments, but that situation is easing off, and Christmas buying is record-breaking and general prosperity will be greater than ever in our history before spring.

"The orders we are receiving now from jobbers and large merchants are larger than last year—they have courage and are preparing to get their share of larger sales and profits by having the stock on hand.

"The merchant with the stock on hand gets the business. The merchant who is always out of stock of shades, of colors and of sizes of cans is driving the buying public over to his competitor's store."

A GOOD TALKING POINT FOR PAINT SELLING

London, Ont.—A talking point of real value in connection with the sale of paint was made by County Engineer Roy Patterson at the closing meeting of the Huron County council. In discussing the tremendous increase in cost for replacing bridges he declared that it is the falsest kind of economy to neglect bridges, either steel or wood.

"It is really surprising," he said, "to note the years of life that are added to a steel bridge by the application regularly of paint. During the summer we painted twenty-three bridges, three of which were long ones. Nothing but the best graphite pint was used and there is no doubt that the results will justify the additional cost."

In connection with wooden bridges he told of the difficulty in securing good wood and good plank. Next summer's prices would be much higher as a result of increased freight rates and he declared it would be poor business on the prt of the municipality to neglect any protection that would tend to shorten the life of any bridge.

There is a big argument here for hardware merchants. What applies to bridges, applies equally to houses, barns, implements, in fact to anything that is exposed to the elements. The use of paint is real economy and more than ever so when present replacement costs are considered.

Turpentine, Resin

Dealing with the situation in turpentine and resin, R. Pinchin, vice-president and manager of Ontario Oil & Turpentine Co., Ltd., Toronto, states as follows:

"The naval stores market as it affects turpentine and resin at the present time is probably more clearly defined by simply saying 'nothing doing.'

"The turpentine and resin harvest for the season of 1920-21 is supposed to close between November 15th and 20th. Owing to the heavy declines of the past two months, it is quite reasonable to suppose that considerable resin and turpentine is still held by the producers or in the hands of private owners and not yet reported on the exchanges either in Savannah, Jacksonville or Pensacola. We do know, however, that the harvest just ended has been a very good one so far as production is concerned—turpentine showing an increase of over 66,000 barrels, or 41%, resin showing an increase of approximately 31%—and this is in the face of a very much decreased demand on the part of the consumers. At the present moment domestic consumption is taking but very limited amounts and the market for several weeks has been posted 'nothing doing.'

"Repeated sales have been made on Jacksonville market as low as 77 cents wine measure, although the nominal quotation ruling since November 20th on the Savannah exchange calls for 92½ cents. Southern interests were relying upon export business to Great Britain, but owing to the decreased value of the British pound in the United States there has not been an export trade from the producing centres to Great Britain that was hoped for.

France's Production

"It might also be noted that France produced this year approximately 155,000 tons or 35,000 tons of turpentine and 120,000 tons of resin, and it is expected overseas accounts will take care of 17,000 tons of turpentine and 80,000 tons of this resin.

"These facts and conditions seem to warrant the statement that the larger users of turpentine in Canada can safely estimate the cost of resin and turpentine as not likely to exceed present market prices for some considerable time to come. In other words, we do not think

(Continued on Page 60)

GLIDDEN

EVERYWHERE ON EVERYTHING

It's Wearette!

Here's Wearette, the sturdy little Glidden helpmate who helps to keep things in the home spic and span.

Whenever there are worn, unsightly surfaces on woodwork or furniture, whenever there are window sills dull from exposure or cupboards that are scuffed and scratched, Wearette will quickly revive them. When you stop to visualize the countless things in thousands of homes that require refinishing, you get an idea of what Wearette will mean in your business.

The Glidden name and the Glidden green label are so well known and popular throughout the Dominion that Glidden products are not only readily accepted, but in fact are in demand. If you are not now handling the Glidden line, write at once for dealer proposition.

Rosin and Turpentine Prices May Stiffen in January

BETWEEN now and the middle of January there is apt to be the same moderate movement of turpentine and rosins into consuming channels, with the same lack of eagerness to buy, even on lowered values, that now characterizes the markets, says the Naval Stores Review, Savannah, Ga. The depression that has ruled for some weeks past is apt to remain the dominant feature until the holidays have become a memory and men's activities have been tuned up for a more confident outlook on another twelve months' efforts. Early January is looked upon by many as apt to see a stiffening of prices, a decided improvement in the market tone, and widespread anticipation of favorable developments in all directions. Even now there are not absent signs that this is to be the course of events and that the unnatural stagnatory deadness that prevails has passed through its major stages and is receding. Between now and the inevitable resumption of more general buying occasional lots of distress stuff may find their ways into consumers' hands at prices highly favorable to them, but such trading will represent a meagre proportion of the real needs that await filling only until the clearing of the business horizon begins to be more noticeable.

200,000 Barrels for Export

In the meantime the preparations for the organization of the Atlantic & Gulf Export Company go steadily on. Approximately 200,000 barrels of rosins are in readiness to be transferred to the new company for export trade purposes, it is understood, the great bulk of which represents direct participation of actual rosin producers.

Apathy as to 1921 Crop

The consuming apathy as to supplies at this time is no more noticeable than the apathy of producers as to the crop for 1921. Not a step is being taken as yet looking to the next crop, and the middle of January will probably have come before anything is done in that direction, perhaps longer. The increase of almost one hundred per cent. in the French and Spanish and Portugese crops, the marketing of whose unexpectedly large surplus, helped to keep the American crop from European consumption, has made its due impression on the American producers, and there is no intention on their part to repeat in 1921 the error of 1920 and make an excess of stuff. A reduction of thirty to forty per cent. in the next crop is regarded as in order unless the signs of general prosperity throughout the world become vastly better in the next ninety days than they now appear. A smaller crop, more cheaply made, is the aim of every producer, not for the purpose of putting prices to an abnormally high basis, but to sustain the industry on a reasonably profitable plane.

President of Sherwin-Williams Co. Weds

W. H. COTTINGHAM

The marriage of Walter H. Cottingham and Mrs. J. D. Miller, of Paris, France, was solemnized in New York. This event is of widespread interest in paint circles, and especially to the Sherwin-Williams organization, of which Mr. Cottingham is president.

The bride formerly lived in London, where Mr. Cottingham met her during one of the prolonged stays which he has made at his country home in England. Mrs. Cottingham has lived in Paris for the past five years.

After the marriage, which was a quiet ceremony, at which only immediate relatives were present, the couple went to Camden, S.C., for a brief stay before sailing for England on December 29. They will remain abroad until spring, when they are expected in Cleveland.

Mr. Cottingham's daughters, Miss Gladys and Mrs. Kenneth Allen and Mr. Allen, and his son, William Cottingham, attended the wedding.

PAINT OIL AND IMPERILINE OUTLOOK

(Continued from Page 58)

turpentine in quantities will be over $1.35 to $1.45 per Imperial gallon, and the best grades of resin will be laid down from $8.00 to $10.00 per barrel, providing the exchange rate against us has reached its peak. Our advice to the larger users of turpentine would be to keep on the short side of the market, buying only for present requirements as the exchange rate may possibly be less unfavorable to us after the middle of January.

"New crop conditions during the last part of February and March will have its effect upon the market. If the South should give evidences of large production next season undoubtedly resins and turpentine will find lower levels, especially if the British pound should not increase in value, and there does not appear at the moment to be any ground for believing that the domestic requirements in either the United States or Canada will very materially relieve a now heavy and listless market.

Why Turpentine Has Not Declined as Much as Linseed Oil

"The statement has been made in some quarters that the turpentine prices have not declined to the same degree as the flax seed market or linseed oil. It should be borne in mind, however, that the negro element used in the turpentine forests will never again work for the same standard of wages as existed in pre-war times, and turpentine producers claim turpentine below the 80 cent mark in the south is no longer profitable. Then again, the turpentine forests are being rapidly depleted and cannot be replaced as quickly as can the production of flax seed upon which the price of oil depends.

"The stocks of turpentine and resin now in the hands of the manufacturing and jobing trade are undoubtedly light and active buying of these commodities the first of the year would no doubt steady the present market, but there is no positive evidence in sight that the increase in busines we hope may take place in the near future will very materially advance the naval stores prices but rather that it would bring out of hiding large quantities of resin and turpentine now held in first hands and not yet reported on the several southern exchanges."

WHITE LEAD PLANTS ACCUSED OF PRICE FIXING

Five manufacturing concerns controlling over 95 per cent. of the United States output of white lead, the principal ingredient of paint, are accused of collusion and price fixing by the New York Commission investigating the alleged "building trust."

The information that the five concerns maintained equal prices and exchanged information regarding quotations and names of customers was given the committee by Charles F. Tuttle, Secretary of the American Institute of Lead Manufacturers.

Profits Before 1917 Not To Be Taxed

Ottawa.—A recent ruling of the Finance Department concerning joint stock companies provides that dividends derived exclusively from profits realized before January 1, 1917, may be distributed on or before December 31, 1920, without being liable to taxation. This ruling is confirmed by R. W. Breadner, Commissioner of Taxation.

The Luxeberry Painter Says:

"Selling varnish is an easy job for the paint store clerk when the label is the only sales argument necessary. I often think of this when I see how little over-the-counter salesmanship is wanted to sell Berry Brothers' Finishes—the same that I have used all my business life and my dad before me."

Liquid Granite Floor Varnish, Luxeberry White Enamel, Luxeberry Wood Finishes and Wall Finishes, Berrycraft Stain Finish, etc., are among the Berry products that have been staples of the painters' supply trade for more than sixty years.

Holders of Varnish Gums Optimistic

Buying Soon Expected on Liberal Scale—Varnish Gum Prices Fallen Not More Than 15 Per Cent. in Six Months

WHILE buying in the varnish gum market has been on a hand-to-mouth basis for some time and pressure from resellers, prompted in many instances through the desire to obtain ready money to tide them over, has forced a lower selling basis on many grades, the large importers do not view the situation as discouraging, says the American Paint Journal. They argue that consumers have been out of the market for several months and have most likely reached the bottom of their supplies and that as soon as the readjustment period is over they will be forced to come into the market at a fairly liberal scale.

It is pointed out that while there have been price declines, they have not been nearly so drastic as those noted in other lines and the market at present is only slightly below that prevailing the first of the year. While the demand is dull, sellers state that they are doing a regular business in small lots and that the consumers have not entirely stopped buying as has been the case in many other products. It is estimated that varnish gum prices have not fallen off more than 15 per cent during the last six months, while the declines in chemicals and oils have averaged much more than that figure.

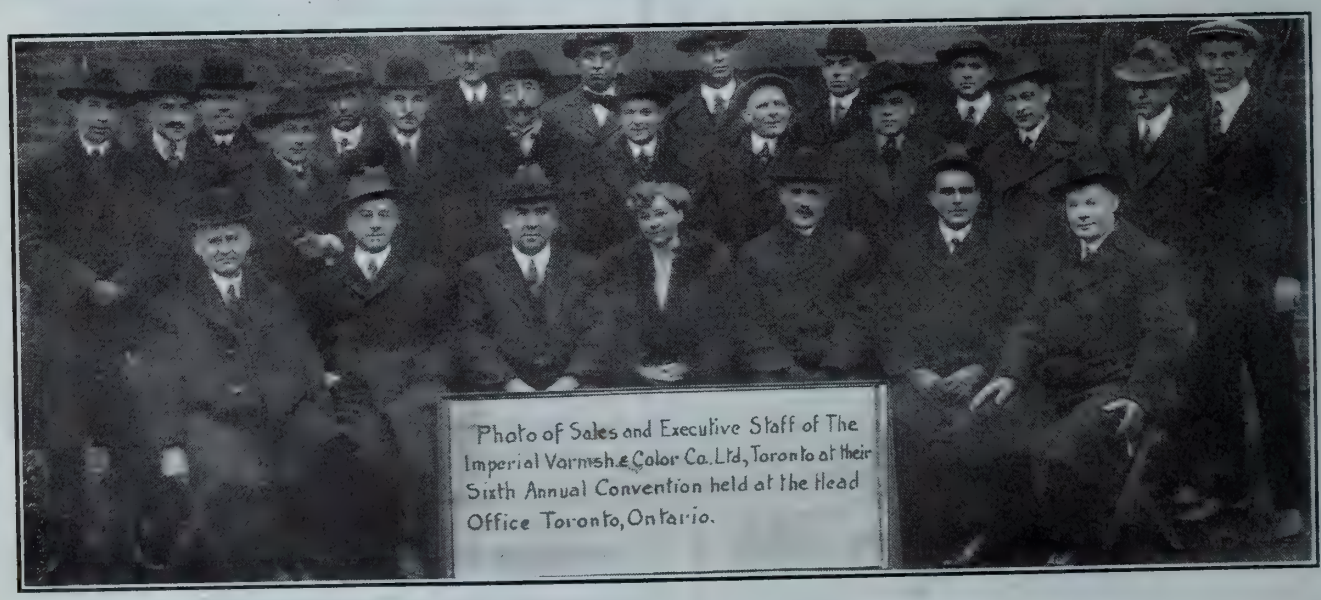
The excitement attending the decline in prices that has prevailed in many lines of trade has not been in evidence in varnish gums and the liquidation has proceeded in a most orderly manner. Consumers are known to have only small stocks on hand as they have been pursuing a conservative policy. The fact that firms which ordinarily buy 50 to 100 packages at a time are now making purchases of five and ten package lots, would seem to show that the varnish trade is in need of supplies from time to time and cannot be content to sit back and wait for lower prices.

If the importation of gums continues at the present rate until the close of the year, there will have been brought in considerably more than was imported in normal pre-war years. It is not believed, however, that this increase reflects an oversupply of such materials as the consumption of gums has grown enormously during and since the war. Considerably more gum was imported last year than during 1913 or 1914, and yet there was no oversupply on spot and prices of all grades were not affected to any appreciable degree.

Another factor which has not been felt in this market to any extent, although it has affected many other commodities, is the cancellation evil. Naturally there have been a few requests for cancellations of contracts, but generally they have been adjusted in a manner satisfactory to both buyer and seller, and for the most part there has been little request from the varnish trade for such action by the importers.

Advices from abroad indicate that present prices are close to cost of production and there is said to be little chance for anything in the way of concessions being offered.

PITTSBURGH MARKET



(Continued from Page 57)

store prices and it is the feeling of all steel manufacturers that the retailers have not reduced prices as they should. A wage reduction, particularly in a town where the employees of the plant involved furnish the chief custom for the retail stores, would stimulate the retailers to reduce their prices. Thus, from one viewpoint the employer should wait for the cost of living to come down, while from another viewpoint he should make the reduction at once in order to help the cost of living to decline. One idea has been this, to make a small reduction now and another later, but a difficulty about this, in the minds of some of the steel makers, is that upon the appearance of the second reduction the buyers of steel would probably feel that they were entitled to lower prices. According to what practically all the independent mills say now, the Steel Corporation or Industrial Board prices are going to be maintained indefinitely, and thus anything that would encourage talk of lower steel prices would be very objectionable. There are some observers, however, who insist that no matter how steel producers talk there will eventually be lower prices for steel before there is any general buying movement and before prices firm up and start advancing again. No definite predictions are made as to when such declines will come, whether in two months or many months.

Steel Prices Held

The finished steel market, as far as quoted prices go, is holding better than many people expected. There are some reports of price cutting, but not many, and in general the markets are being held. This may possibly be due to there having been so little enquiry that ade-

Weekly Paint Markets

Montreal

MONTREAL, December 30.—Business has been extremely quiet in paint lines here this week, and prices are holding firm generally.

Turpentine prices show a further reduction, but it is moving very slowly.

Linseed oil remains unchanged and quotations are holding on white lead in oil and on putty.

Paint travellers are not on the road this week, but it is expected that when they start out again there will be an increase in sales.

Turpentine Shows Lower Prices

Montreal.

TURPENTINE.—Business in turpentine is extremely quiet, and prices continue to sag. This week shows a further reduction in prices, and it is expected that prices will be still lower.

Turpentine—	Imp. Gal.	
Single barrels	1 35	1 50
Small lots	1 45	1 60
(Packages extra)		

Linseed Oil Prices Remain Firm

Montreal.

LINSEED OIL.— Business continues quiet and it is not likely that there will be any improvement during the next few weeks, owing to dealers taking stock. It is reported from Argentine that they have a crop now estimated at 55 million bushels of flax, and what effect this will have on the market cannot be determined at this time. It is likely, however, to create easier prices.

Raw—	Imp. Gal.	
1 to 4 barrels	1 15	1 33
Boiled—		
1 to 4 barrels	1 17½	1 35½
3 to 4 barrels	....	....
5 to 10 barrels	....	....

White Lead in Oil Price Is Firm

Montreal.

WHITE LEAD IN OIL.—Quotations on white lead in oil are holding firm at prices quoted last, and the indications are that for the next few months at least there will be no change. While the prices on pig lead continue to be uncertain, there is little buying either in pig lead or white lead, and manufacturers who corrode lead have good stocks at present. It takes quite some time in the process of corroding lead and the present stocks will consequently take care of the demand for some time to come.

Putty Sales Are Reported Seasonable

Montreal.

PUTTY.—There has been no further change in the price of putty. The demand is light now owing to the season of the year.

Commercial Putty	5 tons	1 ton	ton
Bulk barrels, 800 lbs.	$6 00	$6 25	$6 60
Bulk drums, 100 lbs.	7 00	7 25	7 60
Do., or tins, loose, 25 lbs.	7 25	7 50	7 85
Bulk tins, cased 25 lbs.	8 00	8 25	8 60
Bulk drums or tins, loose 12½ lbs.	7 50	7 75	8 10
Bulk tins, cased 12½ lbs.	8 25	8 50	8 85
Bladder barrels, 400 lbs.	8 25	8 50	8 85
Do., cases, 100 lbs.	8 50	8 75	9 40
Tins, 1 lb.	10 60	10 85	11 20

Standard Putty, 10c per 100 lbs. advance over above prices.

Pure Linseed Oil Putty, $2.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

Toronto

TORONTO, Dec. 30.—A quieter week is reported due to the holidays and the fact that travellers are mostly inside this week.

Little change is recorded in paint trades since the last market report. Linseed oil continues unchanged from last week, and but little trading is being done.

The flax seed market is fluctuating from day to day, but the undertone is reported firmer and a revival of business just now might induce a higher price. In turpentine there is also litttle doing and the price shows no change from last week. White lead in oil holds at previous quotations and the same can be said of putty.

Glass sales are lighter, and the undertone is easier, but retailers are carrying as small stocks as is possible, it is stated.

An optimistic feeling appears to pervade the trade and the new year is being looked forward to with confidence.

Paint and Varnish Prices Hold Unchanged

Toronto.

PAINT AND VARNISH. — No changes have been made in prepared paints or in varnish prices. Business is on the light side just now and travellers are off the road until the new year. The bookings have been fairly good and are expected to show an increase when the new year starts.

White Lead Prices Show No Changes

Toronto.

WHITE LEAD IN OIL.—There is little new to report on white lead in oil. The demand is light at present and prices are held at prices made a month ago. If pig lead prices continue at the present low level it is likely that there may be further reductions in white lead quotations, but it is pointed out that it takes some time for the corroded lead to feel the effect of recessions in primary markets. Present quotations will be found on current market pages.

Putty Sales Smaller; Prices Holding

Toronto.

PUTTY.—The sales of putty have been holding up fairly well, but are now showing a decline in amount. No changes have been made in quotations and none are expected at present. Quotations are as follows:

PUTTY—	Per 100 lbs.	
Standard in 100-lb. drums	....	8 05
Do., 25-lb. irons	....	8 30
Do., bladders in bbls.	....	9 30
Do., less quantities	....	9 55
Pure, in 100-lb. drums	....	10 55
Do., 25-lb. irons	....	10 80
Do., bladders in bbls.	....	11 80

Glass Now Quieter; Discounts Unchanged

Toronto.

WINDOW GLASS.—A quieter tone is evident in the window glass trade, and sales are smaller. Some sorting up is being reported but no large sales are being made. The American market is showing firmness, it is reported, but some wholesalers expect the Belgian window glass to have more influence on the Canadian market during the coming year than it has since the war commenced. Supplies from that source have shown a large increase during the past few months. Quotations remain unchanged at 30 per cent. off list for case lots.

Linseed Oil Prices Show No Change

Toronto.

LINSEED OIL.—There is no change of price to record this week in linseed oil. Sales are small and there is little doing. The seed market is unchanged but shows signs of firmness, and a revival in the demand would likely con-

duce to a firmer tone. The movement of oil at this time of year is naturally light and little change is expected for the present. Quotations remain as last week and are as follows:

	Raw	Boiled
1 to 2 barrels, gal.	1 17	1 20
3 to 5 barrels, gal.	1 16	1 19
6 to 9 barrels, gal.	1 14	1 17

Turpentine Held at Last Quotation

Toronto.

TURPENTINE.—Quotations on turpentine show no change this week, and last market reports of $1.55 in one barrel lots still holds. There is very little demand at the present time and wholesalers report a quiet time with consumers taking inventories and showing little inclination to do business. Quotations remain as follows:

Turpentine—	Per Imp. Gal.
1 barrel lots	1 55
2 to 4 barrel lots	1 54
5 gal. lots	1 70

PITTSBURGH MARKET

(Continued from Page 62)

quate temptation to cut prices has been lacking, and if so the turn of the year may see a more open market, for such a period of dullness as has prevailed in the past few weeks cannot be prolonged. There is another point, however. A mill cannot operate economically unless it has a fair tonnage. To cut prices and get a light operation would hardly pay, complete idleness involving less loss. As the steel mills are all in very comfortable position financially they have no incentive to operate except to make real profits.

The independent market on standard steel pipe continues at $7 to $10 above the Steel Corporation or Industrial Board list. There is a rumor that some or all of the independents will issue a new card January 1, conforming to the standard card. While the pipe mills have been running very well on orders they have had some cancellations and postponements and cannot run on orders for more than a very short time longer. However, it is the regular thing for pipe mills to carry stocks and ship from stock rather than current production. Hence the mills may hold their prices and make stock, as they have practically no stocks at present. The old practice may be resorted to of putting out a 30 or 60 days' guarantee, whereby if a new list should be issued, say February 1 or March 1, all shipments to jobbers' stocks for 30 or 60 days previously would receive an adjustment equal to the reduction.

A little foundry iron has changed hands at $35, valley, enough to show that the quotable market has not changed. Bessemer and basic have remained stagnant, with prices nominally unchanged at $35 and $33 respectively, valley. The idea has become prevalent that some of the furnaces will formally announce price reductions January 1 or within a few days afterwards, possibly to about $30 for basic iron. The date has some significance, since several of the furnace interests will then get on to lower priced coke contracts and thus will have lower costs.

Some additional contract furnace coke business for the first half of the new year is reported as closed on the general basis of 5 to 1 against basic pig iron at valley furnaces. On $30 pig iron this would mean $6 for the coke. Altogether about 75,000 tons a month has been put under contract on substantially this basis.

Extraordinary Year in Fibre Industry

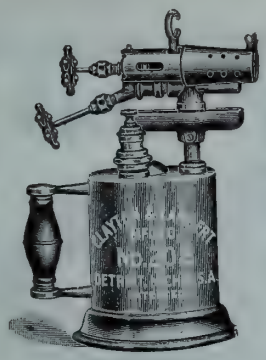
Conditions Reverse of Preceding Year—Year Closes With Lowest Quotations in Four to Six Years—Downward Sweep Since Midsummer.

NINETEEN hundred and twenty has proved to be another extraordinary year in the fibre industry. In general, it has been almost the reverse of the year which preceded it, says the Cordage Trade Journal. Members of the trade will recall that 1919 opened with fibre prices lower than at the beginning of 1918, and that there was a feeling that prices would continue to go down; but that the end of the year found values of such fibres as manila, istle, jute and cotton on a higher level than at the beginning of the year. Therefore, 1920 opened with these fibres strong and their strength led to expectations that the year would be a strong one throughout. This belief was fortified by the statistical position of many fibres, for during the greater part of 1920 the actual consumption of such fibres as manila, Mexican sisal, cotton, etc., appeared to be greater than the current production. In the autumn jute appeared to move into a strong statistical position as a result of the poor crop yield. But, beginning last summer, there has been a most astonishing sweep of values downward, until the year is closing with virtually the lowest prices ruling that have obtained for from four to six years, some prices now being back to those that ruled on July 1, 1914, about a month before the great war began.

Movements of Manila Fibre

Manila fibre has had during the year several distinctive movements, fluctuating most naturally in accordance with the law of supply and demand. During the early part of the year, although production was then on a larger scale than in 1919, the demand was so good that prices moved upward, while during the last two or three months, although production has been light, the demand has been so poor that prices have fallen sharply, so that this week's quotations are lower than have ruled since November, 1916.

Mexican sisal has been the mystery fibre of the year. Because of the relatively low price at which it has sold, due to the large stocks controlled by the Comision Reguladora del Mercado de Henequen and its associate, the Eric Corporation, there has been a considerably increased consumption of it in 1920. This has reduced the stocks in the United States and Yucatan, as the current production is nothing like what it was a few years ago and it is considerably below the maximum output that was scored during the palmy days of the Comision Reguladora. During the year many efforts have been made to get all interested to come to some agreement that would practically or actually re-establish a monopoly in Yucatan; but thus far none has succeeded. Last month the Eric Corporation, controlled by bankers in the United States, made a price of 6 cents, Gulf ports, the lowest price that has ruled since 1915. This has brought only moderate business.



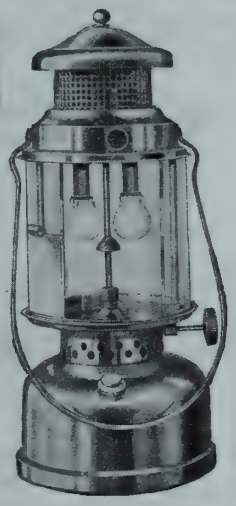
Other sisals than Mexican have been in good demand during most of the year; but the demand here for them has been destroyed, for the time being at least, by the low prices now ruling for Mexican sisal. Java sisal has sold at a premium of between 2½ and 5 cents per pound over Mexican sisal throughout the year.

Unusual Year for Soft Fibres

Soft fibres have had a most unusual year. Italian hemp values have passed through two different phases, one advancing and the other declining. In point of time, these phases occurred virtually in the two halves of the year. During the first two quarters of the year, Italian hemp quotations here showed net gains.

Jute has had a notable year. Opening on a relatively high level, the quotation for first marks being some 3¼ to 3¾ cents higher than Mexican sisal, with which it competes in some branches of the cordage trade, it is closing the year, notwithstanding the Indian Government's forecast of the shortest jute crop in many years, from ⅜ cent to ⅞ cent less than the current New York quotations for Mexican sisal.

Cotton during the year made new high records for this generation on the strength of prospects of a short crop; but, with the cessation of the demand for manufactured goods and unusually favorable weather conditions, which have resulted in a final crop yield considerably greater than was forecast by the Government earlier in the year, prices have melted away like snow in a February thaw.



No. 208 TORCH

ANY WEIGHT. EIGHT FEET WIDE. ANY LENGTH.

THE CANADA METAL CO., LIMITED, TORONTO

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day. That's

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

To all probability, your customers' specifications for an IDEAL CLOTHES-LINE, would be one that was WEATHER ROT, STRETCH and RUST PROOF, one to which clothing would not FREEZE—STRONG and DURABLE, and still not EXCESSIVE in PRICE.

AERO CORD

is the ONLY cordage coming within these specifications, and the sale of which will net you a good profit and give your customers ABSOLUTE SATISFACTION.

Manufactured by

THE AERO MFG. CO., Limited

Factory: LENNOXVILLE, QUE. **SHERBROOKE, QUE.**

Barrett Roofings, Cements Industrial Paints etc.

Prepare for Bigger Business

MORE and better advertising than ever before—
That's the Barrett program for 1921, and it means quicker, easier sales and larger profits for every dealer who handles the famous Barrett Products.

These products, which are listed below, have made good on their own merits. For many years they have been fast sellers in every section of the Dominion. Each of them is unequalled for its particular purpose.

Everlastic "Rubber" Roofing

The most popular roll roofing on the Canadian market.

Liquid Elastigum

Preserves the surface of prepared and "rubber" roofings.

Everlastic Liquid Roofing Cement

Puts a new surface on worn-out prepared and "rubber" roofs.

Everjet Elastic Carbon Paint

A durable, waterproof, acid-proof, protective paint for wood and metal.

Elastigum Plastic Patching Cement

"The waterproof cement of a thousand uses." Repairs roofs, flashings, etc.

Creonoid (Fly Oil) Cow Spray and Lice Destroyer

Just what farmers want. Inexpensive, effective and easy to use.

This year there will be an unprecedented demand for these products. If you do not carry them *all*, you will miss a sure opportunity to increase your profits.

Descriptive booklets regarding any of these products sent free on request. Address nearest office.

THE CREDIT MAN

of a manufacturing or commercial concern must know now the financial standing of the firms to whom his company extends credit. He has his Dun or Bradstreet.

The Purchasing Agent or the buyers of various departments must be convinced that the goods delivered are as represented in both weight and quality. They have their scales and testing apparatus.

The Advertising Man must know that the circulation claims of the papers with which he does business are justified by the facts. He has the reports of the Audit Bureau of Circulations.

Good firms invite investigation of their rating or their merchandise.

Good papers furnish A. B. C. reports to their advertisers.

Hardware and Metal is a member of the Audit Bureau of Circulation.

MYERS PUMPS

We are manufacturers of a complete line of Pumps for Every Purpose—pumps for operation by hand or windmill—pumps of larger capacity for power operation—pumps in styles and sizes to meet capacity, depth, motive and installation requirements. If interested in Pumps for any service, write us for Catalog.

TINKER TOM'S TALKS.

No. 292

Well, Well!

Here we are again with the old salutation that has greeted the dawn of each New Year since measured time began.

For 292 weeks we've said our little piece and gone back to work—enjoying every day of it—through good times and bad—glad to be of service—to have established and operated for mutual benefit a new Canadian industry.

For your kindness—your patience and forbearance—as well as the business which came our way, we thank you. Every last one of us is lined up to give you Premier quality—lowest price and improved service in 1921—We are ready to do our part in making it

A HAPPY AND PROSPEROUS NEW YEAR

TINKER TOM

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

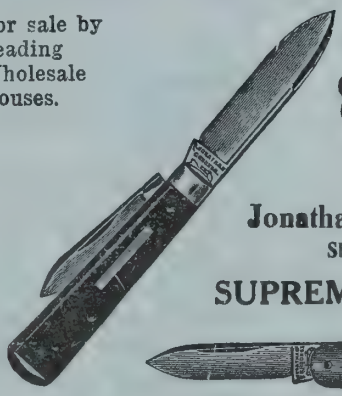
Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

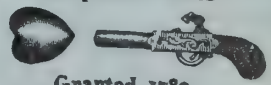
Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.



Increasing Consumption of Your Product Through Dealers' Influence on Customers



When your reputation is thoroughly established, when the value of your organization is fully appreciated by the trade, when your product and its use are fully understood, when distribution seems ideal, the day has come to skillfully direct your continuous advertising on increased consumption of your product through the dealers' influence on customers and sales.

A weekly message through Hardware and Metal—where the whole hardware trade of Canada seeks its business news—will supply the dealer and his clerks with the selling points of your product, the sales plans you have evolved, and furnish the means and inspiration for increasing consumption of your product to your pleasure and profit

For sale by Leading Wholesale Houses.

"Save the surface and you save all" *Paint & Varnish*

Stephens'

REGISTERED TRADE MARK

Silkstone Flat Wall Colours

For beautifying homes all the year round. Silkstone is not merely a "spring re-decorator," but an all-the-year staple that housewives are buying for the home whenever the spirit moves them to "do the walls."

The housewife is "sold" on Silkstone because she knows that it is cheaper than wall paper and can be washed without rubbing off. The soft, silky finish has an appeal for the home-lover. Silkstone out-wears all other wall coverings.

The economical side of Silkstone; its beauty and its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably—learn what's in it for you in an agency.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND
A
ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Buckeye Incubator and Fittings

Good Displays Mean Easy Sales

The hardware dealer in rural districts will find much scope for many new sales by looking up farmers, poultry farmers, etc., and supplying them with new machines or fittings.

Display Buckeye incubators and fittings in your window and where your customers will see them.

The superior merits of these machines will be instantly recognized and sales easily closed.

Proof that their success and great sales are founded on merit is shown by their continued use at Canadian institutions like MacDonald College, Ontario Agricultural College and by many Canadian poultry farms.

Confidence

Like all the lines handled by Ashdown's, they're good sellers. For fifty-one years Ashdown's has had the confidence of manufacturers of the best lines.

Let us put a Buckeye in your store to demonstrate and boost your trade.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything, forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500-lb. containers.

Here's a Money Maker!
MAPLE EVAPORATOR
AND
WELDED STEEL SAP PAN

This evaporator fills the popular demand for a handy, efficient, up-to-the-minute machine at a reasonable price.

It is specially made to meet the requirements of the small farmer who wishes to get all the money profits out of his maple bush without too heavy an outlay for apparatus.

Welded Sap Pan no solder about it to melt or leak—a pair of handles on each side and heavy angle steel around top.

Standard sizes: 6″ x 24″ x 5′; 6″ x 30″ x 7′; 6″ x 24″ x 7′; any size to order.

Placed on market last year and proved a great success.

Write us for trade prices and further particulars regarding these two money makers—we also manufacture steel baths, tanks, sanitary closets, dairy equipment, etc.

Send list of prospective buyers and we will mail literature to them.

STEPLADDER STOOLS
Every Housewife a Prospect--Serviceable and Salable

This stool is made from hardwood, is 25 inches high when opened, with an 11-inch top. It is light and opens automatically. Impossible for the stool to collapse while in use, and nothing to lock or unlock when opening or closing. Takes little room, as cut shows.

The wide top makes the stool seat, which enables the housewife to sit down while working at a kitchen cabinet or table, or at any other kitchen work, and also provides a broad, secure footing when used as a stepladder.

Besides its varied use around the house—stores, offices, libraries and workshops offer a wide field for its sale.

Display Fixture For Sale Cheap

Some months ago we bought a new Universal Display Fixture. Owing to limited space, however, we will now dispose of this stand.

Here is an Opportunity For Every Storekeeper

We want to get this Displayer off our hands immediately.

It is the latest type—about 10 feet long, 6 feet high and 3 feet deep. Has 10 double-sided swinging panels of solid construction and green baize facing. Oak and metal frame. Electric canopy lighting. Especially suitable for displaying cards, pictures, albums, small accessories in hardware store, wall papers, electrical fixtures, office supplies, jewellery, etc., in fact for any business requiring efficient display.

This high quality Displayer cost nearly $400.00. Its condition now is as good as the day we bought it new.

No reasonable offer, if submitted at once, will be refused, If further particulars are desired write us at once. Hyslop Brothers, Limited, Shuter and Victoria Sts. Toronto.

If interested tear out this page and place with letters to be answered.

WANT ADS

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

FOR SALE

ONLY $400—ONE NINE AND A HALF FOOT wall case, one four-foot and one four and half-foot silent salesman, all mission oak. Will crate to ship out of town. Apply 546 Yonge Street, Toronto. North 6305, evenings North 6583.

HARDWARE STOCK AND BUILDINGS FOR sale in town of 1,500 in best farming and fruit-growing district in Grey County. About twelve thousand will handle. Stock can be reduced. Ill-health reason for selling. Turnover about forty thousand, can be increased. Box 18, Hardware and Metal.

TIN PLATE FOR SALE—

75 Boxes	105 lbs.	—20 x 28
50 Boxes	107 lbs.	—20 x 28
116 Boxes	100 lbs.	—20 x 28
4 Boxes	100 lbs.	—22 x 27
55 Boxes	55 lbs.	—20 x 28

This tin plate is Prime Cokes at Toronto warehouse. Box 28, Hardware and Metal, Toronto.

260 ROLLS FIRST-CLASS ROOFING FOR sale cheap. Must have room. Wheeler & Bain, 170 King St. E. Main 784.

BUSINESS WANTED

WANTED—TINSMITHING BUSINESS IN GOOD town, connected with hardware store. Apply A. C. Waters, 16 Callendar St., Toronto.

SITUATIONS WANTED

WANTED — POSITION AS FOREMAN ON sheet metal work, accustomed to cornices, skylights and general sheet metal work. Apply Box 44, Hardware and Metal.

EIGHTEEN YEARS' HARDWARE EXPERIence, retail, wholesale and builders' hardware. 34. Married. Would like to represent manufacturer builders' hardware lines in Eastern or Western Canadian territory. Will be in Toronto last week in December. Address Box 38, Hardware and Metal.

HARDWARE SALESMAN—THIRTEEN YEARS' experience, can take charge of store, open for position first of year. Would prefer Saskatchewan, Alberta or British Columbia. Best of references. Box 81, Hardware and Metal.

HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

IN WRITING ADVERTISERS, PLEASE MENTION THIS PAPER.

Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND METAL are big buyers because they buy for business as well as for private consumption.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

Also name plates, embossed trade checks, time checks, badges, steel stamps and stencils or anything in steel or brass lettered or embossed to order.

SAVAGE

NOW SECURE YOUR STOCK!

For years you've stocked the Savage Automatic, the Pistol that "aims as easy as pointing your finger." You know it—have handled it—have sold it to your customers as the Champion Pocket Gun—the home protector.

What about you? Have you a Savage located conveniently in your store, so that you can get at it, and utilize these 10 quick shots to guard your stock against the sneak thief or the bolder, more daring hold-up man?

Big banks recognize this peril, and are training their Tellers to shoot straight and shoot quick.

And you've put Savage protection in countless homes.

You've stocked this security for years—NOW SECURE YOUR STOCK.

Caliber .32 . . . . . 11 Shots
Caliber .380 . . . . . 10 Shots

We'll supply descriptive booklets on the new Savage Automatic, with the grip that fits the hand. They will help you sell yourself.

REMINGTON UMC

Make 1921 Your Biggest Year

Mr. Dealer:

There's more interest being shown in shooting than there has been for years. The Shooting Clubs that were neglected during the War have been reorganized and hundreds of the boys are taking up this manly sport.

Shooting will be more popular than ever.

Be prepared to supply the renewed demand for the best and most modern shooting equipment. Sell Remington UMC's—Rifles, Shotguns, Cartridges, and the new .380, eight shot, automatic pistol. Remington goods mean satisfaction to your customers, and quick, sure profits to you.

Stocks at all Jobbers.

WHAT WE EXPECT OF 1921

We face the New Year with a smile—and with much determination.

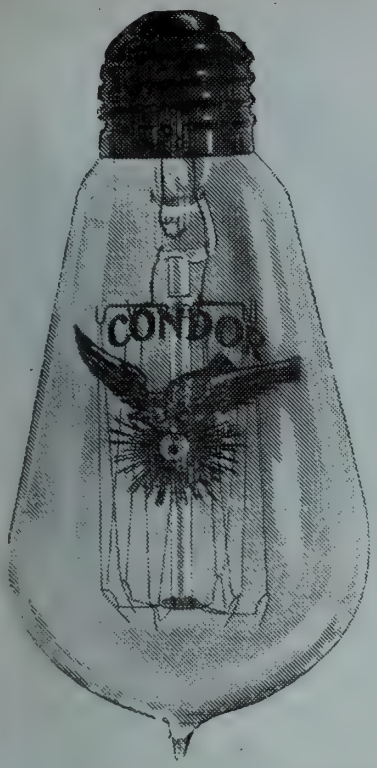
We urge you to do the same.

1921 will be what we business men of Canada make it.

A calm survey of the situation will convince any thinking man that Canada is on the eve of a wonderful development.

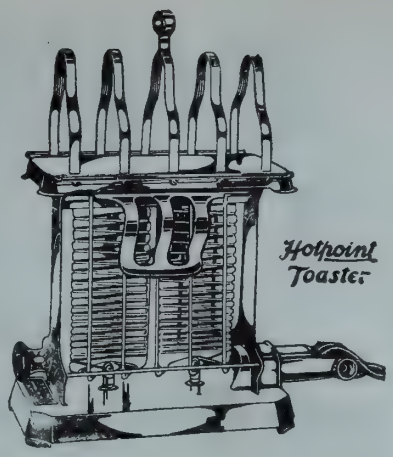
To prove our confidence in the immediate future, we have just placed contracts for the largest and most spectacular advertising campaign in the history of our business.

O-Cedar sales are going to be the biggest ever—our aggressive selling and advertising will make things hum in 1921.



O-Cedar will help to make things hum around your store. It is one of the biggest trade-pullers that you stock.

Give it a chance—by placing it in your windows and in a prominent place in your store.



Channell Chemical Co., Limited, Toronto

HARDWARE AND METAL, January 8, 1921. Volume XXXIII., No. 2. Published every Saturday at Toronto. Yearly subscription price, $4. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

Things Electrical

There is a growing tendency for hardware dealers to go into the electrical appliance business more extensively than ever. It's an all-year-round business, clean-cut, no style changes, always good. Here are some of the lines we can supply you with:

Condor and **Ajax Tungsten** and **Nitrogen Lamps.**

A full line of **Hotpoint** Electrical Appliances, **National** Electric Irons, Upright and Flat Toasters and Heaters, **De Luxe** Electric Irons and Toasters.

A full line of **Canadian Beauty** Appliances. **Ohio and Cadillac** Vacuum Cleaners. **Columbia** Hot Shot Batteries. **Eveready Daylos** and Flashlight Batteries, Lamps, etc.

Ask the "Rice Lewis" man.

If the Dealer did the Ironing!

IF the dealer could do a little sample ironing in the store, it would be easy to convince any woman of the quick-heating, smooth-working qualities of the Universal Iron.

In the store, the Universal is but well designed, well finished metal—cold, inanimate, unresponsive. But in the home, on the ironing board, it quickens into life—a life of service.

After all, the Universal isn't metal; it isn't theory; it isn't what ingenuity designs and skill executes. The Universal Iron is Service itself—hot, dependable, continuous Service throughout years of ironing days.

The Universal is the result of slighting nothing, taking nothing for granted, proving everything. Non-stopping satisfaction goes with every sale and a liberal profit to the dealer.

An Old, Reliable Salesmaker

"Canada"

Flexible Steel Door Hanger

Cannot Jump the Track

The "Canada" runs smoothly and easily on anti-friction, steel roller bearings, using the same track as our famous "National" Hanger.

Commercial conditions invite liberal stocking of Builders' Hardware for a record-breaking building season—Canada is short more than 40,000 homes. She has more autos than any other country excepting one. Autos in Canada continue to increase in number. Between the increasing number of cars and their necessary housing and the inevitable building activity to restore the balance of supply and demand in buildings, the Canadian merchant can profit by "preparedness" on builders' and garage hardware. Order now.

The Braced Rail, shown above at the left, is 1¼ x 3/16 inches and is furnished in lengths of 4, 6, 8 and 10 feet; 8 lengths to the bundle.

The "Canada" comes neatly and conveniently packed, one pair in a box complete with bolts. Be sure to include "Canada" in your order.

Keeping Butterfield Tools Displayed Brings Sales

A display of Butterfield Tools attracts the attention of machinists and mechanical men. It advertises your store and impresses it in the minds of tool users and buyers. The sight of a certain tool often brings to memory a forgotten need for it.

Frequent displays of Butterfield Tools mark your store as the place to buy tools. The tools you sell to-day may have caught a prospect's eye in a display last month or a year ago. A display of Butterfield Tools informs every possible buyer who sees it that year store handles these desirable tools.

Keeps Dust Down--

IMPERIAL
FLOOR DRESSING

Imperial Floor Dressing comes in one and four-gallon lithographed sealed cans, and in half-barrels and barrels. Ask the Imperial Oil salesman for prices and a demonstration.

Dirt is bound to accumulate in busy stores. But it can be kept from settling on your stock and shelves in the form of dust if you use Imperial Floor Dressing.

Customers will be attracted by the absence of dust in your store, by the neat appearance of your merchandise, by your "spick and span" displays and bright show cases.

One application of Imperial Floor Dressing cleans and preserves floors and prevents dust from rising. One gallon will treat upwards of 700 square feet and does not need renewing for weeks.

Imperial Floor Dressing is non-evaporating and non-gumming. It catches and holds the dust on the floor where it can easily be swept up and disposed of. It is the most sanitary and satisfactory dressing you can buy—or sell—for floors, linoleum or oil cloth.

Its effective use in your own place of business creates a big market for floor dressing among your customers. Talk to the Imperial Oil salesman about it.

Story for Week Dated January 8th, 1921 Being No. 39 in the Series

Busy Scenes in the Eddy Company Paper Bag Factory

ALTHOUGH not by any means the largest of the factories at the E. B. Eddy plant, the Paper-Bag Factory is certainly one of the busiest. The work of paper-bag making is carried on by quick-fingered girls who take care of the most ingenious machines. The speed of these machines is exceedingly rapid. They have to be fast to maintain an output of a million bags per day.

Every particle of paper used in Eddy Company paper bags is manufactured at the Eddy plant out of wood pulp by the clean, careful processes of which you have read. The factory in which the bags are made is airy, and brightly lit by many windows. The girls who watch the machines are a merry, healthy bevy, as nimble at their work as the girls of the match factory, and as happy in the doing of it.

Special rolls of paper of various necessary sizes are used for the manufacture of Eddy Company paper bags. These are delivered as required to the bag factory, and feed the eager machines in almost ceaseless succession. Paper bags to hold from a few ounces to a great many pounds are all manufactured at various rates of speed.

The little quarter pound bags come tripping out of the machines at the breathless pace of 225 per minute. It takes a bright, alert girl to see that they arrive in perfect order and all efficient for service. Sixteen pound bags proceed more slowly—at about a hundred per minute—and girls who are new to the business begin with the making of the bigger bags.

The same sort of machinery makes both big bags and small, so that a girl who has learned to manage a 16-lb. bag machine can go on to a faster running machine, making smaller bags as she grows expert. How the machines work will be told here next week.

If interested tear out this page and place with letters to be answered.

How Many Kinds of Hack Saws Do You Sell?

We had an interesting talk with a big hardware dealer the other day.

He made some wise remarks about selling that are worth a good deal to other hardware merchants who will follow them. So we pass them along for your consideration. He said:

"This is an age of specialization; and we specialize in leaders, because we turn our money over faster that way.

A few years back we had $12,000 tied up in 9 different makes of hack saw blades. Our sales in this item totalled about $25,000 a year, so we were turning over our stock only about twice a year.

We decided to cut our line to just one leader; now we turn over our stock much faster—I should say four or five times a year.

We picked the one that most people knew and liked, and cut out all the rest. Our purchasing agent, a close Scotchman, found out that Star prices and discounts were as good as any other, so from that day to this we have sold no blade but the Star."

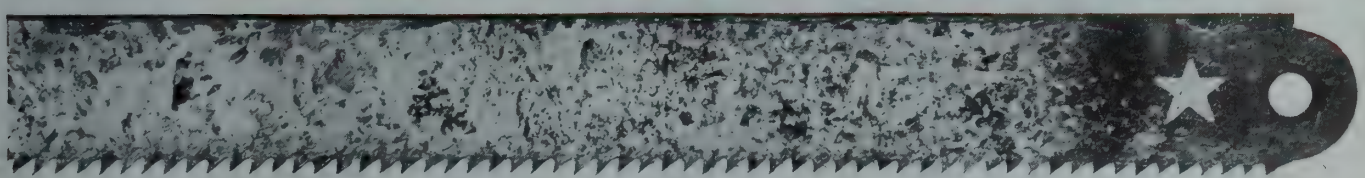
There is a lesson here for any wide-awake hardware man. You know the value of fewer lines and quicker turnover. Have you applied it to your stock of hack saw blades?

Geo. N. Clemson *President.*

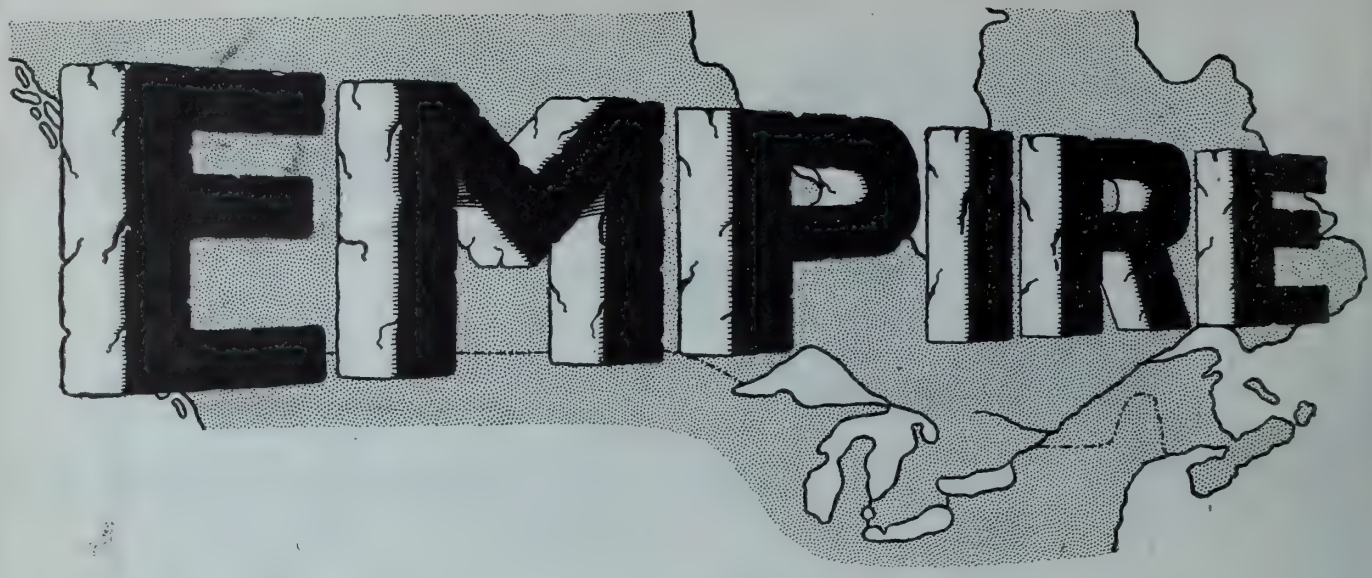
CLEMSON BROS. INC.

There are few hardware dealers today who do not recognize the value of handling nationally advertised goods. For a number of years Star Hack Saws have been steadily and strongly advertised in a way that commands the attention of any user of hand or power blades.

The above reproduction shows the latest double page advertisement in the Saturday Evening Post.



It is advertising like this that has made Star leadership in the hack saw field more conspicuous than ever. When you carry Star you can satisfy every hack saw demand. Hack saw users everywhere understand that there is no such thing as "just as good as Star." And dealers realize that standardizing on Star means a smaller investment, a greater turnover and a greater profit.



Since August 15, 1920, Star blades have been sold to the trade by the makers. The former arrangement of selling through agents has been discontinued, as we feel that we can serve our customers better by maintaining a closer contact with them. We invite correspondence and receive suggestions from the trade on any subject connected with Star Saws.

Clemson Bros. Inc., Middletown, N.Y.

Canadian Office and Warehouse: 304 Imperial Office Bldg., Hamilton, Ont.

STAR HACK SAW BLADES

PRODUCTS OF MERIT

The word Empire is a symbol standing for brass goods, plumbing supplies and sanitary fixtures of merit. Every article is of the choicest quality and designed to give maximum service.

So it is with this brass spray nozzle, No. A-1981, which adjusts readily from a misty spray to a coarse one, and then to a solid stream. It is always in demand where hose is used. Then our hose coupling No. A-1982 goes hand-in-hand with it, for it is well machined with deep, even threads and is a necessity wherever hose is used. They really sell together and in large quantities.

Empire products are handled by jobbers everywhere and by demanding EMPIRE goods you assist in bringing the Canadian dollar back to its full 100 cents.

EVEREADY

$10,000 Contest Announcement Week

February 1st to 8th Inclusive

What did the Letter Say?

You tell 'em through Your Windows

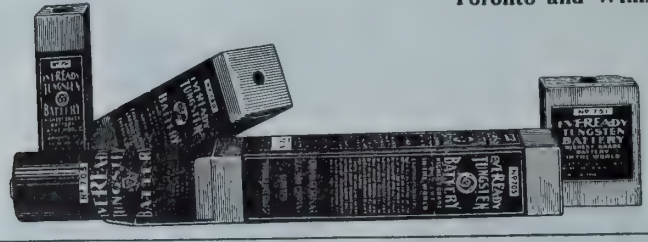
THROUGHOUT Canada, announcement of the winners of the great Eveready Prize Contest will be made during the week of February 1st to 8th inclusive. This is your opportunity.

So great was the response to this novel Contest that the announcement had to be deferred, in order to give the judges ample time to sift and select the winners.

Over 350,000 answers were received, indicating the widespread appeal of the Contest. Folks everywhere are anxiously waiting to hear who won. Now—

In accordance with the Eveready policy of Help the Dealer, newspaper ads will not carry complete list of winners. Instead, people will be told to *see their dealer's window.*

They must go to your store, look in your window, and get the answers *there.* Here is a real, merchandising idea that will direct the great tide of interest to *your place.*



Get ready *now* to handle the crowds that will come to you to find out who won. Look over your stock. Get in your order without delay for Eveready Flashlights and Batteries.

You'll need a good stock for your shelves and windows. Be ready to put in a striking window display that will flag passersby and bring them inside for details of awards and—*incidentally*—for flashlights and batteries.

Remember, this Contest was instituted for just one purpose—to *sell* Eveready Flashlights and Batteries. If it fails to roll up sales for you, our money has been thrown to the birds.

But—you are going to see it through. It cannot fail. The interest has already been created. Our advertising will send the people *to* you. It's up to you to give them information, merchandise and service—and take their money.

Get Closer to that Customer the Garage-man

A HARDWARE business that is run right can do more than merely fill orders. It can *create* orders; which is the same as saying *go out and get new business.*

For the past two years the Greenfield Tap & Die Corporation has been pounding away at this idea as the only way to increase its trade through hardware dealers. And every day we become more and more convinced that we're *right.*

Take your threading tool business in garages, for instance. We find from actual contact with garage-men that there is an imperative need here for at least *three* different styles of the threading tool sets we sell.

No. AA4 *Little Giant* Screw-Plate (for magnetos and other small work).

No. **312** *Little Giant* Screw-Plate (for engine and chassis repair).

No. **260** A Set of *Little Giant* Pipe Stocks and Dies (for pipe connections).

And we say this straight from the shoulder to hardware dealers who are or ought to be selling the GTD line:—*until you've visited and sold* every garage-man in your territory these three items (and maybe others) you haven't scratched the surface in your territory for threading tool sales—and re-sales (which means replacements).

Why not make a list of the garages near you where these tools may be sold and send such a list to our Dealers' Service Section? If you will do so, we will give you intelligent cooperation both in stocking the tools you need and in supplying advertising material to move them.

*On account of the freight the established retail prices on carpet sweepers are 25 cents higher than above and on our vacuum line 50 cents higher in the following Western provinces: Man. (excepting the City of Winnipeg), Sask., Alta., B.C.

"It affords us a great deal of pleasure to inform you of a reduction in our prices taking effect to-day as per prices quoted herewith. With the reduction made in our list prices to the trade the retail prices to the consumer can be reduced, and which should greatly increase the sale of our goods."

* * *

"To stabilize our line and to enable our customers to order in sufficient quantities to meet reasonable demands for the first six months of this year, **we want to emphasize that there will be no change in our prices before July 1st."**

From our New Year's letter to the trade.

A Hammer to Hit the Slump on the Head

A slump in your usual trade need not mean a slump in your profits. What if some lines are slow movers—how about the unexplored avenues of business?

There is bound to be building or remodelling going on in your town or locality. Have you thought of the fire escape for the school or the factory, the wire window screens, the wirework around the elevator, or guarding dangerous machinery, the teller's cage, and the brass railings for the bank, the church, or theatre?

A Big Field of Prospects for the *Westco* Tankless Water System

In rural and suburban districts and on farms, the need of running water is urgent. The convenience and reliability of the Westco Tankless Water System appeals strongly to those people having electricity available.

These Westco features make strong talking and selling points:

(a) Requires no storage tank. Water is pumped direct from source of supply to taps.

(b) Entirely automatic; open tap, pump starts at once; close tap, pump stops.

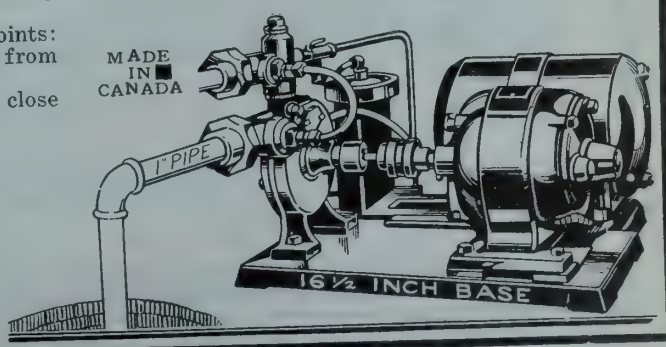
(c) Inexpensive to buy, install and run.

(d) Is vibrationless and silent in operation.

(e) Has no gears, no belt, no valves.

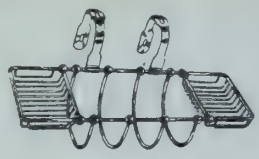
(f) Has only one moving part, and is self-lubricating.

But Above All—Thoroughly Reliable.



Westco Pumps, Limited

707 Yonge Street, Toronto, Ont.



Handsome Profits for Westco Agents

Farmers everywhere are demanding a reliable, compact water system such as the Westco. In addition to this huge field of farmer prospects there are the suburban and outlying districts of cities and towns where the hand pump and well are still being used. **Our dealers and agents are making splendid profits.** There are still a few really good territories left open. Write us at once for our selling arrangement and other particulars.

What of Hardware Stocks on Which Luxury Tax Has Already Been Paid?

Automobile Dealers' Protest May Also Apply to Electric Fixtures, Gas Fixtures, Ammunition, Musical Instruments, Boats, Etc., on Which Hardware Merchant Has Paid Tax to Manufacturer and on Which Customer May Now Ask Reduction of Luxury Tax Amount.

TAKING off those luxury taxes on hardware lines which were collected and remitted to the Government by the retailer himself was a comparatively simple matter and one which would not lead to any complications. Taking off the luxury tax which was collected and remitted by the manufacturers is considerably more involved. The cause for complication lies in the fact that manufacturers had already collected the luxury tax on certain hardware lines sold by them to the jobbers and thence passed on to the retailer, when the tax was taken off, and the natural result is that retailers find themselves to-day with stocks on their shelves on which a luxury tax has been paid and which they may find difficulty in collecting from customers who know the tax has been removed.

In the hardware trade lines on which manufacturers collected the tax were as follows:—Chandeliers (except for churches) over $12 each, 10 per cent; electric light fixtures (wall) over $3.00 each, 10 per cent; firearms (shells, cartridges, etc., except for militia purposes) 10 per cent.; gas wall fixtures over $3.00, 10 per cent.; gramophones, phonographs, and other musical instruments other than band instruments, 10 per cent.; boats (yachts, canoes and motor boats, except if used for trading) 10 per cent.

Under this heading also came automobiles and automobile dealers are now taking up their case with the Government with a view to securing refund of tax paid on automobiles in stock.

With a view to finding out if such action was warranted in regard to those lines on which tax has been collected and which might be expected to suffer in competition with new deliveries coming forward on which no tax has been collected by the manufacturer, Hardware and Metal has made enquiry among manufacturers, wholesalers and retailers.

Hold Prices Till Stocks Cleared Out

Briefly the stand taken by jobbers and retailers who are holding stocks on which tax has been paid is that they will sell those stocks at the same price as they have been doing recently, including the tax which they have paid. When these stocks are cleared out and are replaced with stock on which the tax has not been charged there will be a proportional decrease in the price of such lines. This plan is not being followed out in every case however.

Discussing the matter with a manufacturer of phonographs and other musical instruments, it was pointed out to Hardware and Metal that when the luxury tax was applied on such lines at time of sale by the manufacturer, new catalogs with prices including the tax were immediately issued to the trade and retailers were thus enabled to take advantage of the increase immediately on stock on which they had paid no tax to the manufacturer.

"As far as our lines are concerned the hardware merchants should not forget that they took the profits when the tax was put into effect," said this official, drawing attention to the fact that as stocks generally held now are lighter than at the time the luxury tax was effective the profits at the one end will more than offset any decrease in the profit now to be taken by allowing customers for the luxury tax on stock now on hand. This firm has issued new prices minus the luxury tax, for the use of the trade, and as these prices are adhered to strictly it is considered unlikely that any merchants will hesitate to make this allowance. Some manufacturers of musical instruments have stated that it is not their intention to reduce prices until material in stock, on which tax has been paid at importation, has been fully disposed of. Such manufacturers are desirous of keeping prices up so that they will not suffer from the removal of the tax.

Less Profit—Not a Loss

It was pointed out by this official that merchants will not be compelled to take a definite loss on such instruments as are in stock, but that they will have to take a less profit than otherwise. This firm had foreseen the possibility of the tax being removed and had encouraged merchants to make some allowance and clear out stocks so as to minimize as far as possible any chance of trouble with customers.

It was pointed out that there would not likely be any move on the part of wholesalers or retailers handling this particular line to have any refund made, owing to the fact that the condition was not serious and the giving of such refunds would, it was thought, result in a revenue shortage that might cause a more severe form of tax to be applied later.

Three Distinct Classes

In this connection it was pointed out that this case was somewhat different from that of the automobile dealers. There were said to be three distinct classes, the jewellers in one class, whose line was possibly the greatest luxury of all and yet who were given a very simple form of taxation levied at time of sale; automobile dealers were shown to suffer most, under a tax measure which made it necessary for them to pay a tax on cars which were in their possession when the tax was applied. It was evident therefore that these dealers had no way of making an additional profit at that time to recompense them for the loss taken to-day. The third class was described as such lines as those on which the manufacturer collected tax at time of sale, which did not apply to stocks already held by jobbers and retailers, and on which an additional profit could be realized to recompense them for the loss to be taken to-day if the luxury tax is taken off current prices.

The musical instrument business has not felt any great stimulus yet as result of the removal of the luxury tax, but the opinion was expressed that its removal would have a good moral effect upon business this year.

Electric Fixtures

A manufacturer of electric fixtures stated to Hardware and Metal that the revenue in taxes from this branch of business had been so slight that its effect on prices would be hardly noticeable now that the tax has been removed. He stated that 90 per cent. of the fixtures sold to the hardware trade came under the exemption figure of $12 for chandeliers and $3 for wall fixtures. There will, of course, be a decline proportionate to the amount of the tax formerly charged.

An interesting point brought out was that owing to the fact that a fixture which would cost less than $12 as it left the factory would, when wired and fitted with sockets, shades, etc., sell for probably $25, it was ruled that a dealer contractor who added these parts was a manufacturer and therefore should charge the 10 per cent. tax on the value over $12 of the fixture. Shortly before the luxury tax was removed, a deputation went to Ottawa and succeeded in having this ruling eliminated. For this reason there would not be many fixtures sold which became liable for luxury tax when sold by the manufacturer and any serious complications with customers in the retail trade over prices on fixtures as result of the removal of this tax is not anticipated. Meanwhile jobbers of electrical fixtures intend to clear out present stocks without making any allowance for luxury taxes.

As far as ammunition is concerned it will be noted that a decline has been announced this week by at least one Canadian manufacturer. The decline is equivalent to the amount of the luxury tax and it is stated to have been put into effect as result of the removal of these taxes. Stocks of ammunition in the hands of either retailers or wholesalers are not generally heavy at this time of year but on such stocks as are on hand this manufacturer stated that the higher price secured on stock on hand when the tax became effective will make up for the lower prices now being charged the trade and from which customers may seek to benefit.

Misleading Advertising Injures Tire Business

Manufacturers Urge dto Refuse to Accept Such Classification as "Blemished," and "Seconds" Be Advertised Only as Such—Dealers Urged to Set an Example by Abandoning Deceptive "List Price" Comparisons, Claims of Enormous Savings, Misleading $1 Sales or Bargain Offers

THAT the tire business as a whole has been injured by the misleading advertising of cut-price dealers in selling rebuilt tires and so-called "factory seconds" is the conclusion reached in a bulletin just published by the National Vigilance Committee of the Associated Advertising Clubs, based on that committee's investigations.

"There is no objection to reconstructed, rebuilt, or to 'second' tires as such. There is a legitimate market for them," says the committee in commenting upon facts in its bulletin. "But it is the representations under which they are sold which constitute a serious menace to public confidence in all tire advertising. Instead of giving the complete facts, which would clearly show the true character of the tires offered for sale, irresponsible dealers either intentionally leave them out or so subordinate them that a misleading impression is produced.

Manufacturers Somewhat to Blame

"Manufacturers have been somewhat to blame for the loose use of the word 'seconds,' due to the fact that some of them have sold surplus stocks or discontinued lines to dealers and allowed them to call these tires 'seconds' because of 'blemishes,' 'change of color,' 'change of tread,' or 'overproduction.' A 'second' actually belongs to a class of tires which is defective and this definition should be maintained firmly.

"Rebuilt tires are commonly called 'double treads,' which leads the reader to infer that he is getting a tire with an extra thickness of tread instead of a second-hand tire re-made by cutting two old worn casings and sewing together the less worn parts," the committee states. "The censorship practised by same publications forces advertisers to specify that such tires are rebuilt or reconstructed, but these publications are not sufficiently great in number to check the abuse which is widespread.

Mileage Guarantees on "Seconds"

"Guarantees of exceptional mileage are invariably made for rebuilt and 'second' tires, but these are merely the dealers' own promises and are misleading because he simply offers to replace any tire which does not give the specified mileage with another tire of the same sort at half price. This sounds fair but experience has proved it to be otherwise. Elementary arithmetic will show the cost of mileage upon such a basis to be enormous if the tires blow up in a few hundred miles, which they often do.

"Comparing the price of rebuilt or 'second' tires with the price of standard first quality tires of known and meritorious makes is another common and deceptive practice which many dealers follow," the committee reports. It contends that, "it is falsehood to claim that rebuilt or 'second' tires are selling at large reductions from list price for the reason that such tires have no list price and have never had one. They sell for whatever they will bring and generally that is every bit of what they are worth in the market.

$1 Tire Sales

"The $1 Tire Sale is another means of misrepresenting the price of such tires," the committee maintains. "In these sales the customer is given an additional tire for $1 provided he first purchases one tire at the full 'list' price. In every instance two tires must be purchased and in no case is a single tire sold for one dollar. The use of the deceptive list price, plus the one dollar, gives the seller a good price for each tire."

Continued on page 45

A separate department for stoves and heaters is used by Emerson & Fisher, St. John, N.B. This department, well lighted, clean and attractive, with each stove kept polished, is shown herewith. Here the customer may take time to choose a range and there are no distracting influences. The advantages of such a department have been well proved by this store.

Emphasize Fuel Economy in Stove Selling

Some Hints on Increasing Stove Sales From St. John, N.B., Merchants—The Exclusive Stove Department—A Valuable Service Department—Demonstrations Valuable in Stove Selling

FUEL-saving is one of the features around which St. John hardware merchants have developed stove business this season and in view of the economies necessary through the high price of coal this has proved to be an important factor in keeping the stove business active. So well have customers responded to the argument that a new stove will save its cost in fuel saved that St. John merchants have been enabled to do a very fair share of the stove business which manufacturers report has been so heavy as to clear them out of stock.

Merchants of St. John have made an exceptionally big drive on the kitchen range and heating stove end of their business this season and in every store handling this class of goods there is a big display linked up with advertising campaigns carried on through the local newspapers. It has been the experience of these merchants that the high price of fuel has made the buying public very particular as to the type of stove they buy, and the stove with the most efficient fuel saving devices is naturally the one which is being chosen by every economical housewife. The merchants have not been slow to recognize this fact and their advertisements and window displays always point out the many fuel saving features in their stoves. To the buyer this class of advertising always appeals.

Through the use of their splendid stove department and the use of advertising Messrs. Emerson & Fisher, Ltd., are making a very extensive appeal for range and heater business. They follow the plan of continually impressing the customer that their product is founded on efficiency and durability—not on words, but on deeds. They give some very convincing reasons why the citizens should buy their stoves. Here are some of them, as used in their newspaper advertising. Because:—it's easy on fuel—burns hard coal, soft coal or coke; simple to operate; easily kept in overnight; it's a quick heater too; presents a good appearance.

Exclusive Department for Stoves

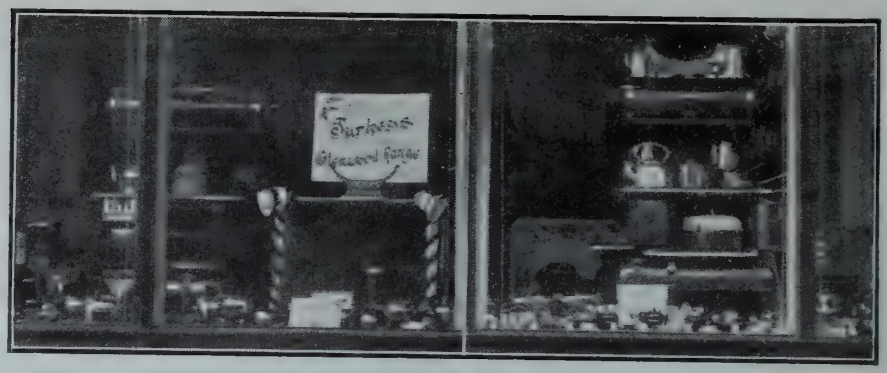
A large and exclusive department is used by Emerson & Fisher to display stoves. The various types of stoves and heaters are ranged along each wall of a department and inclined slightly so that they may all be seen from the end at which light is admitted. The department is well lighted and the stoves are kept clean and polished. The separate department allows customers to take their time in looking over the various types and here the salesman may have full sway without any distracting influences to disturb. Keeping the stock in a separate department has been found to be a distinct advantage from many standpoints. In addition to those outlined it helps to keep the stock in better condition and therefore show to the best advantage.

Service Department

A splendid service department in parts for all stoves stocked is conducted in connection with the stove department. It is a source of great satisfaction for customers to be able to purchase any part of their stove without any waiting whatever, and to be sure it will be right. This has been found to be a distinctive feature of great importance in attracting stove business.

Every Salesman Knows Stoves

Every salesman selling in the stove



department of this store is well posted on stoves and can give customers all the advice and information necesary in purchasing a stove that will suit their requirements and give them perfect satisfaction. This store also conducts a rapid installation service, and on nearly every occasion they will instal a stove or range the day after the purchase has been made.

D. J. Barrett, St. John, is also going after stove business with enthusiasm. His windows always show a good line of ranges and heaters and a well assorted stock is always kept on hand to meet the needs created by aggressive advertising. He too has found the fuel-saving appeal is an important one in stove selling. He is also a firm believer in quoting prices in his advertising and it is not often than any advertisement appears in the local papers without being accompanied by the price. Oil heaters are always mentioned in the advertising and a good stock kept on hand.

Giving a turkey away for a limited time prior to Christmas with every range purchased at the store is a plan which has been successfully followed by Mr. Barrett. The real usefulness of a good range is very apparent at Christmas time when the Christmas fowl must be cooked and linking up the two ideas has been found to be effective.

Mr. Barrett is also a firm believer in demonstrations, in fact demonstrations may be said to be a specialty of his. In his ads. he says: "our prices show, and a demonstration will convince." When demonstrations are held no pains are spared to give prospective customers full information in every detail. His salesmen are fully alive to the value of practical demonstrations, and will disassemble a stove in order to show the parts to intending purchasers with such a cheerful readiness that a very favorable impression is created. Mr. Barrett believes that this is one of the best means of creating good will, and the quantity of stoves he sells during the season bears out his convictions.

"A fuel saving firebox" is one of the points Messrs. J. E. Wilson, Ltd., bring out in their advertising, and show that it is necessary to produce more heat from less fuel. Here again a special demonstration service goes on every day, and citizens are invited to call and see the selling points of the company's line of stoves without any obligation to buy. The free and easy manner in which the demonstrations are carried out makes the customers feel "at home," and many a stove is sold to a shy customer because of the fact that there is no feeling that a purchase must be made as an obligation. "The pleasure is all mine" seems to be the motto of the salesman, and in most cases the customer becomes imbibed with the salesman's enthusiasm and a sale is made.

A good line of ranges and heating stoves are frequently featured in the window display by D. J. Barrett, St. John, N.B. This store has found it advantageous to link up displays with some current feature such as the necessity for fuel saving at present or in connection with cooking the turkey for Christmas. A feature introduced by this store is to give away a turkey with each range purchased for a limited time before Christmas.

Emphasize Fuel-Saving in Stove Ads.

A Fuel-Saving Firebox

B——

Cast Iron Range

Fuel is scarce and high in price this winter. It should be economically used. The firebox on the ——— range has proved to three hundred thousand users throughout Canada its consistent ability to produce more heat from less fuel. They know from results that the ——— has a fuel-saving firebox—let us tell you why.

Demonstrations daily—no obligation to buy.

J. E. Wilson, Limited
St. John, N.B.

You Will Require Less Coal This Winter If You Use a

——— Range

Owing to the scientific flue construction of this famous range, whereby all the heat is retained and practically only smoke escapes, is the one reason why the ——— range is famous as a fuel-saver.

This is only one of the many exclusive features of this range. If you are interested we will be pleased to have you call and demonstrate its many labor-saving features to you.

D. J. BARRETT
ST. JOHN, N.B.

The Prestige of

The —— Heater

is firmly founded on efficiency and durability—not in words, but on deeds. Hundreds of these heaters are in use in St. John and vicinity —numbers of them have been in use for years. They're still favorites. Why?

Because—It's easy on fuel.
—Burns hard coal, soft coal, or coke.
—Simple to operate.
—Easily kept in over night.
—It's a quick heater, too.
—Presents a good appearance.

If you are going to buy a heater, let us show you the ———. We have all kinds of heating stoves—for any place—to burn any fuel.

Emerson & Fisher, Ltd.
ST. JOHN, N.B.

Some good selling points in connection with stove and heater advertising are outlined in these three samples of ads. used in local newspapers by St. John hardware merchants. The fuel-saving factor is emphasized in all ads. owing to the high cost of coal. Suitable illustrations were used in each of the ads.

1920 Was Big Year in Automobile Industry

Total Registrations of Motor Vehicles in Canada Increased From 323,360 in 1919 to 408,999 in 1920—Remarkable Development Since Seventeen Years Ago When 220 Motors Were in Use—Auto Accessory Trade Develops Proportionately.

CONTRARY to the general opinion that there had been a considerable falling off in automobile trade during the year 1920 as result of the period of slackness evident toward the end of the year, it is to be noted that 1920 was the biggest year the automobile business in Canada ever had. Every one of the nine provinces in Canada reports an increase in the number of motor vehicles in use. Figuring the increase on a percentage basis British Columbia stands out as the leading province with an increase of 43.5 per cent. over 1919 registrations. Ontario's increase was 30 per cent.

Motor cars and trucks registered throughout the Dominion from January to November, 1920, numbered 408,999. Of this number those provinces which separate motor trucks in the registrations indicate that at least 23,574 of these are trucks. It is stated that striking a fair average of motor trucks to passenger cars there would be approximately 380,325 passenger cars and 28,674 trucks in Canada. An increase in the number of motor cycles in use in Canada is also noted, there now being 10,311 registered.

Increase by Provinces

The increase in registrations by provinces is as follows:—in 1919, Ontario registrations increased by 23,400 over the previous year's figures; in 1920 the increase over 1919 was 44,600; Quebec registrations increased by 8,994 in 1919 and by 9,913 in 1920. Nova Scotia registrations increased by 1,797 in 1919 and 3,040 in 1920. Prince Edward Island registrations increased 518 in 1919 as compared with 419 in 1920; Manitoba had an advance of 5,774 in 1919 and of 7,159 in 1920; Saskatchewan had an increase of 7,511 in 1919 and 4,958 in 1920; Alberta advanced 4,500 in both 1919 and 1920; British Columbia increased registrations by 3,672 in 1919 and by 8,500 in 1920.

These figures indicate the provinces which have had the greatest increase in number of motor vehicles used and those in which there has been a decrease do not present an alarming condition as fluctuations are a comparatively common occurrence in their cases.

Total Registrations

Total registrations for the various provinces of Canada for 1919 and 1920 are as follows:

Province	1919	1920
Ontario	132,000	176,600
Quebec	34,987	44,900
Nova Scotia	9,900	12,450
New Brunswick	8,061	11,101
P. E. I.	999	1,418
Manitoba	29,163	36,322
Saskatchewan	54,750	59,708
Alberta	34,000	38,500
British Columbia	19,500	28,000

Development in Seventeen Years

Motor vehicle development in Canada has come chiefly within the past seventeen years. In 1903 Ontario was the only province to register motor cars and these numbered 220. Alberta was next to join the list in 1906 with 41 registrations. In 1907 Quebec joined with 254 cars, Nova Scotia with 62 cars, Saskatchewan with 54 and British Columbia with 175. A total of 2,100 motor vehicles were registered in the Dominion in the year 1907. These figures have multiplied rapidly each year until to-day every province has a substantial number of motor vehicles and the total has soared to 408,999. The following figures will show how rapidly the use of motor vehicles has increased:—Total registrations in 1907 were 2,100; in 1908, 2,901; 1909, 4,711; 1910, 8,937; 1911, 21,682; 1912, 34,789; 1913 50,489; 1914, 67,415; 1915, 87,675; 1916, 120.368; 1917, 199,302; 1918, 267,408; 1919, 323,-360; 1920, 408,999.

Growth of Auto Accessory Trade

These figures represent a truly remarkable development and it is no wonder that Canadians are proud of this industry. Not only does this industry give employment to thousands of mechanics in automobile factories but it provides much business in subsidiary industries such as tires and other accessories, oil, etc. The growth of the accessory business in Canada has been quite in keeping with the growth of the automobile industry itself, and the likelihood that registrations of motor vehicles will go well over the half million mark in Canada during 1921 will carry with it a proportional increase in the requirements for accessories.

From the statistics given herewith covering all parts of the country hardware merchants should be in a position to figure out approximately what the potential value of their district is, in so far as accessory trade is concerned, They can figure what their natural increase in such business should have been during the past few years and what they may reasonably expect with development in equal proportion during the next few years.

BORROW $50,000 TO CARRY ON BUSINESS

The receivers of Walden-Worcester. Inc., Worcester, Mass., have been authorized by the court to borrow $50,000 to carry on the business. The receivers had asked permission to borrow $100,000.

Enforcing Ontario Anti-Glare Law

ENFORCEMENT of the Ontario Headlight Anti-Glare law is now proceeding, the plan being followed of granting motor licenses only for vehicles on which approved headlight devices are being used. For the first month or six weeks of the year there will be much activity in taking out 1921 licenses and there are 176,600 motor vehicles in the province of Ontario to be equipped with some approved device for the elimination of headlight glare. On each application for 1921 license, the owner of a passenger automobile or truck must fill in an answer to the question "Is the above described vehicle equipped with an improved device for the elimination of Head Light glare? The name of the device must also be given.

Following are the names of the approved devices as at present recognized by the Ontario Department of Highways:—

Outlines of the New Bankruptcy Act

No One Will Go so Far as to Say That Every Man Who is Unable to Meet His Obligation is Dishonest—New Bankruptcy Act Will Accomplish Much Good for the Trading Public—How It Will Work Out

Written by A. E. NASH, for Hardware and Metal

A GOOD DEAL has been said in past years of the man who is unable to meet his obligations, and a good many unnecessarily hard things have been said. The number of men who are unable some time in their lives to meet in full all of their obligations is much greater than many of us realize, but the number of men who cannot tide over a difficult period and eventually pay their debts in full is small. There is always a hard feeling towards the man who cannot do so. While it is a wise thing to be cautious in extending credit to the man who fails to pay all his debts promptly, there are very many cases where a hardship is performed through a too-ready suspicion. No one will go so far as to say that every man who is unable to meet his obligations is dishonest, because the inability to meet one's obligations comes from a number of sources, of which circumstances beyond the control of the person affected and hard luck are two.

The Bankruptcy Act.

Much will also be said in the next few months about the new legislation covered by Chap. 36 of 1919 and its amendments, officially called "An Act Respecting Bankruptcy" and commonly called "The Bankruptcy Act." This Act has been designed by the Government to take care of the procedure previously covered by the Assignments Act and similar acts and which have failed to entirely meet the necessities of the trading public. The Act as it stands is moulded very much on the English Bankruptcy Act and all the principal points, with the necessary alterations to meet the special requirements of this country, are taken from the English Act. The interpretation of the word "Bankruptcy" is that it is a proceeding under which the Government takes possession of the debtor's property, when the debtor cannot pay his debts or when the creditors of that debtor cannot obtain satisfaction of their claims, by the appointment of a trustee. The property of the debtor is realized and the proceeds distributed among the creditors in proportion to their claims, with the necessary provisions to cover any legal preferences given previous to the date of bankruptcy, and during the proceedings, and, as will be shown, subject to certain exceptions. Forever afterwards, the debtor has complete protection from any legal proceedings that can be instituted by any of his creditors, and can finally obtain a complete discharge of all obligations and debts, and recommence in business under his own name. The exceptions which are spoken of above, are covered in Section 59 of the Bankruptcy Act, and are briefly as follows:—

The Exceptions Outlined

1. That the assets of the bankrupt do not realize 50c on the dollar of his unsecured liabilities, but this does not apply when the Court can be satisfied that this position has arisen from circumstances for which the debtor cannot justly be held responsible.
2. That the debtor has not kept proper records for three years preceding the date of bankruptcy.
3. That after becoming insolvent and knowing himself to be such, the debtor has continued to trade.
4. That the debtor has not accounted satisfactorily for a loss or deficiency of assets.
5. That the bankruptcy has been brought on by rash and hazardous speculation or unjustifiable extravagances or culpable neglect.
6. That the debtor has not dealt properly with his creditors, but has put them to unnecessary expense by frivolous or vexatious causes.
7. That the debtor has incurred unjustifiable expense by engaging in frivolous or vexatious actions.
8. That the debtor has given undue preference to certain of his creditors within three months of the date of bankruptcy.
9. That the debtor has previously deliberately incurred liabilities in order to affect the creditors' standing.
10. That the debtor has previously made an arrangement for extension with his creditors, or previously been declared a bankrupt.
11. That the debtor has been guilty of fraud or a fraudulent breach of trust.

Not a Dishonest Action.

The above exceptions have been specially mentioned here, because the object of this article is not to describe the Bankruptcy Act in its dealings or workings, but to try to show that an Act of Bankruptcy in itself does not constitute a dishonest action. First of all, if none of the above eleven things has happened, then any time after the adjudication of bankruptcy, the debtor may, upon proper application, obtain a discharge, and such discharge in the eyes of the law, is equal to stating that the debtor is once more free to trade, that he is considered to be an honest man and that he has to the best of his ability discharged his liabilities; that he is a fit and proper person to again receive from the public a share of their confidence. If, on the other hand, he has done any of the eleven things mentioned above, a full investigation as to his integrity is made and the onus is on him to prove that he has acted honestly. He may fail to satisfy the Court that circumstances for which he cannot be justly held responsible have caused his assets to realize less than 50c on the dollar, and for this technical reason he may fail to obtain his discharge at first. He may through circumstances which he has been unable to control, be unable to produce proper records of his business transactions, and by this, his discharge may be delayed, although, provided he can satisfy the Court that the failure to keep the records was no fault of his or that it was an oversight through ignorance, he eventually would obtain his discharge. If, on the other hand, it is proved that he has acted dishonestly, his discharge would be difficult to obtain, and rightly so.

May Examine Affairs of Debtor.

The intention of the Government in providing for exceptions to the discharge of the bankrupt is to assure itself of his honest intentions, and that if he has done any of those things, that they have been done through ignorance and not by deliberate act, so that when the debtor obtains his discharge he may be able to hold up his head and say to the public, "While it is true that I became a bankrupt, it is also true that I have done everything in my power to meet my liabilities, that I unfortunately failed and that my assets were not sufficient to pay everybody in full, but the Court has satisfied itself that I have done nothing wrong, fraudulently or otherwise, and that my bankruptcy was the result of bad luck or misfortune, and has satisfied itself that I am a fit and proper person to continue in business, and, therefore, that I am an honest man." The assumption here is reasonable. The British law treats every man as honest until he is proved dishonest, and through the medium of the Bankruptcy Act, the Court has in its power the means of thoroughly examining the affairs of every debtor in bankruptcy, and the Court will not grant to a debtor a dis-

charge from bankruptcy until it is satisfied that everything in the power of both the debtor and the Court through the trustee as been done.

Obtaining Discharge Not Easy

The obtaining of a discharge from bankruptcy is not quite as easy as a lot of people may think, and the reason is that the Court is supposed to satisfy itself as to the future bonafides of the debtor before it allows him to again commence trading. He may at any time after he has been adjudged a bankrupt apply for his discharge. First of all, he must get a certificate from the trustee, giving full details of the creditors, to whom notices will be sent that the application for discharge will be heard in Court, and the trustee will appear and present his statement of the conduct and affairs of the bankrupt. There is no reason to suppose that when no good purpose can be obtained and no additional benefit accrue to the creditors by keeping a man in bankruptcy, that the discharge will be refused, because the State holds that the refusal of a discharge or the granting of it subject only to almost impossible conditions, imposes too great a burden and discourages the man to a degree where it would not be in the interests of the country. For certain reasons the discharge may be suspended instead of being altogether refused, and either the refusal or the suspension must be given if any of the above eleven things have been committed, and the suspension may be for a period of two years, or it may be for such time until a dividend of not less than fifty cents on the dollar has been paid to the creditors, or it may be provided the bankrupt agrees to allow a judgment to be registered against him for the amount of the unpaid balance of his debts.

A discharged bankrupt is, therefore, in the eyes of the law and must be in the eyes of the public, an honest man, but an undischarged bankrupt may in the same manner be just as honest, for the discharge may in some cases be delayed only for the purpose of further investigation and more complete particulars, and if he is honest he will eventually get his discharge.

Will Accomplish Much Good

On the whole the Act will work a wonderful good for the community. It is severe on the debtor who does not intend to meet his obligations, but while appearing to be hard to the debtor who is trying to do his best, it is not unjust, and we must remember that the Government should protect the trading public. If legislation such as this Bankruptcy Act was not introduced, business would suffer very materially on account of the dishonest trader. Not only does the Act take care of the creditor by giving him the power to make a debtor a bankrupt and thus enables him to obtain some return for the goods he has supplied, but it will also have the effect of curtailing the dishonest practices of men who intend deliberately evading their just obligations. The Act is hard, and justly so, on the dishonest man, and this very fact will keep men from dishonest trading in the future.

The Bankruptcy Act coming into force at a time when credits are not easy to obtain and when it looks as if we might be about to pass through a period of tight money, and when prices have reached the highest point they are likely to reach, and we may expect a reduction in almost every line, is a fine thing for the future business stability of the country. It will have the effect of creating much needed caution in many of our business men and will restrict foolish and speculative buying, and the over-loading with stocks. The Act, indeed, could not have come at a better time, and one effect of it will almost surely be that additional care, which is so much required during a period like the present, will creep into our business methods.

Acts of Bankruptcy Defined

For the benefit of our readers, the following are acts of bankruptcy:

1. The making of an assignment for the benefit of the creditors.

2. The making of a fraudulent conveyance of property.

3. The creation of a charge on property which would be a fraudulent preference.

4. Absconding with intent to defeat creditors.

5. Allowing an execution in the sheriff's hands to remain unsatisfied, subject to certain limitations.

6. Exhibiting by a debtor to a meeting of creditors a statement of assets and liabilities showing that the debtor is insolvent.

7. Assigning, removing, secreting of disposing of any goods with intent to defraud, delay or defeat any creditors.

8. Making a sale in bulk of one's assets without complying with the Bulk Sales Act.

Results of Order Serious

The results of a Bankruptcy Order are immediately very serious. For three months after the order is made, the trustee who is appointed will receive all the bankrupt's mail, telegrams, etc., and the bankrupt is restricted in his business without a heavy penalty being imposed in the event of his doing anything contrary to the Act, which includes the inability to borrow more than $50.00 or obtain credit for five hundred or more without disclosing the fact that he is an undischarged bankrupt. I doubt if any one carefully reading through the Bankruptcy Act will not come to a very sane conclusion, and that is, that the punishment meted out to a man who has committed grave acts of indiscretion, and has thereby got himself into a position where he is unable to carry on any further, while appearing to be severe, is very just, and moreover that the Act affords as full a measurement of protection as possible to creditors. Another conclusion that I think we will all agree in is that bankruptcy is a thing to be avoided, wherever possible, for the stigma naturally attaching to it must be difficult to overcome.

Editor's Note—Questions on the Bankruptcy Act will be promptly answered to the best of our ability. While not guaranteeing that our opinion will be upheld at law, we have on our staff men qualified to give an opinion. Questions should be addressed to the Editor.

B-S-NESS

WITH "U" AND "I" LEFT OUT

Doesn't look just right, does it?

IT takes "U" and "I" to make a trade. That's why they put "US" in bUSiness.

For BUSINESS is trading—trading our merchandise and good service for your cash.

No business, not even ours, can succeed without "U." Realizing this, we always consider "U" first.

Our aim is to please "U" in every transaction with the HIGHEST QUALITY of HARDWARE and the BEST of GOOD SERVICE.

We need "U" and "U" need "US."

May Brothers Hardware

2869 DUNDAS STREET WEST

Phones : Junction 138-139

A leaflet of envelope size as enclosed with parcels or with literature being sent out to prospects by May Brothers, West Toronto, Ont. It is but one of many novel advertising ideas as worked out in an endeavor to bring the customers into closer touch with the store and to bring customers to a better realization of the importance of the hardware store in the community.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations.

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, JANUARY 8, 1921

THERE is no question that the automobile tire business has been injured by the advertising done by certain dealers who have no scruples about misleading customers. This deceptive practice is chiefly in regard to making extravagant claims for "seconds." Once a customer has been the object of such deception he is likely to have less regard for all phases of the tire business. Such practice should therefore be discouraged.

Tax on Stocks on Hand

ANOTHER case has come to the attention of Hardware and Metal this week where one of the foremost officials of a Canadian manufacturing firm was unacquainted with some of the details of the sales and luxury tax regulations. So many of these cases have come to light that it leaves no doubt but that the trouble lies with the tax measure and not with those who are supposed to execute the mandate.

In connection with the removal of the luxury taxes formerly collected and remitted by manufacturers on certain lines sold in the hardware trade, a point which may cause some difficulty is that which forms the basis of the automobile dealers' protest to the Governcent, i.e., that the tax had already been paid on stock and customers learning of the removal of the tax asked for a correspondingly lower price, resulting either in a decreased profit to the merchant or the loss of a sale and the accumulation of a stock which could not be sold profitably.

Fortunately this does not affect many hardware lines seriously and no heavy losses are anticipated on this account. The policy being followed by most retailers and wholesalers so placed is to continue to quote prices including the tax until present stocks are cleared out. On the other hand some manufacturers have issued new price lists quoting prices to the consumer minus the tax and retailers are forced to stand by such prices. The defence is given that such merchants took the tax as an added profit when it was originally applied on stocks on which they had paid no tax to the manufacturer, and that these merchants should not forget those profits now that decreased profits may have to be taken until present stocks are cleared out. It is pointed out by one manufacturer that stocks now held are much lighter than when the tax was applied and that therefore the merchant will now have to take less profit on a much smaller stock than that on hand when he applied the tax in the form of an extra profit.

This outlines the policy being followed by various wholesalers and retailers and therefore if any complications arise the hardware merchant will know how others are handling the situation.

The Automobile Industry

IT is doubtful if any other branch of Canadian industry represents such a phenomenal growth as does the automobile industry. From figures of registrations as outlined in this issue, it is evident that from the small beginning of 220 motor vehicles registered in Ontario in 1903, representing all the motor vehicles in Canada at that time, there has been a very rapid development which has brought registrations of motor vehicles up to 408,999 for the year 1920 for Canada. Every province shows a large increase in registrations. This growth may well be expected to continue duing the forthcoming years as motor vehicles have proved their value in business as well as for pleasure, and this opens up an unlimited field of potential business for dealers in automobile accessories.

From figures of registrations in each locality and figures showing the percentage of increase year by year, every hardware merchant selling accessories should be in a position to figure approximately what the requirements of his community for accessories should be. He will then be in a position to judge if he is receiving his share of such business.

It is confidently expected that registrations will total well over the half million mark in Canada in 1921 and a similar increase in subsequent years. Such being the case it is evident that the motor vehicle industry is and will be in the forefront. Automobile accessoty business will therefore be an increasingly important branch of trade and one which will bring good returns to the merchant who pursues this trade energetically.

Selling and Cutting Prices

THE Montreal Daily "Star," in a recent edition, makes use of the words: "It must be remembered, too, that lower prices will stimulate buying." It may be that this referred only to certain lines of merchandise that pass over the counter. It could not refer to selling in general, because the facts are against any such theory having a chance to prove correct.

Start back with the automobile business, the first to put up the price reduction sign. Ford started the business, and in a few weeks car makers, all over the country, irrespective of what their cost sheets told them, were quoting new selling prices. Some orders came in as a result, but it was dealer business, and the ultimate buyer has not come into the market yet as a result of the price reduction. The dealer is loaded up with cars, but the cutting of the price of automobiles did nothing at all toward promoting real, genuine sales to car users. If it had any influence at all, Ford's own big plant would not now be standing idle in Detroit with the workers clamoring for the use of that plant in order that they might make cars for their own use.

The steel market is another case. Prices have been reduced, and yet buying is less. Non-ferrous metals have been riddled as far as their high war marks are concerned and yet to-day they are a drug on the market. Low prices will not sell them.

The "Star's" claim that lower prices stimulate buying should be interpreted in very narrow confines. In some lines of foodstuffs and wearing apparel this may be true, but in the great field of iron, steel, machine tools and equipment in general, it has very little significance.

The "Buyers' Strike"

A Term Which Hardware Merchants Should Refrain From Using—Public Not Organized for any Such "Strike"—Best Way to Resume is to Resume—Keep Watch on Replacement Values.

THERE has been considerable publicity given through daily papers to what has been termed a "buyers' strike." This action on the part of the general public has cut very seriously into the wholesale and retail merchants' business and has put many of them in rather a precarious financial position.

Many merchants have protested loudly both in the press and by personal conversation with their customers against this action on the part of the public. They have pointed out that if the public persist in this buyers' strike, that it will throw many people out of work and thus act as a boomerang to the people who instituted the movement. This argument would be effective if the public were organized and would definitely agree to follow a policy suggested by the merchants. They are not organized, however, and each individual is acting more or less in his own selfish interests. Merchants should recognize this fact.

Nothing Succeeds Like Success

The best way to resume is to resume. Wholesale and retail merchants and manufacturers should forbid every member of their staff to mention such words as "Buyers' Strike." They should give the impression in interviews, in their advertising and in their general conversation that business is O.K. Remember nothing succeeds like success. They should keep their customers well informed with regard to the trend of prices. They may advise them to purchase some lines, and they may even advise them to hold off purchasing other lines. The one thing they should not do is to complain about the attitude of the general public. This merely advertises the buyers' strike movement and tends to extend it.

Keep Close to Bankers

Merchants should keep close to their bankers. They should make all the economies they can and put themselves in a solid financial position, but above all, they should adopt an energetic policy with regard to getting business. Let them put on special sales if necessary, but do not announce that these sales are being put on because the public refuse to buy. Sales can be put on because they need ready cash, or for some other good reason. The merchant must keep his eye on replacement values.

If manufacturers, wholesalers and retailers adopt this policy it will do more than anything else to stimulate business.

The policy as outlined herewith under the heading "Carry On" is one which was advocated in Hardware and Metal immediately after the armistice was signed. Merchants will do well to follow the same policy in view of conditions prevailing to-day.

Carry On

IF you were in a crowded theatre and one man after another arose and assured the audience that everything was all right and just to keep calm; if the actors stopped the play to make similar statements to the audience you would probably feel sure something was wrong and would get out as quickly as you could. Others would follow and very soon there would be a panic.

The same situation faces business men to-day.

The day after the armistice was signed many wholesalers and manufacturers and their travellers began to protest loudly that everything was all right, that prices would not decline, and urged retailers to stock up. We have been importuned from all sides to join the chorus and through our publications to establish confidence in the trade.

We also believe retailers should carry on and buy for their requirements, but it is the business of manufacturers and wholesalers not to be protesting that everything is all right, but to carry on in the ordinary business way. If they want retailers to buy goods, then in the name of common sense let them tell the retailers through the publications they read and have confidence in what they have to sell. If they never advertised before let them take space and in a quiet, business-like way tell the trade what they have to sell. If they do not do this the natural assumption on the part of the trade will be that they have nothing to offer, that they too are panic-stricken and have decided to economize and mark time till better conditions return.

Can you blame retailers for following the example of wholesalers and manufacturers?

We are interviewing hundreds of retailers every week in all parts of Canada and our advice is:

Don't stop the play. Carry on.

Take space in the publications your customers read and tell them what you have to sell in a simple, straightforward, business-like way.

The 1907 panic was caused entirely by lack of confidence.

It is worth millions to Canadian business men to establish confidence. You can do your part at small cost.

News of Western Canada

B. C. Retail Merchants Want Small Debts Law Changed

Also Want Legislation Which Will Permit a Merchant to Hold a Customer From Leaving City Even Where His Debt is Less Than $100

VANCOUVER (Special)—The Retail Merchants' Association of British Columbia expect to pay a visit to Victoria shortly to take up several matters requiring legislative changes. One is the subject of the collection machinery for small debts; it is hoped that larger bills can be collected through the small debts court than is at present allowed. The merchants feel that they are put to too much expense to collect their larger accounts when they have to be taken through the District Court.

They are also hopeful of getting a change made on the "copias" proceedings which will permit a merchant to hold a customer from leaving the city, even where his debt is less than $100. At present, it is stated, a delinquent can "flit" leaving a debt less than $100, without the creditor taking action. The R.M.A. hopes to have a change made that will permit a merchant to stop a debtor leaving town, owing accounts of $25 or over.

They will probably ask for a change in the Garnishee Act. At present, in certain circumstances, the exemptions protect the whole salary, and payment of accounts cannot be obtained.

The R.M.A. expect to organize two branches on Vancouver Island in the near future, one at Ladysmith and one at Courtney.

Future of B.C. Iron and Steel

Bounty on Pig Iron an Inducement to British Interests—Spend $50,000,000 in Next Few Years.

Vancouver, B. C.—Establishment of a large iron and steel industry in British Columbia backed by British capital was announced in a recent issue of Hardware and Metal. A recent issue of the British Columbia Gazette carried the notice of the formation of the Coast Range Steel, Limited, with an authorized capitalization of $15,000,000 and gives some further interesting details. The promoters claim that within the next few years $50,000,000 will be spent in establishment of a great steel industry on the lower mainland of British Columbia. They expect to start active construction of the plant within six months. Five Vancouver men have been named as provisional directors.

Three years ago the British Columbia Government offered a bounty of $3 a ton on pig iron produced in that province from native ore. After investigating the standing of the interests behind the Coast Range Company, the B. C. Government passed an Order-in-Council sanctioning an agreement between the Minister of Mines and the Company. The British engineers have been investigating the adequacy of raw material resources and they have evidently made a favorable recommendation to their principals.

The period of construction will be three years, during which $15,000,000 will be spent, so the industry cannot avail itself of the Provincial bounty until the end of that time. Meanwhile preliminary work is being pushed. The location of the plant has not been definitely decided, according to men interested in the project, but the lower mainland appears to be the likely district for the site.

Mr. Henry J. Landahl of Vancouver, one of the principal directors, declared that the $3 bounty on pig iron was a great inducement for the British interests. "If we have resources of iron, coal and limestone in British Columbia in quantities large enough to maintain an iron and steel industry, and of such quality as to insure our successful competition with the world, then it is assured that all the money necessary to create this industry is available," said Mr. Landahl.

"We are optimistic enough to expect that the time will come when British Columbia will take care of the iron and steel trade around the entire Pacific and furnish ores to the iron and steel works of Great Britain. The work we have undertaken appealed to the British financial group because of its strong Imperial nature."

WILL BE BIG MOVEMENT OF BETTER GRADES OF PAINT

The Miller-Morse Hardware Co., Limited, of Winnipeg, as the recently appointed exclusive western jobbers of "Floglaze," product of the Imperial Varnish and Color Co., and other western firms interested in the paint industry are optimistic regarding the outlook for 1921.

Both manufacturers and jobbers are preparing for a greater volume of paint sales. Based on the urgent need for paint and the reduction in price, they are unanimous in declaring that 1921 will see a big movement in the better grades of paint.

Miller-Morse Hardware Co. Convention

Winnipeg, Man. — Twenty - eight members of the sales staff of Miller Morse Hardware Company gathered here for the annual sales convention of the company and plans for the new year were discussed. Under the direction of L. C. Marr, sales manager, general business conditions were discussed and it was the unanimous opinion that the outlook gave cause for optimism and that there is no possibility of any serious disturbance in the retail hardware business in the western provinces. Business during the past year was stated to have been good and no less than an equal volume of hardware trade is expected during the forthcoming year.

Sales Convention of J. H. Ashdown Hardware Co.

Winnipeg, Man.—The annual sales convention of the J. H. Ashdown Hardware Co., Ltd., was held here this week, when many instructive addresses concerning lines handled by the salesmen were heard. A number of these talks were illustrated by pictures. The convention lasted all week and concluded on Saturday morning with addresses by Messrs. Hutchison, A. E. Dykes, McIntyre and Maitland. The complete program of the proceedings for each day was outlined in last week's issue of Hardware and Metal.

Some Novel Advertising Ideas

To serve as a constant reminder of the Cochrane Hardware Company, Sault Ste. Marie, Ont., this firm has issued a handy brass clip, the face of which is 2 inches wide by 2½ inches in depth. On the face of the clip is the lettering "Cochrane Hardware, Ltd. Soo's Greatest Hardware, Wholesale and Retail. Sault Ste. Marie, Canada. Branches, Sudbury, North Bay, Copper Cliff." Pencils bearing the name of the firm were also given out as a medium of publicity.

Just prior to the Christmas trade this store ran a rather unusual advertisement three columns wide and a full page long in the local newspaper. At the top of the ad was a picture of the local store and the ad took the form of a brief survey of how Sault Ste. Marie was preparing for the Christmas season and pointing out the value of suggestions for presents as made through the windows of this store. It outlined gift suggestions for the various members of the family and described their value in a conversational style which made it easy to read.

MISLEADING ADVERTISING

Continued from page 36

take a definite stand against misleading tire advertising and warning the public to carefully scrutinize the claims of cut-price dealers, the bulletin makes the following recommendations to manufacturers and distributors:

"To Manufacturers: Manufacturers who are jealous of their reputation and of that of their product can also lend material aid by refusing to accept such classifications as "blemished" and by insisting that "seconds" of their manufacture, no matter what the reason may be for classing them as such, be advertised only as "seconds," presumably defective and not guaranteed. A number of manufacturers are now following this policy. All should follow it."

"To Distributors: Dealers or jobbers who are desirous of conducting their business on honest lines can set an example which will be effective by stating frankly, and without extravagant phrases, what they have to sell, abandoning use of the deceptive "list price" comparison, claims of enormous savings, false descriptions of 'seconds' and misleading '$1 Sales' or 'Bargain Offerings.'"

"The earmarks of the deceptive tire advertiser are plain to those who can read them and there should be united effort to check his activities," the committee warns.

Ontario Retail Hardware Assn. Convention Feb. 14, 15, 16 and 17

SYNOPSIS OF PROGRAM FOR 16TH ANNUAL CONVENTION OF ONTARIO RETAIL HARDWARE ASSOCIATION IN HAMILTON, ONT., FEB. 14-17

Association Headquarters—Royal Connaught Hotel

Exhibition Headquarters—Armories Bldg., James St. North

Monday, February 14th

2.30 p.m. Meeting of Executive—Royal Connaught Hotel.
4.00 p.m. Registration and enrolment of members.

8.00 p.m. Question box. Answers to card questions.

Establish Branch Factory at London, Ont.

The American firm of Steel Sash, Ltd., have established a Canadian branch at London, Ont. Machinery is being installed and manufacture will commence early next month.

Keep These Dates Open
February 14-15-16-17

There will be many interesting and instructive features at the 16th annual convention of the Ontario Retail Hardware Association to be held at the James St. Armories, Hamilton, Ont., on the above dates. **(See program above.)**

Events in the Trade

Business Changes

Barrie, Ont.—Merrill & Hubbard have dissolved, G. D. Hubbard continuing the business.

Personal

Toronto.—Frederick Moore, general manager of Benjamin Moore & Co., Ltd., is visiting the Maritime Provinces on a business trip of about ten days' duration.

Montreal—Starke, Siebold, Ltd., have appointed a new traveler for Quebec territory. H. Dore will commence his duties at once, with headquarters in Quebec city. For the previous six years he has been associcated with Caverhill, Learmont & Co., Montreal.

Montreal.—E. H. Johonnet, director of sales, Dominion Cartridge Co., Ltd., will leave this week on a six weeks' business trip to the west, calling on the trade in the western provinces. Mr. Johonnet will be away from his Montreal office for about six weeks.

Toronto.—T. McMillan, of Montreal, and others are arriving at the King Edward Hotel for the yearly get-together-for-better-business, of the Canadian Fairbanks-Morse Co., Toronto. J. J. Walsh, of Hamilton, is an unofficial advance guard of the salesmen who will confer this week as to pushing the J. & J. Taylor Co. safes in the markets of the world.

Obituary

St. Thomas, Ont.—Bailiff George W. Smiley, of the Division Court, at St. Thomas, died this week, after an illness extending over some months.

Prior to his appointment as bailiff ten years ago he was one of the best known hardware merchants in St. Thomas. The late John Y. Smiley, hardware merchant at Woodstock, who died a short time ago, was a brother.

T. B. Dundas Honored

Chatham.— T. B. Dundas, who for many years has been manager of the Dominion Glass Company's plant at Wallaceburg, and one of the leading men in public and religious affairs of the county, was tendered a complimentary banquet by the citizens. He was presented with a magnificent grandfather's clock, and an illuminated address. He is leaving for Toronto to take charge of the sales department of the Dominion Glass Co., for the province.

Western Ont. News

The Fennell Hardware Co., of Kitchener is reorganizing as a limited corporation and contemplates entering a wider field in the wholesale trade. The present premises will be vacated.

* * *

At the elections held in London, Col. W. M. Gartshore, of the McClary Mfg., Co., was again returned as trustee for Victoria Hospital. At a meeting of the Rotary Club, at which the successful candidates were guests of honor, Col. Gartshore made an address.

N. P. PETERSON

who as outlined in last week's issue of Hardware and Metal, will shortly return from England where he has been directing the establishment of a manufacturing plant for the Gillette Safety Razor Co., of Canada Ltd., and will be actively in charge of the company's business in Canada in the place of A. A. Bittues, who has been appointed director of foreign sales of the parent company for the Orient and the Far Eeast.

* * *

At the annual meeting of the directors and shareholders of the Canadian Handle Manufacturing Co., held at Strathroy, James W. Cameron was elected as president.

* * *

Hardware merchants of the district took a very active part in the elections this week and among those elected to office were George A. Stanley, councillor, at Lucan, Ont., J. G. Crosby, councillor, Highgate; B. O. Parker, public school trustee at Strathroy and John Douglas, reeve at Wroxeter.

* * *

Wm. Pow, of Pow & Willcox, Tillsonburg, who was shot in the eye some weeks ago while out hunting, is back at business again, but is still suffering considerably.

* * *

James A. Liddell, for thirty years employed with various hardware firms at Strathroy, Ont., died at his home there. He was first with the firm of C. C. Wright, then with the Avery Hardware Co., and recently had been with W. H. Cuddy. He was 56 years old. W. H. Cuddy was one of the pall bearers at the funeral.

Changes in Staff of The McClary Manufacturing Co.

London, Ont.—W. W. Nobbs, for some years manager of the local sales and traffic department of the McClary Mfg. Co., has been transferred to the position of manager of the company's factory at Brantford. A. M. Smith has been placed in charge as manager of the London branch and traffic department, and John J. Foot, who has reorganized and developed the business carried on by the William Buck Stove Company, Brantford, since its purchase a few months ago by this company has been transferred to the head office as general sales manager.

Annual Gathering of St. John Hardware Men

ST. JOHN, N.B.—The annual "get together" night of the employees of T. McAvity & Sons, Ltd., and W. H. Thorne & Co., Ltd., hardware merchants, was held in the St. John Y. M. C. A., the employees of both houses turning out in full force. Directors of the two firms were present.

That there is a keen rivalry between the athletes of McAvity's and Thorne's was evidenced by the enthusiasm with which the contestants entered the many events. The affair opened with a basket ball game, in which Thorne men were victors, the score being Thorne's 18, McAvity's 14. In the bowling games McAvity's won both the ladies and the men's games. In the tug of war, Thorne's won out. The swimming race was won by McAvity's After the sports, a social was held and refreshments were served.

Sudden Death of Sir Frank Baillie

THE DEATH of Sir Frank W. Baillie, K.B.E., which occurred in Toronto this week, removes a prominent figure in Canadian business circles, he having been president of the Burlington Steel Company and Canadian Cartridge Co. of Hamilton, president of

SIR FRANK W. BAILLIE, K.B.E.

President of the Burlington Steel Company, Canadian Cartridge Co., Hamilton, Ont., and an official of a number of other Canadian industries, who died this week in Toronto.

the Canadian Aeroplanes, Ltd., and connected with other Canadian industries.

Death followed an illness of but a few weeks' duration. Following an operation which brought immediate relief, he was progressing satisfactorily on the way to recovery and it was hoped he would soon be fully recovered. Alarming symptoms subsequently developed and with a stoppage in the veins, death was hastened.

The late Sir Frank Baillie was prominent in munition business and other interests connected with the war and in 1916 he was appointed Director of Aviation for Canada. He was regarded in business circles as one of the outstanding Canadians. His career was an exceedingly varied one and through it he showed great acumen and gave greater promise for the future.

WHITE'S, LTD., CONVENTION

Collingwood, Ont.—The sales convention of the travelling staff of White's, Ltd., was held this week, factory representatives addressing the staff.

Changes Made In The Selling Force of John Morrow Company

THE management of John Morrow Screw & Nut Co., Limited, Ingersoll, Canada, has taken advantage of the holiday season to reorganize the company's selling force.

The company has established at 489 St. Paul street west, Montreal, an office and warehouse. This branch will be in charge of F. J. McCarty. Mr. McCarty is an experienced tool maker, and has had, in addition, a large business experience, having been intimately and favorably known to the trade of the Montreal territory for several years past. The services of Mr. McCarty and his staff will be exclusively devoted to the interests of the customers of John Morrow Screw & Nut Company, Limited, and the Ingersoll File Company, Limited, for which the Morrow Company are the sole distributors.

In Central Ontario a change has also been made. J. C. Adams, Toronto, now represents the Morrow Company in this territory. He, too, has the advantage of having had actual shop training. After leaving the bench he was for several years connected with the Vokes Hardware Co., Toronto, and since being demobilized from the Royal Air Force has been in the service of one of Canada's largest manufacturing concerns. He will devote his time exclusively to the work of the John Morrow Screw & Nut Company, Limited, and Ingersoll File Company, Limited.

H. P. Stoneman, assistant general manager, is at present in western Canada completing arrangements whereby the Morrow Company will be adequately represented on the Prairies and the Pacific Coast.

In an interview with a representative of this publication the other day, J. F. MacKay, who assumed the duties of vice-president and general manager of the company on November 1st last, stated that the Morrow Company has been running at capacity practically throughout the entire year, sales showing substantial increases over the corresponding months of the previous year.

Mr. MacKay further stated that from orders already on the company's books, and from inquiries being received daily, he was of the opinion it would be a mat-

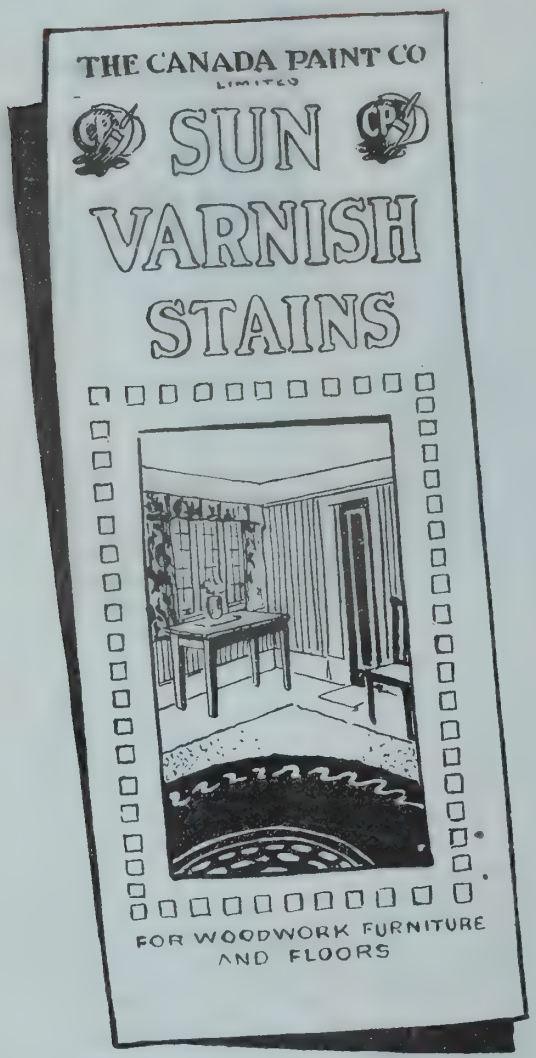
J. C. ADAMS

Formerly connected with Vokes Hardware Co., Toronto, who will now represent John Morrow Screw and Nut Co., Ingersoll, Ont.

ter of but a few weeks when the full equipment and force of the company would again be required to keep up with the demand.

In an interesting letter addressed by the company to each employee at the close of the year, the announcement is made that by means of a bonus system inaugurated one year ago the wages of every employee—excepting the executive officers—has been increased by 22½ per cent. during the year, and that the total amount so distributed was over $77,000. The same system will be continued for some time to come.

Maritime Nail Works Closed



St. John, N.B.—The Maritime Nail Works is closed for an indefinite period. S. E. Elkin, M.P., who is managing director, claims the wages insisted upon by the union make it prohibitive to carry on the business in competition with other factories which have the open shop and are not dictated to by their employees. Mr. Elkin states that the works will be reopened when the men employed stand ready to accept a wage schedule consistent with conditions in the steel market to-day.

Montreal Retailers Optimistic for 1921

Montreal.—Local retailers report business very satisfactory for season of year. Many of them are busy with their stocktaking and rearrangement of stocks after the Christmas and New Year trade. They also state that a number of travelers from outside points as well as from local firms are already busy after the 1921 trade, and everywhere a note of optimism is sounded as to the future outlook of business in general.

Some difficulty is being experienced in procuring some lines of sporting goods such as skis, hockey sticks, and wooden articles generally; however, they hope this is not for long as sporting goods are very seasonable at present.

SUN VAR

QUALITY—the dominant characteristic of all Canada Paint products — is appreciably evident in every can of C. P. Sun Varnish Stain.

And, as with the other C. P. lines, this quality is attained only as a result of scrupulous care in the selection of the necessary materials and by the exercise of the most rigid care in manufacturing.

So that when you sell a customer a can of Sun Varnish Stain you can do so fully confident that you are giving him the very best Varnish Stain that care and skill can produce — one that will measure up to expectations in durability and beauty of finish.

THE CANADA

Makers of the famous "Elephant

MONTREAL TORONTO HALIFAX

NISH STAINS

Sun Varnish Stains are made in nine exquisite colors, as follows—every one durable and waterproof:

Dark Oak, Light Oak, Mahogany, Walnut, Cherry, Green Amboine, Rosewood, Natural and Ground

With a can of Sun Varnish Stain and a good brush, anybody can make old, shabby furniture, floors or woodwork look like new. It stains and varnishes at one operation and correctly imitates the beauty of the natural wood.

The demand for Sun Varnish Stain, fostered by intensive consumer advertising, is worthy the consideration of every good dealer. If you are not already featuring this and the other C. P. sellers, or if your Paint Department is not as productive as it should be, write our Montreal Office for information re the C.P. Agency proposition.

PAINT CO., LIMITED

Brand" Genuine White Lead

WINNIPEG CALGARY VANCOUVER

Number of New Firms Got a Start in Brantford in 1920

REVIEWING the progress made in Brantford during the year 1920, W. H. Wood, managing secretary of the Chamber of Commerce states:—

During the year 1920 among the large concerns which commenced production were the following:—

Robbins and Myers, of Springfield, Ohio., manufacturers of fractional horse-power motors, fans and other small electrical appliances.

S. C. Johnson & Sons of Racine, Wis., manufacturers of floorwax, stains, wood finishes and freeze-proof, carbon remover, cleaner, polish, etc., for automobiles.

The McClary Stove Company, of London, Ont., purchased the Wm. Buck Stove Company, and have greatly increased production in their Brantford plant.

The Williams Tool Corporation of Canada, Limited, manufacturers of pipe threading machinery, amalgamated with the J. H. Hall & Sons plant. The Williams people are from Erie, Pa., and are caring for their Canadian trade as well as that formerly held by the Hall Co., from their Brantford plant.

The Brantford Emery Wheel Co., Ltd., is now the Canadian plant of the Waltham Grinding Wheel Co., of Waltham, Mass.

The Brantford Computing Scale Co., Ltd., are now a million dollar concern, and are completing their excellent new factory, which will soon be occupied and make it possible for them to meet the demands of their business as well as to care for their new lines.

The A. C. Spark Plug plant is completed, which, with over sixteen acres of land, has been purchased outright by the General Motors Corporation.

The Brantford Brass Foundry Company has commenced production.

The Brantford Machine & Tool Co. has been taken over by a new textile company.

Ham Brothers, manufacturers of refrigerators, bee keeper's supplies, screen doors, kitchen cabinets, have made another large addition to their plant.

The Blue Bird Co., manufacturers of electric washing machines, and household electrical appliances, are also securing production.

The Ontario Portland Cement Co., headquarters at Brantford, are now constructing their plant at Beachville, Ontario.

Several other industries from the United States are looking quite favorably upon the telephone city as being the centre which meets the requirements considered when seeking a location. There are now a score of United States concerns who have their Canadian plants in Brantford.

Stove Industry Begins Operations

Sarnia.—W. E. Berchford, of the Perfection Stove Company, has announced that his industry would commence active operations this week and that three of the principal departments would be affected by this order. According to the officials of the company the future looks bright and anything but panicky, and it is expected that in the near future the company will be running at its old capacity.

Extend Electric Service in London

London, Ont.—General Manager E. V. Buchanan announces that during the past year 800 new services were added by the Hydro Department, and this despirte the fact that, owing to the power shortage, everything possible was done to discourage the taking on of new customers. Of the 800 additions, 400 services were placed in new homes. Mr. Buchanan says that in the next five years London's power consumption will increase from 12,000 to at least 22,000 or 25,000 horsepower.

Reorganizing Warren Co.

Reorganization of the Warren Axe & Tool Co. has been announced, and T. J. Dillon of Welland has been made vice-president. Welland and New York interests have united in the reorganization of the Pennsylvania firm.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

UNIVERSAL WASHER

Landers, Frary & Clark, New Britain, Conn., makers of the Universal line of household needs, have issued a bulletin describing their Universal electric washing machine.

The illustrations and diagrams show the design and special features of this washer and the advantages claimed by the manufacturers are plainly and clearly set forth.

Hardware merchants and others interested are invited to write for a copy.

WHITE'S LIMITED, COLLINGWOOD, ONT.

A splendidly illustrated catalog of automobile accessories, electrical and sporting goods for 1921, has been issued by White's Ltd., Collingwood. Illustrations and descriptions of each line are such that the catalog is valuable as a ready reference through the medium of a two-page index. There is a total of seventy-two pages of illustrations and descriptive matter dealing with a very wide range of lines as outlined. Some details in regard to terms, ordering, liability in transit, returned goods and details of parcel post rates from Collingwood to all parts of Canada are given.

Trade Enquiries

Names and addresses of enquirers can be obtained only by those interested in such lines upon application to Hardware and Metal. Please quote reference number when requiring addresses.

2623. **Automobile and cycle accessories.**—Manufacturers who would like representation in Great Britain and Ireland by largest dealers. Please forward catalogues and prices.

2625. **Hardware.**—A firm of commission agents in Trinidad with a large travelling staff wish to represent a large hardware firm in Canada.

2646. **Rope.**—A commission firm in Trinidad with branch in Demerara and covering all the islands, with good references, wish to represent a Canadian firm manufacturing or selling rope of all kinds.

2647. **Representation in British West Indies.**—An ex-officer of the Canadian Expeditionary Force, whose home is in one of the West Indian islands, would like to get in touch with some large Canadian manufacturer with a view to acting as representative in the West Indian islands and British Guiana. He has personal connections with some of the largest business men in the British West Indies.

Hardware LetterBox

Information on trade topics will be gladly supplied to subscribers through this department.

L. C. SMITH SHOT GUN

Cochrane Hardware Ltd., Copper Cliff, Ont.—Kindly let us know the address of the firm manufacturing the L. C. Smith shot gun, and any Canadian agent, if any.

Answer.—The L. C. Smith shot gun is made by the Hunter Arms Co., Fulton, N.Y., U.S.A. Agents for Canada are the Sporting Goods Agencies, 33 St. Nicholas St., Montreal, Que.; Western distributors are the J. H. Ashdown Hardware Co., Ltd., Winnipeg, Man.

SUPREME HEATER

G. W. Nelson, Harriston, Ont.—Will you kindly advise us who are the manufacturers of the Supreme Heater.

Answer.—The Supreme Heating Co., Welland, Ont., were the manufacturers of this stove. They are now out of business and repairs can be procured from Grundy Bros., Strathroy, Ont., and McIntyre & Taylor, Ltd., 501 Queen St. W., Toronto.

CORRUGATING FILES

C. B. Brown & Co., Aylmer, Ont.—Kindly give us the information as to where we can procure corrugating files for sharpening barbers shears.

Answer.—Henry Disston & Sons, Ltd., Toronto, manufacture a Swiss pattern file which would answer your purpose, but would have to bring them on from their American factory as they are not carried in stock in their Toronto branch.

CHURCH BELLS

Martindale & Co., Alliston, Ont.—Can you give us the names and addresses of manufacturers or jobbers of church bells.

Answer.—C. O. Clarke & Bro., Montreal; Wilson & Cousins, 85 McCaul St., Toronto; The Garth Co., Ltd., Montreal; The Jas. Morrison Brass Mfg. Co., Ltd., Adelaide St., Toronto; Wm. Keating, 266 Macdonnell Ave., Toronto.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of January 12, 1901:

"The undertaking begun early last year to consolidate the stove manufacturers in Ontario has failed. The concerns which were to form the proposed consolidation were: The Buck Stove Co., Ltd., Brantford; The McClary Mfg. Co., Ltd., London; Stewart & Co., Woodstock; The Smart Mfg. Co., Brockville; The Gurney-Tilden Co., Copp Bros., Burrow, Stewart & Milne and Bowes, Jamieson & Co., Hamilton. On the plant, etc., of all these firms an option was secured by the promoters, the basis of purchase being a cash one. The amount of money wanted to carry out the idea was between $7,000,000 and $8,000,000."

* * *

"The Seybold & Sons Co., wholesale hardware dealers, Montreal, are seeking incorporation."

* * *

"S. H. Warnock, who has for some time successfully represented Lewis Bros. & Co., Montreal, in Manitoba and the Northwest Territories, has severed his connection with this firm and engaged to travel for Lamplough & McNaughton, Montreal."

* * *

"Geo. F. Stephens, senior partner of the well-known jobbing firm, Messrs. G. F. Stephens & Co., Winnipeg, was in Montreal during the week visiting the different paint factories."

* * *

"J. T. Peacock, of the James Morrison Brass Mfg. Co., Toronto, was presented with a portmanteau by his fellow employees. Mr. Peacock is leaving to take an agency for the Canada Life Assurance Co. at Port Hope, Ont."

* * *

"The Peerless Wire Co., Hamilton, has recently received large orders for book and broom wire and is considering the advisability of running the mill at night as well as the day owing to pressure of business."

* * *

"The Imperial Oil Co. propose to establish an oil depot to be situated at Fredericton, N.B."

* * *

"R. L. F. Strathy, formerly of Welland, Ont., has organized a company in Owen Sound to manufacture a patent wire fence."

* * *

"The agreement which has for some time existed among the manufacturers in regard to the price of stovepipe elbows has collapsed. The cause was the belief that some parties to the agreement were not keeping it."

Turnover Tax in France

DEALING with the subject of a turnover tax, as suggested by Hardware and Metal on many occasions as a substitute for the luxury or sales tax, the following report from the English "Ironmonger" of how the French government is handling the matter is interesting. "France, who abandoned her tax on war profits at the end of June, has since that date been experimenting with a new mode of taxation assessed upon business turnover. The general rate of the tax is 1.1 per cent.; but on certain 'luxury' goods it is 10 per cent. Goods sold for export are exempted from taxation, but on imported goods the tax is added to the customs duty. Traders are required to make monthly returns of their turnover for the purposes of assessment to the impost. The turnover tax is additional to the 8 per cent. tax on commercial and industrial profits and to the tax at a rate varying from .1 per cent. to .5 per cent. already charged upon business turnover in excess of 1,000,000 frs. a year, which are part of the French income tax system. The operation of the turnover tax in France is, no doubt, being carefully watched by the British Government, but, as Mr. Chamberlain, the Chancellor of the Exchequer, informed inquirers in the House of Commons, the tax has not been sufficiently long in force to justify any close inquiry into its practical administration and its full economic and financial effects. In commenting upon the matter, Mr. Chamberlain carefully avoided any references which might indicate whether the imposition of a tax of the nature in question in this country is under contemplation. However, the substitution of a tax on turnover for the universally unpopular excess profits duty is being advocated in certain quarters, and no doubt whoever is responsible for the next year's budget will carefully weigh the results of the French experiment."

Charges That Auto Accessory "Trust" Exists

BEFORE the Tariff Commission, sitting at Ottawa, R. L. Phillips, of Phillips & Pringle, automobile and accessory dealers, of Fredericton, N.B., charged that business in automobile accessories was being unduly restricted in Canada by the organization of jobbers once known as the Canadian Branch of the National Association of Automobile Accessory Jobbers, but now known as the Automotive Equipment Association.

He asked that consideration should be given to the question of taking action under the Criminal Code or under the Combines Act, to dissolve this "trust." He requested the products of houses manufacturing automobile accessories, which had little or no competition in Canada, and the sale of which goods was practically confined to members of the Automotive equipment Association, should be placed on the free list. He requested, further, that legislation be passed next session to provide that a Judge of the Supreme Court in any province, or other suitable person, might be empowered to investigate charges that the distribution of Canadian manufactured goods was being unduly restricted.

Judge Gary Outlines Best Course to Pursue

JUDGE ELBERT H. GARY, chairman of the United States Steel Corporation, states that there is no occasion for pessimism in the present situation and that sufficient capital is waiting the opportunity to invest in new enterprises when prices are stabilized.

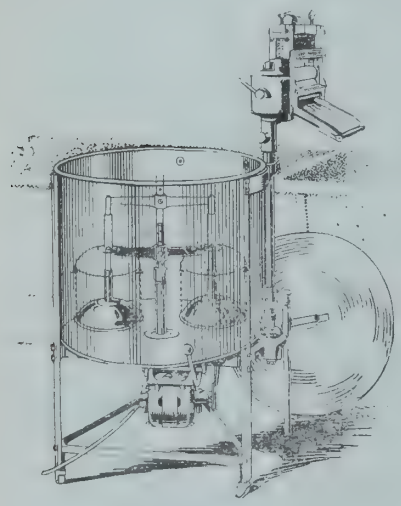
Judge Gary says:

"It is only repeating what many are at present saying when I assert that there are many things in the general atmosphere that are disquieting and yet I am as hopeful and confident of the future as I have been at any time. Conditions are no worse than they were many months ago as predicted would probably be the case. With others I have for a long time hinted at the possibilities. The wonder is that times have not been much worse. Conditions are abnormal. The minds of men throughout the world are distorted. This, of course, is the result of the terrible war through which we have just passed."

The judge pointed out that many of the criminal tendencies at the present arise from the desire to get something for nothing, which all are the result of the military conflicts which have been raging. The judge also said: "That in view of what the world has been passing through during the past few years, one should be thankful that there has not been, since the war closed, more crime, disorder and dishonesty than we have witnessed."

Dealing with readjustment of prices Judge Gary stated: "Those who are still taking advantage of the situation and insisting on prices that are unfair are doing everything they can to prevent return to good business conditions and those who have been fair and reasonable in their prices are doing all they can to help in the readjustment and reconstruction which all thinking men have been waiting for since the war closed. One who gives a little but not much thought to the general situation is surprised that during the last few months there has not been any serious failures, no real disasters, nothing approximating a panic or general demoralization."

New Hardware Goods



OFFERED TO CANADIAN HARDWAREMEN

EASY VACUUM ELECTRIC WASHER

The model "H" Easy Vacuum Electric Washing Machine is being offered to the trade by its makers, The Easy Washing Machine Company, Limited, Toronto, Canada. The "Easy" operates on the "suction" or "vacuum" principle. When in operation the two vacuum cups work up and down inside the tub, but change position when above the water, and take a new position on each downward stroke. This process is said to be far more effective than rubbing, jerking or dragging the clothes over cleated or corrugated surfaces. The worthwhile advantages of this principle of washing will appeal to every woman as the daintiest laces and lingerie cannot be injured, it is claimed.

The tub is made of solid copper and is 24 inches in diameter; it is sanitary and easy to keep clean. The bottom is fitted with quick opening discharge valve. Machine is made entirely of metal—construction is claimed to be simple, sturdy and durable.

Wringer swings in any desired position, is reversible and has instant safety release device. Main pulley wheel runs in oil-less bearings, while drive and reverse gears are packed in grease.

Easy Vacuum Washer

The machine is said to be practically indestructible and to last a lifetime.

ELECTRIC PERCOLATOR SET

A new electric percolator set has been put on the market by Manning-Bowman & Co., Meriden, Conn. The set consists of four pieces: a 9-cup percolator No. 13093, sugar bowl and cream, 8-oz. No. 3091 and tray 19½x14 No. 12019. The shipping weight of the whole is 13 lbs. and the pieces can be ordered separately. The design is chaste but simple as can be seen by the accompanying illustration, and set can be furnished in nickel plate, silver plate or polished copper.

The percolator is fitted with ebonized handles which remain cool and afford convenience in handling. Detachable plug and six feet of cord are provided and electric element is guaranteed and will be replaced free of charge if it proves defective within a year.

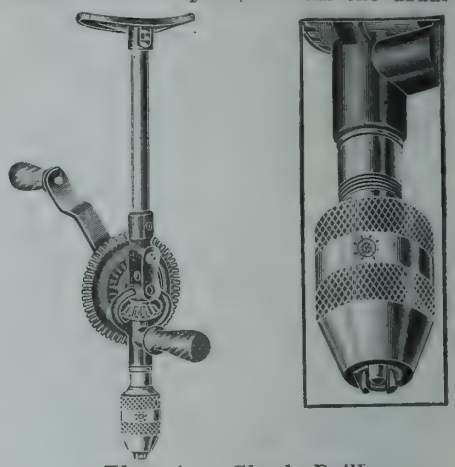
Electric Percolator Set

The Manning-Bowman Company line of toasters, grills, chafing dishes, etc., are handled in Canada by the Northern Electric Co., Ltd., Toronto, Ont.

THE "KLEEN KUT" CAN OPENER

The "Kleen Kut" can opener is a Canadian invention made in Canada by the Franco-British Supply Company, Winnipeg. It is patented in several countries. This can opener works on a ratchet principle, the ratchet engaging the edge of tin and drawing the knife around. It cuts the top off the tin and binds down the cut edge, leaving it smooth. The manufacturers point out that this allows the solid contents to be turned out intact and obviates possibility of user injuring fingers. It works on any shaped tin.

The "Kleen Kut" is made of case-hardened steel and is nickel-plated.

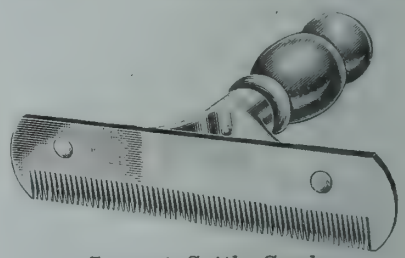


"Kleen Kut" Can Opener

THREE JAW CHUCK DRILLS

The Consolidated Tool Works, Inc., 261 Broadway, New York City, U.S.A., have been for some time making breast drills with the Barber type or two jaw chuck, and have recently started producing these drills with the three jaw chuck.

In this three jaw chuck they claim a rather radical departure from the usual type, as chuck is made without springs or mechanical devices which tend, as a rule, to get out of order, they state, and give trouble. The chuck is made entirely from steel, and is said by the makers to be extremely simple, positive in action and strong and durable.



Three-jaw Chuck Drills

STEWART CATTLE COMB

With the Stewart Cattle Comb, made by the Chicago Flexible Shaft Co., 5600 Roosevelt Road, Chicago, Ill., the herdsmen will have an accessory which, it is stated, will help in keeping his stock in good appearance.

The comb is substantially made, and is fitted with an ebonized handle, designed to permit an easy and sure grip. The metal part is nickel-plated, highly polished.

Stewart Cattle Comb

Depressions in the animal's back may be smoothed out, so that the coat has an outline effect that is symmetrical, showing off to advantage the colorings. Hardware dealers desiring prices and other details on this comb should communicate with the manufacturer.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

THE recent trend toward lower price levels on metals is now being reflected to some extent in lower quotations on wire, bolts, screws, nails, etc. The beginning of this year finds metals at the lowest ebb in some years, and prices on or near the lowest levels reached since 1916. Production is at its lowest point in years and the condition, as a whole, is exactly the reverse of that prevailing a year ago.

Price changes on hardware lines are more numerous than for some time.

Lower quotations are made this week on wire, fence staples, tacks, tapped and blank nuts, turpentine, wrought iron washers, iron rivets, lead pipe, cast soil pipe and fittings, range boilers, valves, vacuum bottles, waste materials, bolts. Garden hose is again reduced, for the second time since summer. Canadian ammunition has also been reduced an amount equivalent to the luxury tax imposed on manufacturers and now eliminated. Removal of the manufacturers' luxury tax on chandeliers, electric and gas wall fixtures, phonographs and other musical instruments, boats, canoes, etc., will result in a proportional decrease, though there is a tendency on the part of some merchants to hold prices up until present stocks are cleared out so they will not sustain any loss for tax already paid to manufacturers on such lines. Wholesalers report a fair amount of business, though travelling staffs are not all out again as yet.

Montreal Markets

MONTREAL, Jan. 6—Some important price changes are noted this week. New quotations are made on wire; and coiled spring, plain, bright and galvanized wire are reduced in price. New lower quotations are also made on galvanized barbed wire. Fence staples are reduced in price, and wrought iron washers, iron rivets, carpet tacks and cap screws all show lower quotations.

Bar iron and steel are holding, but sheets show a slight shading. Waste materials are still on the down grade.

Business is quiet, but prospects for an early resumption of trade seem bright.

Thermos Bottles Revised Downward

Montreal.

THERMOS BOTTLES.—New quotations are being given this week on thermos bottles. Prices have been revised downward and are as follows:

No. 6, $4.75 each; No. 6Q, $6.50; No. 11, $2.50; No. 11Q, $4.25; No. 14½, $2.50; No. 14, $3; No. 14Q, $4.75; No. 15½, $3.75; No. 15, $4.25; No. 15Q, $6; No. 61C, $1.50; No. 61QC, $2.75; No. 54, $8.50; No. 556, $11; No. 168½, $6.75; No. 400, $4.50; No. 396, $4.50.

Caps are quoted: No. 83, $1.75; No. 79, $2.75; No. 80, $3.75.

The above are list prices and the discount is 25% and 10%.

Wire Nails Selling At New Prices

Montreal.

CORRECTION

In our market reports of last week we show the price on wire nails to be $9.50. This is an error as there was a reduction in price of 50 cents per keg and the new base price is $5.85.

Bull Rings Show a Slight Reduction

Montreal.

BULL RINGS.—Bull rings have been revised and the quotations are now slightly lower as follows: No. 21, $4; No. 22, $4.35; No. 31, $4.35; No. 51, $3.50 per dozen boxes.

Reduction in Prices of Fence Staples

Montreal.

FENCE STAPLES.—New prices this week show a reduction on wire fence staples of 40 cents per 100 pounds, and they are now quoted at $6.25 for bright and $7.25 galvanized.

15 P.C. Reduction on Cap Screws

Montreal.

CAP SCREWS.—Hexagon and square head cap screws have been revised in price and have declined 15 per cent.

Wrot. Iron Washers Now Quoted 30 P.C. Off List

Montreal.

WROUGHT IRON WASHERS.—A new price has been reached this week on wrought iron washers and they are now quoted at 30 per cent. off list.

Bright Wire Reduced 50 Cents Per Cwt.

Montreal.

BRIGHT WIRE IN COILS.—The new price shows a reduction of 50 cents per 100 pounds, and is now being quoted at $5.50 per 100 pounds, base.

New Lower Prices For Annealed Wire

Montreal.

ANNEALED HAY WIRE.—This has been revised to the following prices: No. 13, $6.25; No. 14, $6.35; No. 15, $6.60 per 100 pounds.

New Quotations on Galv. Barbed Wire

Montreal.

GALVANIZED BARBED WIRE.—Prices quoted are for 80 rod reels: 2x5 $5.20 reel, 4x6 $5.55 reel, 4x4 $6 reel.

Lower Prices on Coil Spring Wire

Montreal.

GALVANIZED PLAIN WIRE.—The quotations on galvanized plain wire are No. 9 $6.20, No. 12 $6.40; No. 13 $6.50 per 100 pounds.

Galvanized coil spring wire is now

quoted as follows: No. 9 $6.30, No. 12 $6.45 per 100 pounds.

Galvanized plain twist wire is quoted at the new price of $7.50 per 100 pounds.

Sheets and Plates Remain Quiet

Montreal.

SHETS AND PLATES. — There has been a further reduction on the price of sheets and plates. Business has been very quiet with little business other than sorting orders being placed. The reduction represents 50 cents per 100 pounds and prices are as follows:

	Queen Head	Fleur-de-Lis
English Standard—		
28 gauge	13 00	12 00
26 gauge	12 75	11 75
24 gauge	12 15	11 35
22 gauge	11 80	10 90
18 and 20 gauge	11 10	10 75

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Iron and Steel Prices Unchanged

Montreal.

IRON AND STEEL.—There has been no change in prices on iron and steel. Deliveries are reported as being better, but business is quiet as travellers are off the road just now and little business is offering.

IRON AND STEEL

Common bar iron, 100 lbs.	4 55
Refined iron	6 05
Iron finish machinery steel	4 60
Mild steel	4 55
Band steel	4 55
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	4 55
Tire steel	4 75
Toe calk steel	5 45
Harrow tooth steel	4 70
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

NOTE—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Pipe Moving More Freely From Mills

Montreal.

PIPE.—There have been no changes in prices on pipe. While it is still difficult to secure, the mills appear to be catching up with their orders somewhere and jobbers are starting to acummulate stocks. Black pipe is quite free but galvanized is harder to secure. Quotations will be found on current market pages.

New Prices on Scrap Metals

Montreal.

SCRAP METALS.—There have been further declines in prices on some lines of old scrap, with little business offering at this time. It is expected that there will be a much freer movement in these lines during the first quarter of 1921.

DEALER'S BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 07
Red brass	0 12½
Light brass	4 50
Scrap zinc	0 05¼
Lead, heavy	4 00
Lead, tea	2 50
Light copper	9 00
Heavy copper	11 50
Wrought iron, R. Rd., No. 1, per gr. ton	18 00
Malleable scrap (ton)	15 00
Pipe scrap (ton)	9 00
Stove plate, per ton	24 00
Heavy melting steel	15 00
No. 2 busheling	5 00
Boiler plate	12 00

Metal Lath Now Moving Freely

Montreal.

METAL LATH.—Expanded metal lath is moving very freely. Any new buildings that were late in being closed in are taking quantities of this material. Prices are as follows: 26 gauge, 42 cents per square yard; 24 gauge, 48 cents per square yard; 23 gauge, 57 cents per square yard.

New Discount Placed on Rivets

Montreal.

RIVETS.—There has been a revision in price on rivets and they are now slightly lower. The new discount is 37½ per cent. off list.

Tacks Are Now Quoted Lower

Montreal.

TACKS.—There has been a slight revision in the price of tacks and the new quotation is 65 and 15 per cent. off the list.

New Prices Expected on Bolts and Nuts

Montreal.

BOLTS AND NUTS. — It is expected that new prices will be issued on bolts and nuts in the near future. Allied lines are being quoted at new lower prices and it is anticipated that bolts and nuts will follow.

Ingot Metals a Little Firmer

Montreal.

INGOT METALS—Have been showing an encouraging tendency to be a little firmer this week, and improvements are to be expected. Little trading is reported and markets still continue dull.

TIN.—This metal has been holding steady during the past week. At present the trading is very quiet but a gradual improvement is anticipated. Local price is 43 cents pound.

COPPER.—The trend of copper is downward on the New York market but is showing a little more resistance and has reached its lowest level yet. The local price on electro is 19 cents and casting 18¾ cents per pound.

LEAD.—Lead has shown some improvement both in London and New York but local dealers are by no means satisfied that prices are permanent and think it will ease off later. Local price is 7½ cents per pound.

SPELTER.—Spelter has firmed up in London, on which market price here is based. No improvement is shown in the U. S. market. The local price is 8 cents per pound.

ANTIMONY.—There is very little movement and the market is quite dull. Prices should improve, and it is quoted locally at 8½ cents per pound.

ALUMINUM.—There is no change in this metal. The market is very quiet. The local price is 35 cents per pound.

Toronto Markets

TORONTO, Jan. 6—Reductions in the price of wire and bolts of various kinds are the oustanding features of this week's markets.

Price changes are more numerous than they have been for some time, and another decline has taken place in garden hose, making the second reduction in this commodity since last summer. Range boilers have been revised and are lower with the exception of one size.

The removal of the luxury tax has caused a change in the discount on Canadian ammunition, and the amount of the tax which was collected from the manufacturer has been deducted. The new prices on American ammunition have not yet been announced.

The reduction in the price of wire affects bright, annealed, oiled and annealed, tinned and coppered wire, and bale ties and cut hay wire has also been reduced. Fence staples, both bright and galvanized, are lower, and new lower quotations are made on tacks, tapped and blank nuts, wrought iron washers and iron rivets.

Penberthy Valves Reduced in Price

Toronto.

PENBERTHY VALVES.—New and lower prices went into effect on January 1st on Penberthy valves, and constitute a reduction of approximately 15 per cent. The new discounts are the following:

Penberthy Valves—	
Gate Valves	15%
Regrinding Valves	10%
Swing Check Valves	5%
Compodisk Valves	10%

Elephant Brand Felt and Sheathings Reduced

Toronto.

FELT AND SHEATHINGS. — Reduc-

tions have been made in the price of "Elephant" brand tarred and dry building papers and tarred felts, and the following are the new quotations. These are F.O.B., Toronto, Hamilton and Montreal:

	Per roll
Elephant Brand dry fibre, No. 2	$1 10
Elephant Brand, tarred fibre, No. 2	1 45
Elephant brand, white sheathing	1 15
	Per cwt.
Elephant brand, tarred felt, 7, 10 & 16 oz.	$5 35

Wrought Pipe Holding Without Change

Toronto.

WROUGHT PIPE.—There is a fair demand for the smaller size of pipe still, and stocks are below normal. Prices are unchanged, and it is regarded as unlikely that any reduction will take place while demand continues to exceed the supply. Many of the independent pipe mills are operating at practically full capacity, and this condition is in sharp contrast with that obtaining among independents in other finished steel products. This too with their prices above the Corporation prices. While there is not much fresh demand reported by the mills, some of them have had the largest production in their history during the past few months. Present quotations will be found on current market pages.

Quieter Movement of Bar Iron and Steel

Toronto.

BAR IRON AND STEEL.—A quiet week is reported in iron and steel. Small quantities are moving, but it is evident that retailers are just sorting up and keeping their stocks as low as possible. Prices are as quoted last week, and no change is looked for. The recent further drop in ocean freight rates is said to have made it possible to ship iron into this country at a profit. It is also reported to have been offered on the American market, but the belief is expressed there that the movement will be short lived as domestic producers will be likely to meet any serious competition. Present quotations are the following:

IRON AND STEEL

Common bar steel, 3-16 in. dia. and lighter.	$ 5 50
Common bar steel, ¼ in. and heavier	4 75
Common bar iron, 3-16 in. dia. and lighter.	5 50
Common bar iron, ¼ in. and heavier	4 75
Angle base	6 00
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 50
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	28 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	6 00
Norway iron	15 00
Toe caulk iron	6 70
Hoop steel	7 50

Gasoline and Coal Oil Hold Firm

Toronto.

GASOLINE AND COAL OIL. — No change is made in prices of coal oil or gasoline and quotations remain 28 and 31 cents per gallon for coal oil according to grade, and 42 cents for motor grade gasoline. The demand for coal oil is said to be seasonably fair and gasoline sales are above the average owing probably to the open weather permitting a more general use of cars and trucks than is usual at this period of the year.

Wire Nails Hold At Recent Decline

Toronto.

NAILS.—Wire nails are holding at decline noted last week, and base price is quoted at $5.75. Cut nails are quoted $6.60, F.O.B., Montreal. The extras for galvanizing are, under 1 inch, $4.50 per 100 pounds; over 1 inch, $4.00 per 100 pounds.

Thermos Bottle Prices Being Revised

Toronto.

THERMOS BOTTLES.—New price lists are being prepared for Thermos bottles and kits and it is understood that new quotations show some reductions.

Dom. Cartridges Lower; Now 30|20 P.C. Off List

Toronto.

SPORTING CARTRIDGES. — On account of the removal of the luxury tax, which was being paid by the manufacturer, and of course added to the cost of the goods, the discount on the Dominion Cartridge Co.'s ammunition has been changed from 37 1-2 per cent. to 30 and 20 per cent., making a reduction of ten per cent., the amount of the tax. The tax which has been paid on ammunition in the hands of wholesalers and retailers will, it is understood, not be recoverable.

Range Boilers Revised; Some Lower Prices

Toronto.

RANGE BOILERS.—New prices are issued on range boilers and constitute a reduction on the standard boiler of from 5 to 17 per cent., the declines being largest on the smaller sizes. The extra heavy boilers have also been reduced with the exception of the 82 gallon size which has been advanced from $48 to $50. Sales are reported to be smaller now, but a steady movement is still noticed. Following are the new quotations:

Range Boilers—	Standard	Ex.Heavy
30-gallon	$13 00	$15 00
35-gallon	15 00	17 00
40-gallon	17 00	19 00
52-gallon	24 00	28 00
66-gallon	32 00	38 00
82-gallon	40 00	50 00
100-gallon	50 00	60 00
120-gallon	60 00	70 00

Reductions Made on Soil Pipe and Fittings

Toronto.

SOIL PIPE.—A reduction has been made in the price of cast iron soil pipe and fittings. The decline ranges from 20 to 25 per cent. according to size. Medium and extra heavy pipe, 2-inch, and 3-inch, is now quoted at 10 per cent. off list, instead of plus 10 per cent; 5-inch and 6-inch is being quoted at 15 per cent. off list, and 4-inch at 20 per cent. off list, while 8-inch pipe is now 5 per cent. off list instead of plus 20. The declines are said to be due to cheaper materials and lower pig iron markets. The new discounts are given below:

SOIL PIPE—(Medium and extra heavy—2 in., 3 in., list, less 10%; 4 in., list, less 20%; 5 in., 6 in., list, less 15%; 8 in, 5%.

Rope and Cordage Quiet; Prices Maintained

Toronto.

ROPE.—Quotations are held unchanged on rope and cordage. There is very little doing just now and wholesalers do not look for much activity for a few weeks. Prices are as per current market pages.

Fence Staples Are Down 40 Cents

Toronto.

FENCE STAPLES.—A reduction has been made in the price of fence staples and these are now 40 cents per 100 lbs. cheaper. The bright are now quoted at $6.25 per 100 pounds and the galvanized at $7.25; 25 pound and 50 pound boxes are charged $1.00 per cwt. extra.

Change in Tack Prices; New Discounts

Toronto.

TACKS.—The discount on the revised hardware tack list adopted January 30, 1920, has been changed and the new discount is 65 and 15 per cent. in place of 60 and 15 per cent., making a reduction of 12 1-2 per cent.

Stove Bolt Discount Now 57½ p.c. off List

Toronto.

STOVE BOLTS.—A new lower price has been made on stove bolts and the new discount is 57 1-2 per cent., instead of 47 1-2.

Tire Bolts Are Reduced in Price

Toronto.

TIRE BOLTS.—A reduction has been made in tire bolts of approximately 8 per cent., and new discount is quoted at 40 per cent. off list.

Iron Rivets and Burrs Are Now Lower

Toronto.

IRON RIVETS AND BURRS. — The discount has been changed on iron rivets and burrs, and is now 37 1-2 per cent. off list. The extras for small quantities are unchanged. The old discount was 35 per cent.

Garden Hose Reduced; About Ten Per Cent.

Toronto.

GARDEN HOSE—New and lower quotations are in effect on garden hose, making the second reduction since the close of last season. The present decline is about 10 per cent. The following are some of the new quotations:

GARDEN HOSE

Duck Hose—
Maltese Cross brand ..... plus 4%
Lion brand ..... less 23%

Sheeting Hose

	½-in.	⅝-in.	¾-in.
No. 33, 3 ply, per foot	11½	14	15½
No. 44, 4 ply, per foot	13	16	17
No. 55, 5 ply, per foot	15	17	19
No. 66, 6 ply, per foot	16	19	21
Kinkproof, 4 ply	17½	21	23½

Cord Hose —

	½-in.	⅝-in.	¾-in.
Multiped (corrugated)	19	21½	25

Extra 5% discount allowed off full rolls of approximately 500 ft. Multiped.

Wrought Washers Lower; Now 30 P.C. Off List

Toronto.

WROUGHT WASHERS. — New lower prices are made on wrought washers, and the new discount is 30 per cent. off list instead of 25 per cent. Lists and net extras for small quantities and package allowances, with the points that freight allowance is equalized on are unchanged and will be found on current market pages.

Reduction on Wire 50 Cents Per Cwt.

Toronto.

WIRE,—There has been a reduction of 50 cents per 100 pounds made on wire, including bright, annealed, oiled and annealed, tinned and coppered. The new base is $5.50 per 100 pounds, and the net extras remain the same, F.O.B. the usual points.

Bale Ties and Cut Hay Wire Reduced

Toronto.

BALE TIES AND CUT HAY WIRE. —New lower prices are made on single loop bale ties, and also on cut hay wire and new quotations are as below. The extras are as before, and freight is equalized on Hamilton, London, Toronto, Montreal and St. John.

Single Loop Bale Ties—

12g	$6 90	14g	$7 30
13g	7 10	15g	7 55
13½g	7 20	16g	8 00

Cut Hay Wire—

9g	$6 70	13½3	$7 10
10g	6 75	14g	7 30
11g	6 85	15g	7 55
12g	6 90	16g	8 00
13g	7 10		

Carriage and Machine Bolts Reduced

Toronto.

CARRIAGE BOLTS. — The discounts, in effect since June 10, 1920, have been changed, and new discounts are the following: Carriage bolts ($1.00 list), 3-8-inch diameter and smaller, 6-inch and shorter, 15 per cent. off list; Ditto, 3-8-inch diameter, longer lengths and 7-16-inch diameter and larger, net list. Machine bolts, 3-8-inch diameter, and smaller, 4-inch and shorter, 30 per cent. off list; Ditto, 3-8-inch diameter, longer lengths, and 7-16-inch diameter and larger 5% off list.

Coach Screws and Other Bolts Reduced

Toronto.

COACH SCREWS AND BOLTS—New and lower prices are announced on coach or lag screws and on various bolts and are as follows:

COACH SCREWS—20 per cent. off list.
SLEIGH SHOE BOLTS—all sizes, net list.
SQUARE HEAD BLANK BOLTS—5 per cent. off list.
BOLT ENDS—5 per cent.
PLOW BOLTS—1, 2, 3, heads, 15 per cent.
ELEVATOR BOLTS—large heads, net list.
ELEVATOR BOLTS, corrugated heads, 30%.
FANCY HEAD BOLTS—net list.
SHAFT BOLTS—($3 list)—net list.
STEP BOLTS—large head ($3 list), net list.
WHIFFLETREE BOLTS—net list.

Tapped and Blank Nuts Reduced in Price

Toronto.

NUTS.—A reduction of 25 cents has been made in tapped and blank nuts and the following are the new quotations:

NUTS—2 inch, and smaller—

Square, blank, add to list	$2 00
Square, tapped	2 50
Hexagon, blank	2 25
Hexagon, tapped	2 75

Can Openers Are Lower in Price

Toronto.

CAN OPENERS. — A reduction of about 15 per cent. has been made in the Keen Cut and Perfection type of can opener.

Lower Prices Again On Lead Pipe

Toronto.

LEAD PRODUCTS. — Lead pipe is down one cent per pound, otherwise last week's prices still hold. Considering the time of year there is said to be a very fair demand for these lines. Lead is reported to be a little firmer in outside primary markets, and producers as a whole are not disposed to quote far ahead. Quotations on principal lines are the following:

Lead pipe, list, per lb.	0 13½
Lead waste pipe, list, per lb.	0 14½
Do., over 8 in., list, per lb.	0 15½
Lead pipe is subject to a discount of 10%.	
Lead traps and bends	Net
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 10½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 36
Do., strictly, lb.	0 27
Do., commercial, lb.	0 25½
Do., guaranteed, lb.	0 29
Do., wiping, lb.	0 25
Zinc sheets, per lb.	0 18

Prices Hold on Malleable Fittings

Toronto.

PIPE FITTINGS.—Prices are holding on pipe fittings and no changes have been made. There is a quieter time for fittings now and the demand is smaller. Cast soil pipe fittings have been reduced in price as dealt with elsewhere. Quotations are the following:

Cast iron fittings	Net
Plugs	15%
Bushings	17½%
Unions ¼" to 2"	30%
Do., ⅛ in., 2½ to 4 in.	25%
Dart Unions, blk., ¼ in. to 2 in.	20%
Do., ⅛ in., 2½ to 4 in.	8%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

Class A	0 70	0 80
Class B	0 30	0 40
Class C	0 20	0 30

Compression Goods Held; Present Quotations

Toronto.

COMPRESSION GOODS.—No changes are noted this week in the quotations on valves and bibbs. Purchases by retailers are light at present, not only on account of stock-taking, but there is an idea that further changes in prices are likely. Quotations are as under:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	28-30%
Flatway stop and waste cocks, standard	25%
Roundaway stop and waste cocks, standard	25%
Brass steam cocks, standard	add 10%
Globe, angle and check valves, standard	add 5%
J.M.T.	plus 10%
J.M.T. C.	Net
Gate or straightway	Net
Jenkins gate valve	7/10%
Standard gate	list plus 5%
Jenkins Globe	Net
Radiator valves, standard	23%

Sheets and Plates Finding Their Value

Toronto.

SHEETS AND PLATES. — Sales of sheets and plates are small at present and stocks appear to be ample for present requirements. Prices in general are holding unchanged, but there are reports of stock being offered below these prices. Supplies are improved considerably and better transportation facilities from the mills are reported. Quotations are as below:

PLATES

10 gauge	7 50	....
12 gauge	7 55	....
14 gauge	7 60	....
16 gauge	7 70	....

BLACK SHEETS

14 gauge	8 35	9 30
16 gauge	8 40	9 40
18-20 gauge	8 45	9 45
22-24 gauge	8 50	9 50
26 gauge	8 55	9 55
28 gauge	8 65	9 65

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	9 90	11 30	10 00	11 35
U.S. 28	9 50	10 90	9 60	11 05
U.S. 28	9 20	10 60	9 30	10 75
22 and 24	9 05	10 45	9 15	10 60
18 and 20	8 90	10 30	9 00	10 45
16	8 90	10 30	9 00	10 45
12 and 14	8 75	10 15	8 85	10 30

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

No Changes Made on Corrugated Sheets

Toronto.

CORRUGATED SHEETS. — Business is rather inactive in this line at present, and movement is small. No price change is reported, but the tendency is downwards. Quotations are the following:

Corrugated Sheets—	Per 100 Sq. Ft.
No. 28 gauge	11 25
No. 26 gauge	12 00
No. 24 gauge	18 75
No. 22 gauge	22 25
No. 20 gauge	26 50
No. 18 gauge	32 75

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Waste Materials Are Dull and Lower

Toronto.

SCRAP MATERIALS.—The market continues very dull, with little doing in waste materials. Prices are lower, but are still largely nominal and further declines in new metals make values very uncertain Red and yellow grades are unsettled in price. Following are quotations in use:

WASTE MATERIAL

No. 2 busheling	....	$13 00
Stove plate, per ton	24 00	25 00
Yellow brass	7 00	8 00
Red Brass	....	10 00
No. 1 machinery cast	29 00	30 00
Heavy melting steel	16 00	17 00
Heavy copper	10 50	11 50
Heavy copper	0 11½	0 12½
Scrap zinc	3 75	4 25
Light brass	0 04½	0 05
R.Rd. wrought iron, No. 1, gr. ton	17 00	18 00
Scrap pipe	8 00	9 00
Heavy lead pipe	4 00	4 25
Old rubbers, boots and shoes	2 00	3 00
Overseas lumbermen's rubber boots	1 50	2 00
Bicycle tires	0 01	0 01½
Tea lead	2 00	2 25
Automobile tires	0 75	1 00

Ingot Metals Show No Definite Tendency

Toronto.

INGOT METALS.—While the inquiry for metals has developed in volume during the past week, prices show no definite tendency and few new transactions result, though a more active tone is reported.

TIN.—A little firmer tone is shown in tin and quotations locally advanced to 46 cents.

COPPER.—A new low level is reported in U.S. markets for this metal, which is the lowest since November 1914, but doubts are cast on these reports as misleading and they do not represent the present value of copper. Quotations here are unchanged at 19 cents for casting.

LEAD.—This metal is said to have been more active and showing a little more firmness in outside markets. Quotations here are unchanged at $7.00. The American output for 1920 shows a big increase over the previous year.

SPELTER.—There is a better tone to the spelter market, but prices are held at $7.75.

ANTIMONY.—The market was dull throughout the week with prices unchanged and quotations remain 8 to 9 cents.

ALUMINUM. — There is little movement in aluminum. Lower quotations were made in outside markets, but prices here are unchanged at 37 to 39 cents.

London Markets

LONDON, Ont., Jan. 6—Important changes have been made in several lines this week, and are in the nature of reductions.

Fence staples, oiled and annealed wire, wire nails, and wrought iron washers have all been reduced in price. New lower quotations are in effect on carpet sweepers and mounted grindstones.

Business has been seasonably good here during the past week, and merchants are very optimistic regarding trade conditions for the coming year.

Fence Staples Reduced; 40 Cents Lower

London, Ont.

FENCE STAPLES. — A reduction has been made in the price of fence staples and new quotations are 40 cents per 100 lbs. lower.

New prices are the following:

Galvanized, 100 lb. kegs, $7.25 per 100 lb.; 25 lb. boxes, $8.25. Bright, 100 lb. kegs, $6.25 per 100 lbs.; 25 lb. boxes, $7.25.

O and A Wire Reduced; Down 50 Cents

London, Ont.

OILED AND ANNEALED WIRE.—A new lower price is made on wire this week. The reduction is 50 cents per 100 lbs., and new quotations are the following:

No. 10, $6.15 per 100 lbs.; No. 11, $6.25; No. 12, $6.30.

Wire Nails at $5.75 Base; Cut Nails Unchanged

London, Ont.

NAILS. — Wire nails are now selling at the new lower base price of $5.75, as quoted last week. There is no change in cut nails, which are still at $7.50 base. The demand for nails is smaller at present.

Linseed Oil Is Holding Unchanged

London, Ont.

LINSEED OIL. — No change is noted on linseed oil, and sales are quiet this week. Quotations remain as under:

	Raw, Gal.	Boiled, Gal.
1 to 2 bbls.	$1 17	$1 20
3 to 5 bbls.	1 16	1 19
6 to 9 bbls.	1 14	1 17

Less barrels, add 15c per gal.

Turpentine Quotations Are Unchanged

London, Ont.

TURPENTINE. — No alteration has been made in the price of turpentine here this week. The demand is light and following are quotations:

	Imp. Gal.
1 barrel lots	1 55
2 to 4 barrel lots	1 54
5 gal. lots	1 70

Wrought Iron Washers Have Lower Quotations

London, Ont.

WROUGHT IRON WASHERS. — A new lower price is quoted on wrought iron washers, and present discount is 30 per cent. off list in place of 25 per cent. The usual net extras for small lots remain.

Wyandotte Cleaner Quoted A Little Lower

London, Ont.

WYANDOTTE CLEANER. — A new lower price is quoted on Wyandotte cleaner. It is now seling at $19.66 per barrel, containing 50 five-pound sacks, f. o. b., London.

Carpet Sweepers Reduced in Price

London, Ont.

CARPET SWEEPERS. — New quotations are made on Bissell's carpet sweepers. The japanned sweepers are reduced $2.00 per dozen, and the sweepers with nickel plated trimmings have been reduced $3.00 per dozen. New net prices are the following:

Carpet Sweepers.—American Queen, n.p., $60 doz.; Champion, japd., $45; Grand Rapids, n.p., $55; Grand Rapids, japd., $50; Grand, n.p., $71; Grand, japd., $68; Parlor Queen, n.p., $62; Princess, n.p., $57; Standard, japd., $46; Universal, n.p., $53; Universal, japd., $48.

Vacuum Sweepers—Superba, $120 doz.; Grand Rapids, $106 doz.; Household, $94.

New Net Prices on Barn Door Hangers

London, Ont.

DOOR HANGERS AND TRACK. — A reduction was noted in last week's report on the Richard Wilcox door hangers and track, and the following are the new net prices, figured at 20 and 10 per cent. off list.

No. 543, $20.16, doz., pr.; No. 541, $18.72; No. 545, $14.40; No. 843, $14.04; No. 021, $12.96; No. 21, $21.60; No. 321, $21.60; No. 821, $24.50; No. 31 square barn door track, 23 cents foot. Brackets for barn door track, $2.16 dozen.

Net prices.

Ten P.C. Reduction on Mounted Grindstones

London, Ont.

GRINDSTONES. — A reduction of 10 per cent. has been made on the following lines of mounted grindstones and the new prices are: No. 300, $7.92 each; No. 400, $9.00. The kitchen grindstone, No. 320, is now $26.00 per dozen.

Skates Moving Slowly; Prices Unchanged

London, Ont.

SKATES. — The comparatively mild weather is responsible for a falling off in the demand for skates and they are moving but slowly this last week. Prices are unchanged and 30 per cent. is quoted off the Starr list.

Fair Movement of Ash Sifters

London, Ont.

ASH SIFTERS. — There has been a fair sale of ash sifters, and prices are unchanged as follows: Common wood side, $3.00 per dozen; Banner, $3.65 each: Rocker, No. 1, $6.25 each.

Window Glass Unchanged; Sales Seasonable

London, Ont.

WINDOW GLASS. — The sales of window glass have been fair and seasonable, and quotations are unchanged at 30 per cent. off list for single and double diamond, and 40 and 10 per cent. off light list for cut lights.

Smaller Demand Now For Putty

London, Ont.

PUTTY. — The demand for putty is smaller now and sales are just fair. Prices are holding unchanged and are the following:

PUTTY—	Per 100 lbs.
Standard, 100-lb. drums	8 05
Do., 25-lb. drums	8 30
Pure, 100-lb. drums	10 55
Do., 25-lb. drums	10 80

No Change in White Lead in Oil

London, Ont.

WHITE LEAD IN OIL. — There is a very light sale at present for white lead in oil and prices are holding unchanged as follows:

	Tons	Less tons
Pure, per 100 lbs.	18 20	18 55
Elephant, per 100 lbs.	18 70	19 05

Hand Sleighs Having Light Sales

London, Ont.

HAND SLEIGHS. — Sales of hand sleighs are very light at present on account of the scarcity of snow; 35 per cent. off list is still the market quotation.

Cross Cut Saws Have Fair Demand

London, Ont.

CROSS CUT SAWS. — There is a very fair demand for lumbermen's saws, and the following are prices charged. Buck saws are also moving fairly well.

CROSS CUT SAWS—Champion, 75 cents foot; Philadelphia Lance, 75c; Maple Leaf Racer, Maple Leaf Lance, Maple Leaf Premier, Maple Leaf Pangburn, Simonds', Arrow Head, 5 ft., $5.80; 5½ ft., $6.60; 6 ft., $7.55 each.

BUSK SAWS—Common, $15.00 dozen; Heavy Lance Tooth, $18.00 dozen.

Awning Cords Again Reduced in Price

Winnipeg.

AWNING CORD.—A few weeks ago prices on awning cords declined. This week there have been further revisions in prices which are now quoted lower, as follows:

White—4, $4.28 doz.; 5, $16.20.
Drab—4, $4.95 doz.; 5, $19.35.

Another Decline in Cotton Twine

Winnipeg.

COTTON TWINE.—The prices for cotton twine have again been revised and are lower. The price has been gradually coming down on this line during the past few weeks. New prices are as follows:

In Balls.—3-ply, 50c per lb.; 4-ply, 55c. per lb.
In Cones.—3-ply, 48c per lb.; 4-ply, 52c per lb.

Winnipeg Markets

WINNIPEG, Jan. 6—With the exception of declines in the prices of cotton goods such as sash cord, awning cord and twine there have been very few changes in prices. A number of general lines, such as planes, hammers, spokeshaves, try squares, levels, screw drivers, etc., which have just arrived, are priced a trifle higher. Business being very slack at the present time and very little stock coming in, the markets are very quiet, but some important changes are looked for in the near future. It is expected, on account of the luxury tax being lifted that trade will be stimulated a little. There is a very optimistic feeling throughout the trade that business for this year will be fully up to expectations.

Some Lines Wringers Reduced in Price

Winnipeg.

WRINGERS.—This week has brought about a few reductions in the prices of wringers. The demand for this line has not been as great as it should be which is probably the reason for the slight reduction. The new prices are as follows: Regent, $73.60 per dozen; New Easy, $81.60 per dozen; Universal, $52.80 per dozen.

Prices Hold on Pipe; Little Improvement

Winnipeg.

PIPE.—Galvanized pipe is very scarce, and very little improvement has been noticed during the past month. The prospects for more improvement in the near future are none too good. Black pipe is more plentiful but there is not much demand for it. Prices still hold.

Paints and Varnishes Reported Steady

Winnipeg.

PREPARED PAINTS. — There is no change in paint and varnish quotations this week. Busines is reported fairly good, but an improvement is expected within the next few weeks.

Linseed Oil Remains Unchanged

Winnipeg.

LINSEED OIL.—The flax market continues to be firm and prices on linseed oil are unchanged. Raw linseed oil is quoted at $1.27 per gallon, with boiled at $1.30 per gallon.

Turpentine Steady, Price Unchanged

Winnipeg.

TURPENTINE.—There has been no change in the movement of turpentine since our last report and prices are fully maintained. Turpentine is quoted at $2.50 per imperial gallon in one barrel lots.

Sash Cord Still on the Decline

Winnipeg.

SASH CORD.—There has been another decline in sash cord and a very substantial one. Although a lower price was expected it was not thought it would be such a big reduction. New prices are as follows:

In Hanks.—No. 6, 73½c per lb.; No. 7, 72½c; No. 8, 71½c; No. 9, 71½c.
In Coils.—No. 8, 71½c per lb.; No. 10, 71½c; No. 12, 71½c.

Pittsburgh Markets

PITTSBURGH, Jan. 6—There has not been a general reopening of the mills that closed down during the latter part of December, and the majority are waiting for an accumulation of orders sufficiently large to warrant them resuming operations.

With the reduction in the price of pipe to the Corporation level by some of the independents, the last item of regular steel mill products is now in line with Industrial Board prices.

Further reductions in steel prices are expected, but may not take place for some time as little general buying is expected for two or three months, and there is small incentive for mills to lower prices at present unless there is a prospect of good-sized business.

Fewer wage reductions are being reported, and the majority of the independent mills are holding off making changes in this respect for various reasons, but alterations are regarded as probable later.

PITTSBURGH, January 6.—Mills that closed in the latter part of December are not resuming this week to any great extent. Resumption hinges upon the accumulation of orders, whether strictly new business, specifications against old contracts or releases from suspensions, and the accumulation has been very slow. A change in conditions is requisite to enable the independents to operate at any considerable rate, and while such change has been predicted in most quarters as likely to occur after January 1, the change can hardly be expected in the first few days of the new year.

As to the United States Steel Corporation, it continues to operate up to the physical limit, and with a few additional blast furnaces blown in during the past two months, on account of supplies of coal and coke being improved, the corporation's operations are somewhat heavier than for many months, at about 92 per cent. of capacity, measured in steel making units in operation.

With the corporation operating at 92 per cent., there is an ingot production at the rate of fully 21,000,000 tons a year, and at an estimate of 20 per cent. for the independents, counting, of course, those that are closed entirely, there is 6,000,000 tons more, making 27,000,000 tons altogether, there is production at about 65 per cent. of the 42,000,000 ton average rate obtaining during the first nine months of 1920, when the demand for steel was regarded as remarkably heavy. Considering the stagnation prevailing almost everywhere, one would suppose that consumption of steel had decreased by more than one-third. If so, the prospect for the immediate future is not heavier production, but lighter production. It would be necessary to account for the present production, and it seems quite possible that some of the steel being shipped by the Steel Corporation is going to replenish stocks.

Prospects for Consumption

Obviously it is a question of when the ultimate consumer will take hold. It is not a question directly of when the fabricating shops, car shops, machinery manufacturers, bolt, rivet and nut makers, spike manufacturers, agricultural implement makers, producers of cold finished steel bars, and the various other "manufacturing consumers" will decide to buy steel from the mills, but a question when the customers of these steel consumers will themselves be disposed to buy. The manufacturing consumers will buy only as they see a market for their various finished products.

The readjustment the country is now undergoing is of course chiefly a readjustment in prices for materials and services. Consequently it is not enough for mill prices of rolled steel products to be readjusted. There must be readjustment in prices all along the line down to the ultimate consumer. Assuming for the sake of argument that mill prices have been readjusted adequately, it is a fact that prices of manufactured goods have not in all cases been readjusted in keeping. The manufacturing consumer cannot stand between the steel mill and the public and put in his own pocket the reduction the steel mill makes. To illustrate, at the top of the last price movement before the war, culminating late in 1912, steel bars reached 1.40c, while standard railroad spikes reached 1.85c. Merchant bars, as now equalized between the Steel Corporation and independents, are 2.35c, which is 67 per cent. advance. Assuming for argument that this extra price is justifiable, there is the condition that when, recently, spikes declined to 3.65c, they were regarded as readjusted, but they are 97 per cent. above the 1.85c price. If the spike makers cannot "afford" to sell at less than 3.65c, then there is something wrong with their costs and the country will wait until they have readjusted those costs.

Pipe Gets in Line

The year 1920 in the finished steel market ended nicely by the independent market on steel pipe coming down on the last day, for under date of December 31, 1920, the Republic Iron & Steel Company issued a new card showing the same discounts as in the Industrial Board schedule of March 21, 1919, the card to which the United States Steel Corporation has uniformly adhered all this time. The other independents will necessarily have to do likewise and it is an unimportant detail what dates their revised cards may carry. The reduction is from a basing discount, on ¾ to 3-inch, of 54 per cent. to a basing discount of 57½ per cent., making $7 a net ton change.

Pipe was the remaining item in the regular steel mill products to be adjusted. The independent price on tin plate came down to the Steel Corporation price of $7 per base box, 100-pound, about the middle of November. On November 26 bars, shapes and plates came down to the Steel Corporation or Industrial Board prices of 2.35c, 2.45c, and 2.65c, respectively. November 29 wire and nails came down to 3.25c for wire and $3.25 for nails, and a few days later sheets came down to 3.55c for blue annealed, 4.35c for black and 5.70c for galvanized.

Thus the whole round trip of independent steel prices was made just within the limits of the calendar year 1920. It is true that late in 1919 the independents in certain lines were quite generally securing prices above the Steel Corporation or Industrial Board prices, but those prices could be regarded simply as containing delivery premiums, the mills not being willing to sell and the buyers not being willing to buy for any distance ahead. It was after Chairman Gary of the Steel Corporation made his statement, December 30, 1919, that the corporation would not advance its prices, that the independents saw that they would really have to "go it alone" and then they regarded their advance prices as regular prices, not as premium or temporary prices.

(Continued on Page 68)

Important Price Changes Made This Week

Wire and Nails Now Lower—Bolts, Nuts, Rivets, Tacks and Washers Show Reduced Quotations—Garden Hose Is Down Again

SEVERAL important price changes have taken place in the past few days and they indicate the trend of the market in metal products. New discounts announced on carriage and machine and practically all lines of bolts show lower prices, and reductions are made on wrought iron washers, blank and tapped nuts, cap screws, iron rivets and cut and carpet tacks.

The new prices on wire reflect the reductions made recently on wire products at the mills, as do the declines announced in wire nails. Wire and nails have been scarce for some time and fence wire and fencing was particularly hard to get all last season. Supplies have been improving and it is expected that there will be better business in these lines this year.

Soil Pipe and Range Boilers Lower

A reduction of considerable amount is shown by new quotations on soil pipe and soil pipe fittings. The decline follows lower pig iron prices, but it is not long since that manufacturers of these goods stated that costs were still to high to allow of any reductions.

Galvanized range boilers have also been reduced in price, and a further reduction in the price of lead pipe is due to present low prices in primary markets. Lead is lower than it has been since 1915, and last year's output in United States was larger than the previous year's.

Garden Hose Reduced Again

Garden hose has been reduced in price again and this is the second decline since the end of last season. The fall in cotton prices has had an effect on hose prices and at the present raw rubber is lower than it has been for eight years. Reduced prices should be noticed this year on tires and other rubber goods.

Cost of Tax Off Ammunition

New quotations are made this week on Dominion make of ammunition due to the removal of the luxury tax, which it will be remembered was collected by the Government from the manufacturer. The new prices are back at the point where they were before the tax was placed on, and it is stated that present costs do not permit of further reductions on these goods.

Paint Movement to Stabilize Conditions

Consistent and Dependable Increases in Paint Selling Predicted —95 Per Cent. of Merchants Waiting for Other 5 Per Cent. to Start Things Going Are Holding Up the Procession—Clean up Old Accounts and Stretch Out for New Business

THE forecasts of Canadian paint manufacturers regarding the outlook for paint and varnish business during 1921, as outlined in last week's issue of Hardware and Metal, are borne out by the opinions of others in the trade both in Canada and in the United States. Some points outlined by U. S. manufacturers will be of interest to Canadian merchants because of the similarity of the problems of both countries. The consensus of these opinions seems to be that the anticipated steady increase in paint sales should help greatly in stabilizing trade conditions. Consistent and dependable increases in paint business are predicted for the early months of this year by many leading manufacturers who have studied the subject.

As one manufacturer aptly puts it: "When by accident one hits his finger instead of the 'nail on the head' the result not only is painful but disturbing to the entire body, but soon the wound begins to heal and the body to function and a normal condition begins to develop. When the manufacturer suddenly loses a demand for his wares the farmer encounters an unexpected decline in the market value of what he has produced, and the mechanic has his wages greatly reduced; each, in a measure, is temporarily paralyzed just as results from a physical accident. In like manner recovery begins, and is attained according to the seriousness of the condition encountered. The process of deflation we are now encountering is disturbing, and somewhat painful, but certainly it was not unexpected, and foresighted business men, level headed farmers and thrifty laborers have prepared to some extent for that which was inevitable, and therefore are not seriously hurt. We have at hand all the remedies to insure an early recovery and a continuation of business on a different level: an unusual yield of farm products, wonderful manufacturing facilities and plenty of skilled and efficient labor. The need for a large building program is evident. The desire of our people for the things we have produced should be sufficient assurance of an early return to active and satisfactory business conditions for all."

Building Supplies Suffer Least

Another manufacturer states that while business in luxury and semi-luxury lines is suffering and will continue to suffer, it would seem that building supplies and particularly paints and varnishes will suffer least of all and the spring months should bring a return of a satisfactory volume of business.

Pointing out that even now their paint business will compare favorably with that of the rest of the year, another manufacturer looks for a large amount of new building as the result of lowered building costs and a corresponding increase in demand for paint.

Need for More Building is Important Factor.

The necessity for more building and the present tendency toward lower prices on building materials is pointed to by a number as one of the most important developments which which should be reflected in increased demand for paint. While present business is quiet an expansion is looked for once a more normal price level is reached generally, according to another authority.

"Until deflation has run its course conditions cannot be expected to improve, but with a general betterment we anticipate a share in future improvement," is another opinion.

Eliminate Wastefulness

Urging that wastefulness be eliminated, another manufacturer states: "I am entirely optimistic regarding 1921. But the important thing to remember is that this is a time for the practice of real economy. The war forced us into extravagant and wasteful habits. Customers were clamorous for goods; to meet the demand we had to pay whatever was demanded for raw materials and for labor. Now conditions are changed. There is business to be had for all those who go after it, but it must be done on sound basis. There must not be wastefulness."

Clean Up Old Accounts

Pointing out the necessity for cleaning up old accounts and putting forth special effort for new business, another manufacturer makes the following statement:

"I think that underlying conditions are much more healthy than they have been for many months. An improvement in business activity must come after the turn of the year but not because the calendar has changed. To my mind the length of time depends on the amount of energy that is put into cleaning up old accounts and stretching out for new business. There is an old saying that only 5 per cent. of men who go into business for themselves make a success of it. Many people claim that is too high a rating and that only 2 per cent. or 3 per cent. succeed by their own efforts. The rest succeed because of conditions which carry them along and to my mind the 95 per cent. who are now waiting for the other 5 per cent. to start

Glidden Finished—Well Finished

Appearance gives pride and satisfaction, but *service* merits lasting approval and is judged by more exacting standards. Glidden Finishes combine *both* qualities. They *look well* and *wear well.*

It's because these qualities in Glidden products are so well known to buyers of paint that the Glidden line is so profitable for dealers. Glidden reputation keeps Glidden products moving. Their rapid turn-over means dollars to the dealer. And no matter what the surface, there's a Glidden product that will protect and beautify it.

If you are not yet handling the Glidden line write today for our dealer proposition. This popular name will lend prestige to your entire business.

The Brush Department

Brush Manufacturers Present Case

Tariff Board Hears Objection to Charging Duty on Exchange Value Rather Than Par Value—Ask General Tariff of 27½ Per Cent. on Paint and Varnish Brushes

MUCH interesting information concerning Canada's brush industry is outlined in the brief presented to the Tariff Committee, as follows:

The protective tariff on brushes of all kinds (tariff item 653) has built up in Canada an efficient brush manufacturing industry which

(1) Provided employment for 1,000 employes, 60 per cent. of whom are males, with a payroll upon which between three and four thousand persons are dependent;

(2) Has developed an export trade in some lines of brushes and during the last fiscal year exported brushes to the value of $125,000;

(3) Is to-day, and for years has been, supplying the Canadian trade with the classes of brushes made in Canada, of excellent quality, at prices which are as low, and in some cases lower, than prices of similar goods as made and sold for home consumption in the United States. The classes of brushes referred to are those brushes in which the Canadian manufacturers supply the larger part of the Canadian trade, due to the assured domestic market which enables the Canadian factories to produce in quantities at lower unit cost than would be possible if a larger part of the Canadian requirements were supplied with imported goods.

There is no combination or association of brush manufacturers in Canada and the companies compete keenly for domestic and export business.

Export Paint and Varnish Brushes

The Canadian factories are producing paint and varnish brushes of the best quality and their exports consist largely of this class, together with some shaving brushes, and household brushes. During the twelve months ended March 31, 1920, Canadian brushes were sold to the United Kingdom, the United States, Australia, Newfoundland, British West Indies, British South Africa, Portugese East Africa, the Argentine, Colombia, Venezuela, China, Java, Cuba and other countries in small quantities. In selling to Cuba, the Canadian manufacturers were under the handicap of an 8 per cent. preferential in favor of imports from the United States, but still were able to meet the United States price. In no case has the industry sold brushes for export at lower prices than those at which the Canadian trade was supplied. This, surely, is ample proof that the industry is efficient and that it has not been charging higher prices on account of the tariff. The tariff has been of advantage in giving an assured home market and making possible the production of brushes at a low unit cost.

Canadian brushes are practically excluded, under normal conditions at least, from the United States market by an import duty of 35 per cent. (United States tariff item 336). If the Canadian duty were substantially lowered the United States manufacturers, already in possession of an assured home market, would be able to cut into the Canadian trade and, by reducing the amount of Canadian business available to the brush factories in this country, might be able to force our cost of production beyond a competitive basis. Therefore, so long as other trading nations protect their own "home" markets by Customs tariffs, the tariff of Canada is of vital importance to the continued successful operation of the Canadian brush industry.

As regards small camel hair brushes with quill handles, the Canadian industry is unable to compete with German or Japanese labor and these are not made in this country. The manufacture of such quill goods is carried on in Germany and Japan by outside piece-workers who are paid a very low wage. In many cases nearly all the members of whole families engage in such work. The demand for such brushes in Canada is comparatively small but if higher tariff protection be provided the Canadian industry should be able to supply the entire Canadian trade at prices which compare favorably with United States prices on similar brushes made and sold there for home use.

Trade returns show that during 1918-19 imports from the United States under the classification all other brushes, n.o.p., were valued at $245,393. Of this amount, we believe, manufacturing brushes represented approximately $200,000. Some of the Canadian requirements in manufacturing brushes are being supplied by the Canadian brush industry at prices which are as low as United States prices on like brushes as sold in that country for home consumption, but a much larger part comprising lines not made here could be furnished at reasonable prices if higher tariff protection were provided. Expensive special machinery is required in many cases for the production of these lines and with the Canadian market so largely cut into from abroad, the Canadian manufacturers have not felt warranted in making the necessary expenditure. Imports of manufacturing brushes are principally from the United States and it is simply a question of offering sufficient assurance of the Canadian trade to justify the necessary initial expenditure for machinery.

Exchange Hampers Export Business

The Canadian brush factories were doing some export trade in scrubbing brush lines before the war and during the last four or five years they have been selling even in the United Kingdom. The exchange situation, however, has practically cut off all of this export business and is seriously threatening the Canadian market with importations of Belgian and German brushes made by cheap labor. Recent advices from Great Britain show that the brush market there has been completely demoralized by exchange-aided importations from the Continent and Canada can hardly escape. In the manufacture of brushes of this kind, labor represents 40 per cent. or more of the cost of manufacture to the brush factory. Moreover, the raw materials used by the industry in Germany and Belgium are obtained locally and the cost is not enhanced by exchange. We are filing with your committee a letter dated October 15, 1920, from a manufacturer's representative in Cape Town which contains information that two boats laden with German goods, including brushware, recently arrived at Swakopmund, the capital of what was formerly German West Africa. The writer says:

"The prices of these goods were considerably cheaper than those quoted by your good selves, chiefly on account of the exchange, which to-day stands at $3.85½ (Canadian money), while the German exchange stands at 234 marks to the fl., so it will be patent to you that German manufacturers are evidently using the South West African Protectorate as a dumping ground. This is rather a pity, because, as you know, the South West African Protectorate is now incorporated with the Union of South Africa, and a lot of the goods landed at Swakopmund will undoubtedly find their way into the principal centres of the Union, such as Cape Town, Johannesburg, Fort Elizabeth and East London, which will naturally affect the market.

Even before the war Germany was able to send into Canada some brushes of this kind made by cheap German labor, and with the exchange situation as it is at present and as it seems likely to continue for some time, the manufacture of household brushes in Canada is seriously menaced.

The manufacture of toilet brushes, such as hair, clothes and nail brushes, was commenced in Canada about 1913, and under war conditions the industry here has developed and is now producing goods which are equal in quality and price to like brushes as made and sold in the United States.

Before the war France was sending toilet brushes into this country valued at more than $100,000 annually, while Jap-

PAINT SELLING SUGGESTION

Painted interior walls are fast becoming popular.

They are especially preferable in homes where there are small children. Sticky small fingers soon ruin wall paper.

Many people have never seen anything but a plain plastered wall or a papered wall. When a painted wall is suggested they think of whitewash.

It's a real service to suggest to parents the merits of painted walls. Show them a room nicely painted in gloss or flat colors. Explain that finger marks can be washed off without injury.

Here's a good idea for ad copy:

Have you ever considered painted walls in your home while the children are small? Finger marks can be washed off without injury to the paint. Painted walls are really artistic.

Drop in and let us show you some color combinations. See for yourself how pretty a painted interior can be made.

Paint a room or two and stop worrying about the kiddies' sticky fingers.

This New, Sales-Pulling, Display Card

Five colors, including some unusually handsome gilt-work, go to make this striking, attention-compelling display. This handsome, interest-arousing card must be seen in colors to appreciate the sales-making "punch" and "pep" behind it.

21" x 28", made for either easel or hanger use, it is designed with common-sense and real understanding of "dealer-helps," such as goes into all Boeckh booklets and literature, and other co-operation with retail merchants.

This desirable stimulator of sales will be packed without cost in spring orders *when requested.* Have you mailed your request to us yet? A post card does it!

Crude Barytes Abundant in New Canadian Location

All users of crude barytes will be interested in a new deposit located on the Canadian National Railway, 150 miles north of Sudbury. This deposit has been proven for a length of 600 feet and a depth of 140 feet. There has been 1,200 feet of diamond drilling done and the vein has been cut in four sections.

The surface will channel sample 95.5 per cent. barium sulphate. There is a little calcite and a smaller amount of quartz in the barytes. There are no iron stains of any kind. The exploratory work that has been done has proven 50,000 tons of barytes and further exploratory work will continue to show additional tonnage.

Canada has no barium business of any importance and Canadian consumers pay about $500,000 a year for barium products, which are largely imported from the States. Canada consumes $150,000 of ground barytes, which is costing the Canadian consumer $43 per ton f. o. b. his plant. There are also about 1,000 tons of ground barytes produced every year in Canada by one paint company, but this is colored material and consequently brings the lowest market price.

PAINT MOVEMENT TO STABILIZE CONDITIONS

Continued from page 60

things going, are holding up the procession. The commonest form of report of business conditions is to learn that business houses say they are not placing any orders and that they will not until business starts up again.

Holding Up the Cash

This attitude on the part of purchasing agents undoubtedly will be found reflected through the entire organization, including the financial department. Here it is observed that there seems to be a fear of meeting financial obligations because if cash on hand is paid out there is no telling from where or when additional cash will be available. I think this is the greatest weakness of the present situation, and I am of the opinion that if creditors would take a firm stand with their debtors and insist upon every obligation being met that can be met without unjustifiable ruination of the debtor, the situation soon would right itself automatically and those who have the courage to go ahead would find themselves in a position to do so. Confidence is the backbone of prosperity and until a majority of business houses have a feeling that their neighbors are going to take care of their obligations, both contractual and financial, good business cannot be expected.

Buys Plant in St. Romauld

Quebec.—The Nation Fibre Products Company, Limited, has just purchased a plant in the town of St. Romauld, in the county of Levis, and plans to begin operations about the middle of February.

Paint To-day--Walk on Tomorrow

ISN'T IT TRUE that you would paint your floors oftener if you didn't have to keep the house upset so long waiting for the paint to dry?

Wouldn't you do it oftener if you could paint one-half of the floor one day, then move the furniture over from the other half and paint that the next day?

Well that's just what you can do with———— drying floor paint. This fact, together with the way it stands the wear and tear is the reason it is used so much on restaurant floors and ship decks.

Ask for descriptive literature.

(Ad. suggestion for seasonable paint line.)

Death of Martin-Senour Co. Salesman

Belleville. — William F. Ferguson, travelling salesman for the Martin-Senour Co., died at the General Hospital here of typhoid pneumonia. He was one of the best known travellers in this portion of the Province. He was born in Kingston about 46 years ago. For the greater part of his life he was in the hardware business, conducting a shop at Forest Mills, and later acting as manager for the Smith Hardware Co., of this city. He was a prominent Oddfellow and Methodist, and was actively engaged in various local organizations. His wife alone survives.

BRUSH MANUFACTURERS PRESENT CASE

Continued from page 62

anese imports into Canada in 1913-14 were valued at $122,047. Official information, which we shall file with you, shows that in October, 1919, men employed in one of the largest Japanese brush factories at Osaka were paid $1.25 per day, while women averaged only 50 cents to 75c per day. In the Canadian brush industry, women are paid from $2.50 to $3.00 per day and men receive from $3.50 to $6.00. The rates quoted for Japan were those obtaining prior to the economic depression which occurred in that country some months ago and is still continuing. A very complete report on the brush-making industry in Japan has been made by Mr. James F. Abbott, United States Commercial Attache to Japan. Mr. Abbott shows how toilet brushes are made, largely by outside piece-workers. Much of the work is sent to the homes of the poorer classes and is done among most unattractive and in many cases insanitary surroundings. Then, too, the price at which this work is done is still less than the price paid to inside factory workers. If the Canadian public understood the conditions under which brushes are made in Japan they would be slow to buy such imported articles. It will be remembered that in December, 1919, the definite discovery was made in London, England, that Japanese shaving brushes, bearing labels to the effect that they had been "sterilized" in Osaka, nevertheless carried anthrax infection, and as a result a number of countries imposed embargoes against Japanese shaving brushes. Greater care undoubtedly is being exercised at the present time, but the only merit in the Japanese product is its cheapness.

Coupled with the advantage of cheap labor the Japanese practically control the supply of bristles from China and Manchuria and, through the Japanese Government's control of the camphor industry, Japanese manufacturers of celluloid toilet brushes enjoy a distinct and exceptional advantage over Canadian manufacturers.

Exchange Helps French Product

So far as French toilet brushes are concerned, the Canadian tariff is much more than offset by the present advantage which international exchange conditions give to the French manufacturer. No tooth brushes are yet being made in Canada, largely because the present tariff did not provide sufficient protection against cheap Japanese labor. The Payne-Aldrich tariff of 1909 in the United States provided a duty of 40 per cent. against imported brushes of all kinds, including hair pencils in quills. Under the 40 per cent. tariff the manufacture of tooth brushes was commenced in the United States and a number of splendid factories have been established. If the toilet and tooth brushes which are now imported into Canada could be made here, full-time employment would be provided at good wages for at least 200 additional workers. We wish to make it plain to you that protection required by us is essentially a protection for Canadian labor. If you discourage by restrictive laws and regulations the importation into this country of Oriental labor, is it not quite as reasonable to enact corresponding legislation against the products of such labor as well?

So far as exchange is concerned, the present situation cannot continue indefinitely, but a return to parity cannot be expected for several years at least, as respects household and toilet brushes, and in the meantime our industry is in danger from the products of Belgium, Germany and European countries. We would call your attention particularly to the fact that brushes from Belgium and the Netherlands are now admitted to Canada under the intermediate tariff rate of 25 per cent., which rate is much more than offset by adverse exchange in the case of brushes made in these countries from local materials. The practice of charging duty on the exchange value rather than the par value of European currencies, we submit, is stimulating unfair competition from lower exchange countries and we wish to protest against the abandonment by the Government of the former practice in this regard.

Good Conditions in Canadian Factories

The employees in Canadian brush factories work under sanitary conditions and receive good wages. There has been no strike in any of our factories. Some of the brush companies have adopted profit-sharing and are paying their employees a bonus on their wages at the same rate as that at which profits are distributed to shareholdeds. Then, too, the brush companies provide insurance for their employees, without cost, with policies running up to $2,000. The industry was highly developed under war conditions and has not taken advantage of the fact that supplies of brushes of all kinds were difficult to obtain from outside sources. A substantial beginning has been made in the development of export trade, and no doubt after normal conditions are

"Marathon" Steel Ranges

It is very gratifying to know that the superior quality which goes into all Davidson's Stoves and Ranges is appreciated by all users of our various lines.

The "Marathon" is a high-class modern range. Body of extra heavy polished steel and protected with sheets of 1/8" asbestos mill board.

Hand-riveted throughout to insure tight-fitting joints. Regulating oven with balanced drop door.

The bottom is strengthened by braces to avoid buckling or warping. Can be used for wood or coal.

An attractive, efficient range guaranteed Davidson durability.

Weekly Paint Markets

Montreal

MONTREAL, Jan. 6.—Business is quiet now in paint and varnishes, but the outlook for this season's business is regarded as bright.

Prices are holding unchanged, but turpentine is sagging slightly. Linseed oil prices are holding, but the flax market is easier. Little business is offering in white lead, putty or glass and prices show no change.

Linseed Oil Prices Remain Unchanged

Montreal.

LINSEED OIL.—There has been no change in the local price of linseed oil. The market is considerably easier and on account of the large crop of flax seed in Argentine Republic there is a possibility of a lower price in the near future. Prices for this week are unchanged.

	Imp. Gal.	
Raw—		
1 to 4 barrels	1 15	1 33
Boiled—		
1 to 4 barrels	1 17½	1 35½
3 to 4 barrels	....	....
5 to 10 barrels	....	....

Glass Is Now Reported Quiet

Montreal.

GLASS.—There is little local business offering at this season and glass houses are busy stock taking and preparing for the New Year's trade. Glass from Belgium is coming in quite freely and stocks are in good shape. The price is 25% off.

Turpentine Market Still Listless

Montreal.

TURPENTINE.—There is practically no change on the turpentine market; the price has sagged a little, but with little buying in the U. S. markets it is expected that the price will see lower levels.

	Imp. Gal.	
Turpentine—		
Single barrels	1 33	1 48
Small lots	1 43	1 58

(Packages extra.)

Putty Shows No Change at Present

Montreal.

PUTTY.—There is nothing new to report on the putty situation. Prices remain unchanged and there is little business offering at this time, except, of course, sorting up orders.

Commercial Putty	5 tons	1 ton	ton
Bulk barrels, 800 lbs.	$6 00	$6 25	$6 60
Bulk drums, 100 lbs.	7 00	7 25	7 60
Do., or tins, loose, 25 lbs.	7 25	7 50	7 85
Bulk tins, cased 25 lbs.	8 00	8 25	8 60
Bulk drums or tins, loose 12½ lbs.	7 50	7 75	8 10
Bulk tins, cased 12½ lbs.	8 25	8 50	8 85
Bladder barrels, 400 lbs.	8 25	8 50	8 85
Do., cases, 100 lbs.	8 50	8 75	9 40
Tins, 1 lb.	10 60	10 85	11 20

Standard Putty, 10c per 100 lbs. advance over above prices.

Pure Linseed Oil Putty, $2.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

No Change in Prices on White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Quotations on white lead in oil are unchanged. It is felt by manufacturers who corrode lead that the price of pig lead has reached its lowest level, and lately it has shown a slight advance. In view, however, of the price of the raw materials it is to be expected that prices on white lead in oil will be revised to a lower level, but it is to be noted that there are good stocks on hand at present, and this product is moving quite slowly.

Toronto

TORONTO, Jan. 6.—The feature of this week is the decline of 20 cents per gallon in turpentine quotations. Some time ago it was thought that this product had reached rock bottom, but it has declined considerably since then.

Linseed oil is held unchanged, and there is little movement.

White lead in oil and putty are quiet and are unchanged.

There is very little movement in prepared paints and varnishes this past week, but travellers will soon be starting out again, and it is expected that business will revive.

Paints Are Quiet; But Not Unusually So

Toronto.

PAINT AND VARNISH.—With the travellers off the road during the past two weeks or more, sales of paint and varnish have been small, and what mail orders have been received are reported to be of small and sorting up varieties.

Paint manufacturers as a whole appear to be very optimistic and are looking for a good spring business, while admitting that it may be later than usual owing to the fact that many retailers are reluctant to place orders for their spring requirements on a declining market.

This natural tendency to hold off on the theory that further reactions will take place may however cause a sudden demand when the season is opening which will be difficult to meet.

Glass Slower With Small Sales

Toronto.

WINDOW GLASS.—Quotations on glass are nominally 30 per cent. off list for case lots though it is understood that better figures are being offered for quantities. Business is quiet and little change is reported. Stocks are said to be small as retailers have been buying in small quantities, and from hand to mouth, and with little movement there should be good sales when the demand begins to quicken.

No Change in Putty; Sales Are Small

Toronto.

PUTTY.—No new developments have taken place in this product and previous quotation still holds. The demand is small, but as travellers have not been out during the past two weeks this is not surprising. Quotations are as follows:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	8 05
Do., 25-lb. irons	8 30
Do., bladders in bbls.	9 30
Do., less quantities	9 55
Pure, in 100-lb. drums	10 55
Do., 25-lb. irons	10 80
Do., bladders in bbls.	11 80

White Lead in Oil Shows No Change

Toronto.

WHITE LEAD IN OIL.—No change has taken place in the white lead market and quotations remain unaltered. Sales of this commodity in common with all paint products are light at the present time and this condition is expected to continue for a few weeks, though manufacturers are looking for good business. Prices of lead show signs of stiffening on English markets and every advance is said to make it more unprofitable to import into the States or Canada. Producers of pig lead seem indisposed to quote for future deliveries. Present quotations on white lead are as per market quotation pages.

Further Decline of 20 Cents in Turpentine

Toronto.

TURPENTINE.—A big reduction is

If interested tear out this page and place with letters to be answered.

made this week in the quotation on turpentine, and the decline is 20 cents per gallon below last week's prices. The price was thought to be at rock bottom some time ago when prices were considerably higher, and the future tendency seems uncertain. Buying is reported to be very small, but at this period of year this is not unusual. Quotations are the following:

Turpentine—	Per Imp. Gal.
1 barrell lots	1 35
2 to 4 barrel lots	1 34
5 gal. lots	1 50

Linseed Oil Prices Are Unchanged

Toronto.

LINSEED OIL.—This has been another quiet week in the trade and the movement of oil has been small. Prices are holding unchanged. The flax seed market has been unsettled and generally lower. Heavy shipments of seed have been made from the Argentine. The average annual world's production of seed in 1912 was estimated at 150,000,000 bushels, since when it has declined, and the average during the past four years is stated to have been 50,000,000, or one-third of the total of 8 years ago. The Canadian crop this year was estimated to have increased nearly 100 per cent. Spot seed is quoted from $1.91 to $1.98 on Winnipeg market. A year ago quotations were $4.62 to $4.69.

	Raw	Boiled
6 to 9 barrels, gal.	1 14	1 17
1 to 2 barrels, gal.	1 17	1 20
3 to 5 barrels, gal.	1 16	1 19

BRUSH MFRS. PRESENT CASE

(Continued from Page 64)

restored we shall be able to resume and increase such business abroad if our industry is not weakened in the meantime by destructive, unfair competition, arising from cheap foreign labor or aided by the demoralized exchange situation.

Under the present difficult readjustment situation, it is especially important that there should be an assured home market for the products of Canadian labor, that the capacity of the Canadian brush factories should be utilized to supply the needs of the Canadian people.

For the reasons stated it is submitted that the tariff on brushes should be as follows:

	British Preferential	Intermediate	General
Item 653-a, Paint and Varnish Brushes, except hair pencils in quills or otherwise	17½%	25%	27½%
Item 653-b, Brushes of all kinds, n.o.p.	22½%	35%	35%

If this change be made, it is believed that the manufacture of toilet brushes will be placed upon a sound basis; and that the manufacture of tooth brushes and a number of lines of manufacturing brushes not now made here will be undertaken in Canada. Moreover, by giving an assured home market for Canadian-made brushes, the amount of business available to the Canadian companies will be enlarged and we will be able to produce and to sell our goods at prices based on quantity output and low manufacturing costs. The proposed changes would only bring the Canadian tariff under the general rate to a level with the present duty imposed by the low tariff administration in the United States. We also invite your committee to study the development of the brush manufacturing industry in the United States under the protective tariff and call your attention particularly to the way in which the tooth brush manufacturing industry has been developed there after adequate protection against Japanese labor was provided.

PITTSBURG MARKET

(Continued from Page 59

Prospective Steel Prices

In view of the fact that there is not likely to be any general buying movement in steel products in the near future, say not earlier than three months hence, steel manufacturers would prefer it to be assumed that present prices represent the prospective bottom, but the fact may as well be stated plainly that this is not the more likely prospect. The balance of probabilities is that the low point in steel prices, on which the market will eventually turn and from which it will stiffen, will be lower than the present level, say from 2.00c to 2.20c for bars, shapes and plates. If such prices come, they will not be developed soon. There is no incentive for a mill to name such close prices unless, or until, it sees an opportunity to fill up fairly well and thus obtain an economical operation.

As to wages, reductions by independents' mills have not been proceeding nearly as fast as seemed likely two or three weeks ago. The majority of independents are holding off, awaiting a further reduction in the cost of living and also being desirous that the present plant idleness may have its full moral effect both upon workmen and the retail stores they patronize. Some mills, too, attach much importance to the theory that immediately upon wage reductions being made steel buyers would expect lower prices for steel.

At the opening of business this week a large valley pig iron producer announced its willingness to sell basic iron at $30 and Bessemer iron at $32, valley, thus recording declines of $3 in each grade from the previous nominal quotations. Foundry iron, formerly quotable at $35, valley, is not plainly marked at any price, but will have to readjust itself to no more than a moderate spread above basic.

Building in Edmonton Three Times That of 1919

Edmonton.—Building permits for the past year total $3,231,956, according to inspector N. McIvor's annual report to the commission. The sum is more than three times greater than that of the previous year, when the figures were $931,346.

Says Canadian Linseed Cannot Compete With Indian Product

D. H. Ross, Canadian Government Trade Commissioner in Melbourne, Australia, recently cabled that there was a large demand for flax seed in Australia for oil crushing purposes. An important Winnipeg firm cabled to the Canadian Trade Commissioner a quotation of $4.30 per bushel c.i.f. Sydney. On receiving this quotation Mr. Ross wrote as follows: "The quotation of $4.30 per bushel c.i.f. Sydney is equivalent to $172 per ton of 2,240 pounds. This works out at the latest Montreal exchange of $3.80 at £45 5s. 3d. whereas the largest importers in Sydney are landing Calcutta linseed at £33 16c. 4d per long ton c.i.f. Sydney, which is a difference in favor of the India linseed of £11 8s. 11d., which of course places the Canadian quotation quite outside of competition."

Later Mr. Ross wrote as follows: "This morning I saw the Secretary of the Commonwealth Government Flax Committee and was advised that Victorian flax seed was now obtainable at £35 to the ton, or say 17s. 6d. per bushel, the ton being 2,240 pounds. In June last the committee were selling at £48 per ton, or say £1 4s. per bushel, as the rate of exchange from India was then comparatively high, but since the rate improved the price has come down for Indian seed to about £33 or even less at Sydney, ex ship. The secretary of the Flax Committee states that they give a bonus of £6 per long ton on standard flax, and that for seeding purposes they had ample "Blue Riga," which had been thoroughly acclimatized and therefore, in his opinion, more suitable than Canadian, even were the latter competitive."

Ask Huge Loan For Building

Montreal.—That there should be a Federal loan of $250,000,000 as a housing loan was the substance of a resolution passed at a meeting in the Builders' Exchange here representative of the National Joint Industrial Board of the Building and Allied Trades.

It was further urged that there should be established a Federal housing board appointed by the Government, such board to include representatives of the workers.

Big Increase in Winnipeg Building

Winnipeg.—Seven hundred more buildings were constructed or enlarged in Winnipeg in 1920 than during 1919. The cost of the 2,500 structures was $8,367,250, the largest amount in any year since 1914, the year the war started. The outlay was about three times as large as that of last year when $2,948,000 was spent. The 1919 number of buildings was 1,789. Buildings costing $91,000 were constructed this month as compared with outlays of $149,450 in December a year ago.

SIGN OF MERIT
BEST B M & Co MADE

Two Good Lines for Spring Selling

Tile-Like and Impervo Porch and Deck Paint are two lines that sell easily in the spring house-cleaning period. Impervo Porch and Deck Paint is made on Moore's House Color Base with Spar Varnish added to make it tough and durable. It dries solid with a high gloss, giving a hard wearing surface.

Tile-Like is a combination stain and varnish, and can be used on hard or soft floors, wicker and porch furniture, linoleum, oilcloth, chandeliers, lamps, fire-fronts, etc., with the same beautiful effects. It will resist water and never turns white. That's why it sells.

Barrett Roofings, Cements Industrial Paints etc.

Prepare for Bigger Business

MORE and better advertising than ever before—
That's the Barrett program for 1921, and it means quicker, easier sales and larger profits for every dealer who handles the famous Barrett Products.

These products, which are listed below, have made good on their own merits. For many years they have been fast sellers in every section of the Dominion. Each of them is unequalled for its particular purpose.

Everlastic "Rubber" Roofing

The most popular roll roofing on the Canadian market.

Liquid Elastigum

Preserves the surface of prepared and "rubber" roofings.

Everlastic Liquid Roofing Cement

Puts a new surface on worn-out prepared and "rubber" roofs.

Everjet Elastic Carbon Paint

A durable, waterproof, acid-proof, protective paint for wood and metal.

Elastigum Plastic Patching Cement

"The waterproof cement of a thousand uses." Repairs roofs, flashings, etc.

Creonoid (Fly Oil) Cow Spray and Lice Destroyer

Just what farmers want. Inexpensive, effective and easy to use.

This year there will be an unprecedented demand for these products. If you do not carry them *all*, you will miss a sure opportunity to increase your profits.

Descriptive booklets regarding any of these products sent free on request. Address nearest office.

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

"Save the surface and you save all" *Paint & Varnish*

Stephens'

REGISTERED TRADE MARK

Silkstone Flat Wall Colours

For beautifying homes all the year round. Silkstone is not merely a "spring re-decorator," but an all-the-year staple that housewives are buying for the home whenever the spirit moves them to "do the walls."

The housewife is "sold" on Silkstone because she knows that it is cheaper than wall paper and can be washed without rubbing off. The soft, silky finish has an appeal for the home-lover. Silkstone out-wears all other wall coverings.

The economical side of Silkstone; its beauty and its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably—learn what's in it for you in an agency.

Burgess Batteries

Round Carton

Burgess No. 6 Ignition

Energetic, vigorous and enduring, this type of Burgess Battery is fully dependable for gas engine and open circuit work. Inspected, tested and guaranteed. Built for service and sales.

Burgess Packing

eliminates fire hazard, insures against damaged goods from careless packing, saves space. Burgess packing is clean, sanitary and labor-saving.

Flashlight Batteries and Cases

Burgess manufacture a complete line of flashlight cases and flashlight batteries in all styles and sizes, carrying the unqualified agreement.

Burgess Uniplex Batteries

Burgess Guarantee

Every Burgess product is fully guaranteed and you are protected by our unqualified agreement to replace any Burgess product which does not give satisfactory service.

Burgess Uniplex Batteries are actually waterproof. This is the most serviceable of all types of dry batteries—easy to connect, handy to carry, and take up little space. Burgess products are not sold by mail order houses. Write for literature.

CURLING STONE Headquarters

Mac's Special

Specially designed for us to suit our hard, keen ice. The weight is distributed in such a way as to give the running surface sufficient grip to hold whatever turn may be given, without any tendency to rock or roll.

Kay's Excelsior

Manufactured by Andrew Kay & Co., this stone has a world-wide reputation. An absolutely first-class stone that has given satisfaction wherever the game is played.

Registered **Floglaze**

Announcement

With our appointment as

Exclusive Western Jobbers

of

Floglaze

we have inaugurated a selling campaign that will mean Real Big Help to "Floglaze" dealers throughout the entire West.

That Paint Sales

will reach a high figure during 1921 is an unquestioned fact.

That "Floglaze" dealers will receive a general share of this business is fully assured.

The "Floglaze" Proposition

provides for Bigger "Floglaze" Sales.

Wait for our salesmen—they are out to show you

MILLER-MORSE HARDWARE CO LIMITED

"THE BIG WINNIPEG HOUSE"

If interested tear out this page and place with letters to be answered.

THE BUYERS' GUIDE

Bits, Auger
E. C. Atkins & Co., Hamilton, Ont.
Caverhill, Learmont & Co., Montreal.
The Crescent Co., Meriden, Conn.
Millers Falls Company, Millers Falls, Mass.
North Bros. Mfg. Co., Philadelphia, Pa.
Stanley Rule & Level Co., New Britain, Conn.
Wilkinson & Kompass, Hamilton.
Whites Limited, Collingwood, Ont.

Bits, Forstner
Progressive Mfg. Co., Torrington, Conn.

Bits, Extension
The Crescent Co., Meriden, Conn.
Millers Falls Company, Millers Falls, Mass.

Bits, Expansive
The Crescent Co., Meriden, Conn.

Bits, Electrician
The Crescent Co., Meriden, Conn.

Bicycles
Canada Cycle & Motor Co., Toronto.
Hyslop Bros., Ltd., Toronto.
Iver Johnson Arms & Cycle Works, Ltd., Fitchburg, Mass.

Bicycle Parts

TRADE MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but, for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

BOLINDER'S

FOOD CHOPPING and MINCING MACHINES

THE "BOLINDER" FOOD CHOPPERS

Adjustable for chopping meat—coarse, medium or fine. Can be used to the same advantage for mincing fruit, vegetables, eggs, cheese, etc. Ahead of every other make on account of their many-sidedness.

Food Choppers made in 4 sizes.

The "BOLINDER" Mincing Machines

Are of the very highest standard. All surfaces are smooth to prevent the accumulation of dirt and to facilitate cleaning.

Made in 9 sizes

Both machines are constructed on the American system and all parts standardized to interchange with other machines of the same type.

The **Cutters** are of case-hardened Swedish steel, specially tempered and practically blunt-proof. The **Tinning** is extra heavily coated by expert workmanship with purest tin.

Exclusive selling rights granted to dealers where we are not actively represented.

For catalogues, prices and terms please write.

ARROWHEAD SAWS

Sell fast, make satisfied customers and reflect credit on the dealer who carries them, because—they are perfectly tempered, hang right and are set right. Cross-cut Saws, Hand Saws, Buck Saws, and Circular Saws.

T. F. Shurly Company, Limited
St. Catharines
Ontario

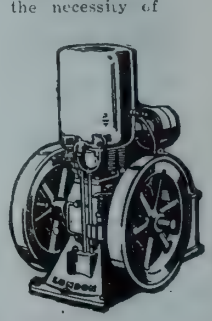
Arrowhead Saws are the "Standard of Canada" and the first choice of men who know. Write to-day for complete catalogue.

When writing to advertisers kindly mention Canadian Grocer.

Better Because of the War!

For years our plant was under Government control. Every effort of our employees was centred on shell making.

Into every man in our employ was drilled the necessity of hair's-breadth accuracy.



Now that their efforts are again centred on the

LONDON ENGINE

The same attention to accuracy that was developed in war time is carried out by the experts retained in our employ.

The London Engine is as perfect as the shells that helped win the war.

Dealers! Write for booklets.

London Gas Power Co., Ltd.

SPARK PLUGS

An Article Well Displayed Is Half Sold

Attractively packed merchandise fulfills the three functions of a good selling display—attracting attention, arousing interest and stimulating desire.

The exceptionally attractive package which Goliath Spark Plugs are now packed in furnishes you with material for endless displays. Feature Goliath Plugs in your windows.

The space occupied by your windows is the most valuable part of your store. Make it pay your rent—by displaying attractive and seasonable merchandise.

The Margin of Profit, on Goliath Plugs, will appeal to you.

The Defenceless Man —Put a COLT in His Hand

EVERY one of your customers requires the protection of a Colt Automatic Pistol or Colt Revolver in his home.

We are in the midst of restless times. Newspapers are full of accounts of "breaking and entering" in the night time—a form of crime made comparatively safe by the ease with which these midnight prowlers can make their "get away" by automobile.

Armed with a Colt, the householder knows that he is safeguarded by "the world's right arm." There is no protection that you can sell in the fire arm field equal in efficiency and safety to a Colt.

COLT'S FIRE ARMS

Illustrated Printed Matter Mailed on Request

International Service

Combined Buying

means increased profits. You save time and trouble by combining orders to us for all your requirements. We feature duplicate parts for popular cars such as Ford and Chevrolet. You can depend on us for shop equipment of power and hand tools. To attempt purchasing these lines from different factories, means extra expense in time and money. We can supply you with everything for motor cars and trucks, and can make quick, complete shipments from stock.

Established in 1896, the B-R Co. service is based on 24 years' experience.

Tools and Hardware, Garage Equipment, Bicycles and Tires, Cycle Supplies.

Write for Prices, Terms and Catalog. Special Proposition to Jobbers.

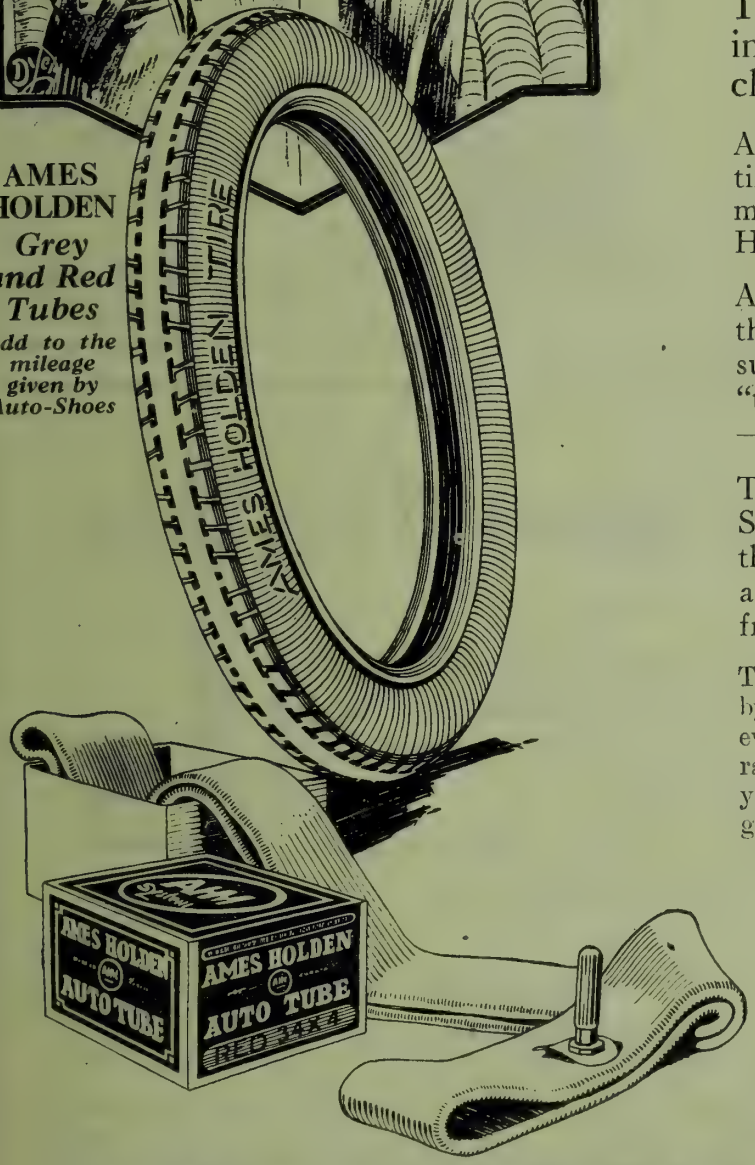
AHM System

HERE ARE "AUTO-SHOES"

Any automobile casing has a right to be called a "tire"—the good, the bad, the indifferent.

The word "tire" contains nothing to indicate the origin of the casing, its character, value, mileage or reliability.



Ample reasons why we should desire a distinctive name for casings built to give much greater than average mileage—Ames Holden "Auto-Shoes."

A name which will distinguish them from the hosts of ordinary tires—indicate their superiority—identify them immediately as "the casings that give the cheapest mileage" —Ames Holden "Auto-Shoes."

The policy behind Ames Holden "Auto-Shoes" is as distinctive as the name—a policy that considers the dealer very largely—that aims at pleasant relationship and goodwill, free from irritating rules and red tape.

The reputation for excessive mileage established by Ames Holden "Auto-Shoes" is being talked of everywhere. Sales and distribution are increasing rapidly. We have a good proposition to make to you for your territory—a proposition you will be glad to consider and act upon. Write.

AMES HOLDEN *Grey and Red Tubes* *add to the mileage given by Auto-Shoes*

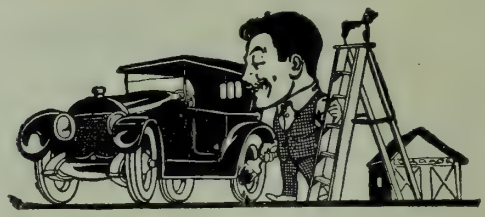
Test Tire Pressure With Pump Hose Connected

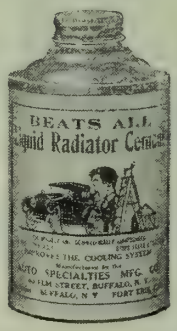
SCREW the Schrader Universal Pump Connection to the regular hose-coupling of either hand or power pump, and you can use the Pressure Gauge without removing hose from valve. This saves you a lot of time and trouble. You simply place your pressure gauge over deflating pin. This handy little device costs only 65 cents, but it adds greatly to your convenience.



SCHRADER UNIVERSAL PUMP CONNECTION

Made in Canada by

A. Schrader's Son, Inc.
334 East King Street, Toronto
London, Eng., New York, Chicago



It's Easy BEATS-ALL Way

Supply your trade with either

BEATS-ALL Liquid or Powder RADIATOR CEMENT

Two Sizes—Liquid 50c. and 75c.—Powder 35c. and 50c.

Why resort to a soldering iron?—Use BEATS-ALL.

It is safe and dependable. When left in radiator acts as a preventive for new leaks.

Guaranteed to repair leaks quickly and permanently.

Dealers—write to-day for our remarkable proposition. It will pay you.

Torrington, Conn., U.S.A.

FORSTNER BITS

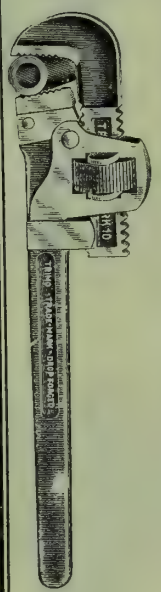
bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

UNIMECO WROUGHT WASHERS

MADE IN CANADA

Prompt Shipments

of this wide and useful range of wrought washers of every variety —in round and square, plain or galvanized.



Annealed Rivet Burrs of the same high degree of excellence can also be supplied.

"Unimeco" are the better kind with an unusual finish. They are profitable to handle. Write to-day for prices and information. It will pay you.

TRIMO

THE WORD TRIMO

Stands for good tools made by the Trimont Mfg. Co., which are the following:—

The Trimo Pipe Wrench
The Trimo Chain Pipe-Wrench
The Trimo Nut Wrench
The Trimo Pipe Cutter (Hand)

The four good points that make **Trimo Pipe Wrenches** superior are the **Spiral Spring** always in place—**Steel Frames** that will not break—**Nut Guards** that protect adjustment nut—and the **Inserted Jaw** in handle that can be replaced when worn.

Gaining New or Greater Distribution

is a well-recognized and familiar use of properly-directed, continuous advertising.

For either marketing on a national scale or by "Zone Methods" continuous, properly-directed advertising blazes the trail, carries your name, reputation and a knowledge of the product to the trade, paving the way for the salesmen, lubricating your whole distribution system and creating friendly territory waiting to welcome your product and your travellers as your production expands.

A weekly message to the whole hardware trade of Canada through HARDWARE AND METAL—their recognized source of business information—will increase your distribution.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail-holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough, leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers

Unusual Selling Points

Carbalox is a product of the electric furnace so fast and cool cutting as to be particularly adapted to the rapid cutting and polishing of metals.

Being available in handy rolls, it reduces cost of production because the workman, keeping a roll at hand, uses as desired without waste or loss of time in cutting.

One-sixth of your salesman's time to make change

It is estimated that it takes one-sixth of a salesman's time to make change under ordinary conditions. This means the time of one salesman in a staff of six. Eliminate the running and five salesmen can do the duties of six.

Our Cash Carriers will accomplish this for you, and at a greatly reduced cost with more efficiency. There also would be two persons in every transaction, viz., the salesman and cashier—each checking the other—and your money will be in the custody of one person, and in your office, where it properly belongs. Had you thought of it in this way? Our leaflet explains it fully.

For Solidifying Sales and Preventing Lost Accounts

For solidifying sales, and preventing lost accounts by keeping the trade "lined up," a weekly message to the whole Canadian hardware trade through Hardware & Metal will prove productive and profitable.

If interested tear out this page and place with letters to be answered.

WANT ADS

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

FOR SALE

FOR SALE — LANTERNS AND SHOVELS — Several dozen Wright's cold blast lanterns, Nos. 3 and 4; also several dozen Howland's No. 50 long-handled snow or stable shovels to sell. Write for prices. I will pay express charges on small shipments. J. A. Chambers, Springfield, Ont.

POLARINE SEVENTY AND MOBIL GARGOYLE oils—Ninety-six cents per gallon in barrel lots. I also have these in half barrels and cans, with a limited quantity of grease and transmission oil. Write Leonard Prowse, 22 Cornish Rd., Toronto.

ONLY $400—ONE NINE AND A HALF FOOT wall case, one four-foot and one four and half-foot silent salesman, all mission oak. Will crate to ship out of town. Apply 546 Yonge Street, Toronto. North 6305, evenings North 6583.

SITUATIONS WANTED

EIGHTEEN YEARS' HARDWARE EXPERIence, retail, wholesale and builders' hardware, 34. Married. Would like to represent manufacturer builders' hardware lines in Eastern or Western Canadian territory. Will be in Toronto last week in December. Address Box 38, Hardware and Metal.

WANTED, POSITION AS HARDWARE CLERK or salesman, Southern Ontario; twelve years' experience to general ironmongery trade in Ireland. Best references. Box 103, Hardware and Metal.

TWENTY YEARS' WESTERN HARDWARE experience. Would like to represent manufacturer in Western Canadian territory. Capable, good connection and best of references. Box 191, Hardware and Metal.

MANUFACTURER'S REPRESENTATIVE DESIRES POSITION

HAS A RECORD OF SUCCESSFUL ACCOMplishment in the hardware industry, having a good friendly connection with preferred retail and all large wholesale houses west of the Maritimes. Has also had a broad experience in merchandising as manager, which, added to a number of years on the road make him fully conversant with many difficult sales problems. Address Box 392, Hardware and Metal.

CANNON OILERS
Easy Seller Because—
It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

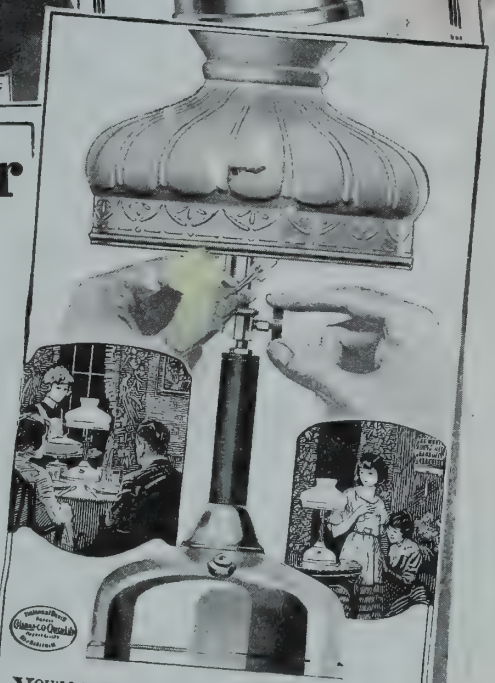
From P.E.I. to Vancouver

—Everywhere —and Right to Your Customers!

IN thousands of homes throughout the great expanse of Canada—right in the homes of your community—Coleman Quick-Lite Advertisements are telling the story of the most popular portable lights ever invented. Each month, each week, these artistic, forceful messages command attention and create the desire for these lamps and lanterns that are safe, clean and beautiful—modern to the minute—and give an abundance of pure-white light at surprisingly little cost.



Coleman Quick-Lite Lamps and Lanterns

Made in Canada and sold through merchants. Constant Dominion-wide advertising makes an appeal in every community. Sales helps, store cards, circulars, slides, booklets, etc., to assist merchants everywhere win trade.

Special Notice to Merchants: Send at once for our latest Quick-Lite Catalog and let us inform you about our Sales Co-operation Department. You can readily build a profitable business with the Coleman line. We show you how. Write today.

The Coleman Lamp Co., Ltd.

Factory and General Offices, Queen Street East and Davies Ave.
TORONTO, CANADA

YOU'LL like the Quick-Lite best of all for the abundance and beautiful quality of light it gives. Such bright cheerful radiance! *Such a lot of it!* And such vicion-helping light it is, too.

Here you have a light so strong and brilliant, so crystal clear and pure white that you can actually match colors with it. At the same time, it is so soft and natural, so near like day-light that you can read or sew the whole evening thru without eye-strain, under its smooth, steady-shining glow. For every light need in your home you'll find the Quick-Lite Lamp just what you have always wanted.

Coleman Quick-Lite

"The Sunshine of the Night"

200 Candle Power of Pure White Light. A steady, smooth, even and natural light. Brighter than 20 old style oil lamps.

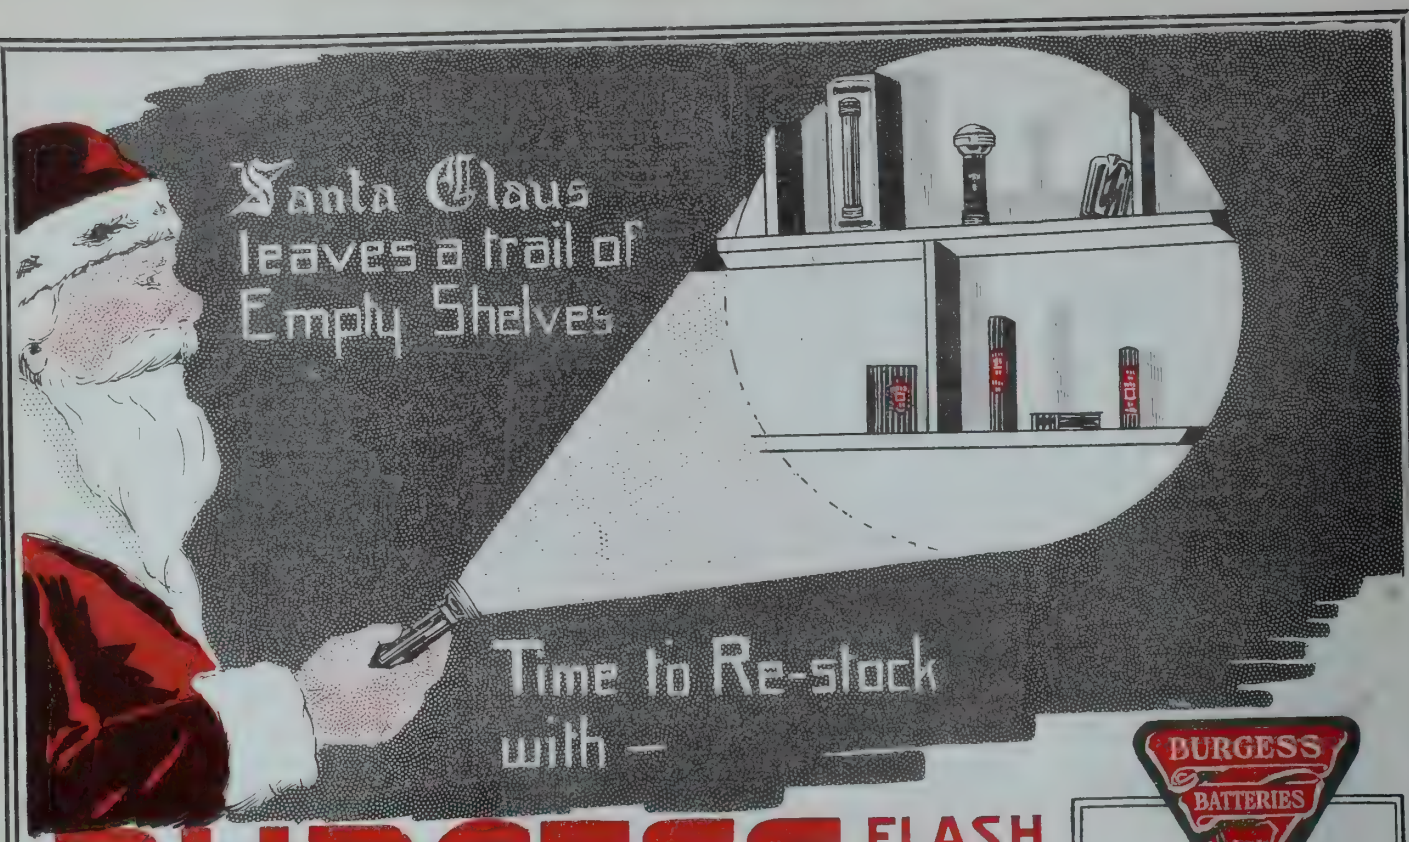
Generates Into Full Brilliance in a few seconds from the heat of common matches. No alcohol torch needed.

Makes and Burns Its Own Gas from Common Motor Gasoline. A portable light plant in itself. Always ready—always dependable.

No Greasy Wicks to Trim. No dirty chimney to wash. No smoke, no soot, no dirt; no dripping oil. No daily filling.

Can't Spill Fuel or Explode—even if tipped over. Can't be filled while lighted. Or Permitted List of National Fire Underwriters.

Economical. Cost-to-Operate less than half a cent a night for 2 or 3 hours use.



Beautiful in Design. Elegantly finished White Opal Shade. Has Universal shade holder, fitting many different styles.

Solidly Built of Brass. Heavily nickeled and highly polished. Inspected, Tested and Guaranteed. Will last a life-time.

QUICK-LITES are now on sale in more than 20,000 stores. If your dealer can't supply you, use the coupon and send for Free Book on Better Light, showing various styles of Quick-Lite Lamps and Lanterns. Write to Dept P45.

BURGESS FLASH-LIGHT CASES AND BATTERIES

The Christmas season has cleared many shelves and you'd better re-stock now for the refill trade. And many other folks will want a Burgess Flashlight these long dark nights.

A PROFITABLE LINE FOR YOU

"Long Life Promotes Long Friendships"

The Popular Heavy Duty Battery

Burgess Uniplex Batteries are assembled in a waterproof container of felt and asphaltum that absolutely prevents short circuiting from moisture.

Large insulated nuts make use of pliers unnecessary.

Connections and terminals are so carefully insulated that it is impossible to have accidental short circuit.

Over fifty different patented features on batteries and accessories combine to make and insure supremacy for the **Burgess** line. Chemically purified materials, patented for our use only, and highest grade workmanship are two factors that give long life and dependability to Burgess Batteries.

The Burgess guarantee proves the confidence we have in our product, and makes for pleasant business dealings; it reads:—"You are protected by our unqualified agreement to replace any BURGESS product which does not give satisfaction"—and we make replacements promptly, without any red tape.

If you don't know the "BURGESS" proposition and "BURGESS" products now, write for full information.

BURGESS BATTERIES

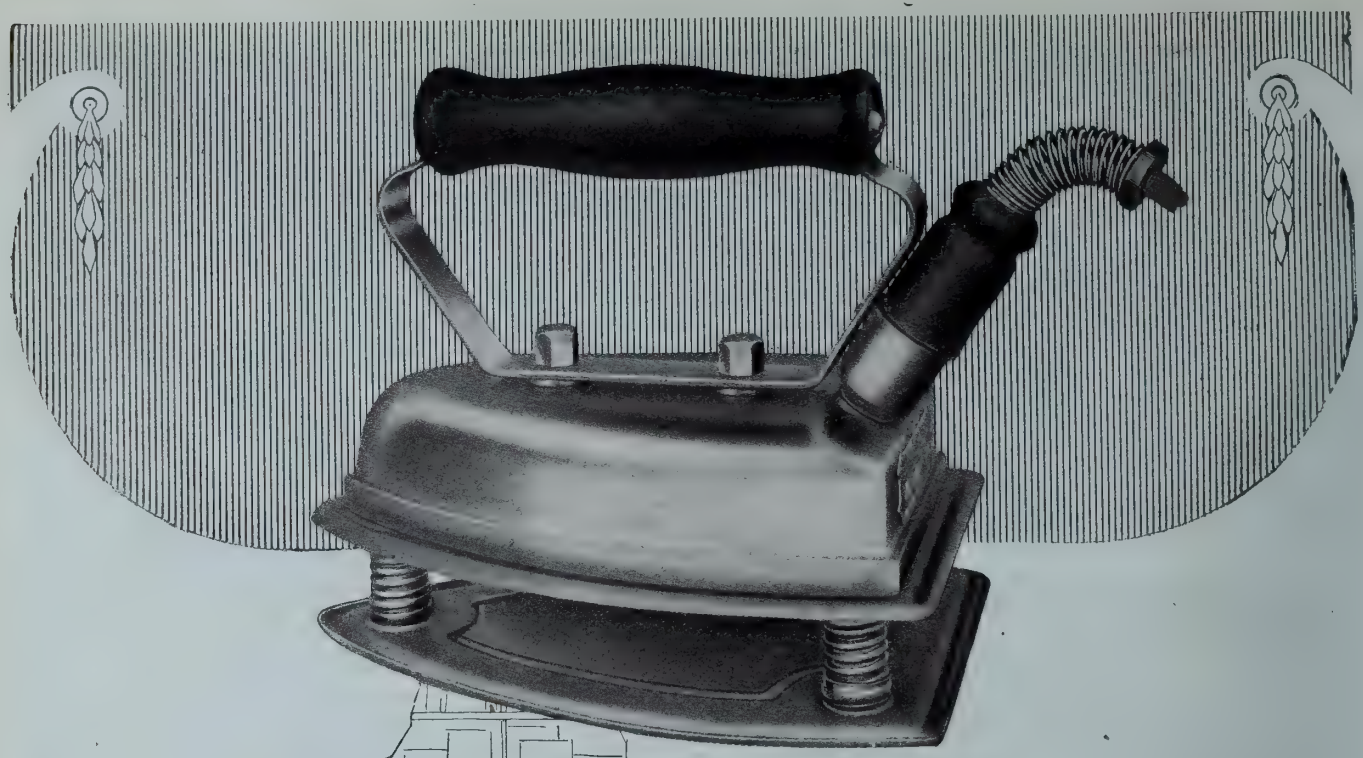
TRUE TEMPERING

The service that an axe will give depends largely on its temper

The steel may be perfect, the carbon content exact, the balance precise, but to obtain the most satisfactory service the temper must be true.

As the temper of an axe, so will be the keenness and durability of its cutting edge.

In the tempering of SAMSON Axes this delicate task is done with special care.



Each tool is given the close grain essential for a fine edge, and the tough fibre to hold the edge.

This is one reason why you may depend on

If the Dealer did the Ironing!

IF the dealer could do a little sample ironing in the store, it would be easy to convince any woman of the quick-heating, smooth-working qualities of the Universal Iron.

In the store, the Universal is but well designed, well finished metal—cold, inanimate, unresponsive. But in the home, on the ironing board, it quickens into life—a life of service.

After all, the Universal isn't metal; it isn't theory; it isn't what ingenuity designs and skill executes. The Universal Iron is Service itself—hot, dependable, continuous Service throughout years of ironing days.

The Universal is the result of slighting nothing, taking nothing for granted, proving everything. Non-stopping satisfaction goes with every sale and a liberal profit to the dealer.

The Door to Prosperity Opens With C.S.G. Co.'s Latches

No. 1240 Barn Door Latch

opens all doors quickly and easily, just as it performs all the other duties of a latch, even the duty of selling readily and with a profit for the merchant. A durable, commonsense latch with Japanned frame and handles, tinned bolt and a Sherardized spring of piano wire that cannot rust. Packed one-quarter dozen in a carton, including padlock eyes. Weight, 175 lbs. per case.

The "Challenge" Latch

has opened a new door to profit for many a shrewd dealer, for it possesses more points of quality and value—selling points—than any other thumb latch on the market; for instance, it is made entirely of wrought steel and it is absolutely impossible for the thumb piece to work loose or get out of place.

Packed one-half dozen in a box. 12 dozen in a case. Weight, 180 lbs. per case.

A WOMAN RUNS THIS FURNACE

The following letter from a satisfied user is good evidence that the "New Idea" Furnace really does do all we claim for it:

Lindsay, Ont.

Dear Sirs:—

"New Idea" is so simple that a woman can run the furnace without any trouble, and the dumper prevents dust going into the rooms. I have not had to sift ashes from it, as no coal of any account goes through. The "New Idea" has not taken the amount of fuel I expected it would. I am indeed well pleased.

R. G. Corneil.

THE "NEW IDEA"

Plymouth Rope

Manila Fiber Is Compressed into Bales Weighing 280 Pounds and Measuring 12 Cubic Feet

AFTER grading, Manila hemp is compressed into bales by hydro-electric presses. These bales weigh approximately 280 pounds and measure 12 cubic feet. It is in this form that the Manila hemp of commerce eventually reaches the rope-maker, each individual bale being covered with straw matting as a protection in transit. Thousands of bales of Manila fiber are consumed each week in the manufacture of Plymouth Rope and many thousands of bales are available in our warehouses at all times, properly classified and tagged to insure the **uniform** quality of our cordage products, and which could not be accomplished otherwise.

When placing orders for rope with your jobber, do not simply ask for "Pure Manila," but specify PLYMOUTH and thus secure the greatest amount of rope value and satisfaction for your customers. PLYMOUTH Rope is an article that can be handled as a profitable specialty on a price-per-foot basis and by utilizing the free Window Display Service that will be furnished on request.

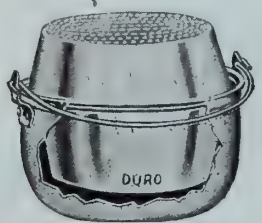
TEN UTENSILS IN ONE

"DURO"

99% PURE ALUMINUM WARE



PUDDING PAN
This pan is fine for making puddings, baking breads, and cakes. An excellent milk dish.

KETTLE COVER
A kettle cover that is made of hard, thick aluminum lasts a lifetime. The ebonized knob is heatproof and well riveted with an aluminum rivet that never rusts nor comes off.

PRESERVING KETTLE
An aluminum preserving kettle has exceptionally good qualities. The heat is distributed evenly over the entire utensil, and stirring is, therefore, not necessary, and the foods do not burn. Aluminum is not affected by the acids of fruits.

COMBINATION COOKER
This combination makes an excellent cooking outfit. Its odd uses are not filled so well by any other utensil. The ears of the kettle are of a special improved design, holding the bail in an upright or lowered position as desired.

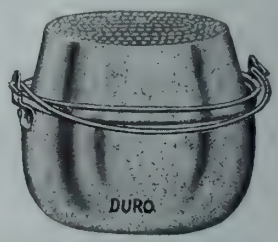
SELF-BASTING ROASTER
Delicious, well-browned, juicy roasts are the result of this roaster. Perfect self-basting is produced by the steam condensing on the cover and dripping back over the roast, thereby making it juicy and appetizing.

CASSSEROLE OR BAKE DISH
An ideal pan for baking apples, beans, escalloped potatoes, macaroni, and similar foods.

ALUMINUM FOUR-PIECE Combination Cooker

This Cooking Set has more uses and advantages than any other similar set on the market. The combinations which can be formed are very practical and serve excellently for every meal of the day. All the pieces are uniform in size and match together very snugly. The bails of the inside pans may be detached if desired. The capacity of the outside kettle of No. 147 is six quarts, and each of the inside pans holds 2½ quarts. The capacity of No. 145 is two quarts outside pan and one quart inside pans. They are highly polished on the outside, while the inner surface is our Ex-Ray finish.

CEREAL COOKER OR DOUBLE BOILER
This large double boiler will not scorch your rice or cereals and you don't need to stir them. It may also be used for steaming vegetables in the upper pan while soup or potatoes are boiling in the bottom.



STRAINER OR COLANDER
It is very handy to rinse berries, lettuce, etc., with this strainer. It also serves as a colander.

CONVEX KETTLE
This attractive Convex Kettle is unexcelled for cooking and stewing vegetables. The bulged sides are a big advantage as they make it easy to pour liquids from the vegetables. They prevent the food from sliding out when the kettle is tilted to drain off the liquid. When used as a Windsor Kettle, it turns out delicious pot roasts without grease or water.

STEAMER SET
This combination is exactly what you need to properly steam potatoes and corn on the cob. The pan is large enough to contain a large meal and the perforations throughout the entire bottom insure uniform and thorough cooking.

CORN POPPER OR CORN FLAKE TOASTER
How often it happens that you need a utensil to do such odd little things as popping corn, restoring the crispness to corn flakes, roasting coffee, etc. This answers these purposes nicely.

Stimulate Your Screw Driver Sales

A Pexto Screw Driver Display on your counter or showcase will sell many screw drivers with little sales effort.

The new No. 3 Solbar Screw Driver is of *solid steel* construction. The bar extends the entire length of the tool, making it one of the strongest screw drivers on the market.

It is fitted in the round fluted wood handle scales, held securely in place by two heavy flush rivets.

This style handle fits the hand perfectly and gives a *positive, continuous* grip.

It is the only tool of its kind with a heavy bevelled shoulder, which prevents the hand from slipping down the rod.

Finished in natural wood, it is an exceptionally attractive tool, and its sturdy make-up will appeal at once to mechanics and automobilists.

Our machinists' screw driver has a square shank which permits using with a wrench.

Carpenter's and cabinet styles made in sizes from 2″ to 12½″.

Send for a supply of folders, describing entire line of screw drivers.

THE PECK, STOW & WILCOX CO.
Southington, Connecticut, U.S.A.

The Evening Dress Shave

There is a certain amount of pride in all men. They are especially anxious to look spick and span in their "best" clothes.

And while clothes do not make the man, a good, clean, comfortable shave is important to his appearance and his disposition as well. Happy the man whose razor does not put him in a bad humor.

More and more, men are coming to realize that they do not have to go to a barber for the kind of shave that makes them put their best face forward. They know that there is a Genco Razor that will shave **them.**

Dealers that sell Genco Razors sell more than so many pieces of cutlery for so much money. They sell shaving service.

Every Genco customer is a satisfied customer. He is so pleased with his purchase of a Genco that he swears by the dealer who sold it to him. He gets to calling the dealer's store "my store."

Sell Each Customer The Razor That Will Shave HIM

Display a Genco Assortment in your store. The ideal stock unit of Genco Razors is a Genco Display Assortment. Each assortment contains razors for every kind of beard and skin with a handsome display cabinet for the cutlery department.

Ask your jobber for prices on the several Genco assortments. If he cannot supply you, write us.

Genco Dealers are furnished with window display material, booklets, salesmen's guide charts and newspaper electrotypes free.

How a Puff of Air Helps to Make an Eddy Co. Paper Bag

WHEN a little paper bag won't open its mouth to receive the goods it is to contain, the retailer blows it. Curiously enough air pressure has a good deal to do with the making of paper bags. It is perhaps not surprising, then, that they obey a puff of air also in the retail store.

When fed into the bag making machines, the paper from the specially made rolls is gummed on one side with a very pure starch paste, and then quickly caught by steel clutches and folded into the square shape of the well-known Eddy Company bag. There is now a square tube of paper in the machine, and it hurries rapidly on its way to the finishing process.

The sides of the bag as you remember are tucked neatly in. This effect is instantly produced by air suction which draws the paper tube in just as far as required. Meanwhile with lightning-like rapidity the bottom of the bag is being adroitly folded in by steel fingers, and securely fastened with paste.

Down comes the pressure of a rhythmical machine unit, and the bag flattened out neatly as you will receive it, is cut off from the tube with a serrated edge, and passes off to join the pile of those made ahead of it. The whole process takes only the fraction of a second, but it is accurately done in that time, and the bags are counted as made, the machine ringing a bell at every twenty-five. The girl in charge watches the output, and the processes of the machine, and any bag having the tiniest flaw or imperfection is discarded.

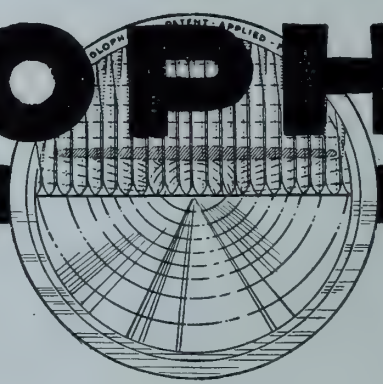
Within the Law

THE salient points of the Holophane Lens:

1—It bends down the concentrated searchlight beam below the 42-inch line, preventing glare.

2—Lights the road 500 feet and more ahead of the car.

3—Provides ample light directly in front and to the side of the car, enabling the driver to easily see the curb, ditches and passing vehicles.



4—It places the oncoming driver in the glareless shadow of the Fin.

Holophane Lens have been approved by the Department of Highways of the Ontario Government. The Anti-Glare Law is to be enforced this winter. Equip your car with Holophane, "The Lens with the Fin."

DU PONT THE STANDARD SHOTGUN POWDER

The Du Pont Plan for Reducing Your Inventory on Shotgun Shells

IN these times no one can afford to give shelf-room to "slow-movers."

The Du Pont plan *advocates the elimination of all shell loads except those in active demand* with the great majority of shooters. This cuts out all "special" loads that tie up space and dollars, and provides highly concentrated stock that can be turned over rapidly and completely.

The loads themselves are listed below. They are the very best that our experience of over a century can produce, and will satisfactorily meet all requirements in all sections of the country. Last fall practically every sportsman's magazine carried our message to the shooter, to ask his dealer for shells from this table. This campaign will be stronger than ever in 1921. Bear this in mind when ordering your stock for the coming year.

Most Shooters Use Du Pont Powders

STOCK THEM IN THESE STANDARD LOADS

DU PONT

Standard Twelve Gauge Loads

	DUPONT SMOKELESS Drams	DUPONT BLACK Drams	OUNCES Shot	SIZES Shot
Large Ducks	3, 3¼ or 3½	3½	1⅛ or 1¼	4, 5, 6 or 7
Small and Medium Ducks	3, 3¼ or 3½	3½	1⅛ or 1¼	5, 6, 7 or 8
Grouse, Partridge, Prairie Chicken	3 or 3¼	3¼	1⅛	6, 7 or 7½
Pheasants	3	3¼	1⅛	5, 6, 7 or 7½
Geese	3½	3½	1⅛	4, 3, 2, 1 or BB
Wild Turkey	3½	3½	1⅛	4, 3, 2 or 1
Squirrel, Rabbits	3	3¼	1⅛	6 or 7
Doves, Pigeons	3 or 3¼	3¼	1⅛	6, 7 or 8
Quail	3 or 3¼	3¼	1 or 1⅛	7½, 8 or 9
Snipe, Woodcock	2¾ or 3	3	1 or 1⅛	8, 9 or 10
Shore Birds	2¾ or 3	3	1 or 1⅛	8, 9 or 10
Sora Rail	2¾ or 3	3	1 or 1⅛	8, 9 or 10
Trap Loads	3 or 3⅛		1⅛ or 1¼	7½ or 8

Facts that Every Dealer Should Know about Du Pont

"Du Pont" has the largest sale of any powder made.

* * *

—because it gives the highest velocity.

* * *

—because it gives the closest patterns.

* * *

—because it develops the lowest initial pressure which means less strain on the gun.

* * *

—because it is the cleanest burning powder made.

* * *

—because it is waterproof, dependable, and absolutely uniform year in and year out.

* * *

A shell is only as good as the powder it contains.

Appliances That are Judged by What They Can Do

WOMEN judge **stores** most often by the lines that are carried in stock.

And they judge the **lines** by the satisfaction they give.

Stores that carry the New Canadian Beauty Appliances are better patronized—because Canadian Beauty Appliances have been bought by women, tested thoroughly and have given service **absolutely up to their highest expectations.**

The New

Canadian Beauty Electrical Appliances

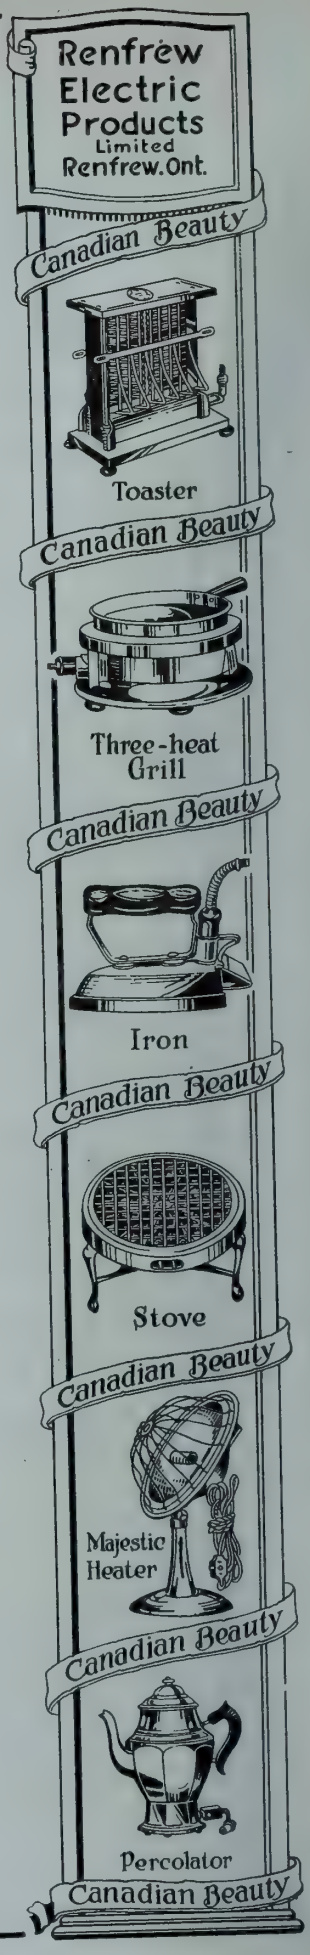
please purchasers in every way—appearance, performance, length of life and usefulness—in fact, every article in the entire line meets the most exacting requirements of all women.

The public are keenly interested in electrical appliances. The public realize the immense advantages of the electric iron, the toaster, the grill, the heater, the percolator, etc.

Men and women are beginning to discriminate among the different brands of appliances, *and in this shuffle the Canadian Beauty line has received a very large share of the public preference.*

Our heavy national advertising is making its influence felt. *Have* ***you*** *benefited any?* Or are you carrying a less popular and less advertised line?

As you know, people are no longer buying in a haphazard fashion.



In the New Canadian Beauty appliances the public get service, durability and smart appearance.

It is a line rich in selling talk—real, truly, honest-to-goodness selling talk.

Order from your nearest jobber or write us direct—tonight.

"Too Much Publicity re Price Reductions"

R. Hawkins, Smiths Falls, Ont., Says Merchants Err in Advertising Sweeping Reductions—"Only Fair to Expect Some Losses After 1915 and 1916, Says C. W. Bennett & Son, Gananoque, Ont. —Interesting Opinions of Hardware Merchants on Conditions.

SOME idea of conditions as they are affecting hardware merchants in various parts of Canada, and steps being taken to overcome the difficulties of readjustment, can be seen in the written experience of a representative group of hardware merchants as reproduced herewith. Merchants in the farming districts report the decrease in business partly due to the tendency among farmers to hold up grain crops for higher prices. Questions as to whether it was thought necessary to reduce prices to stimulate buying, as to whether a reduction to rock bottom prices immediately would be a better stimulant to business than gradual reductions, as to whether it is necessary to accept a loss to move present stocks, as to the business outlook and means to revive trade if dull, as to credit business and tendency to curtail credit accounts, were replied to with a number of good suggestions as outlined herewith.

Price Reductions Defer Buying—R. Hawkins, Smiths Falls, Ont.

Mr. Robert Hawkins, Smiths Falls, Ont., does not believe it good policy to make price reductions to encourage buying because this policy prompts buyers to defer buying pending further reductions. A well assorted stock in moderate quantity is advocated, particular care being taken to see that local requirements are taken care of. Speaking further of price reductions, Mr. Hawkins states, "I believe it is an error on the part of many retail merchants to advertise so extensively sweeping reductions in prices, as this encourages the public to defer purchases pending further reductions. This will not only deny merchants profits to which they are entitled but in the end they will find themselves with no more money in hand than if the policy of gradual reductions had been more generally adopted."

Price reductions in the same proportion as the advance made a few years ago, are advocated by Mr. Hawkins in order that business shall not be endangered. He believes that the outlook for business is good if the public will pursue a steady, sane policy. Merchants need not, in his opinion, take any losses to move present stocks.

Rural Districts Not So Much Affected—Brampton Hardware Co.

Steps to curtail credit even though collections have been fairly good, are being taken by the Brampton Hardware Co., Brampton, Ont. It is not thought that losses will be necessary to move stocks, particularly if the policy of carrying a minimum, well assorted stock is followed. The opinion is expressed that the large manufacturing centres are more affected by such conditions than are the rural districts. Reduction of prices on present stocks is not thought necessary to stimulate trade.

Active Trade in Early Spring—May Bros., Toronto

Quiet business during the early part of the year and opening into a broad field of good business in the spring is the expectation of May Bros., West Toronto. Reduction of prices on some lines with conditions varying with certain merchants is thought necessary to stimulate buying, though a gradual reduction is preferred. On some lines such reductions might entail an actual loss. A complete stock with smaller quantities of each line is advocated. Collections are said to be good and steps are being taken to curtail credit accounts.

Well Assorted Stock of Staples—G. F. Potter Kitchener, Ont.

A well assorted, minimum stock of staple lines is advocated by George F. Potter, Kitchener, Ont. Collections are fair but credit is being curtailed. It is not thought necessary to reduce prices on present stocks to move them and a gradual reduction is preferred, in any event, to drastic declines. Speaking of means taken to keep trade active, Mr. Potter says "play the band and keep smiling."

Reduce Prices to Rock Bottom—H. W. Wilson, Paris, Ont.

H. W. Wilson, Paris, Ont., has experienced a decreased volume of business due to customers expecting lower prices. He is not of the opinion that price reductions are necessary to stimulate buying. A minimum stock to meet demands is advocated. Mr. Wilson is of the opinion that a reduction of prices to rock bottom immediately would be a better stimulant to trade than gradual reductions, though he does

not think it will be necessary to sustain any loss through this practice.

Must Adjust Labor Conditions First—Wells & Emerson, Pt. Arthur, Ont.

Wells & Emerson, Port Arthur, Ont., attribute the decrease in volume of business to unsatisfactory conditions as regards labor. They do not think it necessary to reduce prices to move stocks and advise a minimum stock principally composed of staple lines. Steps are being taken by this firm to curtail credit though collections are reported good. The opinion is expressed that a reduction to rock bottom prices would better stimulate buying than gradual reductions, providing labor was treated in the same manner. It may be necessary in some cases to accept a loss to move present stocks. The business outlook is expected to brighten as soon as labor conditions improve.

Advertising Overcomes Dull Trade—C. Murphy, Toronto

C. Murphy, Toronto, believes advertising is one of the surest ways of overcoming dull times. Collections are fair in his case, but credit accounts are being curtailed. He thinks it will be necessary to reduce prices on some lines to move present stocks and in some cases a loss might be entailed. He attributes a decreased volume of business to customers expecting lower prices.

Only Fair to Expect Some Loss—C. W. Bennett & Son, Gananoque, Ont.

Messrs C. W. Bennett & Son., Gananoque, Ont., report that fifty per cent. of their business is on credit basis and collections to date have been fair. A gradual reduction of prices is advocated in preference to a sudden drop. Dealing with the question of whether a loss should be taken to clear out some lines this firm states "It would only be fair to expect some loss after the years of 1915 and 1916." This firm sees nothing to worry about in the outlook for business.

Stoves, Auto Tires, etc., Slow Moving—W. J. Bell, Beeton, Ont.

W. J. Bell, Beeton, Ont., states that certain lines such as stoves, automobile tires, etc., are slow in moving because of the tendency to wait for lower prices. Speaking of price reductions Mr. Bell states, "I do not think it necessary to make drastic reductions. Moderate reductions would be healthy but large declines would have a bad effect upon retailers." He advocates carrying a well sorted stock of lines which are particularly in demand, according to the requirements of various communities. A reduction to pre-war basis would, he states, put many merchants out of business and this would in the end reflect on the general prosperity. "In some lines losses may have to be taken. Speaking personally I do not fear it and live merchants need have no dread of this," says Mr. Bell. He is of the opinion that the business outlook is bright, providing merchants do not get panicky. "I think a great deal of the business unrest is attributable to the daily press and if it was in some way stopped from talking of business matters it does not understand the general public would be less agitated."

OLD TIME HORSESHOE MAY SOON DISAPPEAR

London, England.—Elaborate experiments are going on here to find a type of foot gear for horses which, if successful, will make the horseshoe as it has been known for 1,400 years as extinct as the dodo. The present hard, flat pavements, designed principally to sustain motor traffic, present a surface on which ordinary horseshoes either slip or cause objectionable indentations, and so the authorities are joining the humane societies in trying to devise a new form. None of those so far tried out bears the slightest resemblance to the old symbol of good luck.

Food Prices Must Decline First—Cragg Bros., Ltd., Halifax, N.S.

Three or four hardware merchants in the Maritime Provinces state that business has decreased in volume. Cragg Bros. Co., Ltd., Halifax, N.S., are of the opinion that builders, by holding off awaiting lower prices for labor and materials, are partly responsible. This firm is of the opinion that food prices will have to be the first to decline if any general reduction is needed to stimulate buying. A stock of staple hardware goods is advocated. Collections are reported by this firm to be fair. It is their opinion that gradual reduction in prices is more desired than drastic reductions which might be disastrous. The opinion is expressed that retailers will be forced to take losses, at least on some lines, in order to readjust stocks to their correct relation to replacement values.

Outlook Good When Prices Stabilized—E. K. Spinney Ltd., Yarmouth, N.S.

E. K. Spinney Ltd., Yarmouth, N.S., have experienced a decrease in business volume due to customers withholding buying anticipating declines. It is not thought necessary to reduce prices to stimulate buying and a stock in quantity only to meet immediate requirements and goods of necessity should be stocked. A gradual reduction to normal price levels is advocated in the best interests of consumer and dealer. A loss will be taken on some lines if reductions are prematurely made. The outlook for business is thought to be good once prices are stabilized.

Business Revival in Spring—A. M. Bell & Co., Dartmouth, N.S.

That reduced profits, and not necessarily an actual loss will have to be taken on some lines is the opinion of A. M. Bell & Co., Dartmouth, Nova Scotia. This firm has had experience with customers holding up their buying anticipating lower prices. It is not thought by them to be necessary to reduce prices to stimulate buying. A varied stock with a reduction in size to meet requirements is the plan followed by this firm. Credit business is reported as fair with renewals increasing or more frequent. Reduction to rock bottom prices is not advocated. Referring to the outlook this firm thinks there will be reduced volume of business until spring when a revival is anticipated.

Collections Normal—K. Freeman, Bridgetown, N.S.

Karl Freeman, hardware merchant, of Bridgetown, N.S. has experienced no decrease in business volume and therefore does not think it necessary to reduce prices to stimulate buying. He is keeping his stock of staples well replenished. Collections are said to be about normal and no curtailment of credit accounts is being made. This merchant will add other lines if dull business makes it necessary, but so far such action has not been required. He states that his present stock is moving easily.

No Need to Take Loss—Lacroix & Leger Ltd., Montreal

Messrs. Lacroix & Leger, Ltd., Montreal, report that credit conditions are good and are of the opinion that a gradual reduction in prices will entail no serious disturbance of trade. A stock sufficient to meet requirements and varied in character is being carried and with such a stock this firm do not think it will be necesary for merchants to reduce prices or to accept any loss.

Opinions of western merchants will be found in the Western Section.

Gave Interesting Talk on Sheffield Plate

Chester Martin, who is an authority on Sheffield plate, gave an instructive and interesting talk to a Toronto audience upon the discovery and manufacture of Sheffield or copper rolled plate, as it was designated in the old days. This was said to have began about the middle of the 18th century. In 1742 a mechanic of Sheffield, named Thomas Bolsover, whilst repairing some cutlery, inadvertantly fused some silver and copper; believing he had discovered a method of plating sheets of copper with silver, he started to experiment and found he could shape the rolled plate into pieces having the appearance of those evolved from solid silver.

Later on John Hancock and other silversmiths demonstrated the possibilities of Bolsover's discovery, and factories were started.

Sales of lines shown in the window displays are invariably stimulated as result of this publicity, according to A. H. Bedard, hardware merchant, Montreal. Herewith is a sample window display in the Bedard store showing electric heaters, lamps, irons, percolators, grills, toasters, etc., effectively displayed along with other kindred lines. Mr. Bedard is a strong believer in showing electrical lines in use. This can be carried out in showing such lines in the windows as well. It will be noted the lamps are lighted. Price tickets are prominently shown on the heaters and other lines.

Turn on the Power and "Electrics" Will Sell

A Way to Create Sales of Electric Heaters Even When Customer Has No Thought of Their Need—Sends Appliances on Approval and None Returned Yet—On Good Terms With Opposition

IN A QUIET but effective manner, A. H. Bedard, 392 Victoria avenue, Westmount, Montreal, is creating a healthy demand for electrical goods—particularly for electric heaters. When the representative of Hardware and Metal stepped into Mr. Bedard's store and passed to the office, he looked quickly aside, as the warm rays from one of these heaters shed their cheering glow directly across that pathway. The idea seemed simple, but was unique, in that the heater was placed on top of a silent salesman. This shed the warm rays of the heater directly against the face, so that one must turn aside to see whence they came. Then—farther along, resting on a second case—there was another heater, also connected. This "did the trick," for, as Mr. Bedard remarked, "they do not know what struck them. Sometimes I arrange these so that they get the heat front and back, and then they have got to look around and enquire what it is. In nearly every case people are surprised that these heaters will deliver so much heat."

There you have this story in a nutshell—all accomplished by turning on the power and letting the current "burn up" a few cents per hour. It is considered mighty effective advertising—and is of a very direct nature.

In selling these heaters, Mr. Bedard has found development to be gradual. The average customer is not likely to make an outlay of from eleven to fifteen dollars for a specialty such as this—not without some persuasive salesmanship. But the type of salesmanship Mr. Bedard has found effective is not of the objectionable variety. Do you think it is? Listen!

"Take this heater home and try it. Keep it a week. If you want it, alright, we will bill it; if you do not, let us know and we'll send for it."

"And do they have you send for them?" queried Hardware and Metal.

"No," replied Mr. Bedard, "but once or twice they have asked us for a larger size. We have never had one returned yet, and even if it were, it would not be injured in any way. This plan works well with us."

Be Sure to Get This

There is one thing sure: Mr. Bedard takes no chances in selling anything electrical without making it plain to the woman of the house, or, for that matter, the man of the house, those things that should be clearly understood. This was illustrated.

"I sold a man one of these heaters a while ago and he took it home. I had cautioned him to not use it in that part of the house where an electric iron and toaster were receiving their current, as this would make the load too heavy and the plug might blow out and the lights 'go off.'

"I was called on the telephone afterwards by this customer and he wanted to know what I had sold him that kind of a heater for, etc., etc. Said their lights had all gone out after the heater had been attached a while and when he had called up a friend of his—an electrical man—he told him the heater must have short circuited.

" 'Now let me ask you a question or two,' I said. 'Where were you using the heater, in the front of the house or the back? Were you using a toaster? An electric iron?' The man thought a minute, and then was frank to confess that his wife had brought in a few little things to iron. This made an overload, with the results explained."

Of course, after this, the customer did not want the heater sent for. Had he followed the directions given when he made the purchase, he would have had no trouble. This shows the necessity of posting the customer very definitely when the sale is made. If necessary to link the heater up where other accesso-

ries are being used, advise a stronger plug.

Scared Prospects

Right along this line Mr. Bedard referred to one or two cases that had come to his notice, where women had been using electric irons, but who, on the advice of a salesman as to the great cost of "juice," when these were connected, had decided not to use them at all. After asking how many lights were used by one of these parties, and having ascertained their voltage, Mr. Bedard explained how the cost, per hour, of using the electric iron, was almost negligible. "And, madam," he added, "you must also remember that, once your iron is heated, you will have to disconnect it, unless you are ironing very heavy things. This means that you are not using nearly so much current as one might think; it means a big saving."

That is but a small part of the strong argument Mr. Bedard made as to the necessity of the salesman knowing what the voltage of an appliance is, what it means when related to the cost of the current, per kilowatt hour. Then there is no guesswork when the prospective customer wants to know just what the power company's invoice will total at the end of the month. "Some people are greatly surprised," he remarked, "when we tell them that it costs about two and a half cents an hour to operate one of these electric heaters."

"KEEP ON GOOD TERMS WITH OPPOSITION"

Mr. Bedard referred to the good relationship that he desired to maintain with his opposition. The only way, he asserts, to get along with one's opposition is on the basis of the best of understanding. "I let mine know that I want to get a fair price for what I sell, and that, if I haven't what a customer wants, I will, if possible, direct that customer to him for it. It is my business to look to the customer's interests and if I haven't what he wants, and my next neighbor storekeeper has, perhaps it will save my customer time if he can get it nearby. I often use the telephone just to see whether the desired article can be had there. It does me no harm, is helping my customer, and makes for a better feeling and spirit all around."

Other arguments are effectively used, as occasion may require, as in the very cold weather, when a customer cannot heat "that cold north room" just as comfortably as is desired. "One of these heaters will throw its heat fifteen feet, and placed in such a room it will supply just that heat which is so much wanted," said Mr. Bedard.

It is this closer personal interest, in explaining the how and why of these electrical appliances that is building satisfactory sales for the Bedard store. And the arguments which apply in the selling of heaters apply likewise with other "things electrical."

Other "Electrics"

Although Mr. Bedard has been doing business at this stand for only a few years, he is gradually developing sales on "things electrical." There are several straight electrical stores in Westmount, but there are always a number of one's customers who would prefer to purchase these goods where they are in the habit of buying their hardware regularly. Therefore, Mr. Bedard carries a line of toasters, chafing dishes, electric irons, and portable lamps. "The demand for lamps of the portable vari-

Some Effective Electrical Goods Advertising

ALL THE COMFORTS OF HOME

The electrically-wired house not only means more and better lights, but better facilities for doing many things.

Think of the joy of sitting down to an electrically-cooked breakfast, with everything—coffee, eggs, toast, bacon, all done just right.

Just right, nowadays, means that things are done electrically.

What Matters if the Fire Gets Low?

An electric iron can be attached to the electric light fixture in a jiffy and it will do the work in half the time and save a good many steps and cost less to operate than a coal stove.

The Five Points Hardware

Samples of some effective advertising of electrical goods by Canadian hardware merchants. One points out the additional home comfort secured by the use of electric toasters, grills and other table appliances and the other deals with the labor-saving value of electric washing machines, putting the argument forth in a new light and one which would be apt to create a stir in the home where the husband acted in such a way as is outlined.

ety," he remarked, "begins after the people return from their holidays. When they begin to stay indoors they want a lamp that will give them a cosy feeling in the long evenings, and from now on, and until about February, the demand for these lines is more active."

Care In Selecting Auto Accessories

Automobile accessories, also, are being gradually introduced, but these are being selected with great care, for there is danger, Mr. Bedard thinks, in stocking lines that may prove to be dead stock, and therefore a decidedly poor investment, or even a waste of capital. But a line of staples, such as spark plugs, wrenches, pliers, lap rugs and so on is being stocked, and these are selling increasingly well. In such a location, with a large volume of the available trade of a household or domestic nature, it is felt that the best policy is that of carrying as wide a variety as possible, and this has fitted the local needs here admirably.

In speaking of display, it was remarked that when a line is being shown in the windows sales of that line invariably are stimulated.

Breaking New Ground

Mr. Bedard employs little slips when he desires to "break new ground" on a given article. For instance, he has developed sales in paints and specialties to quite an extent by giving a pointed message on a small blotter which will fit the ordinary business envelope. This, illustrated with a neat and effective cut, goes right where it is desired to make the right impression.

See Paint Department

Another one, used to acquaint the householder with the fact that moist air is better than dry, in the house, makes one or two pointed references to the Radiator Humidifying Pan. Of these sales have been increasing, and they are giving the users the best possible results.

A sample of the message Mr. Bedard has printed on blotters or slips for enclosure in business envelopes or for enclosing in parcels. Each slip carries some important message direct to the place where it will do the most good. This one deals with the use of radiator humidifying pans, a line on which much information can be given to customers.

Price-Cutting Brings No Relief

Optimistic Note Sounded by Those Addressing Lewis Bros., Ltd., Convention in Montreal, Must Use Reason and Tact in Handling Present Situation—Gradual Reduction Predicted.

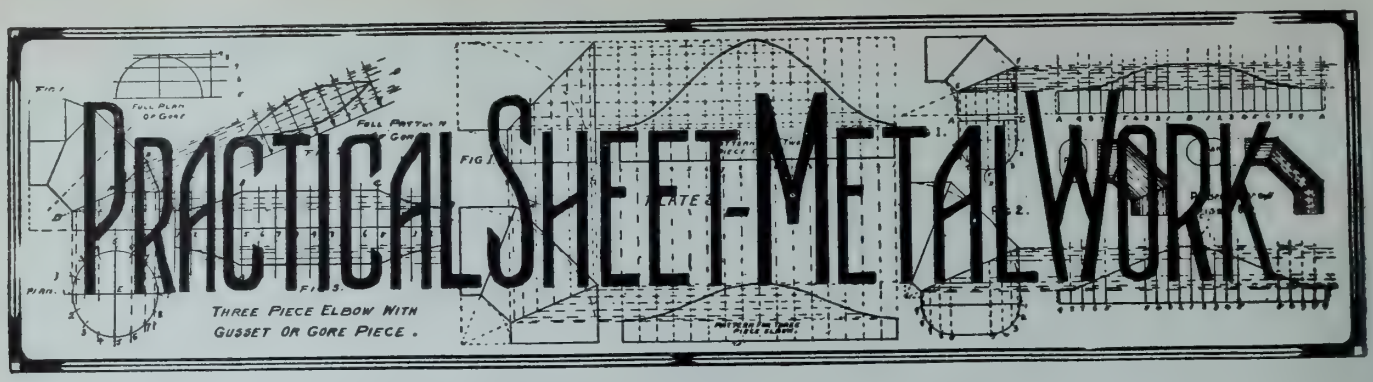
MONTREAL.—Lewis Bros., Limited, Montreal, have held what was probably the most successful sales convention in the history of the company, under the capable direction of John A. Frazer, sales manager. The keynote of optimism was expressed by all the speakers. The consensus of opinion was that there would be no radical decline in prices, but that while there will be adjustments to lower levels this will be gradual. It was pointed out clearly to the salesmen that every one should take careful stock of himself, and to turn right about face and adopt more resourceful methods to develop business; to get out of the rut of the order taker, it being shown that in so far as selling is concerned, it requires salesmen to get business now that the market has changed to a sellers' market.

Prominent Speakers

Some of the sessions were conducted by officers of the company, but one of the most outstanding features was that many of the sessions were addressed by men prominent in their respective lines of business, including the following:—F. W. Stewart, vice-president and managing director Cluett-Peabody Co.; J. T. Smith, secretary-treasurer of the company; Mr. Diplock, salesmanager The Steel Company of Canada, Ltd.; C. F. Vaughan, salesmanager Klaxon Company; A. F. Channell, Channell Chemical Co., Toronto; E. J. L'Esperance, manager Imperial Life Insurance Co.; Mr. Chandler, Brunner Mfg. Co.; Mr. Oxley, Canadian National Carbon Co.; J. Laporte, salesmanager, Laporte Martin; Mr. Marks, Montreal, manager Oneida Community Co.; Mr. Becher, advertising manager Gillette Safety Razor Co. of Canada; Messrs Armstrong and R. H. Dawson of the Gillette Company also spoke. Stuart Boa, Dominion Cartridge Co.; O. R. Harvey, Northern Electric Co.; H. K. Smith, Draper-Maynard Co.; W. D. Armstrong, R. H. Ingersoll & Bro.; Mr. Mellinger, general manager The National Acme Co.; Mr. McDonald, Bacon & Co. represented Butterfield & Co.; W. W. Lewis, manager General Asbestos Co.; F. B. Smith, Smith Hardware Co., Belleville, Ont.; P. W. Robinson, Frank Mossberg Co.; Mr. Mills, general manager Pressure Proof Piston Ring Co.; R. H. Walden, Champion Spark Plug Co.; D. Johnson, Canadian Stewart Speedometers; W. F. MacPherson, Secretary Ontario Retail Hardware Ass'n. Mr. Fraser spoke on the sale of accessories.

The convention was completed with a banquet, held in the rose room of the Windsor Hotel, at which the entire staff was present and a thoroughly enjoyable time was spent by all. After the dinner and speeches the tables were cleared from the centre of the room for dancing. Many of the ladies of the staff and some of the wives of the officers were present.

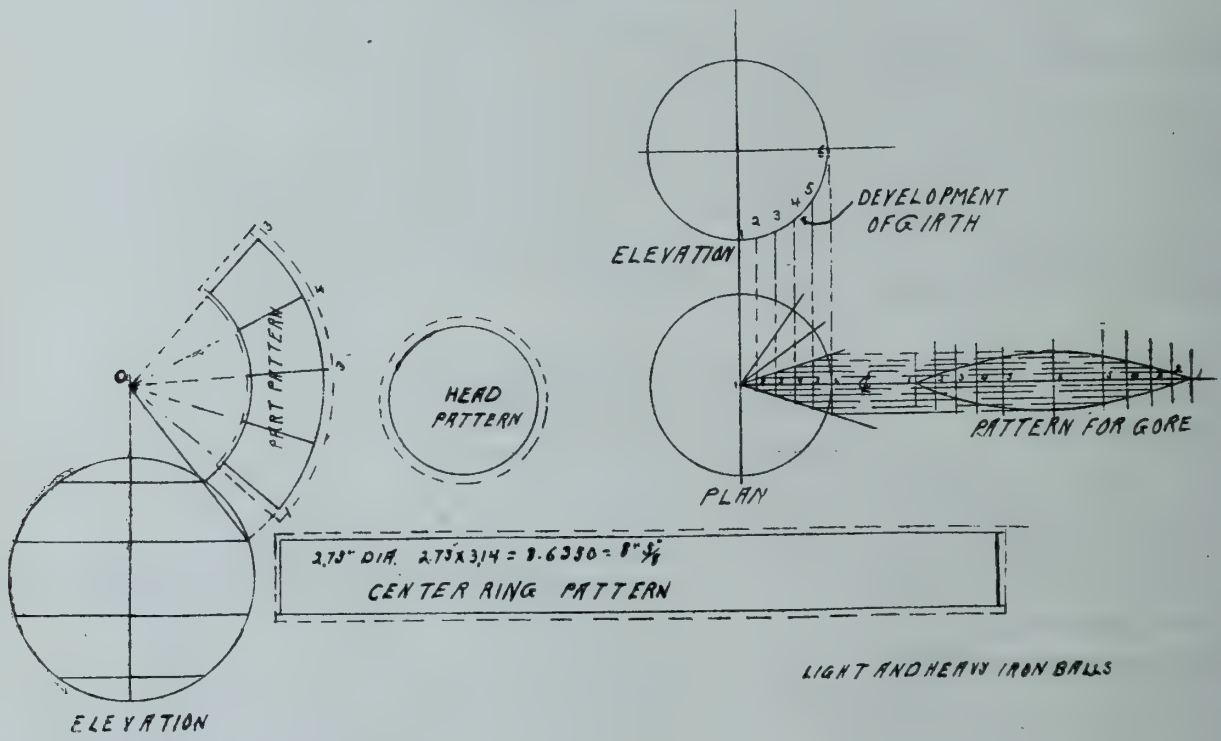
J. G. Lewis Absent



Mr. James G. Lewis, vice-president and managing director of the firm, was out of town and unable to be present at the banquet. He, however, forwarded a very suitable communication to the gathering, which was read out by Mr. Frazer. Regret was expressed at Mr. Lewis' absence, and his message was received very warmly.

W. F. MacPherson's Address

W. F. MacPherson, secretary of the Ontario Retail Hardware Association, was the principal speaker of the evening. Mr. Macpherson spoke of the multitudinous duties of the retailer in order to meet the requirements of the Income Tax Inspector and conduct his business as it should be. The execution of these duties brought the retailer into closer contact with the consumer than any other factor in merchandising, according to Mr. MacPherson, who pointed out that the present lack of buying interest was largely the result of a state of mind. He called upon retailers to dissipate any distorted pessimistic views.



"I believe the hardware merchant will lend himself readily to any readjustment of values as fast as they occur and will hand them down," said Mr. MacPherson, "and from what I know stocks are not very heavy in any particular branch of the trade. Careful and judicious buying on the part of the merchant and careful and judicious selling on the part of traveling salesmen is needed. Hardware merchants would not know there

PATTERNS FOR SPHERES

By O. W. Kothe, Principal St. Louis Technical Institute and Instructor in the David Rankin, Jr., School of Mechanical Trades, St. Louis, Missouri.

WHEN a workman makes a sphere it often puzzles him which method to apply; the zone method or the gore method.

The zone method is the most suitable for all around work. It is easier to assemble, quicker, and is considerably stronger.

The gore method is generally made in so many pieces, that it is hard to put the curvature in the pieces, and this also helps to elongate the sphere from pole to pole, rather than absolutely round.

To set out the belt method, first draw the elevation and divide the body up so the middle belt will be a straight strip.

The other flaring belts are made the same as a funnel or any true flaring article and is described from o in this case. The dished top is set out equal to the radius of the slant height.

These belts must be bumped out to conform to the curvature of outline of elevation. A little edge is allowed; but lines are described so the belts can be held straight.

The circumference of the middle belt is made equal to the diameter of sphere times 3.1416, and is 8. 5.8 inches in this case.

The second belt is made to conform to this girth, and, after the belts are shaped up, it is often necessary to take up a bit of girth or layout one or the other belts a bit.

This is done so a snug fit is produced, and no buckles are forced in the one edge.

The gore method is very simple, a quarter of the elevation is divided in equal spaces and lines are dropped to the centre line of plan.

The mitre lines in plan are set apart at such widths as you desire.

That is, the ball is divided in say 12 equal parts, then one part would be straddled over the centre line of plan, and this is the gore.

From elevation drop lines to cut these mitre lines as shown. Then pick the girth from 1-6 of elevation and set it off as 1-1 in pattern.

Draw stretchout lines, and from each point in mitre lines project lines to intersect those of similar number in stretchout.

Trace a line through these points and the gore is finished. A small lap is allowed for soldering. Each gore is bumped to suit the curvature of ball.

Enough of these patterns are cut to make the ball, and all are bumped out, rounded out, and the gores are then assembled.

Eastern Ontario R.M.A. Convention

About Two Hundred Delegates Present—Sir Henry Drayton Addresses Delegates at Banquet—Strong Plea for Greater Organization by President Henry Watters of Ottawa

By Special Correspondent of Hardware and Metal.

UPWARDS of two hundred delegates attended the third annual convention of the Eastern Ontario and Ottawa District section of the Retail Merchants' Association of Canada held at Victoria Hall, Brockville, on January 11th and 12th. Many important questions bearing on the retail trade were dealt with, including a discussion on the form of taxation likely to succeed the abolition of the luxury tax. The convention unanimously endorsed the proposal of the Dominion Board that whatever tax is decided upon it should be imposed either at the point of importation or manufacture and that it be absorbed in the cost of goods quoted to the retailer and so collected as all other revenue is. The convention endorsed daylight saving, condemned false advertising and took steps to prosecute those who violate this law and set in motion machinery to manufacturers' sales in retail stores.

Address By Finance Minister

A feature of the convention was the address by the Minister of Finance, Sir Henry Drayton. Sir Henry courageously defended the luxury tax as a necessary measure to curb reckless extravagance and the purchase of luxuries and thanked the retail merchants of Canada for the inconvenience they had suffered in helping to lower the cost of living. Justifying the tax, Sir Henry pointed out that the index figure of commodity costs had dropped from 263 in May of 1920 to 234 in October. Having accomplished this, the tax was abolished. The Minister of Finance made a strong appeal for the discontinuance of unnecessary purchases in the United States so that the very unfavorable trade balance could be righted; and the convention subsequently went on record as favoring purchases more exclusively of Canadian or British goods.

The Opening Session

Mayor J. M. Dobbie, of Brockville, extended a hearty welcome to the delegates. In doing so, he referred to their growing strength as a factor in the business and political life of Canada and issued a timely warning that only by concerted, rather than independent action could they hope to accomplish their legitimate purposes.

Robert Craig, president of the Brockville Retail Merchants' Association, also extended a welcome and on behalf of the local Commercial Travellers' Association invited the attending delegates to make free use of their quarters while in the city.

Major Paterson, one of the oldest members of the R. M. A., in speaking of the work of the organization, expressed the opinion that the retail merchants of Canada as an organized body had a great future ahead of them. Only by a combined effort, by putting their shoulder to the wheel, could they get their just due. Their organization was only in its infancy. Members were gradually realizing its importance and were soliciting their brother merchants to become members, knowing that if every merchant in Canada were a member the association would wield a much greater power than it does. Every member would now admit that he was receiving much greater benefit through the association than was represented by the fee he paid.

Secretary E. M. Trowern, of the Dominion Board, said the R. M. A. had been started 25 years ago the coming November by five people. Today 87 people were giving their entire time to this work from the Atlantic to the Pacific. On a moment's notice they could now get in intimate touch with every province in the Dominion. Retail merchants were the largest tax payers of any class in Canada and, when properly organized, should be able to say to any provincial or federal government that a problem affecting their business should be settled either this or that way. Where would retailers have been today if they had not been able to say to the government that the luxury tax should be abolished? It had been abolished and other things detrimental to the retail trade must also be abolished.

President Watters' Address

President Henry Watters, of Ottawa, who presided throughout, addressed the convention briefly before it began its deliberations. The president said that the men they needed at the convention were not present, men who had made a success of their own business and did not feel the need of the association's assistance. Perhaps this might be said equally of men who had worked in the interests of the association for a quarter of a century. In the last analysis, each man must stand or fall by those qualities of head and heart with which he was endowed. All men, however, were not endowed with a high sense of rectitude and honor that they should have, and were not alive to spotting bad conditions of business or discovering obstacles in the way of successful merchandising. Members of the association were merchants who had discovered such obstacles and as thoughtful men were participating in the work of the organization.

Much more could be accomplished, said the president, if all merchants were members of the association. They could then be a greater factor in the molding of public opinion. Retail merchants should be the best organized body that could be had for the betterment of trade and trade conditions. He had no objections to Boards of Trade to look after local matters where there was no organized body of retail merchants. But he felt after many years of study that no body of men that does not represent in large numbers the activities of the retail merchants can accomplish those special objects which the retail merchants have in view. No one line of business could accomplish benefits for the whole retail trade; he had discovered this during the fight against the luxury tax, which was a problem for so many lines of trade. Their best interests as retail distributors could only be accomplished by such an organization as the Retail Merchants' Association covering the whole of Canada.

Ontario President Speaks

B. W. Ziemann, the Ontario president, referred to the great work which the association had to perform. As yet only a handful of the men in active business were organized. The real profiteers among merchants were those who were receiving all the benefits that had been worked out by the association but who were giving nothing or doing nothing to help its work and workers. It was not altogether their money that was needed but their influence on the commercial life of Canada if alive to the interests of the community at large. Men should be in business for the benefit of the service they can give to their fellow men, and so should do all they can to help their fellow men rather than give their whole time to the accumulating of a little money.

Treasurer's and Secretary's Reports

The report of the treasurer, T. W. Collins, showed a surplus of $610.03. The secretary's report appears elsewhere in this issue. Both reports were adopted.

Issue Price List Minus Luxury Tax

Oneida Community Ltd., Niagara Falls, Ontario, formerly published a price list showing net prices, and prices including the luxury tax to the consumer. Since the luxury tax is abolished, they have now issued a new net price list, blue in color and vest pocket size.

He pointed out that inventories were finished and business men knew just where they stood. Trade was opening up and they were getting ready to receive trade.

* * *

CONDITIONS in the United States metal markets have been greatly aggravated and thrown into disorder by the epidemic of cancellation of orders which has been spreading throughout the country, the repudiation of contracts entered into by sellers in good faith, according to the American Metal Market, which points out that this dishonest movement has been a strike at the very foundations of business conduct and integrity. "The dollar in the sight of many has grown bigger than their honor. It is to be hoped that sellers will take to the courts every case where there is no basis for cancellations, and that the 'welcher' will be remembered, and that his ability to break contracts and violate his word will subject him in the future to cast iron contracts, and to premiums in price to cover the possibility of advantage being taken in the future of technicalities. A return to the standard of business morality is absolutely necessary."

* * *

THE RED agitators do not understand generous treatment. Despite the fact that they have been paid abnormally high wages for the minimum of hours there are some of the employees of Henry Ford who are now demanding that he turn the plant over to them so that they may make automobiles for their personal use.

* * *

BUSINESS and industry generally will benefit by the present commercial let-up, says Charles M. Schwab, chairman of the Bethlehem Steel Corporation. Mr. Schwab called the slackening of trade a lesson in economy that eventually would stabilize business and bring about a firm basis for prosperity. Employers and workers were told to wipe out the memory of the orgy of spending through which they had passed recently.

Signs of Disaffection

MANY of the predictions of continued firm prices in certain lines have been based on the argument that labor cost has shown little disposition to decline owing to the influence of union organization among the mechanic class. It has been established, for instance, that steel prices represent labor costs to about 85 per cent. Such being the case it is difficult to see how prices could be much reduced until a generally lower wage scale was accepted by steel mill employees. In this connection it is significant to note that journeymen in various trades have shown a disposition to break away from the doctrine of the masters, in an effort to stir up business. A movement to this end has commenced among painters in Toronto. It is further reported that members of the Plumbers' and Steamfitters' Union of Buffalo, N.Y., members of the international organization, have broken with that organization, maintaining that "increased production, that freedom from outside dictation will enable us to deliver, will make all the reduction in costs our employers can fairly ask."

Word comes from Hamilton, Ont., that the Hamilton Association of the Canadian Building and Construction Industries has devised a system known as the optional plan of employment which provides that every Canadian workman has the right to sell his services without let or hindrance where he wishes, without regard to his affiliation with any particular union.

No workman will remain loyal to an organization which appears to be protecting him by demanding high wages, but which does not provide the work by which he may earn that wage. He will prefer to work at a lower wage and be sure of it. This condition may bring about a quick adjustment of union wages in correct proportion to the normal price scale now required to encourage building and other industrial activity.

Price Reduction Propaganda

THE daily newspapers of Canada—which have already come in for a large share of blame in connection with influencing public sentiment to defer buying pending lower price levels — are held to account for much of the lack of buying interest recently evident. To some extent the daily newspapers have had to give to their readers information concerning price reductions; this is part of their service. Such newspapers have also been largely blamed for information which has really been printed in the form of advertisements and which have come from the hands of business men, partners with those who are now doing the criticizing. Undoubtedly some newspapers became enthusiastic over the prospect of a rapid return to pre-war levels and took injudicious and unwarranted action to hasten that end but many merchants themselves played a large part in moulding public sentiment to wait for lower and still lower prices. An article in this issue reprinting the opinions of a number of hardware merchants concerning business and the outlook, points out that merchants who are advertising sweeping price reductions are finding that customers continue to defer buying, particularly on some lines which were abnormally advanced, pending the arrival of prices at "rock bottom," a level which will be difficult to establish or recognize when reached.

Price reductions by retailers, in proportion to lower replacement values, will indicate to customers that retailers are not desirous of taking advantage of the situation and should help to instil that confidence which will be the foundation of better business. It should not be necessary for merchants to take losses, merely less profits, in doing so. But even if losses on some lines were required, the profits of 1915 and 1916, as pointed out by one merchant, should not be lost sight of.

Meanwhile a policy of ignoring such terms as "buyers' strike" and the resumption of business plans for an active year will be the quickest and most effective way to bring about that condition.

Merchants Oppose Metric System in Canada

World Trade Club of San Francisco Sending Resolution Cards Into Canada — Professions Form Majority of Those Wanting Metric System

THE ANNUAL REPORT of the Dominion inspector of weights, measures, electricity and gas for the year ending March 31, 1920, indicates that during the year 209 seizures and 18 prosecutions were made. Most of the seizures covered old machines which could be more cheaply replaced than repaired. Only serious cases, such as the use of false machines, are prosecuted. Convictions were secured in all eighteen cases except one, and fines to the amount of $320 inflicted. Conviction also includes, in most cases, confiscation of the scale or machine involved, which is a large item in itself.

Inspectors now exercise supervision for the elimination of short weight and measures. Package goods are checked over carefully, allowance being made for shrinkage, etc.

Revenue from this department has increased from $112,204.11, in 1915-16, to $149,473.43 for 1919-20. Expenditure has increased from $187,113.58 in 1915-16 to $272,515.36 in 1919-20. The number of articles inspected has increased from 309,237 in 1915-16 to 427,746 in 1919-20. The number of articles inspected increased 38 per cent. in that period. Revenue showed an increase of 33 per cent. Expenses increased 48 per cent.

The Metric System

Special comment is made in the report concerning the distribution in Canada of much literature, by the World Trade Club of San Francisco, U.S.A., calling upon the government to enact legislation making the metric system compulsory. The resolution cards have been coming in since January last and to date only 359 have been received by the government. Of these, only 91 came from manufacturers and industries of any nature, the balance of 268 being signed by doctors, dentists, lawyers, teachers and ministers. Dealing with this subject, the report says:

"Science naturally espouses the metric system, the full use of which it now enjoys, but it is upon commerce and production that the burden and consequences of the change will fall. Realizing the truth of this, as I mentioned in my report last year, a special English committee appointed in 1918 to examine English trade policy, reported emphatically against the compulsory use of the metric system. And as against the advocacy of doctors and dentists we have a resolution from the Canadian Manufacturers' Association strongly protesting against any such change.

"The reason for the manufacturers, the practical men's protest, is found in the absolute lack of relation between existing English sizes and their metric equivalents, and the confusion this must cause amongst the thousands of interchangeable parts in modern machinery, etc. Following are a few comparisons by way of illustration:

In the matter of screw threads, a 1-inch bolt, 8 threads to the inch, pitch ⅛ inch, becomes a 25.4 mm. bolt—8 threads per 25.4 mm. with pitch 3.17 mm.

Metric standardization would eventually replace such odd sizes—but what has to be remembered is, there are millions of English bolts, screws and nuts in use today that will not disappear for a great many years.

These illustrate but a few practical difficulties as opposed to the laudable but theoretical ideal of international uniformity. And if history affords any lesson it is that the introduction of the metric system will intensify confusion in weights and measures instead of eliminating the so-called English chaos.

Using Profits to Write Off Hold-overs From War Years

REORGANIZATION of their business program to meet changing contions has occupied the attention of a good many firms during the past few weeks. A feature of the work has been the wiping out or writing off, or erasing from memory—whatever phrase suits best—of overhangs or adverse items that were handed down from the strenuous days of war. Many of these matters could not possibly have consideration in the warp and woof of business as it is being shaped to-day, and are best forgotten. At the same time firms who have the right perspective are strengthening their sales forces and selling equipment, for all are agreed that strenuous and more competitive days are ahead—if they have not already arrived.

"To wipe these things off and forget about them, so as to start anew with a clean slate, is the only business-like method," said B. J. McCormick, of the Canada Foundries and Forgings Co. to Hardware and Metal, recently. "There is a handicap in left overs and the same, it seems to me, applies to conditions confronting the dealer as well as the manufacturer. Cash on hand is more useful to the dealer than shelves full of stagnant stock, bought at prices which the public will not meet, for ready money makes possible the purchase of new goods at present values and puts the merchant on an up-to-date selling basis. There is sometimes better strategy in taking a loss than in sitting tight. A strategic loss nowadays seems to be essential to the most effective offensive."

No Rebate of Tax to Motor Car Dealers

Manufacturers May Devise Some Means of Relief For Dealers Who Had Stock Cars on Hand on December 30

Ottawa.—The Government of Canada has refused to grant the request of the automobile dealers for a refund of the luxury tax on unsold cars in stock on December 20, when the luxury tax was removed, according to announcement made by the Retail Merchants' Association of Canada. It is understood that automobile manufacturers will endeavor to devise some scheme whereby relief can be granted the dealers.

The retail merchants issue the following announcement: "A special committee of automobile dealers, members of the Retail Merchants's Association of Canada, and the automobile manufacturers, have had several conferences with the Minister of Finance and the Commissioner of Taxation relative to the request of the dealers for a refund of luxury taxes paid by them to the manufacturers for the Government on cars in stock and unsold on December 20, 1920, when the luxury tax was removed. The facts presented by the committee were fully gone into by the Government and careful consideration has been given to all phases of the question, but the Government find it impossible to grant the request of the automobile dealers and manufacturers for a rebate of the luxury taxes paid on cars on hand on December 20.

"The automobile manufacturers will, however, endeavor to meet the situation in whole or in part to the best of their ability, and will advise the dealers of their proposed plan within a few days."

Complete Hardware Convention Program

Some Added Features of Interesting and Instructive Nature—Much Expense and Work of Officials Hoped To Be Rewarded With Large Turnout of Hardware Merchants

THE COMPLETED program for this year's convention of the Ontario Retail Hardware Association, to be held at the Royal Connaught Hotel and the Armouries, Hamilton, Ont., from February 14th to 18th, inclusive, is reproduced in this issue. A number of changes have been made since the preliminary draft as reproduced in recent issues of Hardware & Metal, and while some further changes may be made these will be of a more or less minor character. It will be noted that there have been a number of additions which should add to the interest and educational value of the convention.

With the exception of the meeting of the executive, enrollment of members, reception and smoker on the evening of Monday, all meetings will be held in the Armories. The proceedings on opening day will be at the Royal Connaught Hotel.

Visit Wood, Alexander & James Warehouse

The business sessions commence at 9 a. m. Tuesday in the lecture hall at the Armouries Bldg., James street north. After greetings from the Mayor have been heard and addresses made by the president, secretary, treasurer and auditors, a visit will be made at 11 a. m. to the new warehouse of Wood, Alexander & James.

The afternoon sessions of Tuesday, Wednesday and Thursday will consist of a visit to the exhibition in the Armouries, where orchestral music has been arranged for. A number of interesting features are provided for the Tuesday evening session. After the presentation of reports on the permanent secretaryship and addresses by the president and secretary on phases of the secretary's work, nomination of officers will take place, followed by a game of cards, in which questions dealing with various phases of the hardware trade will be asked and answered. At 9.15 p. m. a film story of Plymouth Rope and Binder Twine will be shown. This film is in nine parts and illustrates effectively the various stages in the making of rope and binder twine.

Interesting Subjects and Prominent Speakers

The feature of the Wednesday morning session will be brief addresses dealing with business prospects for 1921. Speakers who have been secured and titles of their addresses are as follows:

"The Iron and Steel Market," Robert Hobson, president The Steel Company of Canada.

"Manufactured Products," John M. Taylor, president Taylor-Forbes Co.; B. J. McCormick, general sales manager Canada Foundries & Forgings Co.; Col. A. M. Hatch, Canada Steel Goods Co.

"Paint and Oil Trade," W. J. Lortie, Toronto manager Dominion Linseed Oil Co.; John Irwin, of McArthur, Irwin Co., Montreal, representing Save the Surface Committee.

Mutual Fire Insurance

Another interesting feature at the morning session will be the address by Norman S. Jones, manager of the Canada Northwest Mutual Insurance Co., on the subject of "Mutual Fire Insurance as Carried by Retail Associations."

A complimentary banquet will be tendered by Wood, Alexander & James, of Hamilton, at 7.30 p. m., on Wednesday evening.

Co-operative Buying

Apart from the features already outlined, there will be an address on Co-operative Buying at the Thursday morning session by William Hargreaves, manager Drug Trading Company, Toronto. This will be followed by questions and a discussion of addresses on chain stores and co-operative buying.

Visit Factories on Friday

Arrangements have been made for a visit to Hamilton factories on Friday morning at 9.30 a.m. Hamilton is the centre of many hardware manufacturing industries and an investigation of manufacturing prospects in these industries will no doubt be both instructive and enjoyable.

Hope for Large Turnout

Manufacturers who will have exhibits in the Armories will go to a great deal of expense to make their booths attractive and of educational value to the hardware merchants. The officials of the association have also done much to make the gathering of real practical benefit to those in the hardware trade, and it is hoped that these efforts will be rewarded by a larger turnout of retailers than has been the case in past years. Readjustment conditions, such as the trade is now experiencing, call for the exchange of ideas in order to decide upon the safest procedure and conventions of this kind are therefore very important at the present time.

International Business Machines Co. Convention

Optimism was the keynote at the convention of the Canadian sales force of the International Business Machines Company, held at the offices of the company. About 75 salesmen in all were in attendance at the convention. They represented the three divisions of the company: International Time Recorders, International Dayton Scales and International Tabulating and Sorting Machines. Figures presented at the convention showed that the Canadian organization held all sales records for 1920 against the sales forces of the American firms manufacturing similar products. In fact, the Canadian organization had led the entire world in sales, on percentage of quota, for four successive years.

F. E. Mutton, vice-president and general manager of the International Business Machines Co., Limited, advises that not only he, but the entire sales organization, never were more optimistic as to the future.

Don't be Afraid to Break Away

February 14-15-16-17-18

Your business will not suffer. Rather it will benefit by your attendance on these dates at the 16th annual convention of the Ontario Retail Hardware Association at St. James St. Armories, Hamilton, Ont. Enjoyable and instructive program shown in this issue. Make arrangements now to attend and see what other merchants are doing.

Convention Program of Ontario Retail Hardware Association

SIXTEENTH ANNUAL CONVENTION
FEBRUARY 14-15-16-17-18
HAMILTON, ONT.

MONDAY, FEBRUARY 14TH

At Royal Connaught Hotel

2.30 p.m.—Meeting of Executive.

4.00 p.m.—Registration and enrollment of members.

7.30 p.m.—Reception and Smoker. For Members, Exhibitors, Travellers and Visitors.
Moving Picture. Industrial.

Note—All further Sessions will be held in Lecture Hall at Armouries. Members are specially requested to be prompt in attendance at opening of sessions, in order to carry program through on schedule time.

TUESDAY, FEBRUARY 15TH

In Lecture Hall—Armouries Building, James St., N.

9.00 a.m.—Opening of Business Sessions.

9.30 a.m.—Greetings from Mayor, and from Representatives of Manufacturing and Wholesale Trade.

10.00 a.m.—President's Address—Mr. Ed. Wanless.
Secretary's Report—Mr. W. F. Macpherson
Treasurer's Report—John Caslor.
Auditors' Report—Messrs. Matthewson and Peacock.

Receiving and Disposal of Reports of Officers.
Appointment of Resolution and Convention Committees.

11.00 a.m.—Visit New Warehouse of Wood, Alexander & James, who extend to all an invitation to inspect their New Warehouse.

Tuesday Afternoon.

1.30 to 6.00 p.m.

Visit Exhibits in Armouries.

For practical education in the lines of goods you sell, a close examination of the various excellent Exhibits, is easily one of the best features of the Convention. There you will meet the Travellers you know, Salesmanagers with whom a personal acquaintance is a decided advantage, General Managers and Company Presidents, all of them ready to discuss business affairs and brim full of practical pointers in sales promoting.

SPEND LOTS OF TIME WITH THE EXHIBITORS.

Tuesday Evening.

7.30 p.m.—Presentation of report of Executive Committee on Permanent Secretaryship.
A conception of the duties and scope of an Asso-tion Secretary.—President Wanless.
What the Secretary owes to the members and what the members owe to the Secretary.—Secretary Macpherson.

8.00 p.m.—Notice of motion from 1920 Convention.
Discussion and disposal of report of Executive Committee.

8.15 p.m.—Nomination of Officers.

8.20 p.m.—A Game of Cards Every card headed, "What I want to know about the Hardware business." All questions to be answered first by the members, then by the President or Secretary.

9.15 p.m.—A film story of Plymouth Rope and Binder Twine. Produced by the Plymouth Cordage Company, North Plymouth, Mass., who have kindly consented to come and put on for our Association, and which will surely be appreciated by the members. Shown in nine parts:—

1—Growth and cultivation of Manila Fibre.
2—Production of Sisal Fibre.
3—Factory Panorama—arrival of hemp steamer, docking and unloading scenes.
4—Opening the fibre—its preparation and spinning. Tarring and putting up Lathyarn.
5—How Binder Twine is made. Spinning, testing for length and strength, balling, sacking, warehouse facilities for shipping. Harvest scenes.
6—Machine-made Rope.
7—General Factory scenes. Binding off coils, shipping, etc. End of the day.
8—Old-time method of hand spinning by a rope maker 90 years young.
9—Madern Rope-walk practice.

WEDNESDAY, FEBRUARY 16th.

Lecture Hall, The Armouries.

9.00 a.m.—Reports of Convention Committees.

9.30 a.m.—Business prespects for 1921.
"The Iron and Steel Market"—Robert Hobson, President the Steel Company of Canada.
"Manufactured Products"—John M. Taylor, President Taylor-Forbes Company; B. J. McCormick, General Sales Manager Canada Foundries & Forgings; Col. A. M. Hatch, Canada Steel Goods Co.
"Paint and Oil Trade"—W. J. Lartie, Toronto Manager Dominion Linseed Oil Co.; John Irwin, of McArthur-Irwin Co., of Montreal, representing the "Save the Surface" Campaign Committee.

11.30 a.m.—Mutual Fire Insurance as carried by Retail Associations—Mr. Norman S. Jones, Manager for Canada Northwest Mutual.

Wednesday Afternoon.

1.30 p.m. to 6 p.m.—Visit Exhibition in Armouries. Music by Orchestra.

7.30 p.m.—Complimentary Banquet tendered by Wood, Alexander & James, of Hamilton.

THURSDAY, FEBRUARY 17th.

Lecture Hall—The Armouries.

9.00 a.m.—Reports of Committees.

9.15 a.m.—Election of Officers.

9.30 a.m.—The Chain Store Proposition.

10.00 a.m.—Co-operative Buying—Mr. William Hargraves, Manager Drug Trading Company, Toronto.
Questions and discussion of addresses on chain stores and co-operative buying.

11.00 a.m.—Exhibitors' hour. Short, pithy addresses by Exhibitors and Salesmen on "Selling Points."

12.30 p.m.—Entertainment

Thursday Afternoon.

1.30 to 6 p.m.—Visit Exhibits in Armouries.

7.30 p.m.—A talk on advertising to bring results.

8.00 p.m.—Members' Session Question Box. Answers to cards on file.

Smoker and entertainment.

FRIDAY, FEBRUARY 18th.

9.30 a.m.—Visit to Factories. Hamilton is the centre of hardware manufacturing industries and a visit to the various factories is both instructive and enjoyable.

News of Western Canada

"Give us the Turnover Tax"

Says Wood Hardware Co., Regina—Stern Measures With Public Press Advocated by T. E. Yuill, Manager Calgary Store, J. H. Ashdown Hardware Co.—"Best Business Since 1912," Says Scott & Lake, Edmonton, Alta.—Opinion of Western Merchants on Business and Outlook

OPINIONS of a number of representative Western hardware merchants have been secured by Hardware and Metal in regard to the business outlook and advice as to stocks to be carried, methods of stimulating trade, etc. These opinions are along the same lines as those reproduced in the leading article in this issue based on opinions of eastern merchants.

More Customers Buying at Home—Box Bros., Souris, Man.

Box Bros., Souris, Manitoba, find that there has been no decreased volume of business even though customers are holding off purchases expecting lower prices. This condition results from the fact that a larger percentage of local people are buying in their home town. "In some lines we think it will be necessary to reduce prices to stimulate buying. The daily press is educating people to look for lower prices and in many cases it would be better to reduce prices than carry over stock," says Mr. Box. He points out that collections are none too good and credit is being curtailed. A movement which has grown out of this condition is to put business on a cash basis. This firm favors a gradual reduction. "No matter what reduction was made, the public would look for still lower prices and if too great reductions were made at one time customers would think the retailer had been getting long profits for some time. Small stocks may pull through without any loss, but large stocks will likely have to make some sacrifice," says Mr. Box. This firm is carrying a minimum stock, buying in small quantities, but well assorted, to take best advantage of what trade exists.

Price Reductions Necessary — L. P. Woodhams, Elbow, Sask.

L. P. Woodhams, Elbow, Saskatchewan, reports decreased volume of business, stating that the majority of his customers cannot afford to pay prevailing prices on many lines. Reduction of prices is said to be necessary to stimulate buying and a minimum sorting stock is advocated. In many lines he fears it will be necessary to take a loss to clear out stocks, owing to the fact that crops have been poor in that section.

Give Us Turnover Tax—Wood Hardware Co., Regina, Sask.

P. Logan of the Wood Hardware Co., Regina, Sask., blamed the recent luxury tax for much of the decrease in business and asks for a tax on turnover. He advocates maintaining a small stock with frequent buying. "Business is bound to be good in Canada if you kill the pessimist," says Mr. Logan, speaking of the business outlook.

Collections Slow—W. E. N. King, Neepawa, Man.

W. E. N. King, Neepawa, Man., does a large credit business and finds collections are very slow. Gradual reductions are preferred by this merchant and he is of the opinion that no losses will be necessary to move present stock. A well assorted stock selected to meet the needs of the community served is advocated.

Prefer Sales Tax—Box Bros., Ltd., Pierson, Man.

Box Bros., Ltd., Pierson, Manitoba, are in favor of the reduction of prices to stimulate trade. While there has been no decrease in volume of business in this instance, there is reported to have been no increase, due partly to customers waiting for lower prices. The luxury tax was said to have been partly to blame for this condition and the sales tax could be much more preferable, according to this merchant. A minimum stock which will not be short on lines required is the plan adopted. Credit accounts are limited in this store, but collections are said to be slow on outstanding accounts. Gradual reduction is preferred to a sudden drop, the opinion being expressed that a sudden drop to rock bottom prices would embarrass too many merchants and put them in such shape that they could not give the best service to the community for some time. If reductions are gradual, it is not thought there will be any necessity for losses to be taken.

Active Business.—J. O. Cadham, Portage la Prairie

No decrease in business, rather a good business during last fall and this winter, owing to the late season, is reported by J. O. Cadham, Portage la Prairie, Man. He states that collections are fair, that it will be necessary to reduce prices on some lines to stimulate buying, and he is of the opinion that a gradual reduction is best, though losses may have to be taken in some lines to move present stocks.

Special Sales and Prices Necessary.—Sutherland-Stelck Hdwre. Co., Dauphin, Man.

Sutherland-Stelck Hardware Co., Dauphin, Man., attribute the recent slackening of business partially to customers waiting for lower prices and partially to the drop in grain prices. This firm is reducing prices to stimulate trade and are following the plan of maintaining a minimum, well assorted sort. Credit accounts are being curtailed as collections are poor. On some lines losses may have to be entailed. As to means to stimulate trade, this firm advocates special sales and prices on certain slow lines that have been abnormally high.

Throttle Newspaper Propaganda—J. H. Ashdown Hardware Co., Calgary, Alta.

The J. H. Ashdown Hardware Co., Calgary, Alta., confirm the reported decrease in volume of business due to customers waiting for lower prices and farmers holding grain. In regard to price reductions to stimulate buying, Mr. Thomas E. Yuill, manager of this store, states: "If some of the newspaper propaganda re declines was throttled it would stimulate sales again." Collections are reported as fair. A gradual reduction of prices is preferred and Mr. Yuill is of the opinion that if same judg-

ment is used no loss should be necessary to move present stocks. He thinks the business outlook is good if a sane policy is pursued and he points to the necessity of the merchant having the stock to supply the customers' needs.

"Business Best Since 1912."—Scott & Lake, Edmonton

Messrs. Scott & Lake, Edmonton, Alta., have suffered no decrease in trade and do not think it necessary to reduce prices to stimulate buying. They are reducing the size of stock on most lines. Credit accounts are being curtailed and collections are fair. A gradual reduction of prices is preferred and it is not thought necessary for merchants to take losses to move present stocks. Speaking of business conditions, this firm state that business with them is the best since 1912.

Reduce to Rock Bottom.—D. A. Sands, Yorkton, Sask.

D. A. Sands, Yorkton, Sask., has noticed a falling off in business and he attributes this to low prices for coarse grains and the tendency to hold out for better prices. Stock sufficient for present wants only is being carried. Collections are fair and credit accounts are being curtailed. This merchant advocates a reduction of prices to rock bottom as a stimulant to buying, but does not think it necessary for any loss to be taken on present holdings.

Use Displays and Advertising.—W. A. Brady & Son, Reston, Man.

W. A. Brady & Son, Reston, Man., is another merchant who has experienced no falling off in trade. Forty-five per cent. of his business is on credit and collections are fair, though credit accounts are now being watched carefully. Window display and advertising are suggested as the best methods of overcoming dull times. Gradual reduction is preferred and this firm does not think it necessary to take any loss on present stocks.

No Loss Necessary.—R. M. Snyder, Wetaskiwin, Alta.

Holding up grain for better prices is the cause of decreased volume of business, according to R. M. Snyder, Wetaskiwin, Alta. This merchant advocates a light, well assorted stock. Collections are fair. A gradual reduction of prices is preferred and no loss is thought to be necessary to move stocks.

Big Mistake in Advancing Prices.—J. Winram, Pilot Sound, Man.

James Winram, Pilot Sound, Man., thinks the big mistake which has brought about the present condition was the advance made in prices during the twelve months prior to the present price reduction period. Now, he says, when customers see prices beginning to decline gradually they want a big cut in prices. Credit is being curtailed and collections are fair. Reduction of prices to rock bottom levels is advocated and it is held that losses may be necessary on some lines to move stocks.

WESTERN NOTES

Fire Loss

Waldheim, Sask.—A. Heibert has suffered a fire loss.

Wakyte Mfg. Co. Changes Name

Winnipeg.—The name of the Wakyte Mfg. Co. has been changed to S. H. Whyte Mfg. Co., Ltd., and the capital of the company increased $50,000. The company's products will still continue under the trademark "Wakyte."

Have Bought Out Hardware Stock

Munson, Alta.—Rannie & Mellett, Ltd., shelf and heavy hardware, have absorbed the firm of McConkey & Bowie here. Rannie & Mellett, Ltd., settled here in the summer of 1918 and opened a hardware business. In December of that year they bought a drug stock. Now they are taking over the stock and building of McConkey & Bowie and purpose running the hardware and drugs in their own building, making the other store exclusively groceries and dry goods. The firm is increasing its capital from $20,000 to $50,000 and intends as soon as spring comes to remodel the building now taken over and make it a thoroughly modern store building.

Hardware Price Decline Will Be Gradual

"Indications are that merchandise prices will tend downward for some time," said C. H. S. Bamford, sales manager of the J. H. Ashdown Hardware Company, Limited, in addressing 80 of the company's salesmen gathered in convention.

Mr. Bamford said the decline will be gradual and slow and that it will take years of intensive production to reduce prices to pre-war levels. Hardware prices cannot be a great deal lower, he said, until labor costs come down. Lumber prices have taken a drop, and he expressed confidence that there would be a revival of building.

Marshall Wells, Ltd., Staff in Convention

Winnipeg.—The convention of Marshall, Wells, Ltd., sales staff lasted practically a whole week. All the travelling salesmen were in and conditions were thoroughly discussed. Conditions were reported to be very good. Retailers and wholesalers were said to be very optimistic and while many of them are making price readjustments, it was thought that it is better to make them now than later on. The outlook for the year was thought to be very encouraging.

Believes Most Trying Time is Over

Winnipeg.—Belief that the wholesale and retail trade has experienced its most trying time since depression and that business would resume an upward trend from now on, was voiced by three speakers at a session of the convention of the J. H. Ashdown Hardware Co. employees.

The convention was addressed by C. A. Dana Redmond, advertising manager of the Boston Varnish Co.; W. H. Cunningham of the Kasement Skrene Dore Co., and T. F. Shurley, head of the T. Shurley Co., Ltd., saw manufacturers, St. Catharines.

Wood Vallance Curling Tournament

The annual curling tournament between the travellers and warehouse staff of Wood, Vallance, Limited, again proved that the salesmen are invincible. The competition was arranged, the following rinks taking part, and while a great deal of credit was due to the skips of the respective rinks, nevertheless every one of the travellers demonstrated that they were just as good at curling as they are at selling goods.

The personnel of the rinks was as follows:

Travellers' Rink
Bob Consterdine, lead
Lee Huyck, second
Harvey Sutherland, third
Johnnie Jack, skip

Warehouse
Jimmie Waugh, lead
A. T. Wood, second
Jimmie Wardrope, third
F. W. McGuire, skip

Travellers' Rink
R. A. Bird, lead
F. O'Neill, second
Morley Barnes, third
Geo. H. Herity, skip

Warehouse
Lt.-Col. J. C. Gillespie, lead
W. B. Lawson, second
L. D. Osborne, third
Alex Gordon, skip

Mr. Jack's rink defeated Mr. McGuire's rink with a score of 10 to 6. Mr. Herity's rink defeated Mr. Gordon's rink with a score of 13 to 8.

Winnipeg Ford Plant to Reopen

Winnipeg.—The Winnipeg assembling plant of the Ford Motor Company of Canada, which has been practically closed since last November, reopens this week, John E. Bainbridge, assistant manager, announced. No cut in wages be made, it was announced.

Events in the Trade

Business Changes

Mitchell, Ont.—John Rankin, hardware merchant, has sold out to Geo. Ratz & Son.

Fire Loss

Quebec, Que. — Gaudiose Lajeunesse, hardware merchant, suffered fire loss.

Obituary

Hamilton.—W. F. Taylor, superintendent of the sheet mill, the Steel Company of Canada, Ltd., died this week.

* * *

Mt. Dennis, Ont.—The death of John Alexander Marshall has removed from Mount Dennis one of its oldest and most influential residents. The late Mr. Marshall, who was born near Woodstock and came to Mount Dennis in 1911, entered into the real estate and hardware firm of Goddard and Marshall, a business that was only very recently dissolved. Previously Mr. Marshall had been for fourteen years a traveler for the Imperial Oil Company. He is survived by his wife and two sons.

Personal

Toronto.—S. M. Baker, local representative of T. S. Simms & Co., Ltd., St. John, N. B., headed the polls in the aldermanic election in Ward 8 this year.

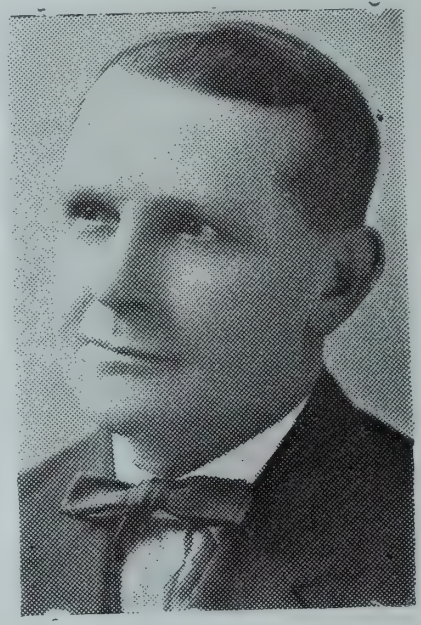
* * *

Montreal.—Among the visitors calling on the hardware trade this week were R. M. Cruise, of Corbin Cabinet Lock Co., New Brittain, Conn.; Morris Wheeler, of Sargent & Co., New Haven, Conn.; Mr. Fraser from Campbell Agencies, Toronto, and Mr. Campbell, Jr., from Campbell & Fowler, St. John's, N.B.

* * *

Montreal.—M. Bliss, general manager, Oneida Community, Limited, Niagara Falls, Ontario, was a visitor in Montreal, in company with Mr. Marks, their Montreal representative. He is continuing his trip east to Quebec City, etc.

* * *



D. F. Griffith, sales manager of B. Greening Wire Co., Ltd., Hamilton, is in New York on business. He will be absent about ten days.

* * *

George Bertram, sales manager of the Lincoln Electric Company of Canada, is in Cleveland, Ohio, this week, on business.

Death of London, Ont., Mgr. Imperial Oil Co.

London, Ont.—In the death of Charles W. McGuire, manager of the Imperial Oil Co., London, Ont. lost one of its best citizens. Mr. McGuire was an indefatigable worker for any philanthropic, charitable or civic undertaking and

LATE C. W. McGUIRE

Manager of Imperial Oil Co., London, Ont., and past president of Western Ontario Commercial Travellers' Association, whose death is announced.

gave of his time and talents freely. He was one of the most prominent Masons in the district and a past illustrious potentate of Mocha Temple Shriners. He was 53 years old and a native of Orangeville, Ont. Nearly 30 years ago he gave up the teaching profession and accepted a position as traveller for the Imperial Oil Company with headquarters in London. Fifteen years ago he became manager of the local branch.

He was a past president of the Western Ontario Commercial Travellers' Association.

He is survived by his wife, formerly Miss Lucy Sells of Tennessee, and one son, Sells, aged ten. James McGuire of the Imperial Oil Company, Windsor, is a brother.

It is the intention to inter the remains in Tennessee, near his wife's old home. The arrangements are under the direction of the Knights Templar.

The funeral held on Wednesday afternoon to Mount Pleasant cemetery was conducted by Kilwinning Masonic Lodge of which Mr. McGuire was past master. It was very largely attended.

Attempted Burglary

Meaford, Ont.—Wm. Butchard & Co's hardware store was visited by burglars but nothing was taken.

Hardwareman Elected Mayor

Brockville, Ont.—J. Murray Dobbie, proprietor of "The Round Corner Store," hardware and electrical goods, has been elected mayor of this city.

Change Name of Firm

Hamilton, Ont.—The name of Slater & Barnard, Ltd., has been changed to N. Slater Company, Ltd., effective, according to the granting of supplementary letters patent, from the first of the year.

Moving To New Premises

Toronto. — The Allcock, Laight & Westwood Co., Ltd., fishing tackle manufacturers, are removing from 78 Bay St. to 70 King street W., Toronto, and expect to be in the new premises about February 1st.

Caverhill Learmont Co. Convention

Montreal.—Caverhill Learmont & Co.. salesmen met for the usual annual consultation last week. The previous year had proven to be a successful one, the business keping up in good volume till the end of the year, even after the salesmen had come off the road.

Reports from the different sections of the country showed a decided feeling that in view of the unquestionably low stocks in the hands of dealers there would certainly be a good steady trade throughout the year 1921, as the needs of the country would have to be supplied.

In starting out on the task of another year all were optimistic and hopeful. After talks from makers' representatives on various lines indicating advanced advertising assistance to dealers, and showing the possibilities of the retail hardware stores for increased sales in many lines that they were not now getting full benefit from, it was felt by all that the volume of trade done by aggressive live dealers this year should equal the one just closed at least.

Western Ontario News

Wm. D. Harper, who has purchased the entire interest in the business of Harper & Aseltine, at Tupperville, Ont., plans to make important changes in the store and will establish a large department for hardware.

* * *

Miss Bessie Lillie, of Montreal, has joined the office staff of the Wallaceburg Brass & Iron Works, succeeding Miss Yula Wooliver, who will be married shortly.

* * *

William Brigham has leased premises at Bervie, Ont., and will shortly open up a hardware store and flour and feed business.

* * *

The Mack Furnace Company of Detroit has completed negotiations for the purchase of the old factory buildings of the Defiance Iron Works at Chatham, Ont., and will remodel them, erect an addition and instal equipment to turn out fifty furnaces daily.

* * *

At the inaugural meeting of the council at Blenheim, Ont., A. G. Shillington was appointed a member of the Court of Revision and also of the Property Committee.

* * *

Fire which started from a gas heater and worked its way in through the partitions caused a loss of $5,000 in the store of the Wyandotte Hardware Co., Wyandotte St., Windsor.

New Premises for Reorganized Hardware Firm

Kitchener, Ont.—John Fennell, one of Canada's veteran hardware merchants, is vacating his present store and removing the business to the rear with an entrance on Foundry street, in order to make room for the Royal Bank, which is moving into the space occupied by the Fennell hardware store. Mr. Fennell states that it is the intention to occupy the rear of the Royal Bank Building, formerly the Economical Fire Insurance Building, for six months. In the spring or early summer Mr. Fennell hopes to locate his business in more suitable quarters. Mr. Fennell stated that during the winter he will endeavor to organize a joint stock company so that the business which he established in this city 57 years ago can be continued as a limited company. The veteran hardware man declared that such a move will make it possible for the firm to greatly extend the scope of business. At the present time the firm is covering a trade that extends from Georgian Bay on the North to Lake Huron on the west in addition to the whole of western Ontario.

Brighton, Ont.—Bullock's hardware store was destroyed in a fire which did serious damage to the business section of the town.

Annual Gathering of St. John Iron And Hardware Association

ST. JOHN, N. B.—At the annual meeting of the St. John Iron and Hardware Association, Stanley E. Fisher was elected president of the organization to succeed A. M. Rowan, who retired from the presidency after ten years' service. Cordial appreciation of the able manner in which Mr. Rowan had performed his duties was expressed by the association.

Other officers elected were: Vice president, S. L. Emerson; secretary-treasurer, W. S. Clarke; directors, A. M. Rowan, Hon. W. H. Thorne, J. A. McAvity, M. E. Agar; executive committee, S. E. Fisher, S. L. Emerson, A. M. Rowan, J. A. McAvity, W. H. Thorne, M. E. Agar, W. S. Clarke.

The association, which is in a very flourishing condition, added two members in 1920, and embraces in its membership practically all the hardware men of the city.

The annual "get together" dinner of the association will be held at the Union Club, St. John, on January 25.

STANLEY E. FISHER

Elected president of the St. John Iron and Hardware Association at the recent annual gathering.

A. M. ROWAN

Retiring president of the St. John Iron and Hardware Association, who has held the position for ten years.

Hon. C. W. Robinson President of N. B. Wire Fence Co.

Moncton, N. B.—At the annual meeting of the N. B. Wire Fence Company, Ltd., one of the most successful years was reported, there being an unusually large volume of business in 1920.

Directors for 1921 follow: The Hon. C. W. Robinson, M.P.P., president; W. C. Martin, vice-president; His Worship Mayor Chapman, secretary and manager. Other directors are: Messrs. W. O. Schwartz, E. W. Givan, F. C. Jones and George A. Robertson.

Catalogs and Price Lists Wanted

Hardware and Metal's Toronto office has received a long distance call from the Wyandotte Hardware Co., 1064 Wyandotte St. E., Windsor, Ont., asking that manufacturers and wholesalers send catalogs, price lists, etc. In the fire which visited this company early in the week, all catalogs and other books of reference were destroyed. The Wyandotte Hardware Co., of which Gordon Wall and Ernie Lefreve are proprietors, was damaged to the extent of $12,000 or $15,000, mostly on the main floor. The fire is thought to have started from an overheated gas stove.

Maritime News

Canada's Oil Supply

Moncton, N. B.—Speaking before the Moncton branch of the Canadian Engineering Institute, following a banquet at the Hotel Brunswick, Brigadier-General C. H. Mitchell, C.B., C.M.G., D.S.O., consulting engineer and dean of the faculty of applied science of Toronto University, said among other things that Canada could supply the world with motor oil for the next 500 years from the sources now in sight.

Saturday Half-holiday

Among the St. John houses who have decided to close Saturday afternoons during January, February and March are Messrs. W. H. Thorne & Co., Ltd., and T. McAvity & Sons, wholesale and retail hardware.

Canada Foundries Ass'n Meets

Canada Foundries Association held a large and representative meeting in Toronto this week with representatives from all parts of Canada in attendance to discuss labor and production problems.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of January 19, 1901:

"Thursday and Friday, January 3 and 4, at the head office of the McClary Mfg. Co., London, were spent in instructive talks among all their traveling men, including the following: Headquarters at Montreal, W. Owen; A. A. St. Arnaud, L. Tarleton, H. Le Page, O. R. Anderson; Headquarters at Toronto, S. T. Smith, W. E. Bulmer, W. Jeffrey, J. D. Laidlaw; Headquarters at London, E. H. Grenfell, J. Chalmers, M. F. Irwin, D. G. Clark; Headquarters at Winnipeg, J. Brockest and Mr. Anderson; Headquarters at Vancouver, T. R. Ella and N. R. Turner."

"John Irving, who for the past nine years has represented the Montreal Rolling Mills Co. in Toronto and Western Ontario, has accepted the position of sales agent with the Nova Scotia Steel Co., New Glasgow. A. H. Hough, who has represented the Montreal Rolling Mills Co. between Montreal and Toronto, succeeds Mr. Irving in Toronto."

"A well-attended and enthusiastic meeting of the Retail Hardware and Paint Dealers' Association was held in Montreal. President F. Martineau occupied the chair and among those present were: Secretary Magnan, treasurer A. Prudhomme, Messrs. Drysdale, Surveyer, Colleret, Denis, Dufault, Mailhot, Millen, Surveyer. U. Granger, Nap Granger, A. A. Wilson, Huberdeau, G. Prudhomme, Belanger, Ponton, Jubinville, Young, Chausse, Tremblay, Couillard, Papineau, Shea, Beland, Marceau and others."

"Employees of Caverhill, Learmont & Co., Montreal, held their 47th annual dinner at Her Majesty's Cafe. Previous to the dinner they were present at the presentation of 'Carmen' in the theatre and shortly before midnight they assembled for dinner. Chairman James Reid proposed the toast to 'The Queen.' J. W. Dowling proposed toast, 'Our Employees,' and Frank Ross Newman responded; G. H. Cornell proposed toast to 'Our Guests' and Messrs. Wm. Percival, R. W. Carth and Wm. Grose responded; J. R. Terrill proposed toast to 'The Ladies.' George McGowan proposed the health of the chairman and Mr. Reid ably responded. The health of Mr. John Gouldthorpe, one of the oldest employees, was drunk. During the evening songs were given by Messrs. R. Platt, A. Bain, F. R. Newman, J. Davidson, F. Cockburn, Wm. Grose and Archie Macfarlane and Mr. Dick Terrill gave a whistling solo."

PRICE CUTTING BRINGS NO RELIEF

Continued from page 39

was any lack of buying interest unless the newspapers told them so. Quite recently I was talking to a number of dealers and without exception they reported satisfactory business conditions. Of course I admit we have a big lead on many other lines of retail trade for which I trust we are duly thankful."

Speaking of prices and referring to a statement appearing recently in a newspaper Mr. MacPherson stated that he did not think cutting prices would get away from the "gloom talk." He advised merchants to use reason and tact in handling the situation.

Those in Attendance

Among those present were John A. Frazer, sales manager of the company and chairman for the evening; J. Thurston Smith, secretary-treasurer of the company; W. F. MacPherson, secretary of the Ontario Retail Hardware Association; Fred B. Smith, Smith Hardware Company, Belleville, Ont.; Prescott W. Robinson, Frank Mossburg Co.; Mr. Richardson, of Richardson & Bureau, manufacturers' agents, Montreal; George Warrick, Belleville, Ont.; Mr. Blakie, Steel Company of Canada; Mr. Pepper, Peck's Rolling Mills, Montreal; C. Smallpiece, Taylor Forbes Company, Limited; R. W. Smith, Hardware and Metal.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

BRUSH DISPLAY CARDS

A new display card has been brought out by the Boeckh Co., Toronto, Ont., and will be sent out with all orders for brushes when requested.

The card which is of good size for use in either store or window display, measures 21-inches by 28-inches, and is in five colors, including a striking gilt finish. It is made for either easel or hanger use, and must be seen to be appreciated.

A reproduction of this desirable stimulator of sales, not colored, appeared in the January 8th issue of Hardware and Metal, page 63.

Dealers are invited to write to the Boeckh Co., Ltd., Toronto.

THERMOS BOTTLES

The Thermos Bottle Co., whose Canadian offices are at 146 Wellington St. W., Toronto, Ont., are reprinting a rotogravure which originally appeared in the weekly edition of the New York Tribune.

In this rotogravure, which occupies the whole of one page, the big growth and the tremendous popularity that the Thermos bottle has attained over the wide world is shown by the picture of the ten factories and branches which are portrayed.

The makers point out some of the wide uses of the Thermos bottle and that men and women are finding it indispensable in all walks of life and in all occupations and pursuits. Mention is made of the fact that though there are many imitators, there is but one Thermos bottle.

UNIVERSAL VACUUM CLEANERS

We have received a copy of a booklet entitled 'Ad Aids for Universal Dealers,' issued by Landers, Frary & Clark, New Britain, Conn.

This booklet is issued with the idea of helping dealers who handle Universal Vacuum cleaners by supplying them with show cards, electros, etc., as well as giving them ideas in advertising and selling the Universal cleaner.

The booklet of 16 pages, 8 inches by 10 1-2 inches, is finely got up and is printed in colors on excellent paper. The colored window and store show cards that are available to Universal dealers are fully shown, as are a variety of prepared ads for newspaper advertising, with or without electros, which are also listed separately.

Letter heads and mailing cards are also at the disposal of dealers and are illustrated and described in booklet with suggestions for letters.

Lantern slides for the "Movies" can be supplied, and those interested are invited to send for a copy of the booklet.

Hardware LetterBox

Information on trade topics will be gladly supplied to subscribers through this department.

SPALDING HOCKEY STICKS

Collingwood Hardware Company, Collingwood, Ont.—Please inform us where we can buy Spalding hockey sticks.

Answer.—The Canadian distributors for those are A. G. Spalding & Bros., 207 Yonge St., Toronto, Ont, and Montreal, Que.

CROQUET SETS

Emerson & Fisher, Ltd., St. John, N.B.—Will you please advise us if there are manufacturers of croquet sets in Canada.

Answer.—The following are manufacturers of these goods: Beauchamp & Co., Ltd., Montreal, Que.; The Henry Wise Woodenware Co., Palmerston, Ont.

QUEBEC HEATERS

In giving the names of manufacturers of Quebec heaters in a recent issue of Hardware and Metal, the name of the Empire Stove and Furnace Company, Limited, Owen Sound, Ontario, was inadvertently omitted. This company is a large manufacturer of Quebec heaters, ranges, hot air furnaces and registers, etc.

Trade Enquiries

Names and addresses of enquirers can be obtained only by those interested in such lines upon application to Hardware and Metal. Please quote reference number when requiring addresses.

2655. **Enamelware, aluminumware, and general hardware lines.**—A Sydney company desire to hear from Canadian manufacturers of the above lines with a view of arranging for agencies in Australia.

2656. **Representation in South Africa.**—A commission agent in Johannesburg, South Africa, established for many years and having a valuable connection, with knowledge of the financial standing of business firms, would like to represent Canadian manufacturers in South Africa. Banking references given.

2658. **Representation in British West Indies.**—An ex-officer of the Canadian Expeditionary Force, whose home is in one of the West Indian islands, would like to get in touch with some large Canadian manufacturer with a view to acting as representative in the West Indian islands and British Guiana. He has personal connections with some of the largest business men in the British West Indies. He served four years overseas.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

THE iron and steel market shows little improvement this week. Steel warehouse business in Canada is quiet. The U. S. Steel Corporation mills are continuing production while the independent mills are said to be on a capacity of less than 50 per cent. The unfilled orders of the Corporation are rapidly diminishing, however, and there seems to be a tendency for independents to shade the latter's prices in order to bring business. Copper is down to pre-war values, pig lead in primary markets shows a tendency to firmness. Tin prices have responded to the higher exchange on British sterling.

Price declines on hardware this week include the following lines: Barbed wire, rubber and canvas belting, copper rivets, soldering coppers, malleable fittings, crowbars, picks and mattocks, corrugated sheets, barrel churns, American metallic ammunition, rule and level goods, fuel oil and machine oils. Lower quotations are expected on eavetrough. Lower prices are also quoted on roofings, butts and hinges. White lead in oil is reduced, this being the second reduction in six weeks. Business is showing steady improvement though inventories are still being taken.

Montreal Markets

MONTREAL, January 13.—Price reductions are numerous again this week, a reduction on hinges of all kinds being the outstanding feature. Butt hinges, light strap and tee hinges, and S. & S. hinges, are all affected by the decline. Copper rivets and Penberthy valves also show a decline in price. Stevens rifles have new net prices, and all kinds of drills are quoted lower. Roofing prices were revised to a lower level at the beginning of the new year, felt products being affected. Deliveries on pipe have improved very much during the last few weeks, and it is likely stocks will be well filled before the spring demand.

Scarcity of Pipe Now Improving

Montreal.

PIPE.—Deliveries of pipe, both galvanized and black, can now be made from warehouses of manufacturers. The scarcity, which has been felt for a considerable time has now greatly improved and both manufacturers and jobbers are of the opinion that conditions will be quite normal by the time spring deliveries are made.

Quotations will be found on current market pages.

Practically No Movement in Sheets and Plates

Montreal.

SHEETS AND PLATES. — These lines show practically no movement at present however, this is the usual experience at this season. Stocks are low and a scarcity is noted in some weights.

20% to 25% Reduction on Roofing, Insulating Papers

Montreal.

ROOFING, INSULATING PAPERS AND WATERPROOFINGS.—The new year brings with it a revised price list of roofings, etc., with reductions ranging from 20 per cent. to 25 per cent. The cost of producing is lower in regards to rags, efficiency of labor, etc., but on other lines of raw materials, such as asphaltum the price still remains at a very high level. It is felt generally that present new prices are lowest that can be quoted for some time.

Quotations are as follows:

	Car lots	Less
Plus Roofing—		
1 ply	2 10	2 25
2 ply	2 55	2 70
3 ply	3 00	3 15
Eureka—Standard weight—		
1 ply	1 75	1 90
2 ply	2 20	2 35
3 ply	2 65	2 80

Nails Remain Unchanged; Sales Are Light

Montreal.

NAILS.—Prices for this week remain unchanged. Jobbers state sales are seasonably light however they are of the op;inion that a gradual greater movement will be evidenced as the winter months pass. Quotations are $5.85 base on wire, and $6.60 base on cut nails.

30% to 20% Off List on Dominion Cartridges

Montreal.

CARTRIDGES.—Price changes came into effect last week on all lines of Dominion ammunition. The new price is 30 per cent. and 20 per cent. off list, and shows a reduction of 10 per cent. off former prices. The removal of the Luxury Tax is looked upon as the reason for the decline. List prices are shown on current market pages.

Prices Readjusted on Penberthy Products

Montreal.

VALVES. — Prices on Penberthy valves, etc., have been adjusted and reductions are made on some lines.

Bolts Reduced From 5 to 15%

Montreal.

BOLTS.—Carriage and machine bolts have been revised with new lower discounts off list.

New discounts are as follows:

Carriage Bolts—	
⅜ in. and smaller	15% off list
⅜ in. over 6 in. long	Net list
7-16 in. and larger	Net list
Machine Bolts—	
⅜ in. and smaller, 4 in. and shorter	30% off list
Larger sizes	5% off list

Coach Screws Now 20% Off List

Montreal.

COACH SCREWS—The revised prices on coach screws show a discount of 20 per cent. off list prices.

Reduced Price on Tire Bolts

Montreal.

TIRE BOLTS.—This week shows a reduction of nearly 10 per cent. on tire bolts, new discount being 40 per cent. off list.

Stove Bolts Now 57½% Off List

Montreal.

STOVE BOLTS.—A reduction of 10 per cent. is quoted this week on stove bolts, quotations now are 57½ per cent. off list.

New Lower Prices Quoted on Drills

Montreal.

DRILLS.—Straight shank, tapered shank, blacksmith and wire gauge drills are now selling at a new lower discount of 37½ per cent. off list price.

Cotter Pins Have Been Lowered

Montreal.

COTTER PINS.—New quotations on cotter pins show that they are now selling at 82 per cent. and 10 per cent. off list.

15% Reduction on Copper Rivets and Burrs

Montreal.

RIVETS AND BURRS.—A reduction is shown on price of copper rivets and burrs. Rivets are now selling at net list, burrs at plus 50 per cent.

Butt Hinges Reduced; 12½% Lower

Montreal.

BUTT HINGES.—New prices on butt hinges are now quoted, all numbers of steel butt hinges being affected.

New quotations are as follows:

No. 800, 5% adv. on list; No. 838, net list; No. 840, net list; No. 802, net list; No. 804, less 5%; No. 814, plus 25%; No. 810, plus 25%.

Light Strap and Tee Hinges Now 5% Off List

Montreal.

LIGHT STRAP AND TEE HINGES.—A reduction is quoted on strap and tee hinges, and they will now sell at 5 per cent. off list.

Screw and Strap Hinges Reduced

Montreal.

S. & S. HINGES.—The discount has been changed on S. & S. hinges and is now 5 per cent. off list.

New Prices on Steven's Rifles

Montreal.

STEVENS RIFLES.—The following quotations are the new net prices on Stevens rifles. The luxury tax being abolished has had its effect on these arms when the following prices are quoted.

Little Scout, $7.60; Crack Shot, $9.25; Marksman, $11.20; Favorite, $13.65; No. 70 Repeater $20.45.

Waste Materials a Little Firmer

Montreal.

SCRAP MATERIALS—A few changes are noted this week on waste metals. Wrought iron shows a decline of $5 a ton and stove plate is reduced $4 per ton. A slight reduction is also noted on scrap zinc. The market is reported quiet, but a firmer tone noticeable.

DEALER'S BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 07

Stove plate, per ton	20 00
Heavy melting steel	15 00
No. 2 busheling	5 00
Boiler plate	12 00

Ingot Metals Continue Firm, Improvement Noted

Montreal.

INGOT METALS.—An improvement is noted this week in metals. Prices continue firm and the sterling exchange is being regarded with much interest, as this has quite an effect on all metals. The exchange has advanced considerably during the last few days.

TIN.—This metal is still holding steady in London. The advance in sterling exchange has had a strengthen-

ing effect on it. A steady market is looked for and local quotations are 44 cents.

COPPER.—Copper is decidedly firmer in New York and with production still being curtailed, the situation is improving. The local price on electro is 19½ cents and on casting 19 cents.

LEAD.—Is showing slightly firmer without much marked strength. The market will, no doubt, be irregular for a while. Local price is unchanged at 7½ cents.

SPELTER.—The London market on spelter is strong, although in U. S. it is practically lifeless. The price should improve in time, but there is no immediate sign at present. Quotation is 8¼ cents.

ANTIMONY.—This metal is stronger in New York, where there is some talk of a duty being imposed on Chinese and Japanese imports. Local price 8½ cents.

ALUMINUM.—There is nothing new to report on this metal. Local price continues at 35 cents per pound.

Toronto Markets

TORONTO, Jan. 13.—Several important price changes have been made this week, and they are practically all in the nature of a reduction. Among the lines that have declined are barbed wire, rubber and canvas belting, copper rivets, soldering coppers, malleable fittings, crowbars, picks and mattocks. Corrugated sheets have been reduced and lower quotations are expected in a few days on eavetrough. Barrel churns are lower in price and a new lower price has been made on American metallic ammunition. The new lists issued on Stanley Rule and Level goods show varying reductions in most instances. New quotations on fuel oil and machine oils show declines in price. Staple lines such as bar iron and steel, sheets and plates, pipe, nails, etc., are moving but slowly at present and are mostly holding fairly firm in price. Business is reported to show a little improvement over the last few weeks, and is fair considering that with most retailers taking inventories the present is usually a dull period.

Prices on Barbed Wire About 11 *P.C. Lower*

Toronto.

BARBED WIRE.—It is announced that new prices on barbed wire will be about 11 per cent. lower than previous quotations, but prices to the trade are not issued yet. The new galvanized wire prices show a reduction of from 2 to 8 per cent. from last season's figures.

Trade Discount Changed On Wire "Extras"

Toronto.

WIRE EXTRAS. — All extras on coppering, tinning, annealing, soft drawn, and also oiled and annealed are now subject to the usual trade discount. These were previously quoted net.

Fuel Oil Is Quoted At Lower Price

Toronto.

FUEL OIL. — A slight reduction has been made in the price of fuel oil, and new quotations are barrels, 15.20 cents per gallen, net, and tank cars at 13.20. This is a reduction of 4-5 of a cent per gallon.

Reduction Made On Machine Oil

Toronto.

MACHINE OIL. — Lower quotations are made on machine oil, and a reduction of 2½ cents per gallon has been made. The regular grades are quoted at 56.10 cents, in place of 58.60.

Rubber Belting Reduced in Price

Toronto.

RUBBER BELTING. — A new lower price is in effect on rubber belting and the Lion brand is quoted at 40 per cent. off list of January 2nd, 1920. An extra 5 per cent. is quoted off full rolls of approximately 400 feet.

Bar Iron and Steel Inactive and Unchanged

Toronto.

BAR IRON AND STEEL.—Very little in the way of new developments is reported locally and business is quiet. Wholesalers report a small demand and no change in prices.

IRON AND STEEL

Common bar steel, 3-16 in. dia. and lighter.	$ 5 50
Common bar steel, ¼ in. and heavier	4 75
Common bar iron, 3-16 in. dia. and lighter.	5 50
Common bar iron, ¼ in. and heavier	4 75
Angle base	6 00
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 50
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	28 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	6 00
Norway iron	15 00
Toe caulk iron	6 70
Hoop steel	7 50

No Change in Pipe; Demand Fair

Toronto.

WROUGHT PIPE. — No changes have been made in pipe prices and list No. 46 is still in effect. While sales are lighter at the present than they have been there is said to be a very fair demand considering the period of the year. Pipe mills are reported to have a good quantity of orders on hand, which is more than many of the independent steel mills have. Prices came down to Corporation levels on the last day of the year.

Quotations will be found on current market pages.

Reductions Made On Corrugated Sheets

Toronto.

CORRUGATED SHEETS. — A reduction has been made on corrugated galvanized sheets, and the decline amounts to about 7 per cent. on the two lighter gauges and about 15 per cent. on the heavier gauges. The 75 cents extra for lighter than 24 gauge and wider than 27 inches is cancelled, and the following substitute for one-inch corrugation, 50 cents per square extra.

Sales are light just now on these lines.

Following are new list prices, and are subject to 7½ per cent. discount:

Corrugated Sheets—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

50 cents per square extra for one inch corrugation.

Nail Supplies Improve; No Further Change

Toronto.

NAILS. — The supply of nails is on the increase and wholesalers are better able to take care of the demand, which, however, is smaller at the present.

The base price is $5.75 per keg for wire nails.

The new price on cut nails is expected to be announced in a few days.

Big Demand for Auto Lenses

Toronto.

AUTO ACCESSORIES.—While trade is reported quieter in these goods at the present, there is a fair demand still for tire chains, engine heaters, etc. Dealers report a big demand for lenses that comply with the new law. Autoists are required to show that their lights comply with the new law before new licenses are issued them, and a big sale of lenses is the result.

Fittings Revised; Malleables Are Lower

Toronto.

PIPE FITTINGS.—New lower quota-

tions are made this week on pipe fittings and reductions have been made in malleable fittings. Class B black are now quoted at 24 cents instead of 30, and B galvanized at 34 in place of 40 cents. In class C the new quotations are 16 cents black, and 24 cents galvanized. The previous prices were 20 and 30 cents. Malleable and cast bushings are now 25 per cent., a reduction of 9 per cent., and unions are quoted at 37½ per cent. off list, a decline of 11 per cent. Plugs are now 22 1-2 per cent. in place of 15 per cent. A fair demand for the time of year is reported, and stocks are in better shape now. Following are present quotations:

	Net
Cast iron fittings	
Plugs	22½%
Bushings	25%
Unions ¼-in. to 2-in.	37½%
Do., ⅛ in., 2½ to 4 in.	25%
Dart Unions, blk., ¼ in. to 2 in.	20%
Do., ⅛ in., 2½ to 4 in.	8%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

Class A	0 70	0 80
Class B	0 24	0 84
Class C	0 16	00 24

Soldering Coppers Down Approximately 16 P. C.

Toronto.

SOLDERING COPPERS.—A decline of about 16 per cent. has been made in the price of soldering coppers, and the base are now quoted at 52 1-2 cents per pound.

Tool Prices Revised; Generally Lower

Toronto.

CARPENTER'S TOOLS. — As announced a short time ago in Hardware and Metal a revision of prices has been made on Stanley Rule and Level goods, and new prices to hand show that though many lines are reduced from 5 to 20 per cent., there are a few lines which bear slightly higher quotations. Stanley planes are generally about 5 per cent. lower.

Pick Prices Are Down One Dollar

Toronto.

CLAY PICKS.—New lower quotations are out on clay and rock picks and long cutter mattocks. The new prices are about $1 per dozen lower and are as follows:

Picks, Clay.—5 to 6 lbs., per dozen, $12; 6 to 7 lbs. $13;

Rock Picks—7 lbs., per doz., $12.50; 8 lbs., $12.75.

Mattocks—Cutter, doz., $13.25; pick, $13.25.

Pail Mop Wringers Are Higher

Toronto.

MOP WRINGERS ON PAILS.—Prices on these goods are slightly higher, and the quotations on the White line are 10 quart size, $3.75 each; 14 quart, $4.20; and 22 quart, $5.25.

Reduction of 50c Per Cwt. on Crow Bars

Toronto.

CROW BARS.—These goods have been reduced 50 cents per cwt. and the new quotation is $11.00 per 100 pounds.

Cotton Mop Cloths Show 20 P.C. Reduction

Toronto.

MOP CLOTHS.—There has been a decline in the price of American cotton mop cloths of about 20 per cent.

Cheaper Lines of Plated Cutlery Reduced

Toronto.

PLATED CUTLERY.—A reduction of about 5 per cent. has been made in the price of the cheap lines of nickel plated knives and forks.

English Grass Shears Will Be Higher

Toronto.

GRASS SHEARS.—Prices on English grass shears for spring delivery show an advance of about 25 per cent. over last year's quotations.

Decline of 13 P. C. On Copper Rivets

Toronto.

COPPER RIVETS.—A reduction of about 13 per cent. has been made in the price of copper rivets. Copper burrs separately are left unchanged. The new discount on rivets and rivets with the usual proportion of burrs is net list, in place of list plus 15 per cent. Copper burrs are still list plus 50 per cent. Net prices are as follows:

Burrs.—No. 7, 74 cents per lb.; No. 8, 75 cents; No. 10, 81 cents; No. 12, 87 cents.

Copper Rivets—No. 7, 49 cents per lb.; No. 8, 50 cents; No. 10, 54 cents; No. 12, 58 cents.

Rivets and Burrs.—No. 8, 56 cents per lb.; No. 10, 60 cents.

Amer. Ammunition Quoted At 22 1-2 Above List

Toronto.

AMERICAN AMMUNITION. — New lower quotations are made on American metallic ammunition, and the new discount is list plus 22 1-2 per cent. The old discount was 27 1-2 per cent. advance on American list, making the decline approximately 4 per cent.

No Changes Made In Oil or Gasoline

Toronto.

GASOLINE AND COAL OIL. — No change has been made in coal oil or gasoline quotations and 28 to 31 is asked for coal oil and 42 for motor grade gasoline. A fairly active demand is shown for both products.

Wire Products; A Decline Probable

Toronto.

WIRE PRODUCTS—Business is rather quiet on wire goods and products. Following the declines in raw materials and wire it is regarded as probable that there will be a revision of prices in wire products and lower quotations are said to be likely on many of these goods.

Daisy Barrel Churns Reduced in Price

Toronto.

BARREL CHURNS.—Reductions have been made in the price of Daisy barrel churns of approximately ten per cent., and the new quotations are: No. 0 and No. 1, $10.80; No. 2, $11.70; No. 3, $12.60; No. 4, $14.40.

Rope Sales Small; Prices Holding

Toronto.

ROPE.—This market is inactive with little business reported. No changes have been made in quotations which are as per current market pages.

Lower Prices Expected On Eavestrough

Toronto.

EAVESTROUGH AND CONDUCTOR PIPE.—Sales are small on these lines now, and business is quiet. New lower prices are stated to be in preparation on eavestrough and will be issued shortly.

Normal Activity In Lead Products

Toronto.

LEAD AND ZINC PRODUCTS.—No further changes are made this week on lead and zinc goods. Sales are moderately fair for the time of year. Lead has shown the biggest decline in price during the past year of any metal, although copper has reached a lower level compared with pre-war values. As an example it dropped from £53 a ton to £21 on English markets during the year, when the extreme range in prices previous to the war was from £3 to £7. On U.S. markets it ranged from $9.50 to $4.45 during the year. These figures show that pig lead is practically back at pre-war prices and further declines in primary markets are regarded as improbable. Quotations on products are the following:

Lead pipe, list, per lb.	0 13½
Lead waste pipe, list, per lb.	0 14½
Do., over 8 in., list, per lb.	0 15½
Lead pipe is subject to a discount of 10%	
Lead traps and bends	Net
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 10½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 36
Do., strictly, lb.	0 27
Do., commercial, lb.	0 25½
Do., guaranteed, lb.	0 29
Do., wiping, lb.	0 25
Zinc sheets, per lb.	0 18

Compression Goods May Be Revised

Toronto.

COMPRESSION GOODS.—The demand is smaller for these goods now, though there is a fair movement of the smaller lines. Several lines of valves

have been reduced in price recently, and it is reported that other revisions are likely in the near future. Many look for a downward trend on all brass plumbing goods, and it is noted that the largest manufacturers of these goods in the States have made a reduction on all their lines. Following are quotations on principal selling lines:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	28-30%
Flatway stop and waste cocks, standard	25%
Roundaway stop and waste cocks, standard	25%
Brass steam cocks, standard	add 10%
Globe, angle and check valves, standard	add 5%
J.M.T.	plus 10%
J.M.T. C.	Net
Gate or straightway	Net
Jenkins gate valve	7/10%
Standard gate	list plus 5%
Jenkins Globe	Net
Radiator valves, standard	23%

Off Season on Sheets; No Price Changes

Toronto.

SHEETS AND PLATES.—Trade is reported to be inactive in these goods at the present. Prices continue nominally the same, though some wholesalers are of opinion that there may be further slight recessions in sheet prices. Reports from the Pittsburgh district indicate that there is but little activity in the sheet mills and state that it is probable that less than one-third of the independent mills are running. English markets are reported to be weaker in galvanized sheets with little export business at present. Quotations here are the following:

PLATES

10 gauge	7 50	....
12 gauge	7 55	....
14 gauge	7 60	....
16 gauge	7 70	....

BLACK SHEETS

14 gauge	8 35	9 30
16 gauge	8 40	9 40
18-20 gauge	8 45	9 45
22-24 gauge	8 50	9 50
26 gauge	8 55	9 55
28 gauge	8 65	9 65

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	9 90	11 30	10 00	11 35
U.S. 28	9 50	10 90	9 60	11 05
U.S. 26	9 20	10 60	9 30	10 70
22 and 24	9 05	10 45	9 15	10 60
18 and 20	8 90	10 30	9 00	10 45
16	8 90	10 30	9 00	10 45
12 and 14	8 75	10 15	8 85	10 30

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Waste Materials; Dull and Declining

Toronto.

WASTE MATERIALS.—The market is reported dull again this week and lack of interest is keeping the volume of business down. The easy situation in iron and steel industry is causing consumers of scrap to expect lower prices and quotations are more or less nominal. Non-ferrous scrap has been very dull. Prices are inclined to lower levels on account of poor demand. The following are average prices:

WASTE MATERIAL

No. 2 busheling	....	$13 00
Stove plate, per ton	19 00	20 00
Yellow brass	6 00	7 00
Red Brass	....	10 00
No. 1 machinery cast	24 00	25 00
Heavy melting steel	15 00	16 00
Heavy copper	10 50	11 50
Heavy copper	0 11½	0 12½
Scrap zinc	4 00	4 50
Light brass	4 00	4 50

Bicycle tires	0 01	0 01½
Tea lead	2 00	2 25
Automobile tires	0 75	1 00

Little Change in Metals; Tin Appears Firm

Toronto.

INGOT METALS.—There is not much improvement in the demand for ingot metals, and it is not expected that there will be very much change before the end of the month. An advance of nearly nine cents in pound sterling exchange rates exercised a strong influence on different metals, and tin and copper were among those to be principally affected. Lead shows a considerably stronger tone in outside markets, but there is a reported shortage of supplies.

TIN.—A little firmer tone is noted in tin and the rise in sterling exchange is having its effect on the market. Business however is dull and stagnant. Quotations have advanced to 48 cents.

COPPER.—Unchanged, but a better feeling expresses this metal. In outside markets there is stated to be an improvement in demand and opinion in the trade is that the market has turned the corner. Quotations on casting copper are unchanged at 19 cents.

LEAD.—While a firmer tone is reported in outside markets, movement is slow and a scarcity of supplies is evident, especially in Eastern markets. Local prices are holding at $7.

SPELTER.—This metal is dull and unchanged, but London reports show an up trend. Quotations are unchanged here at $7.75.

ANTIMONY.—This is reported as dull and unchanged and quotations remain at 8 to 9 cents.

ALUMINUM.—American markets show a continued easiness in aluminum but very little buying. Prices are held here at 37 to 39 cents.

London Markets

LONDON, Ont., Jan. 13.—There are a number of price adjustments this week, and they are mostly in a downward direction. Bolts, nuts, tacks, clout nails, iron and copper rivets, ammunition, belting in canvas and rubber, fence hooks, garden hose, vacuum bottles and brooms are among the lines revised in price. Business in this district has been fair and that is all that can be said for it. The unseasonable weather combined with the fact that merchants generally are taking stock has had a quietening effect on trade. However, travellers are now resuming their trips and expect to be able to secure some good sorting orders. Collections continue good.

New Discounts on Bolts and Nuts

London, Ont.

BOLTS AND NUTS. — New lower prices are in effect on bolts and nuts. The new discounts are as follows:

Carriage Bolts, $1.00 list, ⅜-in. dia. and smaller, 6-in. and shorter, 15 per cent; longer lengths, net list; 7-16-in. and larger, net list.

Machine Bolts, ⅜-in. dia. and smaller, 4-in., and shorter, 30 per cent.; longer lengths, 5 per cent.; 7-16-in. diameter and larger, 5 per cent.

Sleigh Shoe Bolts, all sizes, net list.

Coach and Lag Screws, 20 per cent.

Square Head Blank Bolts, 5 per cent.

Bolt Ends, 5 per cent.

Plow Bolts, 1, 2, 3, heads, 15 per cent.; other, net extra, 20 per cent.

Elevator Bolts, large head, net list.

Elevator Bolts, corrugated heads, 30 per cent.

Fancy Head Bolts, net list.

Shaft Bolts ($3.00 list), net list.

Step Bolts, large head ($3 list), net list.

Whiffletree bolts, net list.

Nuts, 2-in. and smaller, square blank, add to list, $2.; tapped, add to list, $2.50.

Nuts, 2-in. and smaller, hexagon, blank, add to list, $2.25; tapped, add to list, $2.75.

Stove bolts, 57½ per cent.

Tire bolts, 40 per cent.

Iron Rivets and Burrs Discount Now 37½%

London, Ont.

IRON RIVETS AND BURRS. — A new lower price is quoted on iron rivets and burrs. The new discount is 37½ per cent. off list in place of 32½ per cent. The net prices on 5 pound packages, coppered rivets and burrs, assorted, is: No. 8, in ¼ lbs., assorted, $1.50; No. 8, ½ lbs., $1.38; No. 10, ½ lbs., $1.47.

Lower Quotations on Turpentine

London, Ont.

TURPENTINE. — Lower quotations are made this week on turpentine, and present price is 20 cents per gallon less.

1 barrel lots	1 35
2 to 4 barrel lots	1 34
5 gal. lots	1 50

Linseed Oil Prices Hold Unchanged

London, Ont.

LINSEED OIL. — No change has been made this week on linseed oil, and quotations are holding as follows. The demand is light:

1 to 2 bbls.	$1 17	$1 20
3 to 5 bbls.	1 16	1 19

6 to 9 bbls.	1 14	1 17

Less barrels, add 15c per gal.

Nail Demand Light; Wire Base, $5.75

London, Ont.

NAILS. — The demand for nails at present is light and sales are mainly of the sorting up variety. The base price of wire nails is $5.75 per keg.

Net Prices Figured on Ammunition

London, Ont.

DOMINION AMMUNITION. — The discount has been changed here on Dominion ammunition, and it is now quoted at 30 and 20 per cent. off list. This reduction is about 10 per cent. of the amount of the Luxury tax, and the net selling prices on some of the best selling lines are as follows, figured at 30 and 20 per cent. off list.

RIM FIRE.—22 B.B. caps, $3.92 per thousand; 22 short Lesmok, $5.60; 22 short smokeless, $6; 2 long Lesmok, $6.72; 22 long smokeless, $8.40; 22 long rifle Lesmok, $7.84; 22 long rifle smokeless, $10; 25 short black, $13.16; 25 long, black, $18.48; 32 short, black, $13.16; 32 long, black, $15.12; 38 short, black, $21; 38 long, black, $23.52.

CENTRE FIRE.—32 S. & W. black, $21.56 per thousand; 32 S. & W. smokeless, $23.52; 38 S. & W. black, $26.32; 38 S. & W. smokeless, $30.52; 25/20 black, $31.36; 25/20 smokeless, $39.20; 38/40, black, $37.25; 38/40 smokeless, $47.04; 25 Colt Auto, smokeless, $32.48; 32 Colt auto. smokeless, $35.28; 38 Colt Auto., smokeless, $50.96; 32/40, black, $57.40; 32/40, smokeless, $68.05; 38/55, black, $70.28; 38/55, smokeless, $85.12; 32 Winchester Special, smokeless, $80.92; 30/30 smokeless, $80.92; 303 Savage, $80.92; 303 Savage, smokeless, $80.92; 351 self loading smokeless, $68.05.

Crown Black Powder Shells, 12 ga., $43.96 per thousand.

Sovereign and Regal Smokeless Shells, 12 ga., $53.76 per thousand.

Rubber Belting Quoted at 40% Off

London, Ont.

RUBBER BELTING. — A new lower price is out on rubber belting, and it is now quoted at 40 per cent. off list, or a reduction of about 12½ per cent.

Canvas Belting Also Lower

London, Ont.

CANVAS BELTING.—A reduction has been made on canvas belting, and the discount is 50 per cent. off list. This is a decline of approximately 15 per cent.

Fence Hooks Are Down 40 Cents

London, Ont.

GALVANIZED FENCE HOOKS. — A decline of 40 cents per 100 pounds has been made in the price of fence hooks, and these are now quoted at $7.25 per 100 pound keg, and $8.25 per 100 pounds, in 25 pound boxes.

New Prices on Thermos Bottles

London, Ont.

THERMOS BOTTLES. — New lower prices are made on Thermos bottles and refills, and these now take 25 and 10 per cent. discount. The new list price on some of the best sellers is as follows:

	Each. List.
Pint bottle, No. 11	$2 50
Quart Bottles, No. 112	4 25
Pint Refills, 61C	1 50
Quart Refills, 61 Q.C.	2 75
Lunch Kits, No. 396	4 50
Lunch Kits, No. 400	4 50

Less 25/10%.

Lower Quotations For Tacks and Clout Nails

London, Ont.

TACKS AND CLOUT NAILS.—Reductions have been made in quotations on clout nails and tacks. New prices are 65 and 15 per cent. off list, and net prices figured at this discount on some of the better sellers are as below:

Clout Nails—	Blued, lb	Tinned, lb.
¾	0 28	0 32
½	0 24	0 27
⅝	0 28	0 26
¾	0 22	0 26
⅞	0 21	0 26
1 inch and longer	0 21	0 25

Tinned Carpet Tacks—6 oz., 67 cents dozen papers; 8-oz., 84 cents; 10-oz., $1.04.

Blued Carpet Tacks—6 oz., 75c doz.; 8 oz., 72c; 10 oz., 88c.

Cut Tacks—1 oz., 24 cents dozen papers; 1½, 31 cents; 2, 33 cents; 2½, 35 cents; 3, 38 cents; 4, 44 cents; 6, 64 cents; 8, 79 cents; 10, 92 cents; 12, $1.07; 14, $1.24; 16, $1.43; 18, $1.60; 20, $1.78.

Mop Wringers on Pails Are Advanced

London, Ont.

MOP WRINGERS.—Higher prices are being quoted for mop wringers on pails, and these are as follows: Domestic, $38.50 per dozen; Standard, $43.00 per dozen; Janitor, $53 per dozen.

Lower Prices For Garden Hose

London, Ont.

GARDEN HOSE.—New lower prices are now in effect on garden hose and following are the new quotations:

	½-in.	⅝-in.	¾-in.
No. 33 x 3 ply	0 11½	0 14	0 15½
No. 44 x 4 ply	0 13	0 16	0 17
No. 55 x 5 ply	0 15	0 17	0 19

Less 5% in full reels of about 500 feet.

Corrugated—½-in., 19 cents ft.; ⅝-in., 21½ cents; ¾-in.;, 25 cents; 1-in., 40 cents.

Corn Brooms Drop in Price

London, Ont.

BROOMS.—Lower quotations are being made on some makes of corn house brooms, making a reduction of about ten per cent. Prices per dozen are: No. 7, $8.75; Parlor, $7.50; No. 4, stained hardwood handle, $7.50; XX, hardwood handle, $6.75.

Expansion Bits Are Quoted Lower

London, Ont.

EXPANSION BITS.—Reductions have been made on expansion bits, and the small size is now quoted at $22.75 per dozen and the large size at $32.75.

Reduction In White Lead Prices

London, Ont.

WHITE LEAD IN OIL.—The price of white lead in oil has been reduced and quotations are as under. Sales are light at the present.

	Tons	Less tons
Pure, per 100 lbs.	16 95	17 30
Elephant, per 100 lbs.	17 15	17 80

Putty Remains Steady; Sales Smaller

London, Ont.

PUTTY.—There is but little demand for putty just now and sales are smaller. The price remains steady and quotations are unchanged as follows:

PUTTY—	Per 100 lbs.
Standard, 100-lb. drums	8 05
Do., 25-lb. drums	8 30
Pure, 100-lb. drums	10 55
Do., 25-lb. drums	10 80

Rope Is Dull; No Change

London, Ont.

ROPE.—Sales continue light in rope and no change in price has been made. Following are prevailing quotations:

Pure Manila, 29½ cents lb., base; Beaver Manila, 23 cents; New Zealand Hemp, 23 cents; Sisal, 21 cents.

Copper Rivets Are Reduced

London, Ont.

COPPER RIVETS.—Approximately 15 per cent. reduction has been made in the price of copper rivets. Copper rivets with or without burrs are quoted at net list. The burrs separately are quoted at list plus 50 per cent. as before.

Winnipeg Markets

WINNIPEG, Jan. 13.—Lower prices are recorded this week on wire nails, nuts, barbed wire, sheet metal, galvanized iron, screen wire cloth, beaver board, iron rivets and burrs, set screws, and cap screws. Carriage, machine, stove, elevator, plow, tire, and sleigh shoe bolts, have declined in price, also coach screws and cut nails. Machinery shafting, steam, and hot water boilers and radiators have dropped in price. Lower quotations are made, too, on wheelbarrows and road scrapers. Lower tendencies seem probable on many hardware lines, and there seems to be a desire to do all possible to encourage a bigger turnover.

Slight Reduction in Price of Beaver Board

Winnipeg.

BEAVER BOARD.—A slight reduction in the price of beaver board has been made this week and it is now selling for $53.50 per 1,000 feet in original bundles and $56.00 per 1,000 feet for less than original bundles.

Black & Galvanized Sheets Reduced $1.75 Per Cwt.

Winnipeg.

BLACK AND GALVANIZED SHEETS.—As predicted in the last issue of Hardware and Metal the price has dropped on black and galvanized sheets and it is quoted this week at $1.75 per hundred pounds lower. Following are the present prices.

Black Sheets	Per 100 lbs.	Galvanized Sheets	Per 100 lbs.
10 gauge	$8.80	16 gauge	$10.60
12 gauge	8.80	18 gauge	10.75
14 gauge	8.85	20 gauge	10.75
16 gauge	8.95	22 gauge	10.90
18 gauge	9.45	24 gauge	10.90
20 gauge	9.45	26 gauge	11.05
22 gauge	9.50	28 gauge	11.65
24 gauge	9.50		
26 gauge	9.55		

Drop in Price of Wire Nails

Winnipeg.

WIRE NAILS.—A lower price is quoted on wire nails this week and the base price at Winnipeg is now $6.95. Fort William price $6.30.

Wire Finishing Nails in 25-lb. Boxes Cost Less

Winnipeg.

FINISHING NAILS.—A lower price is quoted this week on wire finishing nails in 25 pound boxes. The following prices are the latest quotations.

1-in., $9.95 per 100 pounds. 1⅛-in, $9.95 per 100 pounds. 1¼-in, $9.60 per 100 pounds. 1½-in., $9.25 per 100 pounds.

Square and Hexagon Nuts Reduced in Price

Winnipeg.

NUTS.—Although the prices were revised last week and some of the changes were higher, the prices are all reduced this week and are as follows:

Square, Plain	Case lots	Less	Square, Plain Case lots	Less
¼	$17.00	$18.00	$19.50	$20.50
5-16	16.50	17.50	18.70	19.70
⅜	14.70	15.70	16.30	17.30

Barbed Wire Down 35c per 100 lbs.

Winnipeg.

BARB WIRE.— A reduction of 35 cents per 100 pounds has been made on the price of barb wire this week, and it is quoted at the following prices:

Lyman, 4 pt.—Winnipeg, $6 per 100 lbs.; Ft. William, $5.50.

Glidden—Winnipeg, $5.80 per 100 lbs.; Ft. William, $5.35.

Baker—Winnipeg, $5.70 per 100 lbs.; Ft. William, $5.25.

Fence Staples Down in Price

Winnipeg.

FENCE STAPLES.—The price for bright fence staples has been reduced this week, and they are now quoted at $7.20 per 100 pounds at Winnipeg, and $6.55 at Fort William.

Reduction in the Price of Screen Wire Cloth

Winnipeg.

SCREEN WIRE CLOTH.— A lower price is quoted this week for screen wire cloth and it is now being quoted at $3.50 per 100 square feet.

Lower Price on Lead Pipe and Lead Waste

Winnipeg.

LEAD AND WASTE PIPE—The price has been reduced this week on lead pipe and lead waste pipe, and they are quoted as follows: Lead pipe, $12.96 per 100 pounds, lead waste, $13.86 per 100 pounds.

Set Screws and Cap Screws Reduced in Price

Winnipeg.

SET AND CAP SCREWS.—A reduction was made this week in the price of set screws and cap screws and they are quoted as follows:

Set screws, 30 per cent. off list. Cap screws, sq. and hex., 15 per cent. off list.

Iron Rivets and Burrs Drop in Price

Winnipeg.

IRON RIVETS AND BURRS.— Reduced prices are quoted this week on different kinds of rivets and burrs and are as follows:

Carriage Rivets, 30% off list.
Wagon Box Rivets, 30% off list.
Section Rivets, 30% off list.
Hame Rivets, 30% off list.
Iron Burrs, 30% off list.
Tinners' Rivets—Black, 30% off list; tinned, 30% off list.

Bluestone Price Revised and Reduced

Winnipeg.

BLUESTONE.—The price for bluestone has been revised for 1921 and is reduced. The latest price is 11½ cents per pound.

Linseed Oil Prices Remain Firm

Winnipeg.

LINSEED OIL.— There is no change of price on linseed oil this week. Business has shown a slight improvement since travelling salesmen are on their territory. Raw linseed oil is now quoted at $1.27 per gallon with boiled at $1.30 per gallon for immediate shipments.

No Change in Turpentine

Winnipeg.

TURPENTINE.—Quotations on turpentine show no change this week and last report of $2.50 per gallon still prevails. The demand has shown a slight improvement.

Pittsburgh Markets

PITTSBURGH, Jan. 13.—Decrease in the production of steel ingots is taking place, and it is predicted that it will be late in March before there is likely to be a decided improvement in the buying of steel products. A point worth noting is that a quantity of the steel now being shipped is not being consumed. Stocks are accumulating and buyers will naturally not be in the market for further supplies until present stocks are reduced. Hence further decreases in production may be expected. Prices are being maintained largely for the reason that with little business there is small opportunity to cut prices, and a fairly steady market is probable for some time to come. There is little doubt eventually that prices will be reduced lower. As an example of values, merchant steel bars are at present 130 per cent. above prices of December, 1914. Briefly tabulated, billet steel prices are holding at Industrial Board levels; the only demand for plates is for railroads; the bar market is soft; rails are unchanged, with good inquiries; the sheet market is poor and tin plates are weak.

PITTSBURGH, January 13.—Production of steel ingots in December was at the rate of about 31,000,000 gross tons a year, this comparing with a rate of about 36,300,000 tons in November and an average rate during the first nine months of 1920, when demand was very heavy, but when there were very serious operating difficulties, of about 42,000,000 tons. The actual production in 1920 was 40,000,000 tons or a shade more.

Actual capacity of the industry, given

Readjustment---and the Paint Department

Movement of Union Painters to Lower Costs Is Stimulating Paint Business on Small Scale—Movement May Spread—Likelihood of Early Renewal of Building Activity Shows Importance of Hard-Ware Merchant Watching Local Developments Closely.

ONE of the ill effects of the readjustment period through which we are now passing has been so aggravated that definite action is about to be taken which should result in a considerable improvement in the demand for materials and labor in the lines so affected. One of the most important of these is paints. The condition, briefly, is this—Buying has fallen off to a considerable extent in the expectation of lower prices. Merchants with stocks on their shelves have taken less profits and cleared out stocks at replacement values, or in some cases, at less than that figure but mechanics' wages have been upheld by unions and unless independent action was taken this situation caused a deadlock because no business could be secured at the prices asked.

While this condition does not directly affect paint trade through the hardware stores, it has an effect indirectly in that painters' wages have remained at their peak, and owing to the fact that no concerted action on the part of the union of painters has been taken with a view to lowering the scale, there has been a deadlock and little work to be had. In this way it has affected paint sales to a great degree. It is in this connection that the announcement of union painters and decorators of Toronto to the effect that they are going after business direct and work at the union rate, which is 25 cents per hour less than the charge made by master painters, is of interest.

Business Follows Circular Distribution

This union distributed circulars throughout the residential sections of the city offering citizens the opportunity of having work done at cost. According to the secretary an excellent response has been made and it is the intention to put on an active canvass for business.

Speaking on this matter, E. H. Reeves, secretary of the union, states an offer is made to work at the union rate, which is seventy-five cents per hour. Because of limited capital, it is preferred that people purchase their own paints. The master painters now charge at least $1.00 per hour for labor, so a saving of 25 cents per hour is effected.

A Permanent Scheme

It is stated by the union officials that it is the intention to make the scheme, into which they were forced by conditions, a permanent one. Union painters and decorators were relying to some extent upon Government agencies for securing work, but were disappointed in the results and decided upon an independent line of action.

The cumulative effect of this plan is one of its strongest features. If it results in developing business for painters in this case, the plan may be adopted in othe centres, and one of the best ways to get big painting business under way is to make a start. One newly-painted house on a street will make the rest look shabby and is one of the quickest ways to get action from the other property owners. It is at least a plan which may start action earlier this year in painting than heretofore. Hardware merchants can watch closely any plan having this for its object.

Revival of Building

Plans for a revival of building on a large scale also seem to be taking more definite shape now. Discussing this matter with the head of one of Canada's largest banking institutions, Hardware and Metal was informed that a number of architects had advised clients during the past few months to hold up any building until the spring of 1921. Much of this building is expected to be commenced very shortly, and a mild winter in some localities will speed up such action.

Hence it is advisable that interest in the paint department be kept alive and plans made now for a bigger and better paint season than before. If building is done on a large scale this spring and summer there will be re-opened a valuable field of trade in paints for the hardware merchant, a field which he has been denied for a long time. He has developed good business without this source of trade and the paint department has found it necessary to take the best advantage of every opportunity. As pointed out by the official referred to, the potential demand for paint is great, it is a necessary line and the requirement of it has really not decreased. Therefore, when the demand takes definite shape it is likely to come with a rush.

Size Up Requirements in Each District

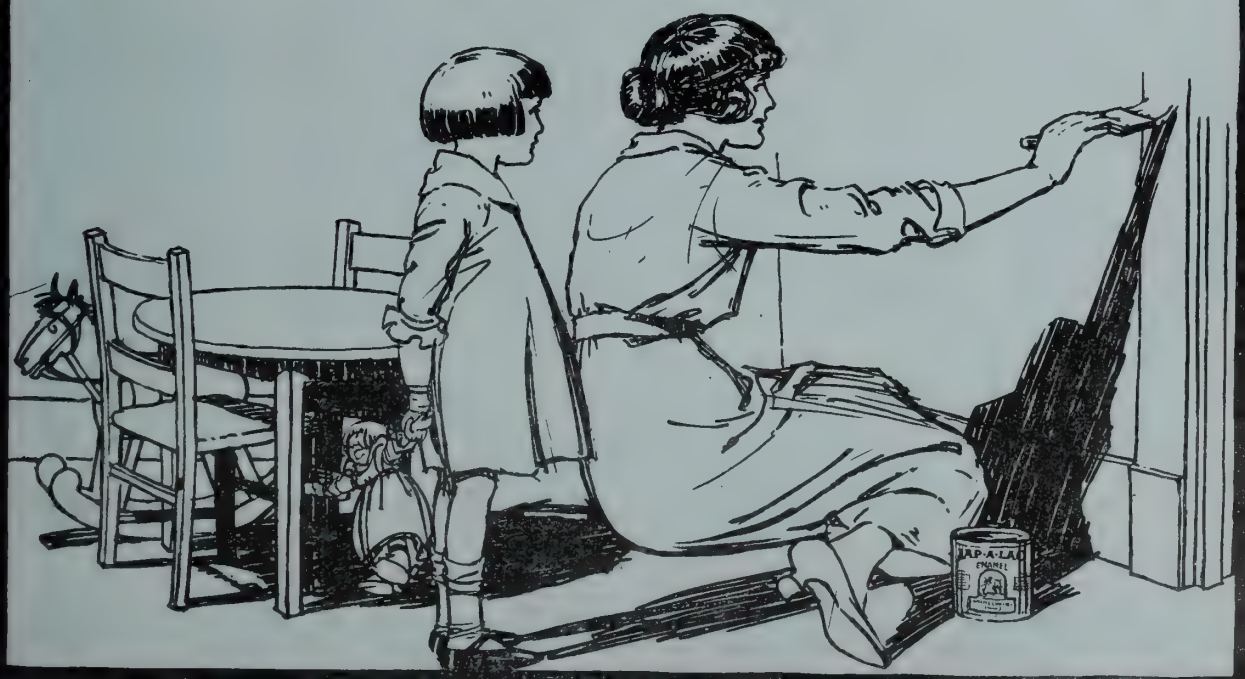
Hardware merchants can size up the requirements of their own district for paint, and enquiries made locally will establish the extent to which building may be done this season. This information should be sought out now, at the beginning of the new year, and plans made for the paint department accordingly. Many of the ideas for increasing paint turnover, as outlined in Hardware and Metal during the past year, can be adopted to advantage at the present time, and a survey of a number of these articles might be advisable when contemplating any such changes.

The advice of many in the trade is to keep an ear close to the ground for the first sign of developments locally, and be prepared to take full advantage of the return of building activity and better business conditions generally.

GLIDDEN

EVERYWHERE ON EVERYTHING

Why You Should Sell Jap-a-lac



First of all, because of the value it represents to your customers. They get more for every dollar spent in Jap-a-lac than in any other household finish. Customer satisfaction is, after all, your greatest asset.

It's because of this quality that the Jap-a-lac trade mark has become so familiar in the home. It represents *known value* the Dominion over — the name is familiar to buyers generally, and the product it represents is accepted readily wherever offered for sale. With this confidence already won, selling is made easy. Good profits and steady profits are assured.

Jap-a-lac reputation reflects itself in your entire business. It adds prestige that is of every-day value to you. If you are not yet carrying a complete line of Jap-a-lac write at once for dealer proposition.

Belgians Undersell British Glass Rivals in Canada

Twenty-five Wholesale Glass Merchants Object to Equalization of Tariff on Window and Plate Glass—British Glass Exporters Asked for Change

OTTAWA.—At a recent session of the Tariff Commission twenty-five firms of wholesale glass merchants presented, through N. L. Martin, Toronto, a memorial denouncing the recent proposal of one manufacturer for the equalization of the tariff on window and plate glass. In the case of ordinary window glass the suggested increase, raising the British preferential and general tariff rates from 7½ and 12½ per cent. respectively to 20 and 30 per cent. would have meant a 266.6 percentage of increase and in other lines the advance would have been very marked.

Patents New Process

The manufacturer referred to, has patented a new process of glass manufacture which bids fair to revolutionize the whole industry. The comparatively primitive methods in use in the glass trade can be replaced by machine production. It is claimed that one man can take care of the operating end of six of the new machines and that "from the time the raw materials are unloaded until the finished glass is cut into desired sizes at the end of the lehr, no human hand has had anything to do with its formation." This process, however, does not apply to making plate glass and until this process is extended to plate glass it was contended the increased duties would result in an increase in the cost "of every little shop window, of every mirror used in every home in Canada and of all furniture in which plate glass had a place."

British Exporters Asked for Change

The Canadian representative of Pilkington's, glass manufacturers of St. Helen's, England, also voiced his protest to the suggested changes.

The Pilkington firm some eight years ago established a plant at Thorold, Ontario, for the manufacture of window glass only. He pointed out that hitherto they have managed to exist with the present rates of protection, which are only 7½ per cent. against Britain but for window glass they would like to see them raised to 15 per cent.

They desire, however, no disturbance of the rates on the other types of glass which they import from the parent firm at St. Helens. Their manager brought up the question of the alteration of the policy of the customs department in regard to foreign exchanges and reduction involving them and contended that Mr. Wigmore's change of policy had simply wiped out the British preference.

In the glass trade the Belgians, with their infinitely greater depreciation of currency, are now able to undersell their British rivals here, and Pilkington's know it to their cost. Sir Henry informed the witness to his surprise that the change had been made at the direct request of British exporters, and added: "I thought myself they did not know what was good for them."

SUSPICIOUS "PAINT" LOST A FIFTH

London, Ont.—License Inspector J. E. Keenleyside seized a shipment of whiskey addressed to Exeter, Ont., valued at $2,000, as it was passing through this city. It was marked paint and was ostensibly shipped by a Montreal paint firm. Mr. Keenleyside had been tipped that a suspicious consignment of "paint" was on the way, but by the time it reached London one-fifth of it had mysteriously disappeared.

Banquet of McArthur Irwin, Ltd., Staff

MONTREAL.—The annual convention of managers and salesmen of the McArthur Irwin Ltd., manufacturers of Crown Diamond products, this week, was one of the most successful yet held.

The slogan adopted this year was "expansion by co-operation," and from the enthusiasm and optimism shown by all 1921 should go down as one of the big years in the history of the company. Practical demonstrations of the products were given by experts. These proved to be extremely interesting and constructive. They were staged in the most elaborate and complete manner, and with the exchange of ideas from the men information was garnered that will undoubtedly prove of great value throughout the coming year.

Mr. Parker, of Parker Irwin Ltd., and Mr. Davies, of Davies Irwin Ltd., were also present representing these two companies which are associated with the company of McArthur Irwin, Ltd.

Annual Banquet

A very enjoyable banquet was given for the staff of McArthur, Irwin, Ltd., at the Place Viger Hotel, in connection with the annual convention of the executive and sales force. A tasty dinner was provided and the arrangement of the menu provided much mirth. The articles of diet ranged all the way from "Puree of Paris Green" (soup) to "Planked White Lead with Linseed Sauce" and "Prussian Blue Point Oysters" (fish) to "Roast Pig Lead" and "Orange Shellac" (fruits) and "Walnut Var Stain" (nuts). The border of the menu consisted of a group of drawings humorously depicting some peculiarity of the various members of the staff. These provided many a laugh.

Following the banquet a musical program was given, with toasts to the King, our President, our Country, our Guests worked in between the numbers. F. A. Bengough rendered a solo, followed by a humorous selection by P. N. Soden. J. Irwin rendered a song and the Westmount Jazz Band was heard in an instrumental selection. A humorous song entitled, "I Think I'll Get Wed in the Summer," was given by M. W. Reynolds, followed by a flute solo by R. Mallette. A. J. Shepley completed the program with a song.

The keynote of the gathering was "Expansion by Co-operation," and optimism was expressed that 1921 would see substantial strides in that direction.

Mr. John Irwin, vice-president was master of ceremonies and awarded prizes, and the recipients were warmly applauded as in some instances they won in face of handicaps. The winners were first, E. C. Moonan, 246 Beaconsfield, Montreal; second, G. H. Charles, 31 Richmond St., E., Toronto; third, D. Rankin, 26 Victoria Park Ave., Toronto.

Spirit of Loyalty

One outstanding feature of this, as well as of all other McArthur Irwin gatherings, is decidedly noticeable, and that is the remarkable spirit of loyalty and good fellowship.

There is a certain sincerity in the open handed hospitality and what might be termed the "family" feeling which gives all McArthur Irwin gatherings an atmosphere which is much to be desired.

Among those present were the following:

J. Irwin, R. H. Monk, F. A. Bengough, G. Armstrong, A. J. Shepley, A. Lacroix, P. N. Soden, G. Dubois, A. Seguin, R. Mallette, R. Berry, J. Reid, W. P. Dickson, F. W. Nugent, J. A. Trempe, J. Geo. Marier, Wm. Reynolds, E. Nadon, R. B. Bremner, C. F. Richardson, R. J. Sheppard, J. C. Yaffey, J. Shipton, T. Shipton, G. Body, Geo. Davies, A. H. Illsey, D. S. Blaikie, A. W. Poole, J. P. Davies, H. C. Parker, L. Mould, R. W. Smith.

Chatham Merchants Elect Officers

Chatham.—W. J. Easton was unanimously re-elected president of the Retail Merchants' Association at their annual meeting in the Chamber of Commerce Forum. Other officers unanimously elected were: Erne White, vice-president; Bert F. Brown, secretary, and James E. Gray, treasurer.

Sends Paint Message on Blotters

A. H. Bedard Finds Blotters for Enclosure in Letters Good Way of "Breaking New Ground" in Selling Paints and Specialties

WHENEVER he desires to "break new ground," A. H. Bedard, hardware merchant, 392 Victoria avenue, Westmount, Montreal, has adopted the plan of using a small blotter which will fit the ordinary business envelope. This plan he has extended to the paint and varnish department with good success. The blotter bears a pointed message and is illustrated with a neat and effective cut. Its value, according to Mr. Bedard, lies largely in the fact that the message goes right where it will make the most impression. A selected mailing list of good paint prospects is used for the purpose.

Emphasize One Argument on Each

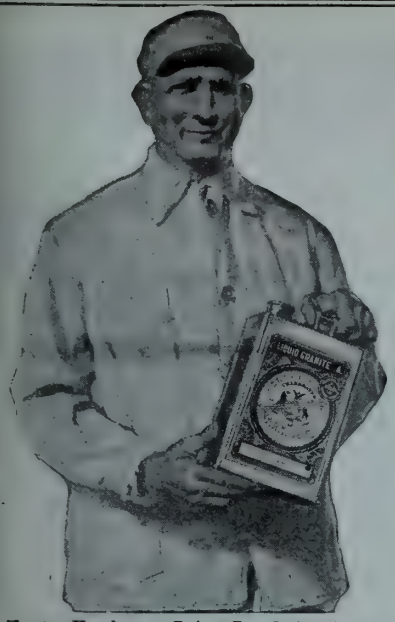
A somple of the messages given on these blotters is shown herewith. Some recognized argument in connection with the sale of paint can be emphasized or some new angle given which will tend to bring more direct action. The message shown herewith has to do with the preservation of lumber owing to its high cost and points out that paint is cheap insurance against weather and depreciation of buildings.

Close Personal Interest in Customers

Close personal interest in each case and the explaining of all details in connection with the use of the article purchased is said to be one of the foremost business building plans adopted by this store. This factor applies in large measure to sales of paints and specialties. It is recognized by Mr. Bedard and his salesmen that if a customer through ignorance makes the wrong application of the article purchased and therefore does not secure the results claimed for the article, dissatisfaction will result and such a condition injures all in the trade. As pointed out by Mr. Bedard to Hardware and Metal, it is therefore a wise plan to give the customer all available information in connection with the use of such a line as paint in order that it may be used rightly, give the desired result, and bring the customer back to the store for future requirements.

A pointed message emphasizing some argument for paint sales, such as this, is used on a blotter in size to fit an ordinary business envelope, by A. H. Bedard, hardware merchant, Montreal. Mr. Bedard states that this plan is a big help in "breaking new ground."

Expect Early Improvement in Demand for Turpentine



THE sentiment has grown in naval stores trade circles that the new year will not have progressed far before there will be a noticeable improvement in demand, not through large orders but through a great number of moderate orders from unsupplied consumers who must buy to carry on operations, says the Naval Stores Review, Savannah, Go. This is the opinion also of visitors from other sections who are conversant with the situation and the industries using turpentine and rosins. The policy of buying from hand to mouth is expected to continue, holding down individual orders to as small proportions as needs will permit, but as the greater number of consumers have allowed themselves to run well out of supplies a multiplicity of small orders should do much to relieve the situation. Some distress stuff still finds its way to market at discouragingly low prices but the quantity of such stuff is rapidly diminishing and the period of forced sales of this character is rapidly drawing to a close. With diminished production ahead for 1921 the position of supplies is expected to become stronger from now on, but it must not be lost sight of that the consuming world must be convinced that this decrease in crop is to be an actual fact before it will be encouraged into a more liberal policy as to purchases.

Big Building Rush in London

London, Ont.—The greatest rush of building that has ever been known will mark the opening of spring in London. In addition to a large number of the better class of residences tenders will be called shortly for larger work, including a new $650,000 collegiate; Sick Children's Hospital, to cost $250,000; factory for the Rawleigh Products Co., $200,000 addition to Bethseda Hospital $85,000; new east end Salvation Army hall, $25,000; new Children's Shelter in South London, $25,000; addition to factory of the London Concrete Machinery Co., $25,000, and a new $50,000 church for the Christian Church congregation. Tenders will be called in March for three new buildings for the Western University, to cost $1,000,000. The contract has just been awarded to the Frid Construction Co., Hamilton, for the new million dollar hotel and the old buildings on the site are being wrecked. John Hayman & Sons have plans for a new block of apartments to cost $75,000.

Ask Special Tariff for Galvanized Iron and Steel Sheets for Culverts

Ottawa.—R. W. Gladstone, on behalf of the Canadian Iron Ingot Co., which has factories at Guelph and three other places and makes galvanized corrugated pipe used for culverts on roads, appeared before the Tariff Commission and presented a case on the special galvanized sheets which are his firm's raw material, but are not manufactured in Canada, there is a duty today of 12½ per cent. under an old and unsatisfactory classification. Materials used for gas and water pipes in the city pay only 5 per cent. duty, and here material used for the benefit of the rural communities has to bear a levy of 12½ per cent. To abolish this unjust discrimination, Mr. Gladstone urged that a new specific tariff item should be created for "heavy galvanized iron or steel sheets for culverts used for building public roads." The commission promised all consideration to his request.

The Luxeberry Painter Says:

"Beautiful homes are made from the inside out and not from the outside in. The outside of the house is the casket, the jewel is inside, and it is the painter who creates it with the aid of the right finishes. I always use Berry Brothers' Finishes because with them I can depend upon producing results that please me and satisfy my customer. I made a notable failure or two with other finishes, but it will never occur again."

The year-in-year-out uniform quality of Berry products has established a nation-wide demand for them that is always growing.

Weekly Paint Markets

Montreal

MONTREAL, January 13th.—The feature of this week's market report is the reduction on white lead in oil. This comes at a very opportune time, as spring demands will soon be moving, and no doubt the new price will assist the movement.

Linseed oil and turpentine remain unchanged for this week. Little business is offering on these lines at present. Putty also remains very quiet.

White Lead in Oil Reduced in Price

Montreal.

WHITE LEAD IN OIL.—A reduction is quoted of $1.25 per 100 pounds. on white lead in oil this week. The recent decline in pig lead and linseed oil is no doubt accountable for the above reduction. Stocks of white lead in oil are quite heavy in the hands of corroders and it is possible the sacrifice has been made on present stocks to enable them to meet the present day situation. Prices are likely to remain firm for some time now, as pig lead has been advanced over former low level.

Quotations are as follows, $16.00 per 100 pounds in five ton lots, $16.50 in one ton lots, and $16.85 for less than ton lots.

Putty Prices Unchanged; Sales Small

Montreal.

PUTTY.—Previous quotations still hold for putty. There is little business offering at this time, but now that travellers are again on the road, it is thought the demand will be somewhat heavier. Quotations are as follows:

Commercial Putty	5 tons	1 ton	ton
Bulk barrels, 800 lbs.	$6 00	$6 25	$6 60
Bulk drums, 100 lbs.	7 00	7 25	7 60
Do., or tins, loose, 25 lbs.	7 25	7 50	7 85
Bulk tins, cased 25 lbs.....	8 00	8 25	8 60
Bulk drums or tins, loose 12½ lbs.	7 50	7 75	8 10
Bulk tins, cased 12½ lbs...	8 25	8 50	8 85
Bladder barrels, 400 lbs. ..	8 25	8 50	8 85
Do., cases, 100 lbs.	8 50	8 75	9 40
Tins, 1 lb.	10 60	10 85	11 20

Standard Putty, 10c per 100 lbs. advance over above prices.

Pure Linseed Oil Putty, $2.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

No Change Reported in Linseed Oil

Montreal.

LINSEED OIL.—The market on linseed oil is reported a little firmer, with a steady movement being experienced. Although a lower price has been looked for, when the large Argentine Republic crop was considered, prices remain unchanged for this week.

1 to 4 barrels	1 15	1 16
5 to 10 barrels	1 14	1 15

Turpentine Shows No Change

Montreal.

TURPENTINE. No new developments have taken place in turpentine and previous quotation still holds. The demand is also light on this product, however, this is only considered seasonable, and a better movement is expected in a week.

Turpentine—	Imp. Gal.	
Single barrels	1 33	1 48
Small lots	1 43	1 58
(Packages extra.)		

Toronto

TORONTO, Jan. 13.—The chief feature of the week is the reduction of $1.25 per cwt. in white lead prices. This change takes effect from January 10th, and makes a decline of about 17½ per cent. from last season prices, the previous change having been made about six weeks since. Business is reported to be quiet yet in paint and varnish lines, although a fair quantity of sales are stated to have come to hand considering.

No alterations have been made in quotations on putty or varnish.

Business is very quiet in turpentine and linseed oil. On Savannah markets there is but little movement of turpentine or resin and stocks are much heavier than this time last year.

Good crops of flaxseed in different countries should ensure a sufficiency of oil at lower prices than was possible during 1920. In another week it will be easier to estimate how the orders are coming in for spring business in paint and varnish.

Paints and Varnishes Slow Without Change

Toronto.

PREPARED PAINTS. — Travellers are on their rounds again this week, but it is a little early yet to judge how spring business is coming in. In another week or so it will be possible to tell whether retailers are placing their orders for spring requirements as freely as usual. Prices are guaranteed until the first of July, and it is stated that the reduction this week on white lead will not affect paint prices. Although our markets do not follow American markets, it is interesting to note that varnish prices over there have been reduced recently.

White Lead in Oil Drops $1.25 Per Cwt.

Toronto.

WHITE LEAD IN OIL. — Effective January 10th, a reduction of $1.25 per 100 pounds has been made in price of white lead in oil. This is the second decline in about six weeks, the last change taking place late in November, when it was reduced $2.25 per cwt. These reductions have been expected on account of the lower quotations on pig lead and linseed oil.

The demand has been small of late in this commodity, but this is a dull time of the year, with many merchants taking inventories.

The new quotations for standard pure in ton lots is $16.95, and in less than tons $17.30 per 100 lbs. Prices are as per current market pages.

Turpentine Is Slow And Unchanged

Toronto.

TURPENTINE. — No new developtine at Savannah and elsewhere are reported to be much heavier this year than last and with very little present demand. The production is 30 per cent. higher, and there is a feeling in the trade that lower prices will rule than the present quotations. The demand is exceptionally light in local markets and prices are unchanged, as follows:

Turpentine—	Per Imp. Gal.
1 barrell lots	1 35
2 to 4 barrel lots	1 34
5 gal. lots	1 50

Linseed Oil Slightly Lower Again

Toronto.

LINSEED OIL. — Very little oil is moving, but a slight reduction has been made this week in quotations, and the price is 7 cents below last week's. Wholesalers state that the demand is small and sales are light at present. There should be a better demand for oil within a short while now. Prices are the following:

1 to 2 barrels, gal	1 10	1 13
3 to 5 barrels, gal	1 09	1 12
6 to 9 barrels, gal.	1 07	1 10

If interested tear out this page and place with letters to be answered.

Rosin Holds Unchanged; Fair Stocks

Toronto.

ROSIN. — Very little change is in evidence in rosin, but the tendency is towards lower quotations. Stocks are heavier, production was greater and the demand is lighter, with export less than usual. Germany used to be one of the biggest buyers of rosin, but chiefly on account of exchange rates and financial difficulties this market has been a closed one to U. S. exporters of rosin and has not been resumed since the war.

Window Glass Is Quiet and Steady

Toronto.

WINDOW GLASS. — Trade is quiet in glass, and there is little to be said at present. Prices are holding steady and no changes are expected. Travellers are starting out again, but there will not be much activity in this line for a few weeks, it is thought. Present discounts are nominally 30 per cent. off list for case lots.

Putty Quotations Are Holding

Toronto.

PUTTY. — Business is quieter in this line, and no changes have been made in quotations. On account of stocktaking, sales are usually small and of the sorting-up variety. Present quotations are as follows and are unchanged:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	8 05
Do., 25-lb. irons	8 30
Do., bladders in bbls.	9 30
Do., less quantities	9 55
Pure, in 100-lb. drums	10 55
Do., 25-lb. irons	10 80
Do., bladders in bbls.	11 80

PITTSBURGH MARKETS

(Continued from page 57

reasonably favorable working conditions, such as always obtained prior to November, 1916, but which have been very rare since then, is about 52,500,000 tons or about 22,500,000 tons for the Steel Corporation and 30,000,000 tons for the independents. The mills did not operate in December in these proportions by any means, as the Steel Corporation still had good order books and indeed increased its operations slightly, by reason of having greater supplies of coke, while the independents had almost run out of orders. The corporation operated in December at about 92 per cent. of capacity and the independents at about one-third capacity. As nearly as can be estimated, in December the Corporation produced ingots at the rate of about 21,000,000 tons a year, while the independents produced at the rate of about 10,000,000 tons. Independent mill operations have been declining continuously and thus are now at a materially lower rate than the average of December, probably between 20 and 25 per cent. of capacity or at 6,000,000 to 7,500,000 tons a year.

The greatly different positions of the Steel Corporation and independents is shown in another way by the record of blast furnaces. In December independent steel works and merchant furnace interests blew out 55 blast furnaces and blew in none, while the Steel Corporation blew out only one, and blew in five.

Production Prospects

At the present moment steel ingots are being produced at the rate of about 28,000,000 tons a year. Of course, one would like to see prospects of the rate of production beginning to increase at once, but obviously that cannot be expected. In the first place, buying is very light, indeed, while from day to day old business is being completed. In the second place, a rate of 28,000,000 tons is precisely two-thirds of the 42,000,000 ton rate that obtained during the first nine months of 1920. Nobody can be so ignorant of general conditions existing, as compared with those in the major part of last year, to believe that the rate of steel consumption is decreased by only one-third. Finally, it is known that some of the steel now being shipped to dealers and consumers, and being accepted willingly by them, is not being consumed. The steel is accumulating. Obviously these buyers will not, for any length of time, continue to accept more steel than they are consuming.

Hence further decreases in production of steel may be expected. The question is when increased buying will have proceeded far enough to take up the slack and convert decreasing production into increasing production. In well posted and conservative quarters it is confidently predicted that there will be a decided improvement in buying of steel products some time in March, more likely in the second half of the month. It may not be until some time afterwards that the rate of steel production will be back to the present rate, but it would not require much to put the industry in better shape than it is in at present.

Steel prices may be described as being well maintained, but that is really not saying much since so little business is moving that there is scarcely any opportunity to cut prices. It may be said, however, that most mills are altogether averse to cutting prices. It was one thing for the independents to reduce their prices to the Steel Corporation level. It would be another thing altogether for them to cut the Steel Corporation prices. The independents would of course like to operate their plants in full, but there is no chance of their being able to do any such thing for the present. A good way to put in the time is to reduce production costs, and a period of idleness is not altogether objectionable, having some advantages. Undoubtedly there will be competition between some of the smaller mills, resulting in price cutting, but there will be none of this on the part of the Steel Corporation or several of the large independents.

A fairly steady market, therefore, is to be expected for some time to come, perhaps for only a few weeks, perhaps for several months. Eventually, without doubt, prices will be lower. Some manufacturers virtually admit this. Others do not, but that is presumably from policy or habit. There is ample proof that steel prices will be lower. As noted above, production during the first nine months of 1920 was at the rate of about 42,000,000 tons of ingots a year, and that was only 80 per cent. of capacity. A greater output could not be realized because there were physical difficulties in the way, the chief of which was shortage of fuel. Thus to employ the full capacity consumption would have to be one-fourth greater. It cannot be argued that physical disability will stand in the way, for when industry becomes active again it is going to be on an efficient basis. There will not be a full demand unless everything is functioning smoothly. It is a settled fact in the present readjustment that in future all industries will have to be content with moderate profits. When the Steel Corporation operated at well under capacity in 1920 it reported large profits, and practically everyone is convinced that the accounting methods were so conservative that the profits were really larger than were reported. Accordingly, very large profits would be yielded on present prices with full operation and with the reduction in costs from the present level that is now regarded as certain. Hence selling prices will be lower, but they will hardly be lower until costs have been reduced and until there is prospect for a moderately full operation of industry. Merchant steel bars, the most prominent product of the steel industry, averaged 1.40c in the ten years 1904 to 1913 and were down to a minimum of 1.05c in December, 1914. The war control price was 2.90c and the present price, that of the Industrial Board and of the Steel Corporation, is 2.35c. According to whether the reduction in costs is mild or drastic, and the wait for large orders to be offered is short or long, the steel bar market will probably turn on either about 2.00c or 1.80c. Of course, definite predictions as to actual quotations cannot be made, and figures are mentioned here merely to assign a definite measure to the estimate of the forces that will be at work.

New Machine for Northern Bolt, Screw and Wire Co.

Owen Sound, Ont.—The Northern Bolt, Screw & Wire Co. is installing a machine for the production of flat bright cold rolled steel. It is said to be the only one of its kind in Canada, and was constructed by the Corbett Foundry & Machine Co., of Owen Sound, especially for the company.

Successful C. P. INSECTICIDES are

(Dry and Paste)
ARSENATE of LIME

C.P. Insecticides

For Efficient Spraying

The vast majority of farmers and fruit growers are convinced of the necessity of spraying as a means of producing full crops of prime quality.

But as results in this regard are determined by the quality of the spray it is very important for dealers to stock and recommend insecticides which actual tests have proven to be entirely satisfactory.

A stock of Canada Paint Insecticides will enable you to meet your customers' every spraying requirement. Economical and easy to apply, they furnish maximum poisoning strength and killing power, controlling the insect pest effectively without the least injury to foliage or fruit.

When you're stocked with C. P. Insecticides your selling efforts will be backed by a vigorous consumer advertising campaign which will direct the local insecticide demand to your store.

May we send you full particulars, prices, etc.?

"Save the Surface and you save all" *Paint & Varnish*

Registered Floglaze

"The finish that endures"

A Bigger Proposition Than Ever

Universally adapted to every domestic surface, which creates bigger opportunities for sales.

Concentrated in number of shades to keep the dealer's investment of capital and shelf at minimum.

Permits larger turnover on smaller capital with greater profit.

Seven Big Lines:---

Floglaze For Home and Farm
Floglaze Lac Shades
Floglaze Art Shades
Floglaze Auto Finishes
Floglaze Porch and Veranda
Floglaze Exterior Surfaces
Floglaze Velvet Finishes

Maple Syrup Cans

"SUGARING" time will soon be here and merchants will do well to stock up on these lines in order to meet the demand for the season's trade.

Supplementing our representative stock of Sap Spouts and Buckets, we offer you two very satisfactory Syrup Cans.

Both shapes illustrated have strong handles and screw tops made of plain tin.

We can give you prices on application.

In these, as in all the other lines we make, the name "Davidson" denotes the better article.

Your correspondence is invited.

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

NEW STOPGLARE LENS

Mr. MOTORIST and DEALER:

Only about 10% of the Non-glare lenses on the Canadian market to-day are Canadian-made, the remainder being American make, carrying a duty of 22½%, plus an adverse exchange of about 17%.

This is why **NEW STOPGLARE LENS** sell for only $2.00 per pair as against prices ranging from $3.00 to $6.50 per pair, for American lenses.

You owe an obligation to Canadian industry because **NEW STOPGLARE LENS** passed the Government test, with the highest rating of candle power given.

Are the cheapest Lens on the market to-day, both for the Dealer and the Consumer.

Are the only lens giving the option of three colors, namely: Amber, Green and Violet.

Help the Canadian dollar regain its par value across the line.

Encourage Canadian industry.

REMEMBER.—You cannot get your 1921 license until you have got NEW STOPGLARE LENS or an approved lens.

BUY NEW STOPGLARE LENS.

All sizes. All colors. $2.00 per pair.

Good Proposition to Dealers.

Sole Manufacturers

Ontario Plate Glass Limited

Hamilton, Ont.

Unusual Selling Points

Carbalox is a product of the electric furnace so fast and cool cutting as to be particularly adapted to the rapid cutting and polishing of metals.

Being available in handy rolls, it reduces cost of production because the workman, keeping a roll at hand, uses as desired without waste or loss of time in cutting.

REGISTERED TRADE MARK

Economy *Durability*

Barn Paint

Permanence *Spreading*

"Save the surface and you save all" *Paint & Varnish*

The Four Cardinal Points

of the many selling features of **STEPHENS** Barn Paint are shown above. The farmer to-day is not only painting to save the material but he wants his buildings to reflect credit on him.

The modern farmer is efficient and successful, and determined to have his buildings look efficient. He wants **STEPHENS** Barn Paint because it is reasonable in cost, durable under weather attacks, permanent in color and spreads easily, covering well. It stamps the barn owner as an alert, progressive farmer. There are many other selling points that help to close your sales.

An agency will pay you—Ask about it.

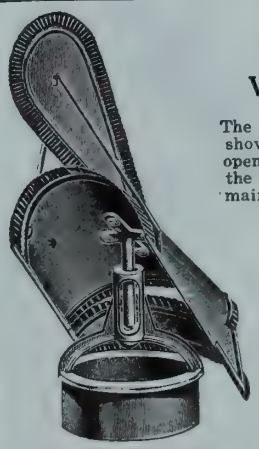
TRIMO

The four good points that make TRIMO PIPE WRENCHES superior are the SPIRAL SPRING always in place, STEEL FRAMES that will not break, NUT GUARDS that protect adjustment nut and the INSERTED JAW in handle that can be replaced when worn.



The Trimo Steel Handle Pipe Wrench is also made in the 6", 8" and 10" size with narrow jaws and fine milled teeth, especially adapted for close work.

Your Jobber can Supply

Trimont Mfg. Company

Roxbury (Boston), Mass., U.S.A.

O-Rib-O

Volcano Chimney Top

The Deflector — the lower slanting part shown — receives wind through the sloped opening, directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys, and closes sales with a bang. Homes, stores, churches, factories are all your prospects.

Order to-day.

CURLING STONE Headquarters

Mac's Special

Specially designed for us to suit our hard, keen ice. The weight is distributed in such a way as to give the running surface sufficient grip to hold whatever turn may be given, without any tendency to rock or roll.

Kay's Excelsior

Manufactured by Andrew Kay & Co., this stone has a world-wide reputation. An absolutely first-class stone that has given satisfaction wherever the game is played.

It gives the service and saves the surface.

We hereby guarantee Diamond "A" absolutely Pure House Paint to be made entirely of Pure White Lead, Pure Oxide of Zinc (except such shades as do not contain lead and zinc), Pure Coloring Materials, Pure Linseed Oil, Pure Turpentine Dryer and nothing else, and is sold subject to chemical analysis.

Kyanize Motor Car Enamels are easy to apply, dry hard in a short time, with a beautiful lustre that lasts. Made by the celebrated Kyanize Process, they color and varnish in one operation. Nine beautiful, permanent colors, also a rich, lustrous black.

Kyanize will make your floors and furniture look like new, and a cloth with warm water will keep them looking spick and span. Kyanize is the most durable finish ever made. Can be supplied in clear and eight popular colors.

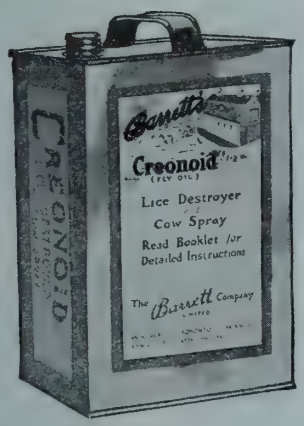
Barrett Roofings, Cements Industrial Paints etc.



Everlastic "Rubber" Roofing

Everlastic Liquid Roofing Cement

Everjet Elastic Carbon Paint

Plastic Elastigum Patching Cement

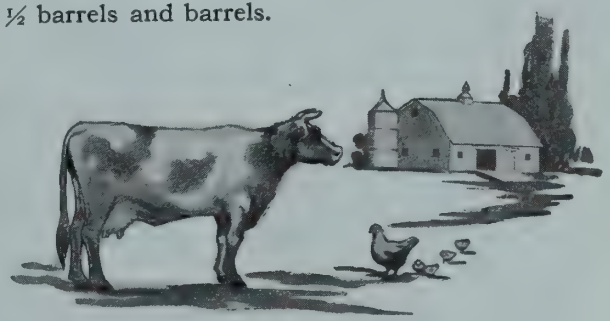
ONE of the most popular of the Barrett Products is Creonoid (Fly Oil) Lice Destroyer and Cow Spray. Farmers throughout the entire Dominion use vast quantities of this product during the fly season. Our plans include an intensive advertising campaign directed to the farmers during the time when the fly pest is prevalent. Be ready to cash in on this demand which will be created for you.

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

"I SAVE from $30 to $50 per month by the use of Creonoid," writes a farmer. "By its use night and morning, my cows have practically 24 hours of peace and comfort . . . I have used Creonoid for more than a year in my dairy, and I find it so superior to all other 'fly dope' that there is no comparison."

That is but one instance among thousands, where Creonoid has increased the milk yield. Experts say that cows give 25% more milk, when freed from the fly nuisance.

Creonoid is a very inexpensive and wonderfully effective fly-spray for horses and all live stock.



It is easy to apply. After its use cows will stand still at milking time, and should show an increase in weight and milk yield.

Creonoid will pay for itself many times over through increased farm profits.

Creonoid means more milk per cow, more eggs per hen, more pounds per hog.

Creonoid comes all ready for use. It requires no mixing or thinning.

It is put up in exceptionally attractive lithographed cans in the following sizes: 1-gallcn cans (12 to the case), 5-gallon cans, ½ barrels and barrels.

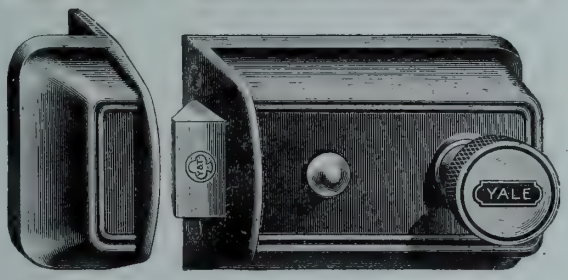
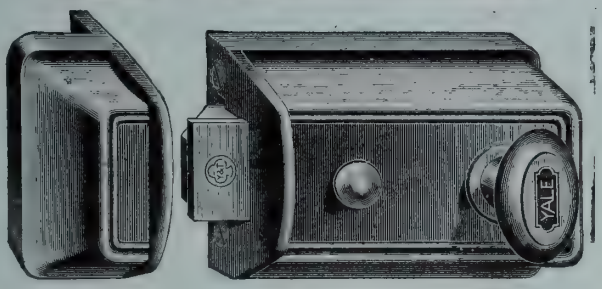
YALE

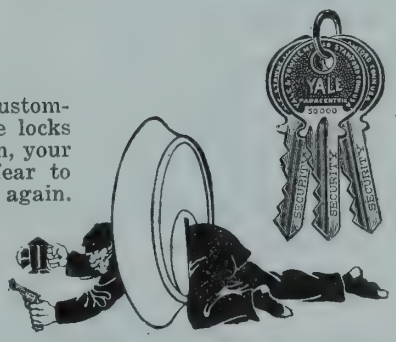


Night Latches



No. 042—Jap'd Iron Case, 2½ x 3⅝ in., bronze cylinder; 3 Paracentric keys with each lock.

No. 42—Old Copper Finish Case, bronze cylinder, size 2⅜ x 3½ in., all screws that attach this latch to door are concealed; 3 keys with each lock.



No. 44—Old Copper-plated Finish Case, 2⅜ x 3½ in., thick bronze bolts. A slide in front of bolt dead locks the latch, which can be retracted only by the key or knob. 3 keys with each lock.

"A little learning is a dangerous thing." To know that Yale locks are safest is not enough, unless you know that all cylinder locks with flat keys are not Yale. The genuine is marked "Yale."

If you supply customers with insecure locks and thieves get in, your customers will fear to trade with you again. Why chance it?

"YANKEE" TOOLS

PUSH DRILL No. 44

Saves Time at Every Turn

Here you have a rapid fire drill, with adjustable tension for hard or soft woods and the 8 different size Drill Points furnished with it.

A turn of the cap does the trick that saves time, labor and Drill Points. This drill is about as valuable to the average mechanic as any "Yankee" Tool we make. Built for hard service.

Your Jobber Can Supply

NORTH BROS. MFG. CO.
PHILADELPHIA, PA.

WILLIAMS' STILLSON

Drop-Forged Pipe Wrenches

are specified whenever a tool of uncommon strength and service is desired.

Their positive grip (no slipping), their ready release (no crushing or locking), their drop-forged, hardened and tempered bar and jaw (no breaking), their unconditional guarantee (no risk), are all good selling points.

Wrenches that are specified are wrenches that sell. Sell Williams'. Ten sizes, 6 to 48 inches.

J. H. WILLIAMS & CO.

LIMITED

TRADE M MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but, for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

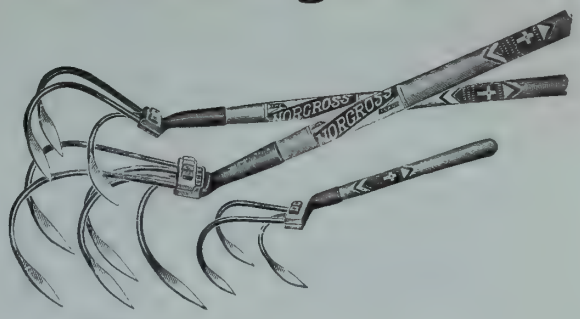
TANKS

Gasoline Tanks
For Underground Storage

Made of the finest copper steel procurable, welded and then painted on the outside with Anti-Rust, Acid-Proof black paint, these tanks are practically rust and corrosion proof. For handling gasoline only the very best is safe. The thorough test all our tanks undergo before leaving our factory is a guarantee of their reliability. The prices are most reasonable.

Oil and Gasoline Tanks

Here's a tank made of copper-steel with handy screw cap opening at top for filling and faucet in side near bottom for drawing off contents. Another reliable tank at a moderate price. These tanks have been giving satisfactory service wherever sold.



Your money back if not satisfied

Write us for prices and send us addresses of possible customers to whom we can send literature direct for you. We also manufacture baths, dairy equipment, sanitary closets, etc.

The Steel Trough & Machine Co., Ltd.

TWEED, ONTARIO, CANADA

Three Big Sellers

Norcross *Garden Cultivators*

Gardeners—Farmers—Florists—people in towns with the smallest gardens—all have use for a **Norcross** Garden Cultivator or Weeder.

There is a steady demand for them from the time gardening starts, until the last weed has disappeared and cultivation is completed.

Selling a **Norcross**—is selling Quality, Service, and Satisfaction to a customer, at a moderate cost and an attractive profit.

Three sizes—all strongly made and handsomely finished.

Place one alongside an old-fashioned hoe and **watch it sell.**

Dependable MOSCO Products

Improved Bemus Ball Contact Timer for Fords

Easier Starting--Smoother Running--Longer Life--Saves Coil Points

The IDEAL TIMER because form of contact is the only one which is correct both electrically and mechanically. This is made by a hardened tool-steel brush coming in contact with steel balls which are kept in proper position by means of a spring with plug on the end pressing against them. The impact of the brush causes the balls to turn so that a fresh surface is presented for each contact. The brush comes in contact only with the four balls, touching no fibre or insulation. The balls are so located that each has a track of its own on the brush, this insuring a maximum amount of wear.

Mosco Products Are Carried By All Leading Canadian Jobbers.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

CROWBARS

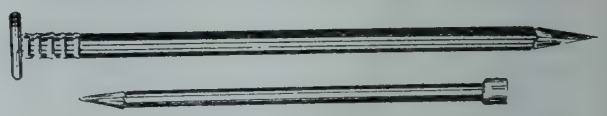
No. 102-A—CHISEL POINT

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

Reed's Patent Plastic Asphalt Roof Cement

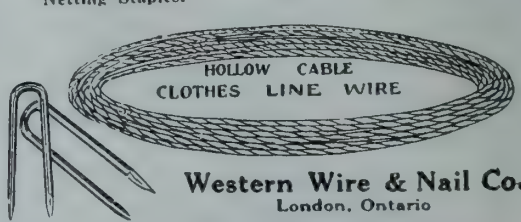
repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.



This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything, forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.



Put up in 1, 5, 10, 125 and 500-lb. containers.

List Price Each $16.00
Ask for Discount

This Kerosene or Gasoline Torch Has No Equal

It produces two to three hundred degrees hotter fire and uses less fuel than other makes. Soon **saves its cost in time and fuel saved.** See the **Double Blunt Point Needles which cannot injure the burners.** The upper needle cleans, but does not enlarge the orifice. The lower needle controls the flame. Our booklet is free. It fully describes this.

THE LAST WORD IN KEROSENE AND GASOLINE BURNERS.

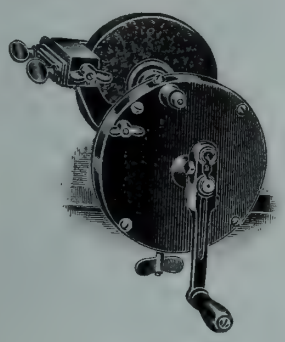
MENDETS

A PATENT PATCH

Will Mend It

Sell Service



When you sell your customers Mendets you sell them a service that will save them money in the added life it gives damaged utensils.

Mends all leaks instantly in hot water bags and other rubber goods, graniteware, pots and pans. Mendets require no heat, cement, or rivets, go on with a twist—sell with a bang. Orders for Mendets are still pouring in. Millions of boxes sold and still going strong.

TORONTO JANUARY 15, 1921

We are Exporting Hardware at the Rate of a Million ($1,000,000) a Month. How Much are You Getting Out of it?

"Hardware and Metal" has Helped to Pull in Many of These Big Orders

Canada exported $5,372,427 worth of hardware and cutlery during the seven months ending October, 1920. These are the latest figures supplied by the Department of Trade and Commerce.

Exports according to countries were as follows: United Kingdom, $2,842,-672; United States, $1,115,517; other countries, $1,414,238.

The foregoing figures do not include lawn mowers, washing machines, bars and rods, metallic shingles and roofing, tubing and pipe, garden and farm tools, spades and shovels, and many other lines which are ordinarily termed hardware by the trade in Canada.

Many of the best inquiries which led up to big orders were received by Canadian manufacturers who were represented in the "Export Numbers" of Hardware and Metal.

There are four "Export Numbers" of Hardware and Metal each year. Export Numbers are sent to our regular list of subscribers in Canada, including all wholesale, and over 90 per cent. of the retail hardware trade, and also to a select list of 1,200 buyers in foreign countries, which are now doing business with Canada.

The "Export Numbers" for 1921 will be issued January 29, May 7, July 30, and October 29. Cost per page (size 7¼ x 10 in.) on four-page order, $56; single insertion $65 per page. Regular advertisers pro rata on contract. Reservations for January 29 issue should be made immediately, and copy and cuts reach us not later than January 22. Unexpectedly good results have been secured from previous "Export Numbers." This is your opportunity to cover Canada and also reach 1,200 foreign buyers. If further information is required we will supply it promptly. We request that you act promptly and make immediate reservation of space.

WANT ADS

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

SITUATIONS WANTED

TWENTY YEARS' WESTERN HARDWARE experience. Would like to represent manufacturer in Western Canadian territory. Capable, good connection and best of references. Box 191, Hardware and Metal.

MANUFACTURER'S REPRESENTATIVE DESIRES POSITION

HAS A RECORD OF SUCCESSFUL ACCOMplishment in the hardware industry, having a good friendly connection with preferred retail and all large wholesale houses west of the Maritimes. Has also had a broad experience in merchandising as manager, which, added to a number of years on the road make him fully conversant with many difficult sales problems. Address Box 392, Hardware and Metal.

BUSINESS CHANCES

GENERAL HARDWARE, PLUMBING AND tinsmithing business, with real estate, in good Ontario town. Death of owner cause of sale. Box 67, Hardware and Metal.

MACHINERY, HARDWARE, HARNESS AND farmers' supplies. Large store, can be bought or leased. Very moderate amount of capital required. A real money maker. Good town on provincial highway. Box 82, Hardware and Metal.

IN WRITING ADVERTISERS, PLEASE MENTION THIS PAPER.

Opportunities are offered every week on this page.

Are you making use of them?

HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

DOES ADVERTISING PAY?

USE THIS SPACE AND SEE

Advertising in Hardware and Metal is economical, because the advertiser reaches only a class of business men directly interested in his product.

YOUR WANTS are many here below. Use the Want Ad. page and get rid of a few of them.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

Also name plates, embossed trade checks, time checks, badges, steel stamps and stencils or anything in steel or brass lettered or embossed to order.

If the Dealer did the Ironing!

IF the dealer could do a little sample ironing in the store, it would be easy to convince any woman of the quick-heating, smooth-working qualities of the Universal Iron.

In the store, the Universal is but well designed, well finished metal—cold, inanimate, unresponsive. But in the home, on the ironing board, it quickens into life—a life of service.

After all, the Universal isn't metal; it isn't theory; it isn't what ingenuity designs and skill executes. The Universal Iron is Service itself—hot, dependable, continuous Service throughout years of ironing days.

The Universal is the result of slighting nothing, taking nothing for granted, proving everything. Non-stopping satisfaction goes with every sale and a liberal profit to the dealer.

Hatch Garage Door Outfits

Canada Has More Automobiles Than Any Other Country Except One: Every Auto Must Be Housed

Canada has between 400,000 and 500,000 automobiles that must be sheltered in garages.

Your market for Garage Hardware is assured. Hatch Garage Door Outfits are sensible, practical and made with exacting care.

They are exceptionally easy to apply and full directions are packed with each set. Slamming and sagging of the doors is impossible and snow and ice cannot interfere with their working easily and reliably.

The Hatch set is easy to sell and profitable.

The Set Includes:

3—Special Swivel Door Rollers, 22 Feet of Track, 3—Paris Special Garage Door Hinges, 3—Stay Rollers (Floor Guides), 2—Extra Heavy Garage Door Handles, 1—Safety Hasp (For Fastening Doors Outside), 1—Hook and Eye (For Hooking Back Swinging Section Inside).

The track comes in separate bundles—2 eight-foot and 1 six-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

Imperial Floor Dressing comes in one and four-gallon lithographed sealed cans and in half-barrels and barrels. Ask the Imperial Oil salesman for prices and a demonstration.

Draws Trade--Holds Trade

A spotless store advertises itself. It draws steady trade from old customers and creates new customers. Freedom from dust is the first essential of a spotless store—Imperial Floor Dressing will do the job quickly and effectively.

Why? Because Imperial Floor Dressing holds dust to the floor. It cleans and preserves floors and prevents warping and checking. It fills in the pores and cracks of wood, and regular sweeping with a stiff broom removes **all** the accumulated dust and dirt.

IMPERIAL
FLOOR DRESSING

Imperial Floor Dressing does not gum or evaporate. One gallon is sufficient for treating upward of 700 square feet. One application will last for several weeks.

It is the most sanitary and economical dressing you can buy for your floors. It is also a fast-selling, profitable line to handle.

The Imperial Oil salesman will gladly demonstrate the superior quality of Imperial Floor Dressing the next time he calls on you.

Get Closer to that Customer—the Service Station

FOLLOWING our recent suggestion, let us make another comment on the service we are equipped to give the hardware trade.

You know what our plan is: not to be satisfied with merely filling orders—but to go out and *create* new business.

This is no idle dream of ours made over a desk by men who don't know practical hardware selling. For two long years we've been building up our *plan* of co-operation to help business creation for hardware merchants, and each day that goes by convinces us more and more that it's sound and that it will really work.

Take Service Stations, for instance. Here you'll find threading repair tools needed almost constantly.

Certain cars require one sort of thread repairs—others another. Yet few service station men have a complete equipment of screw-plate sets for doing the work.

If you adopt our plan of selling, you'll make a visit to each of these service stations and try to sell the following:

No. AA4—Little Giant Set (for magnetos and small work).

No. 312—Little Giant Set (for engines and chassis repair).

No. 260—Little Giant Pipe Stock and Die Set (for pipe connections).

You have in these three sets a total of 35 assorted taps and dies ranging from the smallest sizes up to the largest needed in auto repair work. It's really one complete assortment packed in three boxes—why not sell it that way?

If you're interested in this plan of selling and want help, send us a list of the service stations or garages near you and we will send you special letters and printed matter for reaching them. Write today.

We Will Appoint You Our Exclusive Agent in Your Town

OUR exclusive agency plan is exceedingly attractive. It points a way to big profits and quick returns.

Remember—our goods are fully guaranteed and are already well known to the public, having been on the market for seventy-five years, during which time they have given entire satisfaction from every angle.

In addition to our national advertising, which has already created a demand for our goods and from which our agents will derive a benefit, we will share the cost of any advertising you will do in your local papers. That shows we are willing to back you up, doesn't it?

If you are in the hardware business to make money—take advantage of this offer to become the agent in your town for the famous "Souvenir" line of stoves and ranges.

Tinsmiths should write us regarding the "Souvenir" and "New Idea" Warm Air Furnaces which burn coal or wood.

Write us at once and our salesman will call and see you.

A Wanted, Needed and Sure Seller

Stewart No. 1 Clipping Machines

Sell Them Now

When you sell a Stewart Ball-Bearing Horse-Clipping Machine to your customers you are recommending a wise investment. The price of a Stewart is less than the loss of service of a sick horse for one day may cost. The customer's goodwill comes back to you, so that you have not only made a sale, but a permanent customer.

Say This to Your Customers

The unclipped horse runs risk of colds, pneumonia and other horse ailments; he over-sweats, weakens and gets in a condition subject to sickness. Clipped horses are better horses; they dry quickly and are warm and comfortable when blanketed after the day's work, and are fit and willing workers next day.

Ball bearings; enclosed, dust-proof, cut gears; wearing parts of hardened steel; shipped knocked down, only 30 lbs. shipping weight—low shipping cost and easy to handle. Guaranteed to please, or money refunded. Clips horses, mules or cows without change of knives or adjustments.

Your jobber has Stewart Machines. Give him your order now; get your machines on display for the spring clipping season.

Watching the Market

Dealer Co-operation

BY watching the markets every day we will be able to give the dealer greater co-operation in pricing.

It is our intention that the dealer should have every advantage of the slightest reduction in prices by keeping our quotations close. A reduction in the price of Beaver Board is now in effect, the new price being $50.00 a thousand feet, F.O.B. Collingwood. For carload lots delivered at your station, ask for prices.

Our new illustrated catalogue carries 72 pages of interesting, salable lines, including auto accessories, sporting goods and electrical goods. It is yours for the asking.

Tools Backed By 40 Years' Success

FOREIGN REPRESENTATIVES:—Great Britain, Geo. H. Alexander, 83-84 Coleshill St., London, England; France, Italy, Belgium, and Switzerland, Fenwick Freres, 8 Rue de Rocroy, Paris; Sweden, Norway, and Denmark, Ab. Sigfr. Anderson & Co., Malmo; Spain, Casamitjana Hermanos, Barcelona; Japan, Abe-Kobei & Co., Yokohama; Greece, Stephen C. Stephanson, 11 Lycourgan St., Athens; Netherlands, Wynmalen & Hausman, Rotterdam; Australia, H. R. Richardson, 82 Pitt St., Vickery's Chambers, Sydney; South America, Charles Dreyfus, B. Mitre, 785, Buenos Aires, R.A.; South Africa, H. Parker Wood, Cape Town, Durban and Johannesburg.

Success multiplies. Because Butterfield Tools have been successful they have been used throughout the world in machine shops and factories. Because they have been so widely used we have had great advantages in observing the results in many different lines of work and have received the benefit of wider opportunities to note the chances for improvements made possible by progress in science and manufacturing.

Forty years has provided a long enough period to prove the soundness of Butterfield principles of design and to provide a thorough test in the many difficulties of modern shop practice and usage. This period of time has tested the sales methods also, and the service to the trade, so that, to-day, hardwaremen know that Butterfield Tools lead in sales in Tool Departments.

Can You Supply the Tool He's Looking For?

Nine depth gages are included in the Starrett line. Two of these—one of which this machinist is looking for—are designed primarily for measuring to close limits the depth of grooves, holes, or irregular parts. Three others are invaluable where accurate measurements are necessary on work such as gaging the depth of holes and recesses in jigs, dies, fixture work, etc. The other four gages are popularly used on work which calls for less accuracy.

Can you supply this man with the tool he should have? Check up your stock with the new Starrett Catalog No. 22-**"M A"**

THE CREDIT MAN

of a manufacturing or commercial concern must know now the financial standing of the firms to whom his company extends credit. He has his Dun or Bradstreet.

The Purchasing Agent or the buyers of various departments must be convinced that the goods delivered are as represented in both weight and quality. They have their scales and testing apparatus.

The Advertising Man must know that the circulation claims of the papers with which he does business are justified by the facts. He has the reports of the Audit Bureau of Circulations.

Good firms invite investigation of their rating or their merchandise.

Good papers furnish A. B. C. reports to their advertisers.

Hardware and Metal is a member of the Audit Bureau of Circulation.

DISSTON

Good tools—Disston Tools for every job. Tools of Disston-made Steel hardened and tempered for the particular use of the individual tool.

Tools that do all the work they should instead of demanding unnecessary effort to offset their short-comings.

Tools made by the same expert workmen from the same flawless material as the Disston Hand Saw—the saw most carpenters use.

Sold by good dealers everywhere.

Story for Week Dated January 22nd, 1921 — Hull in 1851 — Being No. 41 in the Series

Interesting Features About Some Special Eddy Paper Bags

THE paper bags with which you are familiar as a retailer come to you probably in the bundles in which they are packed at the Eddy plant for shipment. The aim in bundling the bags is to make each bundle as nearly the same size as the next, no matter what size of bags it may contain. Thus there will be 20,000 quarter-pound bags in a bundle, which will hold only 5,000 three-pound bags, or 1,000 larger sized bags.

Some of the special paper bags made at the Eddy Plant possess interesting features. Thus the banana bags are devised exactly right to hold a whole bunch of bananas, and to slip with them into a crate 25 by 50 inches, side measurement.

The Eddy Company bags to hold explosives are especially interesting. They are made of a highly sized paper, and the paper is crimped. This has the effect of making the bag slip easily into the powder box, but when the powder is put in the crimping expands, and every crevice is absolutely filled firm, so that the bag fits the box like a silk lining.

Another interesting note as to paper bags refers to the paper bags which go into starch barrels. They are always a beautiful deep blue color. Why? Because the effect of the blue is to bring out most dazzlingly the whiteness of the starch.

Sugar is the standard used to measure the weight content of a paper bag. The number stamped on the bag tells how many pounds or fractional parts of a pound of sugar the bag will hold. This, every retailer of experience will know, and every clerk, early in his experience will want to know.

Next week there will be shown on this page a splendid photograph of an E. B. Eddy paper bag specially made to hold an automobile.

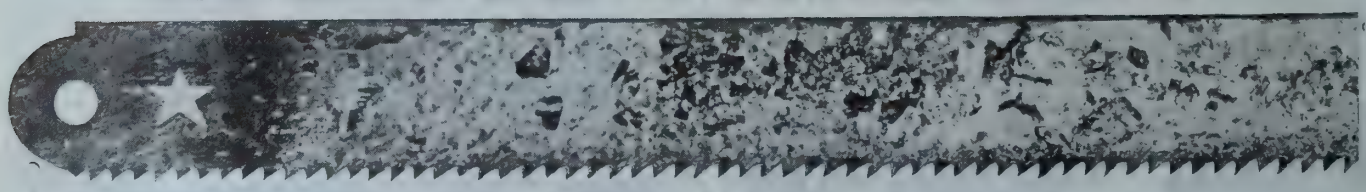
How Many Kinds of Hack Saws Do You Sell?

We had an interesting talk with a big hardware dealer the other day.

He made some wise remarks about selling that are worth a good deal to other hardware merchants who will follow them. So we pass them along for your consideration. He said:

"This is an age of specialization; and we specialize in leaders, because we turn our money over faster that way.

"A few years back we had $12,000 tied up in 9 different makes of hack saw blades. Our sales in this item totalled about $25,000 a year, so we were turning over our stock only about twice a year.



"We decided to cut our line to just one leader; now we turn over our stock much faster—I should say four or five times a year.

"We picked the one that most people knew and liked, and cut out all the rest. Our purchasing agent, a close Scotchman, found out that Star prices and discounts were as good as any other, so from that day to this we have sold no blade but the Star."

There is a lesson here for any wide-awake hardware man. You know the value of fewer lines and quicker turnover. Have you applied it to your stock of hack saw blades?

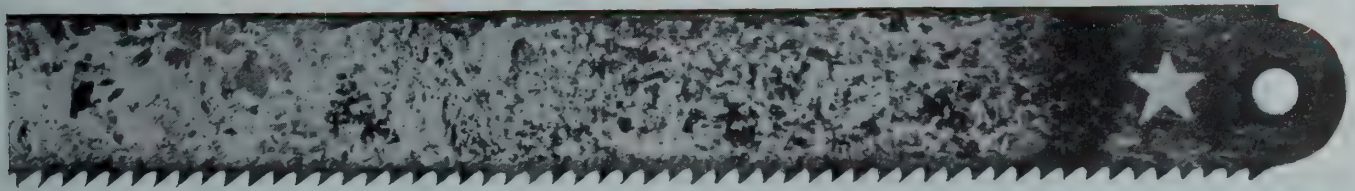
Geo. N. Clemson President.

CLEMSON BROS. INC.

If interested tear out this page and place with letters to be answered.

There are few hardware dealers today who do not recognize the value of handling nationally advertised goods. For a number of years Star Hack Saws have been steadily and strongly advertised in a way that commands the attention of any user of hand or power blades.

The above reproduction shows the latest double page advertisement in the Saturday Evening Post.



It is advertising like this that has made Star leadership in the hack saw field more conspicuous than ever. When you carry Star you can satisfy every hack saw demand. Hack saw users everywhere understand that there is no such thing as "just as good as Star." And dealers realize that standardizing on Star means a smaller investment, a greater turnover and a greater profit.

Since August 15, 1920, Star blades have been sold to the trade by the makers. The former arrangement of selling through agents has been discontinued, as we feel that we can serve our customers better by maintaining a closer contact with them. We invite correspondence and receive suggestions from the trade on any subject connected with Star Saws.

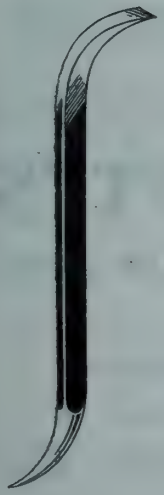
"Quality" Tools

Oil-tempered, Plain Polished Finish

To the members of the Canadian trade who are interested in handling and selling tools of a superior sort we have an announcement of special value. This company — reorganized and under new management — is making two lines of superior tools. The "Quality" line is oil-tempered, plain, polished finish. The "Phœnix" line is electric-tempered, blued finish.



"Phoenix" Tools

Electric-tempered, Blued Finish

These superior tools include Electrician's, Regular, Auto, Cabinet, Star, Knob Handles and Plain, Screw Drivers. The line comprises Cold Chisels, Round Nosed, Oil Grove, Flat Point, Cape and Diamond Point. Other tools are Indestructible Tinner's Awls, Ice Picks, Knurled Cup Point Nail Sets, Octagon Solid Punches, Octagon Centre Punches, Long Taper Punches, Phœnix Cotter Pin Extractors, and Tack Pullers. The Victor Screw Driver is one solid piece of steel. Hammering on the handle doesn't hurt. The handle cannot twist. Screw driver bits—double or single—are among the many items. Ask for catalogue.

Sell Westco Tankless Water Systems

Running Water Badly Needed in Rural Districts — The Westco Fills the Need

AGENTS MAKE GOOD PROFITS

Our agents are making splendid commissions. The farmer is deeply interested to begin with, and the talking points of the Westco are without number. You, too, can make good money selling this water system.

Write us.

Every farmer or rural resident having electricity on his farm or premises is a splendid prospect for the Westco Tankless Water System. Running water is one of the most urgent needs in the country to-day.

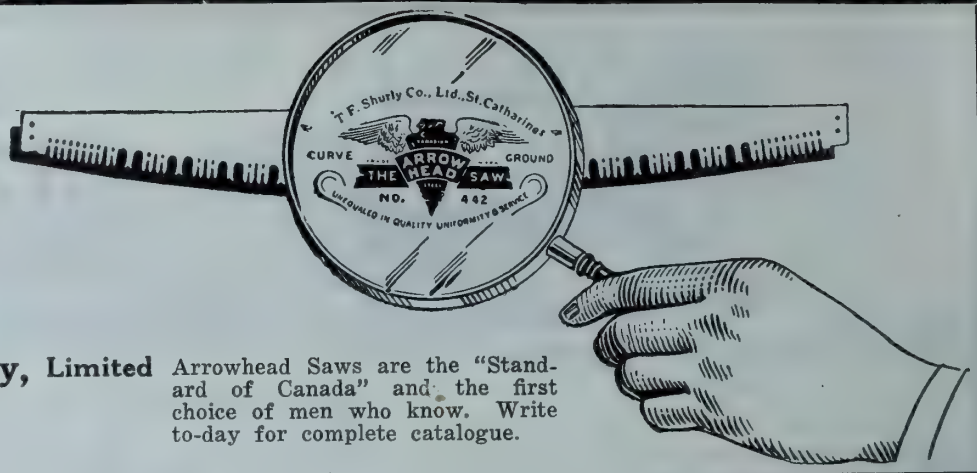
Farmers everywhere are demanding a good water system—and the Westco fills the need perfectly. There is big money in it for you. The field of operation is enormous. There is the whole of the vast rural areas, and suburban and outlying parts of cities and towns. It is a proposition replete with possibilities.

The Westco requires no storage tank—water is pumped direct from source of supply to taps. Entirely automatic; open tap, pump starts; close tap, pump stops.

Simple to understand, and is self-lubricating. Inexpensive to buy, maintain and operate.

No gear, no valve, no belt—only one moving part in the entire system—the impeller.

Above all—thoroughly reliable.



Westco Pumps Limited, 707 Yonge Street, Toronto, Ontario

Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND METAL are big buyers because they buy for business as well as for private consumption.

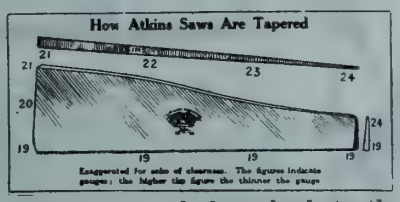
ATKINS



STERLING QUALITY SAWS

REASONS WHY YOU SHOULD SELL ATKINS STERLING QUALITY SAWS

Sterling Quality Steel is our exclusive formula, and the best saw steel made

Atkins Hand Saws are ground the two-way taper, that is, the cutting edge is the same thickness while the back tapers evenly from the handle to the point and from back to the cutting edge. See illustration.

Segment Grinding

Atkins Cross-Cut Saws are Segment Ground. This gives our saws clearance with very little set. The illustrations show the difference between Atkins process of SEGMENT GRINDING and the imitation.

The Imitation

Atkins Sterling Quality Steel receives our special process of Gas Tempering, which makes it tough and stiff, without being brittle. This is the reason why Atkins Saws will hold an edge longer.

Sell Atkins Saws and you will learn the meaning of "The Finest on Earth."

CURTIS

AIR COMPRESSOR and TANK OUTFITS

Note these Special Features of this Garage Equipment:

1—Controlled-splash, self-oiling system. No excess oil in cylinder, no external leakage or waste of oil, no oil gets into the tires. Enclosed crankcase keeps out dust.
2—Uses about one-tenth of the oil used by any competing machine; saving in oil alone soon pays price of machine.
3—High and low level oil-filling gauge, so you can tell at a glance the amount of oil in the crankcase.
4—Fan flywheel cools cylinder; increases capacity.
5—Inspectable valves, light weight, large area.
6—Valves cannot drop into cylinder and wreck machine.
7—Hand unloader permits starting compressor against full tank pressure without burning out motor, blowing fuses or burning or jumping of belt.
8—Drop forged crankshaft. Adjustable, renewable, non-cutting die-cast bearings.
9—Head removable without breaking or bending any pipe connection or pipe fittings; only one gasket.

Welded Steel Pressure Tanks
For Air, Gas and Liquid

We make these tanks of best quality copper steel welded throughout and thoroughly tested under Air Pressure to 300 lbs. before leaving our factory.

Write for price list and further particulars. Send names of prospective customers to whom we may mail literature.

We also make baths, steel factory equipment, gasoline tanks, truck tanks, etc.

Government Asks Retailers Support

Minister of Finance Shows Merchants How Luxury Tax Curtailed Buying of Luxuries—Extends Thanks for Retailers' Assistance—Costs brought down Largely Through Retailers' Efforts—Ask Tax on Source of Manufacture

SIR Henry Drayton, Canada's Minister of Finance, did not hesitate to tell two hundred and fifty delegates to the Eastern Ontario and Ottawa District convention of retail merchants at a banqquet in Brockville, Ont., why he had put on the Luxury Tax, why he had taken it off, and what was the great remedy for the unfavorable trade balance against Canada and the disastrous exchange rate. Frankly, he told the assembled delegates that the Luxury Tax had been imposed to cut down useless extravagance and over-indulgence in luxuries; and as a justification of the tax he pointed out that the index figure for the cost of commodities in May of 1920 was 263 while in October it had dropped to 234. Sir Henry admitted the inconvenience to which the retail trade had been put in Canada, and proceeded to thank them on behalf of the Cabinet for suffering this inconvenience in the cause of lowering the cost of living.

Abolition of Luxury Tax

Refering to the unfavorable trade balance as between Canada and the United States, the Finance Minister again appealed to the retail merchants to help adjust this condition by discontinuing the purchase of unnecessary articles across the line. If goods could not be bought in Canada he urged that the money be spent in the Motherland, "for that which helps England helps Canada." The convention subsequently endorsed a resolution to this purpose.

The Minister of Finance, in his opening remarks, referred to the work of the tariff investigating board that had gone up and down the country, gathering all sorts of information with regard to business conditions the country over. After conducting this investigation, Sir Henry said, he felt that he had done the right thing in abolishing the Luxury Tax.

"We are a funny people," said Sir Henry, "but we are funny only because human nature is a funny and complex thing. I think, perhaps, that the Canadian people are the most sane of any people. After what Canada and Canadians have done during the Great War, we, perhaps, have the right to talk loud. Following the armistice, we began to talk about what should be done to cut down the cost of living. Such are the strange contradictions of human nature that, in spite of rising costs, we were all more or less happy, more than less, I think. Business was buoyant in the circle of ascending costs, wages were high. We grumbled in quiet tones but we were happy just the same.

All Buy on Rising Market

"Another strange contradiction of human nature is that we all buy on a rising market but on a dropping market we all stop buying and wait until it has altogether dropped before we buy anything. The index number of commodity costs in January of last year was 249.7 which was about the same as it was in 1918. In February it was 253.50; in March 257.50; in April 260.50 and in May 263.1. In May of 1920 it had reached this apex and it was time something was done and something was done. It was time that the people of Canada were made to understand that expensive and luxurious purchasing was all right so long as they were contributing not only to their own gratifications and desires but to the upkeep of the country as well. So we had the Luxury Tax. In October this index figure of commodity costs had dropped to 234 and you, gentlemen, particularly you merchants, know that the cost has dropped even lower since then. Luxurious and extravagant buying stopped, business was falling off, notwithstanding the falling off of prices, and the Luxury Tax was abolished.

"What can become of an economic situation on a basis unjustifiable and which cannot be supported on a basis of values or on what should be the common family budget? This question is more than national. If we have a stretching and multiplication of costs there is a grave danger to civilization itself, of the economic basis becoming absolutely in danger, if not altogether shattered."

Costs of Civilized Government

The Minister of Finance then went on to deal with the costs of civilized government in the different countries of the world. In comparison with pre-war days, the cost of government in Belgium had increased 993 per cent; in France 827 per cent.; in Australia, 61 per cent.; in the Motherland, 500 per cent; and in Canada 272 per cent. Dealing with neutrals, Sir Henry said that in Switzerland this cost had gone up 474 per cent; in Norway, 356 per cent; in Holland 207 per cent.; in Denmark 171 per cent.; and in Germany 1,488 per cent. Some people might say that this question of money values might be the amount of the paper inflation; but some of the countries affected, some of the neutrals who have more gold than they ever had in their lives before, were not affected by the gold standards but by the rise of commodity values in the world. If the weight of Canada's obligations could be contracted to represent pre-war values, the cost of government would have increased only about 54 per cent.

"The retail merchants of Canada," said Sir Henry, "have seen the costs coming down in this country, they have been working in that connection and in that direction against their own immediate interests, but not so in the long run. It would be a fine thing if we could get all costs of all countries down to this

Continued on page 41

NEW LIGHT ON THE SUBJECT

Many retail merchants were inclined to regard the removal of the luxury tax as an admission of weakness and bad judgment on the part of the Government. Sir Henry Drayton always claimed however, that the tax had served its purpose. He points out in this article how the index figure of commodity costs gradually dropped from 263.1 in May to 234 in October when the tax was removed, thus indicating that the tax helped to curtail purchases of luxuries.

Keeping Pace With Market Declines

The Merchant Who is Reducing His Prices to the Public in Line With Wholesale Reductions is Acting Wisely And Will Retain And Get Customers by so Doing—Should Not Wait Until High-priced Stock is Exhausted

By C. J. MORRIS

ONE of the outstanding problems with which the hardware merchant will probably have to deal in the current year is the question as to how soon should reductions be made in retail prices after reductions in the wholesale quotations have been announced. Should the retail price be lowered immediately or should the retailer wait until his stock bought at higher prices is exhausted, and then apply the reduced rates only to the stock he has purchased at the lower prices?

To the merchant who has given the matter little consideration it may at first appear that the selling price to his customers should be based upon cost, and that it is unfair to expect him to sell goods at a price which may perhaps yield him no profit whatever simply because he will have to pay less for goods which he purchases in the future. He feels that he is entitled to his fair profit irrespective of any price changes which may have occurred since he purchased the goods.

If, however, he will give the matter a little careful thought he will be convinced that, in the interests of his own business, he cannot afford not to reduce the price to his customers as and when the quotation to him is reduced, regardless of the quantity of stock he has on hand and of the price at which he bought it. And this more especially applies to staple commodities the variations in price of which are more or less common knowledge. A moment's consideration will show that if this rule be not followed to more or less extent each store might have a different price for every article as prices would vary simply according to the length of time each class of goods had been in stock. The same principle applies on a rising market. It is good business then to price goods in accordance with replacement values.

Any business man buying goods to sell at a profit has to run some risk with regard to possible price changes. In some cases he may be the gainer. On the other hand, he must expect sometimes to be a loser and the extra he makes in one case should be regarded as an offset to the loss in the other. In the case of a rise in price the retailer is entitled to the benefit. Conversely in the case of a fall he cannot afford to hold out for the higher price, for in the event of his so doing he is certain to lose business, seeing that there will always be some of his competitors who, on account of their having had a smaller stock on hand, will be able to undersell him. Two concrete cases lately came to the writer's notice which strikingly illustrate the contention that the selling prices must be based on quotations prevailing at the time of sale.

A customer entered the hardware store at which he usually dealt to purchase some turpentine. The price was quoted him as 45 cents a pint. He happened to have noticed a market quotation in the newspaper round about $1.60 per gallon and a simple calculation showed him that the retailer was charging at the rate of $3.60 per gallon. He made some reference to the high price and was informed that it cost the retailer over $3 per gallon and that the latter was thus making very little out of it. On making enquiry at another store near by he was quoted 35 cents a pint. He was on the point of doing a fair amount of painting and varnishing and, arguing that if the first dealer was charging more in one instance he might be doing so in all, he placed an order amounting to somewhere around $15 with the latter dealer. Moreover, two of his friends to whom he related the incident and who required some paint also made purchases there. This is a good illustration of what is, at any time, likely to occur and of how a dealer is likely to lose business when he fails to act upon the principle that in a falling market (or in fact in any market) he should always base his charges upon present values and not on what the goods have cost him.

The extra amount which he may collect by making the higher charge is not likely to repay him for the risk he is running of losing customers and of acquiring a reputation for higher prices than those of his competitors.

The second case above referred to did not occur in connection with the hardware business, but as it is an actual occurrence of recent date and aptly supports the theory here advanced it is well worth relating.

During the recent almost daily drop of a cent or two at a time in the price of sugar one Toronto merchant scrupulously reduced his price day by day as the reductions were noted in the daily papers. He, moreover, took good care to make known these reductions to his customers. Every day a large notice was posted in his window announcing the price. If the morning paper quoted a reduction of 50 cents a hundredweight, the same day a reduction of half a cent per pound appeared in his window, with the result that he acquired a reputation as the closest-price dealer in the district. Not only did he secure customers for sugar who had not dealt with him previously, but in nearly every case they purchased other goods, the profit on which far outweighed any profit he may have foregone on sugar. In one instance a new resident in the district enquired the price of sugar at a nearby store and was quoted 1½ cents per pound higher than that at which it was advertised by the dealer in question. On her pointing out the difference between the two prices, the second dealer explained that he was really selling at exactly what it cost him and that he could not be expected to sell at less than cost. The reply was characteristic of the attitude of the public at the present time:—

"That may be, but I do not see how you can expect me to pay you 1½ cents more than I can get it for a few doors down the street."

The result was that the man who was

Continued on page 39

"FUTURE OF ACCESSORY TRADE ASSURED"

LONDON, Ont. — Discussing with Hardware and Metal the outlook for business in the coming year Fred Floyd of the R. G. Edgecombe Co., Ltd., wholesale hardware, commented especially upon the chances the sale of auto accessories offers.

"There is no qquestion," he said, "about the permanency of the demand for automobiles and auto trucks. Every year sees the sales increasing because these vehicles fill a real place in the everyday life of millions of people. Every car that is sold and every truck that goes out has to have certain supplies. Somebody is going to get the business and it is the man who goes after it and lets car owners and truck owners know that he keeps the supplies and accessories they need. Once they know where to go they will continue to buy at that store and hardware merchants can form a very valuable connection that will bring them in for other lines. Car owners almost without exception are men who can afford to buy the better things for their homes and pay well for them. This is an important consideration. A dollar is neither here nor there with the auto owner provided he gets what he wants, whether it is for his car or his home. There is big business and permanent business for hardware men who stock auto accessories."

A homelike atmosphere pervades the comfortably furnished phonograph department of W. H. Thorne & Co., St. John, N.B. Here the customer may sit in comfort and listen to the latest selections of favorite artists. This is one of the means used by this firm to develop phonograph trade. Many other unique features are outlined in the article herewith.

Recitals Stimulate Phonograph Business

Theatre is Engaged by W. H. Thorne & Co., St. John, for Tone Tests Comparing Artists' Playing With Machine Reproduction—Keeping in Close Touch With Music Lovers—Loaning Machine and Records for Public Dances Proves Good Advertisement

EFFORTS can be made by hardware merchants handling phonographs to keep alive throughout the year, the interest ordinarily more pronounced at certain seasons in connection with sales of this line. Phonographs are much used in the home during the indoor months of winter and they are used equally as much in the summer time both, in the city and at the resorts. There is no reason therefore why the hardware merchant should not find this a profitable line throughout the year. This is the line of reasoning followed by W. H. Thorne & Co., St. John N.B., which firm has adopted several unique features in connection with the phonograph department. One of these features is the periodic holding of recitals in a nearby theatre, to which large numbers of those interested in music are drawn.

One of these recitals was recently conducted in the form of a tone test when an American concert soprano and a violinist gave a recital. The theatre was filled with guests of the Thorne company who had issued tickets of admission to music lovers who called at their phonograph department. The invitation used in connection with this event is shown herewith.

The proceedings of the recital took the form of the artists singing and playing in direct comparison with one of the machines of the line handled by W. H. Thorne & Co. It demonstrated that no difference could be distinguished between the renderings of the artists and the renderings of the phonograph. The lights were extinguished while the music was being played and when the theatre was again lighted it was seen that the artists had retired and the music was from the phonograph alone. These semi-annual recitals given by this company are very popular with citizens of St. John and large crowds are always anxious to gain admission.

Justify Expense and Time Involved

These recitals always prove to be most effective stimulants to phonograph trade. They are well advertised for some time in advance and hundreds of visitors call at the phonograph department of the store to make sure that a seat will be reserved for them. For many days after the event the phonograph department is crowded with customers who were unable to attend the recital but were anxious to hear the selections, by the same artists on one of the stock instruments.

Considerable expenes and work is ne-

cessary in advertising and preparing these recitals on a large scale but the results always justify the expense, time and labor expended, according to the statement to Hardware and Metal, of Mr. Harrison. The company has used the Imperial Theatre in St. John, five times for such recitals. Efficiency and thoroughness are very much in evidence in their conduct. The name and address of every guest in attendance is carefully filed and later an invitation is mailed inviting a visit to the phonograph department and at the same time expressing pleasure at the presence of the party at the recital.

Store Displays Linked Up

Before and after the recital the store windows are tastefully trimmed featuring phonographs. Photographs of the artists and lists of the various selections are shown. Large space is also used in the local newspapers in connection with these events. According to the management this publicity not only is valuable to the phonograph department but it is a valuable advertisement for the store in general.

Pointers From Another Merchant

Another hardware merchant in a smaller centre who has a thriving trade in phonographs and records has a few good suggestions in handling this business. His trade is such that many of his customers are well known to each other through other local activities. Thus when Mrs. Smith purchases a machine he always tells all the friends of that lady about it. He finds they will make some excuse to drop around to Mrs. Smith's place and hear the machine. Some of them already own phonographs but they will likely hear some new records, as this tore always urges the inclusion of a number of the latest records with the initial order. This merchant occasionally uses large space in the local newspaper to enumerate the newest records. These are classed under such headings as concert songs, sentimental ballads, comedy gems, opera gems, hymns, popular songs, sacred music, marches, transcriptions, Hawaiian airs, folk songs, patriotic airs as well as dance music classed under the various styles of dances.

Loan Machine and Records

This store also offered the use of dance records and a phonograph for public dances and found this a good advertisement. Once the young people saw the value of a phonograph at public dances they were quick to see the advantage of having a machine for house dances and the sale of machines and records was stimulated. Between the dances the machine interpreted vocal and descriptive selections and in this way the latest song hits were rendered. Many calls for records of such songs resulted from this.

This merchant also takes the utmost advantage of trade in phonographs as birthday presents, wedding and anniversary presents, in addition to the regular Christmas and summer holiday trade. A record is kept of all weddings and those giving presents. Two weeks before the anniversary is held a neat card is sent to the latter suggesting that as a wedding present was purchased by them for the newly married couple they might also like to give an anniversary present. It suggests that as the couple were presented with a Victrola as a wedding present that it would be appropriate to give them some of the newest records recently added to stock. This suggestion put forward in a diplomatic way has brought considerable business. The same plan is followed out in connection with birthday presents. In most cases this little reminder is gratefully received, offering as it does some practical suggestion to help the gift-giver arrive at a decision.

You are invited to attend a Private Recital
given jointly by

Miss Claire Lillian Peteler
the popular Soprano

and

Madeline MacGuigan Sokoloff
Violinist

assisted by

Mr. Igor Sokoloff
Cellist

Mr. Erl Beatty
Pianist

at the Imperial Theatre on

Tuesday afternoon, October twenty-sixth

at four-thirty o'clock

On this occasion these talented artists consent that
the Re-Creation of their art be
heard in comparison

Admittance will be by Card of Introduction only,
which may be obtained by application at the Phonograph Parlor of
W. H. Thorne & Co., Limited, King Street
as long as accommodations remain.

Invitation form used by W. H. Thorne & Co., St. John, N.B., in connection with the musical recitals held at a nearby theatre. These invitations are extended to music lovers who patronize the department or who are prospects and in this way close touch is maintained with the best prospects for both machines and records.

STRIKING DISPLAY OF ROPE, LANTERNS, WINTER AUTO ACCESSORIES.

LONDON, Ont.—A rather unusual combination of hardware which makes a striking display is contained this week in one of the large windows of the Cowan Hardware Co. The entire display features rope, lanterns and electric flash lights. The rope is coiled flat on the floor of the window in circles about three feet in diameter. In the very center of the circles the lanterns are placed. At one end is a raised stand on which is built a model light house and below are shown a variety of flashlights. At night the windows in the tower of the light house are illuminated. The window has attracted a lot of attention.

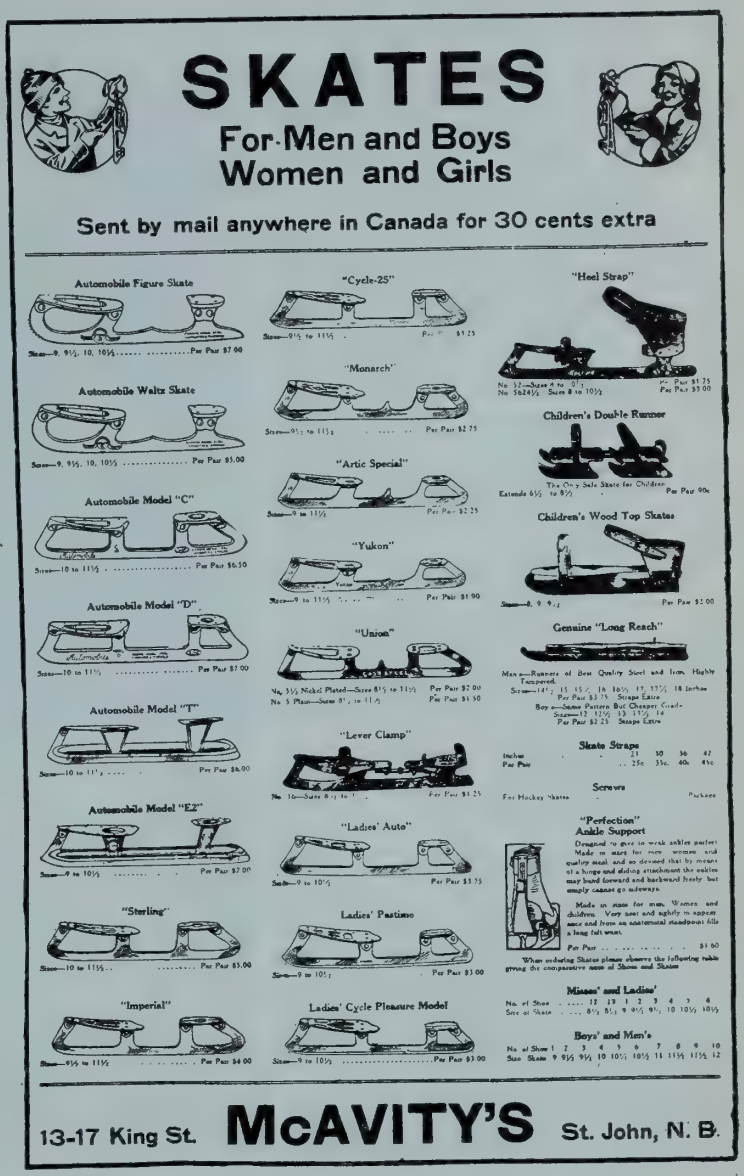
The Russell Beattie Hardware Co. is featuring in one of its windows winter auto accessories, especially chains, oils and non freeze compounds. These attractively arranged and interspersed with advertising matter make quite a nice window and one which carries a real interest to car owners.

Germany Leads in Most Hardware Exports to U. K.

Germany continues to hold a leading place in exports of hardware and cutlery to the United Kingdom. German hardware, other than hollowware, stands first for the month of November, valued at £22,043. German hollowware, cast, enamelled and not enamelled, cast, tinned, wrought enamelled, wrought galvanized, tinned plate, cutlery (other than razors) all lead in their respective field insofar as exports to United Kingdom are concerned.

After Skate Business in a Big Way

ST. JOHN, N.B.—One of the most active campaigns for skate business in the Maritime Provinces is carried on by the firm of T. McAvity & Sons, Ltd., of St. John. This season they are carrying on their usual widespread campaign of publicity linked up with window and store displays and are endeavoring to secure business in skates not only in the city of St. John, but from the surrounding territory.



Skates are being pushed by the use of store displays and by the use of large advertising space. Herewith is a sample advertisement used by this firm in their skate campaign. This is but one of the ads. used, and is six columns wide and a full page in length. It was used in the local newspaper.

As will be noted, every line of skate is well illustrated and prices are given on each line. Accompanying this is an offer to mail a pair of skates to any point in Canada for thirty cents extra.

The advertising shows an ankle support designed to strengthen weak ankles and it also gives a very useful table of comparative sizes of shoes and skates. This information can be given to good advantage in every skate advertisement as it is the one question nearly always asked by customers on making a purchase.

Every year the McAvity firm make a specialty of skates as the ice appears and they have always been rewarded by a large sale of these goods.

The skate situation, as far as manufacturers are concerned, is considerably easier this year than in some seasons past, according to information given to Hardware and Metal by Mr. Morrow, Canada Cycle & Motor Co., Toronto. Two years ago a soft winter was experienced and preparations had been made for a big skate season, the result was that advance orders placed in January and February following were light as retailers were somewhat nervous. Last year was a good sharp season and advance orders placed last January and February were in good volume. The shortage of supplies experienced last year is not expected to be so apparent this year and a fair stock for sorting orders is on hand. Good skating weather is generally reported now throughout Canada and a good volume of skate business is being done.

KEEPING PACE WITH MARKET

Continued from page 36

basing his charges on present quotations secured her business and the man who held out for the higher price lost a customer who would probably have been a permanent one.

Looking for Reductions

Another point worth remembering is that, whereas in normal times the public are apt to accept more or less readily the price quoted them at stores where they are in the habit of dealing, they are, at the present time, when prices are on the downward trend, particularly keen to watch for any price reduction and to buy where they can buy most cheaply. Thus for the merchant who is desirous of conserving his reputation as an up-to-date-price dealer it is more than ever desirable that he should just now do nothing which can possibly lend color to the idea that he is endeavoring to keep prices high.

When Prices Were Rising

Those who in the past few years of rising prices have followed the advice given from time to time in Hardware and Metal will be in a position not only to recognize the soundness of the advice here given, but will also be able to regard any loss which they may incur by following this method of dealing with prices on a falling market as a set-off to the extra profits which have been made in the past through acting upon the advice referred to.

During the period of rising prices Hardware and Metal has persistently counselled its readers to mark prices up as the wholesale prices advanced, irrespective of what the goods originally cost, and has always pointed out that in justice to themselves they must do this in order that they might have a reserve fund to offset the reduction in profits which would inevitably ensue when prices came down to a normal level.

Those who conducted their business on these lines will now recognize the wisdom of having done so and those who unfortunately may have acted otherwise can only regret their failure to profit by the counsel proffered them. If, however, they are wise they will not add to their previous error of not charging what they should have charged by failing to reduce their prices, when, in their own interests and for the sake of their own business reputation, these prices should be reduced, and a lesser profit accepted.

Many Important Matters Covered by Retailers in Resolutions Passed at Convention of Eastern Ontario and Ottawa District

That it is the opinion of the meeting that any proposal that may be made to place a tax on the sales of the retail merchants would be very injurious to us as a class and we recommend that vigorous opposition be made through the Dominion Boards.

Buying in the Empire

This meeting desires to further a recommendation to the Provincial Board and on to the Dominion Board urging our membership to buy as many Canadian or British goods at the present time to conserve our capital and help exchange rates.

Whereas the attention of this association has been called to the ever-increasing practice of certain manufacturers conducting sales in retail stores, and inasmuch as most of these houses sell to the retail trade, be it resolved that any member knowing of those conditions report the same to the district secretary with a view to having the Canadian Manufacturers' Association take action thereon and to having the same immediately discontinued.

Selling Direct

That we, as retail merchants, protest as unfair, the practice of some manufacturers and wholesalers in selling direct to the consumers while soliciting the business of retail merchants, and that we place ourselves on record as of the opinion that such a practice is opposed to our interests, and that we will favor any comprehensive plan of action that may be decided upon by our executive as a means of putting an end to this unbusinesslike custom.

Moved by Mr. Taber, Carleton Place; seconded by Geo. Wright, Brockville.

Collection of Small Debts

That this district convention place itself on record as approving the proposed action of the Ontario Provincial Board to apply to the Provincial Government for an amendment to the Division Court Act, whereby small debts can be collected more cheaply than under the existing system, and, further,

That this district convention pledges itself to do all in its power to assist in the procuring of such an amendment.

Moved by D. Bell, Ottawa; seconded by B. T. Crabtree, Ottawa.

Trading Stamps

Whereas this association has already taken the ground that vigorous action should be incepted against all violators of the Trading Stamp Act or False Advertising Act, or any other similar Act, secured through the efforts of this association for the protection of the retail trade, and whereas we believe all such prosecutions should be undertaken by the Dominion Board, under the direction of special committees appointed by the Executive of the Provincial Board, therefore, we recommend the Dominion Board to request the Dominion Government to have an official appointed whose duty it shall be to prosecute persons who falsely advertise any article, similar to the inspector appointed to prosecute persons who violate the gold and silver marking act.

Moved by B. G. Crabtree, Ottawa; seconded by A. E. Kelly, Ottawa.

Workmen's Compensation Act

Whereas it has been reported that it is the purpose of the Provincial Government of Ontario to bring the retail trade under the scope of the Workmen's Compensation Act, and,

Whereas such an action would impose an unnecessary burden upon retail merchants, therefore, it is resolved that we ask the executive officers of the Ontario Provincial Board of our association to oppose any such attempt upon the part of the Provincial Government of Ontario.

Moved by D. Bell, Ottawa; seconded by T. Bowman, Ottawa.

Discrimination in Price

Whereas legitimate retail merchants are the largest buyers of certain lines of trade marked goods and as such contribute most largely to the profit of manufacturers, and,

Whereas some manufacturers give special prices to dealers who make it a practice to advertise certain lines of goods at a lower price than that at which said goods can be purchased by the legitimate retail trade,

Therefore, we place ourselves on record as opposed to such a practice on the part of manufacturers, and that we accordingly call upon them to discontinue such practice or as an alternative to adopt the price contract or re-selling plan, whereby unscrupulous price-cutters cannot use staple lines for the purpose of deceiving the public.

Moved by A. C. Kennedy, Ottawa; seconded by Geo. Stoate, Ottawa.

Re False Advertising

Whereas the Dominion Board of the Retail Merchants' Association of Canada has secured legislation to prohibit false advertising of goods, and whereas this district convention of the Retail Merchants' Association is strongly in favor of such legislation,

That the members of this district be requested to forward to the district secretary, or to the secretary of the Ontario Provincial Board of this association, any advertising matter in which they find goods misrepresented, and further,

That as in cases of prosecution for violation of the False Advertising Act, no provision is made for accepting the written report of the analyst who may be called upon to analyse such goods, but that official must appear in court personally and give evidence, we recommend the executive to take action which will permit the written sworn statement of the analyst to be accepted as evidence in court.

Moved by E. K. Tallman, Merrickville; seconded by W. W. Adams, Newbury.

Re Business Tax

Whereas for the purposes of the Business Tax, the premises, lands and buildings occupied by retail merchants are now assessed at a valuation of twenty-five per cent., and,

Whereas this convention is of the opinion that the valuation at present in force is excessive, be it resolved that we endorse and approve the action of the Provincial Board of the Retail Merchants' Association of Canada, in endeavouring to have the valuation reduced to ten per cent. and we pledge ourselves to give every assistance to the executive of the Provincial Board in this undertaking.

Moved by T. Bowman, Ottawa; seconded by Mr. McArthur.

Re Welfare Fund

Whereas the Dominion Board of this association, at its last convention in the city of Vancouver, had under careful consideration the matter of extension and development of the work of this association, and,

Whereas for that purpose it was deemed advisable to secure a special fund of $100,000, to be known as the "Special Welfare and Organization Fund," be it therefore resolved that this district convention of the Retail Merchants' Association of Canada, Eastern Ontario and Ottawa District, do heartily approve this proposal and that we officially commend the fund to the kind consideration and support of our members.

Moved by Mr. Patterson, Brockville; seconded by Mr. Collins.

Credit Reporting

Whereas our association has inaugurated a Credit Report Department which has already been found of great service to our members, it is resolved that this convention endorse the Credit Reporting Department of our association and strongly urge our members to make all possible use of it.

Moved by Mr. Grace; seconded by T. Bowman, Ottawa.

Re Express Rates

That in view of the fact that the members of our association residing in districts outside of the zones in which the express companies make delivery of parcels are handicapped by such lack of facilities, it is resolved that the incoming executive be requested to take this matter up and so deal with it as to secure for those members an improvement in present conditions.

Moved by Mr. McArthur; seconded by Mr. Abdullah.

Daylight Saving

Whereas resolutions have been adopted at the conventions of the Provincial Boards of our association, favouring the adoption of a daylight saving measure, it is resolved that this convention is of the opinion that any daylight saving measure, to be properly effective and avoid confusion, should be Dominion-wide and, further,

That the executive officers of this district be requested to submit a copy of this resolution to the Dominion Board for submission to the Right Honourable Arthur Meighen, Prime Minister of Canada, and the members of the Dominion Government, with the suggestion that if such Dominion measure is passed, it come into effect on April first and continue until September fifteenth, in each year.

Moved by Mr. Wright; seconded by D. Bell, Ottawa.

Re Sale "2½ Per Cent."

That this meeting, in convention assembled, approve of the action of the Ontario Provincial Board in opposing the recent Order-in-Council passed by the Ontario Legislature, which provided that the sale of all 2 1-2 per cent. beverages be confined to standard hotels, and, inasmuch as this product is sold by a number of sections of our association, be it resolved that the Ontario Provincial Board be further requested to prevent such legislation being enacted at the forthcoming session of the legislature.

Moved by Mr. Kelly; seconded by Mr. Halpenny.

Re Association Aims

That whereas the work of this association is of great benefit to the retail trade and should be generally known to the public, therefore:

Resolved that the executive of this district be authorized to take such action as they may deem wise to make our association aims and work generally known to the people in order that influence may be brought to bear upon retail merchants not already members of our association that they may come in with us and co-operate in procuring those trade benefits in which they are all willing to share.

Moved by Mr. Hawkins, Smiths Falls; seconded by T. Bowman, Ottawa.

GOVERNMENT ASKS SUPPORT

Continued from page 35

level. The costs in Canada have been largely brought down through your efforts and if I might go so far, I would like on behalf of the Cabinet and on behalf of the country to thank you for the inconvenience and trouble you have had to put up with."

Sir Henry went on to ask if the retail merchants might do something further toward helping the economic conditions in Canada. He said that the West was particularly sensitive about the question of apples and felt that they were paying too much for Canadian apples. A box of apples in Winnipeg, including heating and service on the railways, sold to the retailer for $2.73. The complainant in the case said that one box held 160 apples. At that rate, Jonathans would cost about 1.07 cents each, say, 1¾ cents. They sold to the consumer for 5 cents or even, in some cases, at 3 for 25 cents. "Something came in between that box of apples delivered in Winnipeg at 1¾ cents each and their selling price at 3 for 25 cents. You gentlemen know about that—I don't. The only first-hand information I have is that one thing complained about was that the duty on apples would add to the cost of those 3 apples for 25 cents about three-fifths of a cent because, taking the same figure, a 30 per cent. duty would work out less than one-third of a cent an apple."

Sir Henry thought it would be a splendid thing if he could further enlist the help of the retail merchants of Canada an enlistment, he pointed out, that would receive no more money for its service than the collection of the Luxury Tax did. Exports for the last fiscal year exceeded those of the previous year by two and a half millions, a thing not lightly to be regarded when exporters were faced with the great difficulty of discount on sterling. However, the interest in national buying was as great as in national selling.

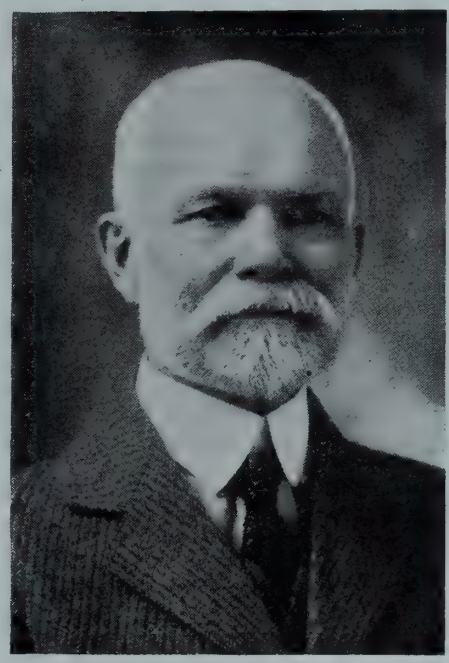
"You cannot go on buying more than you sell unless you borrow enough to cover the margin of your extravagance," said the Finance Minister. "In a young country during its period of development, we must buy more than we sell and for many years we had an adverse trade balance. But at the present time, money cannot be borrowed in England without a loss of from 18 to 25 per cent. We could borrow in the United States, but if we borrowed in a country where the trade balance is against us, we merely face a further declination of currency and add to the load which we already carry. While we are ahead in exports by two and a half millions, we are in quite the reverse position with regard to buying. The net purchases during the last eight months have increased 281 millions; in other words, we purchased out of Canada 44 per cent. more than we did a year ago. There was a sad increase in our unfavorable trade balance with the United States of some 230 millions. As retail merchants, you can do much to correct these figures; you can do much educational work."

Sir Henry then went on to point to some extravagances in fruits and vegetables purchased in the United States by Canada, one of the best fruit and vegetable growing countries in the world. Agricultural and vegetable products, mainly food, increased by 23 millions over the last year, or 23 per cent. increase. Were not a lot of these things entirely unnecessary? In 1918, Canada imported three millions worth of fresh vegetables; $733,000 worth of tomatoes; $766,000 worth of onions, and $12,000,000 worth of other vegetables. Last year Canada imported $14,000,000 worth of fresh fruit and this is one of the best fruit growing countries in the world. In textiles the increase in eight months was some 66 per cent. over the previous year; in hats and caps alone, it amounted to $1,240,000.

"Gentlemen, do you like the depreciated dollar," asked the Finance Minister. "If you do, just let us go on as we are doing. If you want to see the Canadian dollar righted, you must see to it that instead of seeing it attenuated across the line, it shall stay at home and make another Canadian dollar. If you cannot make or buy your goods here, go to the London market and buy there, for anything that helps England helps Canada and the Empire. This matter of exchange is costing us millions of dollars.

"As we go on, these questions are getting more and more questions of the people. It is only the people who can put things right and put a big thing through; it is not the government. It would have been impossible for Canada to have carried on the war had it not been the nearest to the heart of every Canadian home. Financing is not a thing for the government to do; during the war and now it is a thing of the people, for the people and by the people. In order that these things may be done Canada requires and demands the same support and enthusiasm of the war years. The work and burden of the war strain is past, but the people must see that Canada goes on."

Believes in Organization



The Minister of Customs and Inland Revenue, Hon. R. W. Wigmore, spoke for a few minutes. He said that the abolition of the Luxury Tax was largely due to the representations that had been made to the government through the offices of the Retail Merchants' Association. He was a great believer in organization. He advised the retail merchants to keep in close touch with the government with regard to questions that interested them. They should come to the government with a concrete proposition when they would receive a respectful hearing and their views would receive careful consideration.

Henry W. Watters, of the Standard Drug Company of Ottawa, who presided at the banquet, took occasion in the first place to advise all the ladies of Brockville to do their trading at home. By doing so they help their husbands, sons and brothers to discharge their proper duties as citizens to their municipality and not move to other places. It was better to do this, he said, than to spend their money in Ottawa, Toronto or Montreal.

Speaking of the form of taxation that would probably succeed the Luxury Tax, Mr. Watters pointed out very emphatically that the retail merchants were not averse to paying their share of the war debt and doing their share of the work. But until Canadians were courageous enough to accept a measure of direct taxation, he said that retail merchants favored a system of taxation which was absorbed at the source of import or manufacture. "We want the business of this country conducted in the most convenient, comfortable and satisfactory way for both the retailer and the customer," said Mr. Watters.

A. C. Hardy, of Brockville, in proposing the toast to the government of Canada created a good deal of amusement when he said: "It gives me great pleasure to propose a toast to the government of Canada for, God knows, we need it."

Elected President Eastern Ontario District R. M. A.

HENRY WATTERS, Ottawa, Ont.,

who was honored by the Retailers of Eastern Ontario and Ottawa District in Convention last week in Brockville by re-election to the Presidency of the district branch and with an honorary life membership in the Association. The other officers follow:

1st Vice-President—A. Goulet, Bourget.
2nd Vice-President — Robert Craig, Brockville.
Treasurer—T. W. Collins, Ottawa.
Auditor—Alex. Phillips, Ottawa.
Secretary—J. C. Campbell, Ottawa.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations.

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, JANUARY 22, 1921

THE old saying "every cloud has a silver lining" is borne out by reports of paint and brush manufacturers who say the large extent of unemployment in Canada is resulting in large sales of house paints in quarts and of small and medium size brushes.

* * *

THE clerks in hardware stores represent a virile force when organized and can by co-operation improve themselves and their working conditions. This fact is evident from the achievements of the St. John Hardware Clerks' Association which wields a power in local politics and influences many business matters of interest to themselves.

* * *

CAPABLE speakers have been secured to give addresses on Chain Stores, Co-operative Buying, Mutual Fire Insurance and other timely subjects, before the Ontario Retail Hardware Association convention in Hamilton February 14-18. The progressive merchant is the one who keeps himself informed on such important topics in the field of retail merchandising and those attending this convention should learn much from these speakers. There will be many other important features as well, as outlined in the program in last week's issue of Hardware and Metal.

Signs of Improvement

SEVERAL indications that trade conditions in Canada might soon be expected to improve, are found in the trade returns for the month of December 1920, figures of which are shown elsewhere in this issue. It is evident from these figures that Canadian exports are on the increase, a condition which should shortly be reflected in a further broadening of the export field and an improvement in Canadian exchange. Another notable fact is the decrease in the imports of foreign foodstuffs, textiles and other products which are not really essential to Canadians. The figures furthermore indicate an increase in Canadian imports of raw materials necessary for maintenance of activity in Canadian factories. This fact would seem to indicate that manufacturers are making plans for a resumption of industrial activity in the near future.

One of the unsatisfactory features of the trade returns is the fact that imports of non-metallic minerals is nearly doubled in December 1920 over the same month in the previous year. This item chiefly represents imports of coal. Under prevailing conditions this item is likely to continue to prove a thorn in the side for Canadian trade and it is therefore to be hoped that every attention will be given the development of "white fuel" from Canada's unlimited facilities for producing power. Much of the importation is of soft coal for the production of power. Development of water along the lines suggested should result in decreasing our coal imports, and will furthermore allow the extension of electric energy to every town and hamlet throughout this country and thus bring about better living conditions.

The Customer's Confidence

NOW is the time when those hardware merchants in whom customers have confidence, will reap their rewards. No buyer wants to make a purchase to-day if to-morrow he will be able to make the same purchase with a less expenditure of money, and he will very often be guided by the merchant's advice. If a policy is followed, such as it outlined in an ad used by one merchant wherein he takes the stand that reductions will likely be gradual and will be passed on to the customer as soon as possible, the customers will have confidence that their interests are being looked after. As long as buyers have the idea that the merchant will hold prices up until he is forced to make drastic reductions, his trade will suffer as result. Better to base prices on replacement values at time of sale and so encourage more buying.

Says Conditions Are Better

WHEN Judge Gary, chairman of the U.S. Steel Corporation, states for publication that he can see nothing unfavorable on the business horizon, it carries weight.

"I think I am justified in saying," said Judge Gary a few days ago, "so far as my opinion extends, there is nothing unfavorable on the business horizon. Certainly at present the tendency is toward improved business conditions.

"That does not necessarily mean that there is a decided increase in volume, but it does mean that the general aspect, including the temper of business men, is better. If that continues, it is certain to have a decided improvement within a comparatively short time.

"As before stated, the principal reason for apparent dullness in some lines is that the purchasing public is waiting for such information as will influence it to conclude bottom prices have been reached. It should be evident to everyone that in certain lines or departments further decreases in selling prices are necessary and therefore likely to be reached. I have heard of cases where lower prices have been fixed by retailers than the prices they paid to the wholesalers for the same goods. It shows a disposition to make adjustments which have been determined upon for the purpose of complete readjustments, promptly disposing of stocks and of getting into a financial position which will enable the retailers to proceed in the regular way. And this is only an illustration of what must be done in all lines before we can expect good business.

"However, we all know by experience that after any movement of importance commences, as it progresses it gathers speed and will within a short time reach a momentum that means early completion of the movement.

"I see increasing signs of a disposition on the part of producers and wholesalers to recognize conditions and to submit to such reductions in selling prices as are necessary before a return to a normal volume of business."

Decline is Gradual in Hardware Prices

Inflation of Values During 1920 Not so Great as in Less Staple Lines—Not Necessary to Sell Below Replacement Values—Many Interesting Features of 1920 Trade

READJUSTMENT conditions prevailing during the year 1920 failed to bring about as acute a condition in the hardware trade as in some other lines of business, and from present indications it looks as though the hardware merchant will continue to be somewhat favored. It must be kept in mind that hardware is more of a necessity than a luxury and prices were not subject to artificial inflation to such an extent as some other lines. Therefore, while prices of some hardware goods are three times as high as before the war, the average advance is much less and the urgency of price reduction is not so apparent. Thus it is that with few exceptions hardware prices remained fairly firm during the first part of the price reduction campaign recently commenced and have declined very gradually since then.

Conditions have been such that hardware merchants have not found it necessary to sell at prices below replacement costs. What reduction is taking place is influenced chiefly by lower replacement values and therefore the process of bring about lower values in hardwar promises to be gradual.

Reviewing the trend of events during the year, it will be recalled that early in 1920 there was a scarcity of many lines, particularly those made from iron and steel, such as nails, pipe, sheets and plates. This condition later affected stoves and wares, kitchen utensils, etc. The scarcity was attributed to shortage of raw materials and poor transportation. That condition is now changed and of 66 basic lines which, taking an index figure of 100 as representing the price in January, 1920, now are represented by an average value equivalent to 111.

Present prices on iron and steel goods are higher in proportion but the declines recently on linseed oil, turpentine, cotton goods and ingot metals have tended to decrease the average advance.

Many manufacturers are catching up on production. Higher freight rates have assisted in the movement of materials and commodities.

Smaller Stocks

Hardware stocks are, generally, smaller now than earlier in the year and owing to uncertainty a hand-to-mouth buying policy has been adopted in the trade.

New hardware goods introduced to the trade during the year have consisted chiefly of electrical appliances and auto accessories. These, along with toys, represent three departments which are fitting in more and more to the hardware trade. There has been much trade development along these lines in hardware stores, during the past year.

While a careful buying policy has been adopted of late, collections have in many instances not been given the same care with the result that some jobbers report an increasing number of merchants recently showing a tendency to neglect credit accounts. This matter has not assumed any serious proportions however, as indicated by the fact that there have been no failures among hardware merchants for some time and credit men report general conditions will continue favorable as long as due attention is paid to collections.

Building operations have still been held largely in abeyance this year and it is noteworthy that hardware trade has continued in such good volume without this usual source of much business in builders' hardware, tools, paints, etc. The expected resumption of building next spring should be an important factor in this year's business.

During the past year there has been much criticism of the Government's tax legislation as introduced in the 1920 budget. Hardware merchants were in the vanguard of those making energetic protest to the luxury taxes as a cause of too much trouble and a deterrent to business. Some forms of licenses and the application of the sales tax have also come in for much protest. No doubt the protests mentioned played a part in the repeal of the majority of the luxury taxes.

Importations

Importations of hardware this year have been nearly double those of 1919. The exchange rate has had little effect on imports from the United States. Imports of cutlery and sheets from the United Kingdom have this year been below those of the pre-war period but are gradually improving. Glass is coming forward in small quantities from Belgium. It is interesting to note that a company has been organized to manufacture glass in Canada next year and an output sufficient to suply one-half of Canada's requirements is expected.

Exports

Canada's exports of hardware and cut-

(Continued on page 66)

Price Tendencies During 1920

Following is a table showing the price tendency during 1920 on sixty-six staple hardware lines. Taking 100 as the index figure representing the value on January 1, 1920, the value on December 31, 1920, on these lines was as follows:

Axes	114	Coal oil	130
Belting, Leather, standard	111	Gasoline	131
Sheet brass	86	Oakum, plumbers'	94
Carriage bolts	110	Tar paper, No. 1	128
Wash boards	126	Tarred paper, No. 1	128
Steel butts	100	Tarred felt	115
Range boilers	125	Coal tar, crude	132
Cement, Portland	109	Clay picks	110
Churns, hand	136	Pipe, galvanized, 1-inch	111
Canada plate	174	Lead pipe	107
Chain, proof coil	113	Ready roofing, 2-ply	109
Window glass	88	Rope, pure Manila, base	95
Sash cord, base	80	Cotton rope, base	70
Crow bars	112	Wood screws	120
Files (Canadian)	100	Shovels, 2nd grade	124
Grindstones	143	Sheets, galvanized	112
Hammers, sledge	114	Solder, commercial	72
Hinges, strap	100	Fence staples, bright	119
Bar iron, base	112	Wares, enamelled, standard	119
Sad irons	113	Do., Pieced tin	117
Lawn hose	120	Do., Galv., pails	114
Lanterns	120	Stove pipes	125
Lantern globes	178	Sash weights	183
Ingot metal, copper	78	Steel wire, bright, base	107
Do., Tin	67	Screen wire cloth	97
Do., Lead	74	Clothes wringers	122
Do., Spelter	69	Cotton waste	121
Do., Aluminum	109	White lead in oil	105
Washing machines	131	Linseed oil	44
Lawn mowers	138	Turpentine	60
Wire nails, base	111	Mixed paints, colors	100
Do., 1¼-inch	118	Putty	118
Horse shoe nails	106	Rosin	78
Poultry netting	110		

New Features For O. R. H. A. Convention

F. A. Maycumber, Sales Manager Winchester Repeating Arms Co., to Speak on Chain Stores —Exhibit Booths Rapidly Taken up in Anticipation of Big Turnout

A NUMBER of new features are being constantly added to the programme for the sixteenth annual convention of the Ontario Retail Hardware Association to be held in Hamilton from February 14 to 18 inclusive. Details of the programme were outlined in last week's issue of Hardware and Metal. Since that time word has been received by the secretary that F. A. Maycumber, sales manager Winchester Repeating Arms Co., of New Haven, Connecticut, will address the convention on the subject, "The Chain Store Proposition." The speaker will no doubt be heard with much interest owing to the development of chain hardware stores in the United States by the company he represents. This feature is scheduled for 9.30 a.m. on Thursday, February 17, at the meeting at the Armories.

Booths Rapidly Taken Up

The seventy booths in the Armories have all been arranged for by manufacturers and a number of late applications for concessions could not be filled. The rapidity with which the locations were secured when considered in view of the expense and work involved in fitting up an attractive booth, indicates that manufacturers as well as the officers are expecting a much larger representation of hardware merchants than have attended former conventions. The large number of interesting programme features arranged for justify wholehearted support on the part of Ontario hardware merchants.

Among the interesting and instructive features, apart from the actual business of the convention, are found the following: Addresses on the business outlook for 1921, as follows—"The Iron and Steel Market," Robert Hobson, president the Steel Co. of Canada; "Manufactured Products," John M. Taylor, president Taylor-Forbes Co.; R. J. McCormick, general sales manager Canada Foundries & Forgings Co.; Col. A. M. Hatch, Canada Steel Goods Co.; "Paint and Oil Trade," W. J. Lortie, Toronto manager Dominion Linsed Oil Co., and John Irwin, McArthur-Irwin Co., Montreal, representing the "Save the Surface" campaign.

Mutual Fire Insurance

Address on Mutual Fire Insurance as Carried by Retail Associations, by N. S. Jones, manager for Canada of the Northwest Mutual Insurance Co.

Complimentary banquet tendered by Wood, Alexander & James, Hamilton.

Addres on the Chain Store Proposition by F. A. Maycumber, salesmanager Winchester Repeating Arms Co., New Haven, Conn., originator of the Winchester chain hardware stores in the United States.

Address on Co-operative Buying by Wm. Hargraves, manager Drug Trading Company, Toronto.

Brief talks by exhibitors outlining selling points of various lines.

Talk on advertising to bring results.

Visit to Hamilton factories and investigation of manufacturing processes as applying to various lines of hardware.

Free Discussion of Hardware Problems

In addition to these extraordinary features there will be free discussion of all problems now affecting the retail hardware trade. This will take the form of a question box and game of cards. With the latter questions will be answered first by the members, then by the president or secretary.

Two films will be shown during the convention. An industrial picture will be shown on Monday evening, and on Tuesday evening a film story dealing with the various processes in the manufacture of rope and binder twine will be shown by the Plymouth Cordage Co.

The exhibition hall at the Armories, where an orchestra will be in attendance during the afternoons, will be of interest and educational value.

It is doubtful if more interesting features could be crammed into a four-day convention, and it will amply repay any and every hardware merchant in the province to attend and learn what is going on in the trade.

As this issue goes to press the secretary of the O.R.H.A. advises that the following speakers will also be heard at the Wednesday morning session of the convention, coming, in order, after the speakers on Paint and Oil Trade:

The Wholesale Trade—Col. Robert Starke, president Canadian Wholesale Hardware Association; S. H. Alexander, Wood, Alexander & James, Hamilton, Ontario.

The Retail Trade—Nelson Mills, vice-president O.R.H.A.; G. E. May, Toronto; F. B. Smith, Belleville; G. A. Binns, Newmarket; A. J. Wright, Hamilton, all members of the executive committee.

Trade Shows Improvement

CANADA'S trade returns for the month of December are thought by some to offer definite evidence that industrial conditions are on the mend and that the worst phase of the present condition is over. One of the most encouraging features of the figures is that there is a marked increase in our exports of domestic products. The increase in these exports is noted from the following comparison: December, 1919, $133,541,000—December, 1920, $149,284,000. The nine months of the fiscal year show exports valued at $974,920,000, an increase of $33,075,000 over the corresponding exports during 1919. This is despite price declines in many of the lines which form the major part of our exports.

The buying of luxuries in foreign markets by Canada is being checked, according to December figures. Imports of foreign foodstuffs, textiles, etc., show considerable decrease. There is still a large importation of non-metallic minerals, chiefly coal. The total imports, including coal, glass, petroleum, salt, etc., but of which coal is the chief item, practically doubled in value during December, 1920, compared with December, 1919.

"Knowledge is Power"

Progressive hardware merchants realize the value of exchanging ideas and learning what is developing in the trade. Under prevailing conditions it is only by securing such knowledge that an intelligent course of merchandising can be pursued. There will be much of educational value at the Ontario Retail Hardware Convention in Hamilton and it will well repay you to spend the following dates in Hamilton:—

February 14-15-16-17-18

News of Western Canada

Convention of Alberta Retailers

Government Has Conceded Right for Merchants to Take Stock at Low Price if Declined —Avoid Taxation on Losses.

CALGARY, Jan. 19 (Special).—The Alberta branch of the Retail Merchants' Association is holding its annual meeting here this week. Following the registration and receiving of delegates, an address of welcome was given, after which the president, secretary and treasurer made their annual reports.

James Kellas, secretary of the Retail Merchants' Association, in a message sent out to the members, stated that the government had been asked to concede the right to merchants to take their stock at the end of their year at the lower price if the commodities are declining in price, and they have agreed to do this. This is, that retail merchants should not have to pay taxation on their losses as a result of the slump in prices. For instance, if a merchant has something that cost $60, and when repurchasing it will cost $40, the retailer must take stock at the lower price. This will protect the merchant against taxation on losses.

A discussion on what should be substituted for the luxury tax will take place at this convention. An increase in the sales tax or a bulk sales tax are being suggested. Many other matters of interest to the retail trade are also being considered.

Calgary Merchants Provide a Fine Rest Room for Shoppers

Calgary, Jan.—The rest room for rural shoppers is now ready for the use of the public. The retail merchants' bureau of the board of trade intends to see that it is properly advertised, and at a meeting of the bureau it was decided to notify all secretaries of the U.F.A.'s and U.F.W.A.'s within a radius of one hundred miles of the city of the convenience that will be furnished shoppers to the city. In addition to this there will be notices posted in all post offices within the same radius, signs will be placed in conspicuous parts of the city and it is probable that notices will appear in all country papers to that effect.

The retail merchants are delighted with the excellent arrangements which have been made at the rooms on Seventh Avenue opposite the city hall and feel that this will be a decided acquisition to the city and mean a great deal of advertising as to the enterprise of the merchants.

Expects Big Aluminumware Trade

Winnipeg.—E. Roderick, general manager of the Louis McLain Co., Ltd., of Toronto, is on an extended business trip to their Winnipeg branch and during an interview with Hardware and Metal stated that his firm have just finished their new factory in Toronto and new machinery is to be installed very soon. He stated that the firm is now manufacturing 500 lines of aluminumware and during the last two months have put on the market over thirty-seven new lines.

Notes of Wood Vallance, Ltd.

Winnipeg.—Wood, Vallance, Limited, Social Club gave a delightful entertainment in the form of a toboggan party and dance. Sliding started at 7 o'clock at the Kennedy street slide, after which all hands returned to the warehouse where the office floor had been specially treated for dancing. A buffet supper was served and dancing was indulged in until the wee small hours. The committee consisted of Miss B. M. Parkinson, Convener; Morley Paul, George Horn, Grant McLean and Dave Miller.

* * *

Winnipeg.—Wood, Vallance, Limited, hockey team recently journey to Beausejour where they played the local team a friendly game. The brand of hockey put up was an agreeable surprise to the big crowd who attended the game and the result was in doubt at all times. The final score was 7 to 5 in favor of Beausejour. Several members of the staff accompanied the team and all hands report that they enjoyed a splendid time.

Following is a list of the players for Wood, Vallance, Ltd.

Goal—Don McKinley.
Left defence—Wm. Thompson.
Right defence—Joe Lyons.
Centre—Morley Paul.
Right wing—Alex. Morrison.
Left wing—J. Fellowes.
Substitutes — Dave Mackie, Dunc. Irwin, Dick Bird.

* * *

Winnipeg.—Wood, Vallance Ltd., bowling team started the second series in the Merchants' Bowling League by capturing three straight games.

Western News

Winnipeg.—The International Varnish Co., Ltd., Toronto, are operating a new branch at St. Boniface, Winnipeg.

Winnipeg.—J. B. Curran, manager of the Brandon Hardware Co., Brandon, Man., was a visitor to Winnipeg.

Roderick Wynne Succumbs

Winnipeg.—Roderick Wynne, Calgary, traveller for the J. H. Ashdown Hardware Co., died at the General Hospital of pneumonia. In his usual good health Mr. Wynne came to Winnipeg to attend the company's convention, and it was while on this mission that he was stricken with the disease. He was a native of Campbellford, Ont., forty-six years of age and unmarried. The remains will be forwarded to Norwood, Ont., where deceased has a sister residing.

Group Insurance for Employees

Winnipeg.—The Winnipeg Paint and Glass Co., Ltd., have arranged for group term insurance for the employees. The insurance ranges from $500 in the case of employees at least one year on the payroll to $3,000 in the case of employees on the roll for fifteen years and over.

J. H. Ashdown President W. C. Colonization Ass'n.

Winnipeg.—J. H. Ashdown, of Winnipeg, was elected president of the Western Canada Colonization Association at a meeting of the executive of that organization. M. A. M. Brown, of Medicine Hat, was elected vice-president. A general manager was agreed upon, but his name has not been announced. It is understood that an active campaign for immigration will be instituted soon, and that agents will be sent to the United States to that end for this year's work.

Municipally Controlled Stores in Alberta

Edmonton, Alta., Jan.—Retail shops all over Alberta are likely to be taken from under the provisions of the Factory Act and put under the control of the municipal and civic bodies. This grew out of a request, submitted to the government by a delegation from the Retail Merchants' Association, to the effect that a shops act be passed for the special regulation of retail trade in cities, towns and villages.

The fixing of opening and closing hours and weekly half holidays was one of the chief reasons why a shops act was desired, it was said by the delegation.

Events in the Trade

Business Changes

Montreal.—Thos. Moore & Son have dissolved partnership.

Obituary

Gananoque, Ont.—E. L. Atkinson, president St. Lawrence Steel & Wire Co., is dead.

Personal

Toronto.—M. A. Daly has succeeded the late W. F. Ferguson, as eastern Ontario representative for the Martin Senour Co. Mr. Daly has been with this company for the past fifteen years.

* * *

Toronto.—Gordon Houlden, formerly manager of Glen A. Henry & Co. Hardware Store, of Oshawa, Ont., who has been the Eastern representative of the 1900 Washer Co., Toronto, for some months, is now transferred to Montreal where he will be in charge of the company's special selling department in Henry Morgan & Co.'s store.

* * *

The Continental Sales Co., a new firm of manufacturers' agents, have opened an office at 24 Adelaide St., Toronto.

* * *

Montreal.—Among the visitors who will call on the local hardware trade in the near future are A. A. Dwight of Remington Arms Co., and Mr. Sheafe of Thos. Laughlin & Co., Portland, Maine, manufacturers of marine supplies.

* * *

Montreal.—Ernest Bureau, of Richardson & Bureau, has left for a trip to the Maritime Provinces, and will be away for about a month's time, calling on the jobbing trade.

* * *

Montreal. — Visitors calling on the Montreal hardware jobbers this week from outside points include: F. A. Ray, Stevens-Hepner Co., Ltd., Port Elgin, Ont.; Mr. Dery, Canada Needle & Fishing Tackle Co., Ltd., Toronto, Ont.; Roy Miller, Carbarundum Co., Ltd., Niagara Falls, Ont.; Walter Begg, A. C. Gilbert-Menzies Co., Ltd., Toronto, Ont; Mr. Fraser, Crescent & Co., Meriden, Conn.

Fire Destroys Halifax Hardware Store

Halifax.—Fire starting from a defective wire in the toy department of Morton & Thompson's hardware store, Sackville street, swept through the three-story brick building with extraordinary rapidity and an hour later had destroyed virtually the entire contents of the building and left only the brick walls and a portion of the roof standing. The loss is estimated at $150,000.

The stock of hardware, toys and sporting goods destroyed was valued at $50,000, with insurance of $23,000. The building, which was owned by the hardware firm, was valued at $75,000, with $40,000 insurance.

Western Ontario News

At the annual banquet of the members of the Builders' Exchange at Sarnia the opinion was general that a big year's building is ahead and that business men will have a most satisfactory year. Among those who responded to toasts were H. A. Couse of the Sarnia Hardware Co.

* * *

Roy Taylor of Jones and Taylor, hardware merchants at Amherstburg, has returned after spending two weeks in Boston, New York and Syracuse.

* * *

Negotiations are well under way at London, Ont., for the purchase of twelve acres in East London on which an American Metal company will locate its Canadian branch.

Changes in Stanley Steel Co. Staff

Hamilton, Ont.—H. C. Hatch has been appointed general manager of The Stanley Steel Co., Ltd., succeeding D. B. Marwick, who becomes manager of sales.

Expect Fresh Start For British Empire Steel Merger

Conferences recently held in England by Anglo-Canadian steel magnates concerning the British Empire Steel merger are said to have resulted in a satisfactory understanding. Roy Wolvin, President of Dominion Steel Corporation, and D. H. MacDougall, President of the Nova Scotia Steel & Coal Company are now on their return to Canada, J. W. Norcross, President of the Canada Steamship Lines, is remaining in England. It is stated that financial arrangements for the development of Canada's steel resources were practically settled at the meeting, and that if Messrs. Wolvin and MacDougall can make a quick settlement regarding the Canadian firms which will enter the merger the undertaking can be launched within three or four months. The recent hitch in negotiations is said to have resulted in a complete change in plans.

Canadian Firm Buys Rights to New Pipe Process

The National Iron Corporation, Ltd., of Toronto has purchased the sole rights of manufacturing iron piping by a new process, invented by a Brazilian engineer, Senhor Sensaud de Lavaud. It is claimed that much lighter and yet stronger iron piping can be made by this process than in the usual way. The process is said to reduce the number of operations in the manufacture of piping from thirty-one to four.

Many Attend Banquet For A. A. Bittues

Montreal.—A farewell dinner was tendered to A. A. Bittues, managing director of the Gillette Safety Razor Company, who leaves soon for the Orient to represent the parent company or director of foreign sales. A large number of his friends gathered at the Montreal Club and the guest was the subject of the best wishes of all present. Among the speakers were Robert F. Jones, of the Bell Telephone Company, who occupied the chair, F. W. Stewart, Walter Hagar, Mr. Justice Marechal, Charles Gardner, on behalf of the North Lake Fish and Game Club, Col. Geo. Ham, and others.

Reorganize Quality Tool Works

Montreal.—The Quality Tool Works has undergone reorganization and is now a limited company with a capital of $100,000. The plant, located at 1554 St. Patrick street, Montreal, Que., has been compretely refitted with modern machinery for the production of small tools for the hardware trade. Mr. Snyder, formerly connected with the original concern, and who has expert knowledge of the manufacture of small tools, is retained as superintendent of the plant, and is also a director on the Board of Directors.

Richardson & Bureau, agents, of Montreal, have been appointed general sales agents for Canada, with the exception of the Province of Quebec, which is being handled by the head office direct. The plant is at present running full time and new lines will be added from time to time. Two qualities will be featured, the "Phoenix" brand will be the highest grade, hammer forged, electric tempered, with a blued finish. Distribution will be made through the wholesale hardware firms and catalogues may be secured by the trade upon request.

Steel Works Manager Receives Presentation

Toronto.—S. R. Cound, general works manager of the Baldwin Steel Corporation, was, on the occasion of his departure for England on a holiday, presented by the staff with a handsomely engraved cigarette humidor, bearing the inscription: "Presented to S. R. Cound, Esq., by the staff of the Baldwin Canadian Steel Corporation, Ontario, Canada, in commemoration of the opening of the works and the successful production of sheets and tin plate in the Dominion of Canada, and as a mark of their attachment to him."

The presentation was accompanied by a laudatory address, to which Mr. Cound made a suitable reply.

Will Fight Wage Reduction

That they will fight by every legitimate means in their power the 20 per cent. wage reduction ordered by the Dominion Iron & Steel Corporation was the decision reached at a mass meeting of Steel Workers' Union, Sydney, N.S. Speaker after Speaker took the floor and declared that there was nothing in either the cost or price of steel or in the trend of the cost of living to justify the drastic wage cut proposed by the Steel Corporation.

An effort will first be made, it is said, to induce the company to change its announced purpose of making the 20 per cent. cut, but if negotiations in this direction fail, then an appeal will be made direct to the Federal Government.

U.S. Manufacturers Appoint Canadian Representative

Montreal.—A. J. Hopkins, formerly head of the automotive equipment department of the Canadian Fairbanks-Morse Company, has opened his new office at 392 St. James St. W., Montreal, being appointed Canadian representative for the following American manufacturers: Black & Decker Mfg. Co., Baltimore; Clover Mfg. Co., Norwalk, Conn.; Continental Auto Parts Co., Columbus, Indiana; Edgar C. Guthard Co., Chicago; Locktite Patch Co., Detroit and Windsor; and David W. Onan, Minneapolis.

To Explain Work of Research Council

The Canadian Manufacturers' Association will give a luncheon at the Royal Connaught Hotel, Hamilton, Ontario, at 12.30 p.m., on Thursday, January 27, 1921, after which Dr. A. B. Macallum, chairman of the Research Council of Canada, will deliver an address. Dr. Macallum will tell what the Research Council has done up to the present and what the Council recommends should be done in the future in order to develop Canada industrially to the greatest possible extent.

St. John Hardware Clerks' Annual Meeting

Co-operate With R. M. A. re Early Closing Law—Sound Financial Standing—Favor Daylight Saving

ST. JOHN, N.B.—The second annual meeting of the St. John Hardware Clerks' Association was largely attended by representatives from the staffs of the various hardware stores in the city. President H. D. Sullivan in a brief address reviewed the work done by the association during the year, and referred to the generous action of the St. John hardware merchants in granting the Saturday half holiday during the months of January, February and March, making a total of seven months out of the year on which the half holiday was in effect. He expressed appreciation, on behalf of the members, of this act of co-operation on the merchants' part.

Not a Union

Mr. Sullivan, who holds a responsible position with the S. Hayward Co., gave in detail the aims and objects of the association and strongly urged the members to always bear in mind that theirs was not a union, nor was it formed with the intention of at any time enforcing any demands. On the other hand, the object was to work along co-operative lines, and to ever bear in mind that the interests of merchant and clerk should be one. A successful merchant was necessary before we could have successful clerks or salesmen, and by all pulling together it was possible to make an all round success of any undertaking.

Co-operate with R.M.A.

The vice-president, R. A. Willet, who is senior bookkeeper for W. H. Thorne & Co., Ltd., then addressed the members. Mr. Willet dealt with the early closing law and said that although the hardware employees were enjoying very reasonable working hours, and had no complaint of any description to lodge, clerks in other lines of business were not so fortunate, in many stores they were having to work until ten or eleven o'clock every night. Mr. Willet went on to say that the early closing law, although passed some years ago, had never been put into effect and was full of loopholes through which it could be evaded, even were it enforced. He suggested that the association co-operate with the Retail Merchants' Association and go into the matter thoroughly, with a definite aim in view with regard to hours, holidays and the class of store to which it would apply. The Retail Merchants' Association had on a former occasion given backing to the early closing movement when brought up by the Dry Goods Clerks' Association, but it had fizzled out owing to divided opinion amongst the clerks themselves, and lack of co-operation with the Retail Merchants' Association. Mr. Willet advised the association to revive the movement.

Good Financial Standing

The president then called on the secretary-treasurer, P. H. Butler, to read the report of the year's work. The report showed that the association had taken an active part in all matters pertaining to the interest and welfare of hardware clerks, and that it was in a flourishing financial condition, having a large surplus on hand.

Election of Officers

The election of officers then took place, which resulted in the return to office of H. D. Sullivan as president, R. A. Willet as vice-president. P. H. Butler was again nominated for the office of secretary-treasurer but declined nomination owing to business pressure. P. C. Johnson and E. H. Marshall were then nominated and Mr. Johnson elected. Mr. Johnson is on the staff of T. McAvity & Sons, Ltd., and has been an enthusiastic supporter of the association, taking many active parts. The managing committee is as follows, each being a representative of the staff of the different St. John hardware stores:—J. Henderson, H. Murphy, W. O. Bagnell, R. McKenzie, E. H. Marshall, T. A. Graham, G. Logue, W. Dixon, J. Walsh and A. Baxter.

The association decided to hold a big bean supper and skating party in the near future.

Favor Daylight Saving

The association went on record as being strongly in favor of daylight saving as carried out last year and urged that the city council should be impressed with the necessity of taking up the matter in good time.

Pexto Annual Sales Convention

Southington, Conn.—Members of the sales force of the Peck, Stow & Wilcox Company, together with the executives, met in Southington on the occasion of their annual sales meeting, which was from all standpoints a great success. Unusual interest and enthusiasm was in evidence. Pertinent subjects were discussed and company policies carefully reviewed. The entire selling organization, while appreciating present conditions, expressed optimism concerning the immediate future. At the close of the meeting a very enjoyable banquet was tendered locally to the salesmen, executives and other guests, and repartee was the order of the evening.

More Aggressive Selling Needed

Sales Staff of Steel Co. of Canada, in Convention—Present Market in Favor of Buyer—Better Trade Expected Soon

THE ninth annual sales conference of the Steel Co. of Canada was held at Montreal on January 13, 14 and 15, the sessions taking place at the Windsor Hotel. The gathering was representative of the entire organization, and a number of the executives and factory heads were also there, including the works manager and superintendents from the plants at Montreal, Brantford, Hamilton, Toronto and Belleville.

The Thursday morning gathering was largely of the get-together order, when the incoming visitors were welcomed by the committee in charge. Mr. Robert Hobson, president of the Steel Co. of Canada, presided at this gathering, assisted by Mr. R. H. McMaster, vice-president, both of them dealing with several matters of interest to the company. The secretary-treasurer, Mr. H. H. Champ, went extensively into figures dealing with the sales of the organization, and also with the exchange rate during the year 1920, pointing out that the average against Canadian money during that period had been 13 per cent. One point was brought out that was of special interest, and which by the way reflected no small credit on the collection department and the sales force, viz., that the losses through non-payments of accounts had amounted to only a small fraction of one per cent.

Mr. Lloyd Harris, a director of the company, was also one of the speakers at this session, having only a day or so before attended a meeting of the automobile manufacturers in Detroit, where the whole position had been thoroughly discussed. Mr. Harris made it clear that there was need for more aggressive selling now than for some time past. For a long time everything had been in favor of the seller, the real salesmanship had been allowed to lapse in many cases. The market was in favor of the buyer now, and salesmen ought to adjust themselves to these changed conditions. The meeting in Detroit had felt that things were definitely on the mend now, although the start might have to be made in a small way, but a better buying movement was looked for, and it should take on definite form early in April, and perhaps in some measure before.

The sales conferences themselves were presided over by Mr. H. T. Diplock, eastern sales manager, Montreal, and Mr. George Spence, western sales manager, Hamilton, able assistance being given by Mr. D. J. Black, assistant sales manager at Montreal, and Mr. Charles E. Harrison, assistant sales manager at Hamilton. Reports given by a number of the men from various parts of the Dominion dealt with many phases of trade and problems of salesmanship. The consensus of opinion was that trade was going to be better early in the year. Stocks in nearly every centre are low, and manufacturing concerns are not putting in their accustomed supplies of raw material, so when business does start to move there will be purchasing done on a fairly good basis.

Some of those who are accustomed to be present at the sales conferences, but who were not able to be there this year, through various causes, were Charles S. Wilcox, chairman of the Board of Directors, Cyrus A. Birge, one of the directors, George A. Simpson, special representative, Hamilton, Thomas Moore, assistant sales manager, Hamilton, and D. B. McCoy, of Vancouver.

The annual banquet at the Canada Club proved to be a thoroughly enjoyable affair, and the entire company stands ready to vote Mr. Hobson the one and only chairman for such an occasion. The toast to "our officers" was proposed by J. Orr Callaghan, works manager of the Canada Works, Hamilton, the response being given by Mr. Robert Hobson, president, Mr. R. H. McMaster, and Mr. H. H. Champ. "Our works," was responded to by Mr. Jaquays, works managed at Montreal, and Mr. R. G. Wells, works manager at Hamilton, also superintendents McEwen and John L. Smith of Hamilton, and Flaherty and Johnson of Montreal. "The Sales Organization" drew responses from Messrs. Spence and Diplock, sales managers of west and east respectively, Fred Perego and Stuart Kell. One of the most impressive incidents of the gathering was the response by Mr. Fesserton, of Montreal, to the toast of the "Visitors." Mr. Fesserton, who has retired from active life, was for fifty years connected with the Steel Co. of Canada and its predecessor, the Montreal Rolling Mills, which was taken in at the time of the amalgamation. Mr. Hobson issued a special invitation to him to be present at the banquet in Hamton next year to the sales force.

The committee in charge of the conference and banquet earned the thanks of the whole organization. They attended to every detail and left nothing undone that would make the affair a success. They were Messrs. H. T. Diplock, D. J. Black, A. Y. Paxton, S. N. Colcomb and E. M. Russell. About 150 attended the conference.

The Steel Poet Sings

The Steel Co. of Canada harbors in its Montreal branch a bit of a poet, in the person of H. E. Skeats. On top of the menu card used at the banquet of the sales organization were several verses from Mr. Skeat's quill.

Looking back over the restricted diets of war years the Montrealer lifts his voice and chants thusly:—

Good evening, gentlemen—take your seats,
And run your eye o'er this list of eats,
Food censors have vanished in ambient air,
So hew your way through the bill of fare,
Nor trouble yourselves with the awful thought
That you're putting away what you didn't ought!

I suppose you remember the days gone by
When on bacon, and butter, and beef you were shy,
When you dare not consume a succulent steak!
For fear that a Food Commandment you'd break
When the grub you ate, as it sank to rest,
Seemed to your sensitive souls to protest
That you had no right to devour, by gee,
The food that should nourish a refugee!

Hockey Match

On the evening of the banquet a fast and furious hockey match took place between the Steel Company of Canada team and the team of the Sherwin Williams Co., the former winning out with a score of 4-0. President Robert Hobson, of the Steel Company of Canada, in congratulating President Bean, of the Steel Company hickey team, jocularly remarked, "Sherwin Williams may cover the earth, but we put it all over them."

Winners of Geneva Cutlery Co.

The Manville Hardware Company of Prince Albert, Sask., were the Canadian prize winners in the recent window display contest held by the Geneva Cutlery Corp., and the prize window was dressed by L. K. Bradbury. Other Canadian prize winners were: The Sarnia Hardware Co., of Sarnia, Ont., and a window trimmed by A. E. Stephens, of the J. H. Ashdown Hardware Company of Calgary, was also among the prize winners.

Large Imports to U. K. of Canadian Safety Razors

Canada's exports of hardware and cutlery to the United Kingdom are not very extensive, comparatively, except in the case of safety razors (including blades and blanks), in which the Canadian product stood a close second to the United States. During November Canadian exports of this product numbered 1014 doz., valued at £8,350. In cutlery,

New Official of Leslie Tinware Co.

OTTAWA, Ont.—Walter Brown, late manager in Ottawa for the Swift Canadian Company, is now associated with The Leslie Tinware Co. of this city in the position of secretary-treasurer and sales manager.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of January 26, 1901:

"No retiring president of the Toronto Board of Trade—for a great many years at any rate—is more deserving of commendation than Mr. A. E. Kemp, M.P., the senior member of The Kemp Manufacturing Co." (Sheet Metal Products Co., Toronto).

* * *

"One of the four men appointed to the Upper House (Senate) during the past week was Mr. A. T. Wood, of the wholesale hardware firm of Wood, Vallance & Co., Hamilton, and one of the founders of the Dominion Board of Trade."

* * *

"At the last regular meeting of the Executive Committee of the Canadian Manufacturers' Association, Mr. Geo. H. Hees, of the firm of Geo. H. Hees, Son & Co., Toronto, and chairman of the Tariff Committee of the Association, introduced for discussion, the advisability of urging upon the Government the appointment of a Trade Commissioner for England."

* * *

"Seybold & Sons, wholesale hardware dealers, Montreal, suffered in the worst fire that has ever visited the city."

* * *

"An article on the relation of advertising to the cost of goods, written for Hardware and Metal by Walter H. Cottingham, President Sherwin-Williams Co., states the following truths:—"Good advertising does not make goods more expensive. Good advertising will lower the cost of doing business and if it does not do this it is not good advertising. We are often accused of making our prices high on account of our advertising. The fact is, if we did not do so much advertising and do it so well our prices would have to be higher."

* * *

"The death of Her Majesty Queen Victoria, and the accession of King Edward VII, are events that the commercial world cannot regard with indifference. The Queen's personality inspired much of the vigor and enthusiasm by means of which British trade and dominions have been extended since 1837."

Favorable Points in Industrial Outlook

A NUMBER of expressions of opinion concerning the industrial outlook have been made recently by officials of foremost Canadian companies. Some encouragement is given in some of these statements:—

President Robert Hobson of the Steel Company of Canada says: "If Labor becomes settled, particularly in the building trades, I look for a good revival of business in the spring of 1921, but if Labor leaders still continue to stir up strife between the employees and employers, it will certainly cause the revival of business to be postponed."

Vice-President A. Whyte of the Canadian Car & Foundry Company says: "So far as the iron and steel trades are concerned, the future is encouraging, in view of the admitted shortage of equipment of all kinds on the Canadian railways. Financial conditions may delay the placing of orders for a time, but it is felt that within the next two or three months these obstacles will be removed."

"The steel situation," says W. J. McKay of the Dominion Iron & Steel Company, "to us looks better and brighter than any of the other trades, and it is just a matter of sitting tight for another month or so."

"We look forward to excellent business in 1921," saye James L. Acker of the National Steel Car Corporation, Hamilton. "Our production will be increased, but we anticipate no difficulty in disposing of our additional output. Inquiries and orders keep coming in, and everything indicates that the country's buying power is more than sufficient to take care of the products of Canadian truck manufacturers for 1921."

Expect Big Roofing Trade

Manufacturers Looking Forward to Active Year—Prices Said to be at Lowest Levels—Resumption of Building Expected

"THE roofing industries today are experiencing a dull period, due perhaps to two main reasons, namely, the season of the year and the mental depression of the buying public. This period is expected to a certain extent each year; however, 1921 is perhaps exceptionally dull, due as stated to the latter cause," said Herbert Kennedy, general manager Standard Paint Co. of Canada, Ltd., to Hardware and Metal.

"We are not, however, expecting this quiet period to last for any great length of time, but rather are looking forward to one of our largest turnovers in the coming year," he added.

"Roofing at the commencement of the new year shows a decline to prices which we are fully convinced are at the lowest level that can possibly be reached for some time. Advances are more in line, we believe, than further declines. By reducing prices we will gain the confidence of the buying public, which is really needed today. I am informed that other manufacturers are doing this, and I join wholeheartedly with them and feel satisfied the outcome will be favorably realized by us. If we put our products on the market at present at a reduction, which we know in our own minds is the lowest possible, and find it necessary in the future to advance them, then the buying public will realize that the manufacturers are behind them.

Rags Are Reduced

"Rags, which are used most extensively in the making of our lines, are the only commodity that shows a reduction in prices. Asphaltum, the other leading raw material used by us, has advanced very considerably over last year's contract prices. Wages are as high as ever, although a standard of efficiency has been reached that helps us to determine a lower cost of production.

"Dealing with our own products, I believe roofing and felt products will be in great demand before many weeks pass. We look for the building trade to revive very extensively, and we know stocks are low in the warehouses. Some large jobbing houses are carrying not over twenty-five squares in stock; others, smaller, are without a stock completely."

When asked if their stock now on hand could meet a large demand, Mr. Kennedy stated their stocks were in fairly good condition, that during the quiet period a close observance was given the source of supply and quality and quantity were both ready for movement.

ASK STANDARD FOR GASOLINE

"Motor drivers tell me that the gasoline sold now is very inferior," said Coroner J. A. C. Evans, of Toronto, in reporting an inquest into a death caused by asphyxiation from gasoline fumes. "Considering the very extra and exorbitant price we pay for gasoline, the Government should see that we get as pure gasoline as it is possible to obtain. Impure gasoline is also stated to be far more dangerous in regard to fumes than the pure product. The Government is very lax. When we pay 45 cents a gallon for gasoline we should get pure gasoline. The Government should bring in a law to make gasoline sold conform to a standard purity."

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

"DURO" ALUMINUM FRY PANS

W. D. Shambrook & Co., Hamilton, Ont., manufacturers of the "Duro" line of aluminum ware, have added to their line of cooking utensils a heavy sheet

No. 133 Duro Fry Pan

aluminum fry pan made in two styles. No. 133 has cool steel handle, outside top diameter is 9¼ inches, bottom diameter 7 inch, and depth 1¾ inches.

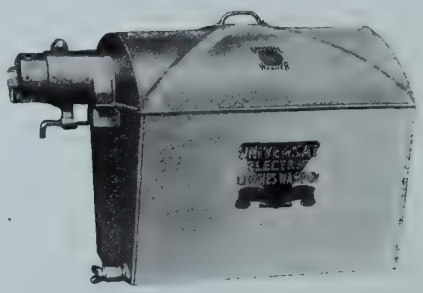
No. 134 Duro Fry Pan

No. 134 is the same size, but made in a heavier weight and has an ebonized wood socket handle. Both are polished finish inside and out.

EMPIRE HOSE NOZZLE

The Empire Brass Mfg. Co., London, Ont., and Toronto, are offering to the trade a Canadian-made brass hose nozzle. This nozzle, No. A-1981, is claimed by the makers to be of the same standard of quality as other Empire products, and to be of the highest finish and designed to give maximum service.

Empire Hose Nozzle and Coupling



The nozzle can be readily adjusted, it is stated, from a misty spray to a coarse one and then to a solid stream. Empire products can be obtained from the wholesalers or direct from the manufacturers.

UNIVERSAL ELECTRIC CLOTHES WASHER

The Universal Utilities Corporation, Alpena, Michigan, have brought out an electric clothes washer for which they claim several advantages.

It is said to have only four moving parts—all fully protected. There is no wood—every part is metal, and the tub and cover is constructed of Armco rustless galvanized iron. The cylinder revolves one way and is made of zinc with galvanized steel ends. There are no belts, chains or sprockets to break or get out of order.

It is claimed that the Universal washer will run on any kind of electric current and a specially wound motor is supplied that will operate from any 32 volt private farm lighting plant.

Universal Washer

A sliding adjustable extension arm enables the washer to be used in any stationary laundry tub, or it will operate, it is claimed, just as well in a bath tub. It can also be placed on a gas plate or gas range, doing away with the necessity of a separate boiler. Another advantage claimed for it in small flats is that when not in use it can be put under a table, in a closet or under the kitchen sink.

The capacity is stated to be six sheets or their equivalent, and cost is said to be within the reach of all.

WODACK PORTABLE ELECTRIC DRILL

The Wodack Electric Tool Corporation, 23-27 Jefferson avenue, Chicago, Ill., are offering to the Canadian trade a portable electric drill and grinder, for which they claim special features.

The motors of their own design and manufacture are said to be self-adjustable in speed to the size of the bits used. The switch located in the top handle and operated with the palm of the hand is of the make and break type. As pressure is released switch shuts off current, thus avoiding drills running empty and ensuring operator having full control. The gears are of chrome nickel steel and motor windings are protected from injury by liquid tight grease compartments.

Wodack Grinder

It is claimed that drills cannot be stalled when driven at their rated capacity. They are made in 4 sizes, and the ⅝ in. size is made in two speeds.

Wodack Drill

WODACK PORTABLE GRINDER

The grinder is designed for smoothing down castings, also for buffing and polishing. The motor is completely enclosed and is fan cooled. It is furnished with 10 feet of cord and an emery wheel size 4 x 1 x ¾ in.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

SIGNS are not lacking that the hardware business is acquiring a better tone. Orders are coming forward from the trade in larger number, though for small quantities, indicating careful buying for sorting stock. Steel prices are firm and there is thought to be little chance of any break, in fact a buying movement on a broad scale might cause a stiffening of prices. Pig iron has declined but buying has not been stimulated above immediate requirements. The non-ferrous metals are dull, with tin and spleter showing weakness.

Lower prices are quoted this week on rope, wrought butts and staples, strap and tee hinges, shelf brackets, axle grease, cup grease, conductor pipe, eavetrough, ridge roll, conductor elbows, cotton waste, cotton twine, sulphite sheathing, wrapping paper, grub hoes, mechanics' vises, pipe fittings, metallic shingles, sidings, ceilings, garages, culverts, roofing, etc. Galvanized sheets are easier in tone. The glass market is unsettled, with lower prices offered.

The paint trade will soon become active, and manufacturers, from present indications, are satisfied that the prospects are for good business early in the year. Paint prices remain firm.

Montreal Markets

MONTREAL, January 20.—Price reductions are again noted this week on several lines; although not great in most instances, it shows that hardware commodities are on a downward trend in a gradual movement, as predicted in Hardware and Metal in recent issues. Cotton twine is again reduced, sulphite sheathing, and wrapping paper are also on new lower levels. Revisions are made on vacuum and carpet sweepers, but no reduction is evident. Crowbars, clay picks, grub hoes and mechanics' vises are now lower. Metals, sheets, iron and steel are very dull, with no change in price. Pipe fittings show some reductions. Metallic shingles, sidings, ceilings, garages, culverts, roofing, etc., are reduced.

Cotton Twine Again Reduced

Montreal.

WRAPPING TWINE. — New prices are again quoted this week on cotton wrapping twine with a reduction of 3 cents under last quotations. Prices now quoted are: 3 ply in balls, 47 cents lb.; in cones, 44 cents lb.

Sulphite Sheathing Reduced $1 Per 100 Lbs.

Montreal.

SULPHITE SHEATHING.—Sulphite sheathing is now being quoted at $8.75 per 100 pounds, a reduction of $1 on previous prices.

Revised Prices on Vacuum Sweepers

Montreal.

VACUUM SWEEPERS.—New revised prices are now out on vacuum sweepers. "Grand Rapids" is now selling at $106, and "Superban" at $120.

Carpet Sweepers Are Also Revised

Montreal.

CARPET SWEEPERS.—These lines also come under the revision list this week, but no lower levels are shown. Present prices are as follows:

Grand Rapids, japd., $50 doz., nickeled, $55; Parlor Queen, $62; Universal, japd., $48; nickeled. $53; Princess, $57; Champion, $45 doz.

Clay Picks Showing Decline

Montreal.

CLAY PICKS.—A decline of $1 dozen is reported on clay picks this week and new quotations are as follows: 5 to 6 pound, $11.50 dozen; 6 to 7 pound, $12.50 dozen; 7 to 8 pounds, $13.50 dozen.

Kraft Paper Now 15 Cents a Pound

Montreal.

WRAPPING PAPER.—Present quotation on kraft wrapping paper is 15 cents per pound.

Expansive Bits Show Reduction

Montreal.

EXPANSIVE BITS.—Clark's expansive bits are reduced in price. No. 1 is now selling at $26 a dozen and No. 2 at $37.20 a dozen.

Machinists' Vises Are Quoted Down

Montreal.

VISES.—Although the new quotations were not available at time of going to press, it was stated today that a reduction had been made and prices will be quoted next week on machinists' vises.

Revised Prices on Shelf Hardware

Montreal.

SHELF HARDWARE.—Revised price lists are now in the hands of the trade from the Canada Steel Goods Co., Ltd., and Taylor-Forbes Co., Ltd., and show changes in prices of shelf goods. A reduction of approximately 5 per cent. is quoted on these lines.

Decline Noticed in Grub Hoes

Montreal.

GRUB HOES.—A reduction is quoted on grub hoes and present prices are as follows: 3 lb., $10.50 dozen; 3½ lb., $11 dozen.

Scrap Metals Continue Dull

Montreal.

WASTE MATERIALS.—The market on waste materials can best be described as being in a rather stagnant condition for the last two months. Although a

slight firming up would be reported one week, the next would show an easier tendency, prices fluctuating on the same lines. Today a local dealer states that a few more enquiries are being made and it is probable that an improvement may be looked for.

DEALER'S BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 07
Red brass	0 12½
Light brass	4 50

18 and 20 gauge	11 10	10 75

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Corrugated Sheets Register Decline

Montreal.

CORRUGATED SHEETS. — In line with other galvanized products, corrugated sheets show a reduction in price this week. The reduction on these is about the same as on the other lines, namely, 10 per cent. There is practically no movement at present. However, this is considered seasonable.

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25

Class C	0 13	0 20

Add 17½%.

Season Practically Over for Heating Stoves and Ranges

Montreal.

STOVES AND RANGES.—The season for stoves and ranges being well advanced is having its effect on sales, and a very slow movement is in evidence. Some stove foundries are now closed for the period of stocktaking.

10% Reduction on Metal Roofing, Siding, Shingles

Montreal.

SHEET METAL PRODUCTS. — New lower prices, effective from January 5th, 1921, are shown on metal shingles, sidings, corrugated iron, tiles, roofing, corner beads, crestings, cornices, culverts, well curbing, flumes, silo covers and garages. Also on inside metal ceiling and wall material.

Oil and Gasoline Remain Firm

Montreal.

COAL OIL AND GASOLINE.—Local prices are still holding on oil and gasoline. The demand continues fair and seasonable. Quotations are 29 cents for coal oil, and 43½ cents for gasoline.

Fuel Oil Remains Unchanged

Montreal.

FUEL OIL.—Local prices on fuel oil are unchanged, quotations being: $14.40 bbl. in tank car lots, with 2c added per gal. in barrels. Although it was reported from the Pacific coast that steamship operators could not get their fuel oil contracts renewed for 1921 on account of shortage, it is now understood that all contracts have been renewed.

Lower Prices Lubricating Oils, Greases, Etc., Likely

Montreal.

OILS AND GREASES—Following the reduction of crude oil, which went into effect last week, a decline in the price of lubricating oils, greases, etc., is looked for at a very early date.

Lower Prices Quoted on Rope

Montreal.

ROPE.—Pure Manila, Beaver manila, New Zealand hemp, sisal and lathyarn are all affected this week by the lower prices coming out. It is probable this is the result of manufacturers of Canadian rope wanting to help stimulate a stronger home market for their products. Export trade is hampered to a great extent by exchange rates; this, as explained by one large manufacturer, had its effect on raw materials from the United States.

Pure manila shows a reduction of 3½ cents, Beaver manila and New Zealand 2 cents, sisal and lathyarn 2 cents on base prices.

New quotations are as follows:

Pure Manila, 26c lb. base; Beaver or New Zealand, 21c base; Sisal and Lathyarn. 19c base.

Zinc Sheets Show a Little Lower Price

Montreal.

LEAD PRODUCTS.—The demand for lead products continues very normal, considering the season of the year. Leads and solders remain unchanged in price, but zinc sheets are quoted one cent lower. Present quotations are as follows:

Lead pipe	0 13½
Lead waste	0 14½
Note.—Lead pipe is subject to a discount of 10%	
Lead traps and bends	Net list
Lead wool, lb.	0 13½

Do., 4 to 8 lbs. sq. ft.	0 10
Cut sheets ¼c lb. extra and cut sheets to size. ¾c lb. extra.	
Solder, guaranteed, lb.	0 29½
Do., strictly, lb.	0 27½
Do., commercial, lb.	0 24½
Solder, wiping, lb.	0 25¼
Solder wire (8 gauge)—	
40-60	0 30
45-55	0 31¾
50-50	0 33¾
Zinc sheets, casks	0 14½
Do., broken lots	0 15½

Crow Bars Now Selling at $10.50 Per Cwt.

Montreal.

CROW BARS.—These goods show a reduction this week and are now quoted at $10.50 per 100 pounds.

Slump Affects Different Metals

Montreal.

INGOT METALS.—The feature of the metal market this week is the big slump on the London market, this affecting

practically all metals, although more effective on tin where it dropped £20 in two days.

TIN.—The big slump in London, as stated, has had its effect on tin, rendering it very unsettled at present. No special reason can be given locally for this decline. Local price is 42 cents.

COPPER.—In sympathy with tin, copper has eased off in London. However, in New York it has held up pretty well. Situation here is unchanged and prices are 19½ cents on electro and 19 cents on casting.

LEAD.—Lead has held fairly steady this week and shows no sign of weakness as in other metals. Local price is 7½ cents.

SPELTER.—Spelter has declined several pounds in London. It is also easier in the States. The demand is very light. Price 8 cents.

ANTIMONY.—This metal shows a little firmer and the demand is improving. Price unchanged at 8½ cents.

ALUMINUM.—Aluminum shows a little easier this week. Price now quoted is 34½ cents.

Toronto Markets

TORONTO, Jan. 20.—The outstanding feature of the week is the decline in the price of rope. This is the fourth decline in four months, and is the largest one in amount.

Other reductions include wrought steel butts and strap and tee hinges, shelf brackets and staples. Lower quotations are made on steam cylinder oil and axle grease and cup grease. Reductions have been made in cotton waste prices.

Bar iron and steel are unchanged, but the smaller sizes are back at the same differential as formerly. Galvanized sheets are easier and the tendency is lower. Wrought pipe is unchanged, but a new list is out to cover freight changes.

Although orders are generally on the small side and apparently show that a careful buying is in progress, wholesalers report that results so far during the new year have been up to expectations.

Rope Prices Again Decline

Toronto.

ROPE.—A further reduction, dating from January 14th, has been made on rope, and pure manila is down 3½ cents per pound; Beaver manila and New Zealand hemp two cents; and sisal and lath yarn two cents.

It is interesting to note the gradual decline on this product. There have been four changes in rope quotations during the past four months. Pure manila was quoted at 35½ cents during this last summer, and at the beginning of October a reduction of 2 cents was made to be followed by one of 2½ cents on November 13th. On December 9th a further decline of 1½ cents took place, and now another 3½ cents has been taken off, making in all a reduction of 27 per cent. since last September.

Pure Manila, basis	0 26
Beaver Manila, basis	0 21
New Zealand hemp, basis	0 21
Sisal, basis	0 19

Above quotations are basis prices, ¾ in. and larger diameter. The following advances over basis are made for small sizes: ⅝ in., 1½c; 9-16 to 7-16 in., inclusive, 1c; ⅜ in., 1½c; ¼ and 5-16 in., 2c; 3-16 in., 2½c extra.

Single lathe yarn, basis	0 19
Double lath yarn	0 19½

Smaller Sizes of Bars On Old Basis

Toronto.

BAR IRON AND STEEL.—There is not much change in bar iron and steel during the past week, but the 3/16 inch, and lighter are reduced 25 cents, making the differential 50 cents and leaving it as it was before the last reduction in base prices.

The demand is still light and little improvement is expected for a week or two. In eastern U.S. markets new business continues light, and the output this month is likely to be less than December, it is stated. A comparison of American prices with those of 1915 shows pig iron at 130% advance, but also shows coke at 178% advance and wages 130% higher. Present quotations are the following:

IRON AND STEEL

Common bar steel, 3-16 in. dia. and lighter	$ 5 25
Common bar steel, ¼ in. and heavier	4 75
Common bar iron, 3-16 in. dia. and lighter	5 25
Common bar iron, ¼ in. and heavier	4 75
Angle base	4 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 25
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	28 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	6 00
Norway iron	15 00
Toe caulk iron	6 70
Hoop steel	7 50

Pipe Quotations Hold Unchanged

Toronto.

WROUGHT PIPE.—Pipe seems to be a commodity that there is still a good demand for. Smaller sizes are showing a little improvement, but could be better yet.

Reports from U.S. markets indicate that unfilled orders will keep the pipe mills operating well into the spring months.

A new list, No. 48, was issued, effective Jan. 3rd 1921, on account of change in freight rates, but prices remain unaltered and will be found on current market quotation pages.

New Lists and Discounts On Eavestrough

Toronto.

EAVESTROUGH.—As announced in last week's issue of Hardware & Metal new lists on eavestrough have been printed and the new prices show a reduction of from 17 to 18 per cent. according to size.

Prices of new list are higher than old list, but instead of being plus 25 per cent., the new discount is 50 and 10 per cent. off list. New quotations are as follows:

EAVESTROUGH—O.G. Square head and half round.—8-in. girth, List, $15.90 per 100 ft.; 10-in, $17.70; 12-in., $21.20; 15-in., $28.80; 18-in., $36.50.

Less 50/10 per cent.

Conductor Pipe Shows Reduction

Toronto.

CONDUCTOR PIPE.—New lists issued for conductor pipe show a reduction of 17 per cent. and plain round corrugated pipe is now quoted at 50 and 10 per cent. off new list. Old prices were plus 25 on old list. Following are new quotations:

CONDUCTOR PIPE—Plain round or corrugated—per 100 feet, in 10-ft. lengths: 2-in., list, $18.40; 3-in., $22.30; 4-in., $29.60; 5-in., $40; 6-in., $49.

Less 50/10 per cent.

Lower Quotations On Conductor Elbows

Toronto.

CONDUCTOR ELBOWS.—New lists are out on conductor elbows, and show a decline of approximately from 5 to 10 per cent.

The discount is now 50 per cent. off new list.

New prices are as follows on plain, ribbed and corrugated elbows:

CONDUCTOR ELBOWS—2-inch, $5.25; 3-inch, $6; 4-inch, $10.50; 5-inch, $24; 6-inch, $29.

Less 50 per cent.

Manila Clothes Lines Are Reduced

Toronto.

MANILA CLOTHES LINES.—A reduction of nearly 17 per cent. has been made in the price of manila clothes lines, and the 50 foot are now being quoted at $3.75 per dozen instead of $4.50.

10 *Per Cent. Decline In Cast Shears*

Toronto.

CAST SHEARS.—There is a decline of about 10 per cent. in the price of some lines of cast shears.

Some Lines Aluminum Ware Reduced

Toronto.

ALUMINUM WARE.—A reduction of approximately 20 per cent. has been

made in the Viko line of aluminum ware. Some other makes of aluminum ware are reported to be lowered in prices of many of the articles made, but tea kettles and tea and coffee pots are said to be slightly higher in price.

Lead Prices Are Holding at Changes

Toronto.

LEAD PRODUCTS.—Prices are holding unchanged on lead and zinc products this week, and no quotable changes are reported. Business is said to be keeping up fairly well in these lines. The primary markets in lead and zinc are reported to be inclined towards a firmer tone, but it is believed to be a temporary flurry and little change is expected so long as the big buyers remain out of the market.

The following are quotations on these lines:

Lead pipe, list, per lb.	0 13½
Lead waste pipe, list, per lb.	0 14½
Do., over 8 in., list, per lb.	0 15½
Lead pipe is subject to a discount of 10%.	
Lead traps and bends	Net
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 10½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 36
Do., strictly, lb.	0 27
Do., commercial, lb.	0 24¼
Do., guaranteed, lb.	0 29
Do., wiping, lb.	0 25
Zinc sheets, per lb.	0 18

Strap and Tee Hinges Are Lower

Toronto.

STRAP AND TEE HINGES.—There has been a decline in the prices of strap and tee hinges and also screw and strap, and the new quotations are about 10 per cent. lower. The list is now less 5 per cent.

Wrought Steel Butts Decline in Price

Toronto.

WROUGHT BUTTS. A reduction of approximately 10 per cent. has been made on wrought steel butts. This affects all numbers of steel butt hinges and includes the following: Nos. 838, 840, 802 are now net list; No. 800 5% advance on list; Nos. 810, 814 plus 25 per cent.

Nail Prices Hold: Supplies Improved

Toronto.

NAILS.—Prices continue to hold on nails, and business remains light at present. Supplies are stated to be improved, but stocks on the whole are below the average.

Quotations on wire nails are $5.75 base, and cut nails $7.30 base.

No Changes on Gasoline or Oil

Toronto.

COAL OIL AND GASOLINE.—Prices are holding unchanged on coal oil and gasoline. There is a fair demand it is reported for the season of the year. Quotations are 28 to 31 cents per gallon for oil, and 42 cents for motor grade gasoline.

Steam Cylinder Oil Down Six Cents

Toronto.

CAPITOL CYLINDER OIL.—A reduction of six cents per gallon has been made this week in the price of Capitol cylinder oil, and the new quotation is $0.92.10 less 15%.

Axle Grease Prices Are Lower

Toronto.

AXLE GREASE.—New lower quotations are made this week on Mica axle grease, and prices are from one to one and a half cent per pound lower.

Following are the new quotations:

MICA AXLE GREASE

Per case of 48 1-lbs., list	$8 95
Per case of 24 3-lbs.,	11 05
Per case of 12 5-lbs.	9 25
Per 25-lb. pail	4 25

List, less 15 per cent.

LIGHT AND DARK DIAMOND AXEL GREASE

Per case of 48 1 lbs., list,	$ 8 25
15-lb. pail	2 00
25-lb. pail	3 05

List, less 15 per cent.

Cup Grease is Quoted Lower

Toronto.

CUP GREASE.—Reductions of approximately one cent per pound have been made in prices of cup grease and following are the new quotations.

ARCTIC CUP GREASE. NO. 3

Per case of 36 ones (1 lb.), list	$ 7 85
Per case of 12 fives (5 lbs.)	10 65
Per 25-lb. pail	4 45

List less 15 per cent.

Cotton Waste Prices Are Lower

Toronto.

COTTON WASTE.—New lists are being issued on cotton waste, and show a reduction of about 1½ cents per pound on most grades.

Pipe Fittings Show Some Reductions

Toronto.

PIPE FITTINGS.—Some further reductions are shown in pipe fittings, and Class A goods are now quoted at 60 cents, and galvanized at 75 cents.

Other declines are as noted last week. Fair sales are reported for the season of the year in fittings, and stocks are in good shape again.

Quotations are as under:

Cast iron fittings	10%
Plugs	22½%
Bushings	25%
Unions ¼-in. to 2-in.	37½%
Do., ¼ in., 2½ to 4 in.	30%
Dart Unions, blk., ¼ in. to 2 in.	20%
Do., ⅛ in., 2½ to 4 in.	8%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, 4-in. and under	20%

Class B	0 24	0 34
Class C.	0 16	0 24

Compression Goods are Holding Unchanged

Toronto.

COMPRESSION GOODS.—No changes are announced in prices of compression goods and sales are seasonably light. The tendency seems to be downwards on brass goods, and prices on American markets have declined recently on many of these lines it is reported.

Following are quotations:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	28-30%
Flatway stop and waste cocks, standard	25%
Roundaway stop and waste cocks, standard	5%

Corrugated Sheets Hold At Recent Change

Toronto.

CORRUGATED SHEETS. — These goods are now on a new lower basis as announced last week. Sales are light at present it is stated, and dealers do not expect much change during the next few weeks.

Following are new quotations:

Corrugated Sheets—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

50 cents per square extra for one inch corrugation.

Sheets Show an Easier Tendency

Toronto.

SHEETS AND PATES.—Business is reported to be quiet on sheets and plates. Prices are nominally unchanged, but some easier quotations are made, although some are of the opinion that lower quotations will not result in any more business at the present.

Reports from Pittsburgh show that many of the sheet mills are closed down while others are only operating three days a week. Buyers, it is said are not satisfied that bottom has been reached in mill prices and are waiting before going into the market.

IMPORTED—NOT CANADIAN FILES —ADVANCED IN 1920

In the review of hardware price tendencies during 1920, as appearing in January 1 issue of Hardware & Metal, it was stated that files had advanced 11 per cent. during the year. This should have mentioned imported files, in view of the fact that Canadian files underwent no change during 1920.

Quotations are as follows:

PLATES		
10 gauge	7 50	....
12 gauge	7 55	....
14 gauge	7 60	....
16 gauge	7 70	....
BLACK SHEETS		
14 gauge	8 35	9 30
16 gauge	8 40	9 40
18-20 gauge	8 45	9 45
22-24 gauge	8 50	9 50
26 gauge	8 55	9 55..
28 gauge	8 65	9 65

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier	Apollo
10¾ oz.	9 90 11 30	9 70 11 35
U.S. 28	9 50 10 90	9 40 11 05
U.S. 26	9 20 10 60	9 10 10 70
22 and 24	9 05 10 45	8 95 10 60
18 and 20	8 90 10 30	8 80 10 45
16	8 90 10 30	8 80 10 45
12 and 14	8 75 10 15	8 65 10 30

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Little Change in Waste Materials

Toronto.

WASTE MATERIALS.—Although a better feeling prevails the markets do not show any improvement. There is only a small movement of steel and iron scrap and prices are holding fairly. In non-ferrous metals the situation remains the same.

Prices are nominally as below:

WASTE MATERIAL	
No. 2 busheling	$13 00
Stove plate, per ton	19 00 20 00
Yellow brass	6 00 7 00
Red Brass	10 00
No. 1 machinery cast	24 00 25 00
Heavy melting steel	15 00 16 00
Heavy copper	10 50 11 50
Heavy copper	0 11½ 0 12½
Scrap zinc	4 00 4 50
Light brass	4 00 4 50
R.Rd. wrought iron, No. 1, gr. ton	13 50 14 50
Scrap pipe	8 00 9 00
Heavy lead pipe	4 00 4 50
Old rubbers, boots and shoes	2 00 3 00
Overseas lumbermen's rubber boots	1 50 2 00
Bicycle tires	0 01 0 01½
Tea lead	2 00 2 25
Automobile tires	0 75 1 00

Door Hangers and Track Reduced 10 Per Cent.

Toronto.

DOOR HANGERS AND TRACK.—A reduction of approximately 10 per cent. has been made on the prices of door hangers and track made by the N. Slater Co., Ltd., manufacturers of the Allith line.

Shelf Hardware; Revisions Made

Toronto.

SHELF HARDWARE. — Revisions have been made in the prices of shelf brackets, butts and hinges, hasps and staples and other lines of shelf hardware and new price lists just issued show some small reductions.

Ingot Metals Remain Dull: Tin is Shaded

Toronto.

INGOT METALS.—There is a pronounced weakness in all metals this week. Tin and spelter are showing lower levels and copper and lead are credited with a slight improvement. Aluminum markets are a little easier. The demand for metals continues light.

TIN.—The market has been erratic in tin this past week or so and prices have dropped back again.

On English markets there was a break of £10 on spot, but little buying, and the feeling prevails that the future trend in the market will bring prices down to lower levels.

Quotations here are made at 47 cents.

COPPER.—Quotations are unchanged on copper, and seemingly the metal cannot recover from the depression. Inquiries are said to be few.

Prices are held unchanged at 19 cents for casting copper.

LEAD.—This metal is reported as dull and irregular this week, and demand has eased off considerably. It is stated that the large consumers have not as yet come into the market.

Quotations are made at $7.00.

SPELTER.—This is quoted at slightly lower prices, but the market is weak and dull. $7.50 is being quoted locally.

ANTIMONY.—No change is reported in this metal, and quotations are holding at 8 to 9 cents.

ALUMINUM.—This metal shows a little easier tone, but market continues dull with small demand. Prices range from 35 to 37 cents.

SAYS NO LOWER PRICES ON HICKORY HANDLES.

An announcement is made by a number of handle manufacturers that in view of the general expectation of lower prices on hickory handles based on the decline in lumber prices, that such lower prices on handles cannot be looked for. They state that handles, especially in the better grades, are manufactured from selected young second growth hickory, the available supply of which is constantly diminishing each year becomes more expensive and difficult to obtain. Attention is drawn to the growing tendency of the trade to demand an increasing proportion of higher grades, leaving the lower grade stock on the manufacturers' hands, a stock which he is compelled to accept with the high. This low grade material becomes a burden and causes serious loss. The continuation of this condition will, it is said, result in higher prices on high grade handles. It is added that such timbers as maple, ash, oak and rock elm are becoming more difficult to procure as they are not growing as fast as they are being cut down. An ample and well assorted stock is recommended by these manufacturers pointing out that even now there is a shortage of high grade handles and that there will be delay in filling orders later when business activity is increasing.

London Markets

LONDON, Ont., Jan. 20.—The principal changes in prices this week are on rope, pipe fittings and churns which are all lower. Reductions have been made on linseed oil prices also.

Orders during the past week although not very large have been numerous, and business has been better than anticipated for the month. Good collections are reported.

Linseed Oil Drops Seven Cents

London, Ont.

LINSEED OIL.—A reduction has been made this week on linseed oil, and the new prices are 7 cents per gallon less. Quotations are as under:

	Raw.	Boiled.
1 to 2 bbls.	$1 10	$1 13
3 to 5 bbls.	1 09	1 12
6 to 9 bbls	1 07	1 10

Less barrels, add 15c per gallon.

Malleable Pipe Fittings Are Lower

London, Ont.

MALLEABLE PIPE FITTINGS.—Reductions have been made in pipe fitting quotations, and malleables are practically 20 per cent. lower. The new quotations are:

Class A, black, 70 cents lb.; class B,, 26 cents; class C, 17 cents. Class A, galvanized, 80 cents lb.; class B, 36 cents lb.; class C, 26 cents.
UNIONS—List, less 37½ per cent.
BUSHINGS—List, less 22½ per cent.
PLUGS—List, less 20 per cent.
IRON STOP COCKS—List, less 20 per cent.

Turpentine Quotations Show no Change

London, Ont.

TURPENTINE.—Prices have been held unchanged in turpentine, and quotations remain as last week. Sales are light on this product.

Turpentine—	Per Imp. Gal.
1 barrel lots	1 35
2 to 4 barrel lots	1 34
5 gal. lots	1 50

Electric Fans; Quotations for Spring

London, Ont.

ELECTRIC FANS.—The quotations for spring on the Polar Cub electric fan is unchanged and quotations are the following:

POLAR CUB FANS—6-in, one dozen lot, $7 each; less dozen lot, $7.50. 9-in., one doz. lots, $12; less one doz. lot, $12.50.

Rope Prices Reduced Again

London, Ont.

ROPE.—New lower prices are in effect

on rope and the reductions are 3½ cents per pound on pure manila; 2 cents on Beaver manila, and 2 cents on sisal and lath yarn. Following are the new quotations:

Pure Manila, 26 cents lb. ball; Beaver Manila, 21 cents; Sisal, 19 cents; Lath Yarn, 19 cents.

Lower Prices on Barrel Churns

London, Ont.

BARREL CHURNS.—A reduction of about 10 per cent. has been made this week in the prices of barrel churns, and the discount is 10 per cent. off list. Following are the net prices figured at this discount.

No. 0 and 1, $10.80 each; No. 2, $11.70; No. 3, $12.60; No. 4, $11.40; No. 5, $17.10.

S Lead Traps Are Reduced

London, Ont.

S LEAD TRAPS.—New lower prices have been made on S lead traps, and these are now quoted as follows:

1¼-in. short, 58 cents each; 1¼-in., long, $1.12. 1½-in., short, 90 cents each; 1½-in., long, $1.65.

Brass Headed Tacks Are Higher

London, Ont.

BRASS HEADED TACKS. — These goods show a slight advance in price and are quoted at $2.05 per thousand in packages of 50; packages of 100 are $2.00, and in bulk the price is $1.60 per 1,000.

Good Sales Made On Watches

London, Ont.

INGERSOLL WATCHES.—Good sales have been made of late years in hardware stores of watches, and there is a steady and growing demand for Ingersoll make of watches. Quotations on these lines are the following:

Maple Leaf, $2.15 each; Maple Leaf Radiolite, $2.65; Eclipse, $3.15; Eclipse Radiolite, $3.65; Junior, $3.65; Midget Radiolite, $4.15; Wrist Radiolite, $4.40; Waterbury Radiolite, $5.15; 2 in 1 Ingersoll Radiolite, $2.80; Reliance Screw Case, $6.20; Reliance Gold Filled Case, $9.70.

Clay Picks Are Lower; Down One Dollar

London, Ont.

CLAY PICKS.—A reduction has been made in price of clay picks, and the new quotations are $1.00 per dozen lower. Following are new prices:

5/16 lb., $11.50 doz.; 6/7, $12.50; 7/8, $13.50.

Lower Prices For Mattocks

London, Ont.

MATTOCKS.—Pick and cutter mattocks are reduced in price about 50 cents per dozen and are now quoted at $14.00 per dozen.

Grub Hoes Are Reduced in Price

London, Ont.

GRUB HOES.—These goods are down $1.00 per dozen and the new price is $11.00 per dozen.

Crowbars Are Now at $10.50

London, Ont.

CROWBARS.—Lower quotations are in effect on crowbars, and the decline amounts to $1.00 per 100 lbs. These are now quoted at $10.50 per 100 lbs.

Carpenters' Bars Reduced in Price

London, Ont.

CARPENTERS' BARS.—A reduction of 75 cents per dozen has been made in the price of the Canadian make of "goose neck" carpenters' bars, and the new price is $6.50 per dozen.

American Metallic Ammunition Lower

London, Ont.

AMERICAN AMMUNITION. — The new price on Winchester and Savage make of ammunition is plus 22½% on American list. This is a decline due to the removal of the luxury tax.

Spring Prices on Ice Cream Freezers

London, Ont.

ICE CREAM FREEZERS. — Quotations on ice cream freeers for spring delivery show an advance over last year's figures. The new prices are as follows:

Blizzard—2-qt., $4.85 each; 3-qt., $5.70; 4-qt., $7.; 6-qt., $8.75.

Window Glass Unsteady: Seasonable Sales

London, Ont.

WINDOW GLASS.—There is a seasonable sorting up business in window glass. Prices remain unchanged although the market is unsteady and lower prices are expected. Quotations in effect are 30 per cent. off list for single and double diamond, and 40 and 10% off list for cut lights.

Putty Holds Unchanged in Price

London, Ont.

PUTTY.—There has been no change made in putty prices, and sales are light at present. Following are the standard quotations:

Putty—	
Standard, 100-lb. drums	8 05
Do., 25-lb. drums	8 30
Pure, 100-lb. drums	10 55
Do., 25-lb. drums	10 80

New Quotations On Cut Nails

London, Ont.

NAILS.—Wire nails are holding at recent decline and are quoted at $5.75 base. Cut nails have recently been reduced 35 cents per keg and are now being quoted at $7.15 per keg base. F.O.B. London.

Weather Strip In Good Demand

London, Ont.

WEATHER STRIP.—A fair demand has been noticed this past week for weather strip, and the Frost King felt strip is quoted at $5.45 per dozen packages.

White Lead Prices Hold At Recent Change

London, Ont.

WHITE LEAD IN OIL.—This commodity is selling at the reduced prices noted last week. Following are quotations:

	Tons	Less tons
Pure, per 100 lbs.	16 95	17 30
Elephant, per 100 lbs.	17 45	17 80

Colder Weather Moves Skates

London, Ont.

SKATES.—There has been a fair demand this week with the colder weather for skates, and the Starr make are selling at 30 per cent. off list.

Brisk Demand for Ash Sifters

London, Ont.

ASH SIFTERS.—The seasonable winter weather has caused a revival in the demand for ash sifters and sales this week have been heavier in these lines. Quotations are being made as follows:

Common Wood Sides, $3 doz.; Banner, $3.65 each; Rocker, No. 1, $6.25 each.

Fair Sales on Wedges: Present Prices

London, Ont.

WEDGES.—Good sales are being made now on saw and splitting wedges and quotations are appended:

Winnipeg Markets

WINNIPEG, Jan. 20.—There appears to be a general downward trend to prices and some of the quotations on hardware lines are lower now than they have been for years.

This week's changes have brought lower prices on carriage and machine bolts, tire, stove, sleigh shoe and plough bolts, coach screws, wrought iron washers, rubber belting strap and tee hinges and also rope. Bar iron and steel and wrought iron pipe are still holding. Sheets are unchanged from last week's decline.

Business is still quiet, but an improvement is expected before very long.

Reduction in Price of Rubber Belting

Winnipeg.

RUBBER BELTING.—The price has been lowered on rubber belting and it is now quoted as follows: Western or Equal, 6 in. and under, 47% off; Lion or Star, over 6 in., 40% off.

Wrought Iron Washers Down in Price

Winnipeg.

WASHERS.—The prices on wrought iron washers have been lowered this week and are as follows:

	Case Lots. Per 100 lbs.	Less.
3-16 inch	$21 10	$21 60

Heavy Strap—(in bulk)—4 inch, $2.15 doz. prs; 5 inch, $2.65; 6 inch, $2.80; 8 inch, $3.85; 10 inch, $6.55; 12 inch, $7.90; 14 inch, $9.40.

Screw Hook and Strap—6 inch, $3.80 doz. pairs; 8 inch, $4.75, 10 inch, $5.95; 12 inch, $6.50; 15 inch, $7; 18 inch, $10.10; 21 inch, $11.45; 24 inch, $14.55.

Light Tee—(in bulk)—3 inch, $1.10 dozen prs.; 4 inch, $1.25; 5 inch, $1.45; 6 inch, $1.75; 8 inch, $2.10; 10 inch, $2.75.

Heavy Tee—(in bulk)—4 inch, $1.90 dozen pairs; 5 inch, $2.25; 6 inch, $2.60; 8 inch, $2.95; 10 inch, $5.15; 12 inch, $8.40; 14 inch, $8.60.

Corrugated Tee,—(in bulk)—4 inch, $2.05 dozen pairs; 5 inch, $2.85; 6 inch, $3.25; 8 inch, $5.55; 10 inch, $8.40.

Linseed Oil Prices Remain Unchanged

Winnipeg.

LINSEED OIL.—There has been no change in the local prices of linseed oil. Raw linseed oil is quoted at $1.27 per gallon while Boiled is quoted at $1.30 per gallon.

Another Decline in the Price of Rope

Winnipeg.

ROPE.—This week has brought about another reduction in the price of rope and is now quoted at the following prices:

Sisal—¼ and 5 1-6, 23¼ cents; ⅜, 22¾ cents; 7-16, ½ and 9-16, 22 ¼ cents; ⅝, 21¾ cents; ¾ and larger, 21¼ cents.

British Manila—¼ and 5-16, 25½ cents; ⅜, 25 cents; 7-16, ½ and 9-16, 24½ cents; ⅝, 24 cents; ¾ and larger, 23½ cents.

Pure Manila—¼ and 5-16, 30¾ cents; ⅜, 30¼ cents; 7-16, ½ and 9-16, 29¾ cents; ⅝, 29¼ cents; ¾ and larger, 28¾ cents.

Sisal Lariat—3 x 7-16, 26¼ cents; 4 x 7-16, 27¼ cents.

Manila Lariat—3 x 7-16, 33¾ cents; 4 x 7-16, 34¾ cents.

Lath Yarn—21¼ cents.

Paints and Varnishes Remain Steady

Winnipeg.

PAINTS AND VARNISHES.—There has been no change in the paint and varnish situation this week. Since the travelling salesmen are again on the road business has shown an improvement.

Turpentine Drops 50 Cents Per Gallon

Winnipeg.

TURPENTINE.—There has been a drop of 50 cents per gallon in the price of turpentine this week and it is now quoted at $2.00 per Imperial Gallon in one barrel lots.

Plate Glass Lower

Winnipeg.

PLATE GLASS.—Plate Glass is reported lower this week and the discount is now 20% f.o.b. Winnipeg.

Pittsburgh Markets

PITTSBURGH, January 20.—The iron and steel trade very generally approves Judge Gary's statement made to the newspapers last week. The statement, as is always the case with Judge Gary's utterances, is temperate and at the same time it is hopeful. It is interesting to note that in less than three months Judge Gary will round out 20 years of active service as chairman of the United States Steel Corporation. He does not claim that the steel business has improved of late, but he insists that general sentiment is better and more hopeful. Prices of some commodities must come down farther, he says, the public being in a waiting mood and being ready to take hold when it is convinced that prices are right. Judge Gary does not say that steel prices will not decline from the present level, and probably believes that eventually they will, particularly as costs are going to decrease.

Production

There has been no material change in the rate of steel production since the first of the year, the rate being slightly over 90 per cent. for the Steel Corporation and about 25 per cent. for the independents, representing in ingots about 21,000,000 tons a year for the corporation and 7,000,000 tons for the independents, or 28,000,000 tons altogether. This is two-thirds the rate at which steel was made during the first nine months of last year, but it is only about 53 per cent. of the capacity. On account of various difficulties, chiefly the insufficiency of rail transportation facilities, steel production during the first nine months of last year averaged only 80 per cent. of capacity.

It will be noted that according to the above estimates the Steel Corporation is producing about three times as much steel as the independents, whereas it does not have more than 44 per cent. of the capacity. The condition is, of course, the aftermath of the divergent price policies pursued in 1920 by the Steel Corporation and independents respectively, the corporation holding its prices down to the Industrial Board schedule of March 21, 1919, while the independents advanced their prices by various amounts, some to the highest figure that could be obtained from anxious buyers for prompt shipment, others to various intermediate levels. Naturally at the windup the Steel Corporation found itself with a well filled order book, while the independents had relatively little on order books, and some of that business was cancelled or suspended, even though eventually the independents marked down the prices in their contracts to the Steel Corporation level.

All this has been well understood, but what is developing now is of particular interest. It might have been thought that when the independents got down to the corporation price level a good bit of the Steel Corporation business would be cancelled, and the independents, by making slight cuts in prices, would be able to get some of that business. The outcome, however, is proving quite the reverse. The corporation has had some

(Continued on page 66)

Unemployment Increases Paint and Brush Sales

Noticeable Increase in Sales of House Paints in Quarts and of Small and Medium Size Brushes due to Unemployment—Suggestions for Increasing Paint Trade—Getting an Early Start for Spring Paint Business

THE increased demand for house paints in quart sizes, which is said to be always apparent when there is much unemployment, is to be found at the present time according to the statement of F. J. Penberthy, manager Lowe Bros., Ltd., Toronto. Mr. Penberthy pointed out to Hardware and Metal that an increased demand for house paints in small quantities, generally quarts, is now evident. This business is said not to affect regular paint trade but, rather, supplements regular business.

The brush manufacturers also notice this tendency according to the statement made to Hardware and Metal by an official of Meakins & Son Co., Hamilton, Ont. This firm in company with other brush manufacturers has noticed an increase in the sales of small and medium size brushes, while business in the brushes generally purchased by experienced painters is quiet. This tendency is attributed solely to the number of men who are unemployed and who spend their spare time doing odd painting jobs around the house.

Have Unique Opportunity

In view of the prevalence of unemployment hardware merchants in all parts of the country have a splendid opportunity to develop trade in house paints, pints and quarts, and in small and medium brushes, for this class of business. One of the chief difficulties confronting the hardware merchant who in the past has endeavored to stir up enthusiasm for utilizing spare time to paint floors, woodwork, walls, furniture, etc., in the house during the cold weather. The unemployed man has time to spare and the chances are he is so actively inclined that he will want to be doing something to improve the appearance and value of his property while he is so situated. He will thus be easy to convince regarding the value of utilizing his spare time in this manner.

Many of your customers in this position may just be awaiting the suggestion to paint or varnish the floor, woodwork, paint the walls in the kitchen, bathroom or nursery, to refinish some pieces of furniture, to paint the automobile, enamel the stove pipes or beds, etc. There are a great many suggestions to be offered along this line. These points might be dealt with through the medium of the advertisement in the local newspaper, through cards in the window display or by suggestion made personally across the counter. Or better still, by a combination of them all.

Developing This Trade

An attractive window could be dressed showing house paints, varnishes and specialties in the pint and quart sizes generally required by this class of trade. A display of small and medium size brushes can also be shown. Window cards can be used to put forth the suggestion that men who are temporarily out of employment can utilize their spare time to good advantage by improving the appearance and increasing the value of their property by the use of paint and varnish. A more direct message might be made on other cards suggesting the use of certain lines for the painting of floors or woodwork, the varnishing of furniture, etc. Many hardware merchants have found this a valuable source of business in small quantities.

Another advantage of such a campaign instituted at this time will be its effect in getting the usual spring painting interest started earlier. It is a well known fact that in recent years much paint business has been lost by allowing customers to postpone the spring painting until the season is well underway. It is generally then found that painters are too busy to take on additional work until midsummer and by that time much of the early enthusiasm is lost and the painting again postponed. This is not only a bad policy for the property owner but it cuts deeply into the merchants' paint business. The ideal arrangement would be to have paint trade spread more evenly over the twelve months of the year so that painters' services could be secured when required and at a fair wage. This would bring better results in the use of paint and would undoubtedly encourage its use on a broader scale. The merchant by starting such a campaign as is outlined, right now, will be doing much to get this interest started early for the spring. Now is a mighty good time to start ringing up paint sales on the cash register and plans should be made now to keep it ringing merrily through the spring and summer months.

Watch Building Developments

An active building season is reported from many sections of the country. This will not only create a demand for paints for new buildings but should also help paint business for houses not of recent construction. New houses are built largely for speculation and present property owners take advantage of that condition to turn over their houses at speculative prices. In order to do so most of them are quick to see the advantage of having their property shine forth with a fresh coat of paint, for just as the automobile with a fresh coat of enamel looks like a new car beside other unpainted cars, so the freshly painted house often sells quicker and brings a price which makes the money expended for paints a good investment.

Close watch should be kept on the local building situation by hardware merchants and plans laid early to be first on the ground when this development materializes.

GLIDDEN

EVERYWHERE ON EVERYTHING

Floorette For Floors

Floorette is the name of a Glidden floor varnish that's made purposely for hard usage. It's made to play on, dance on, have a good time on.

A beautifully finished floor is something in which the housewife can justly take pride. And satisfaction, too, when it's finished with Floorette, because it will stay beautiful for the longest possible time. It's a floor varnish you can recommend to your customers without reservation because of its wonderful qualities. And because of Glidden reputation they will readily accept it.

You can meet every paint and varnish requirement with the complete Glidden line. *Everywhere on Everything* expresses the usefulness of Glidden products as well as the scope of Glidden versatility. Write to-day for dealer proposition.

The Brush Department

"Brush Prices Unchanged Before Summer"

Bristle Market Remains Firm—Factories Have Normal Supply of Business on Hand

"BRISTLES have remained firm in price in spite of the downward trend in many other commodities, doubtless due to two factors. First, there has been no sign of over-supply of brushes on the market, all manufacturers in the United States and Canada being very busy; and, there having been practically no comeback in the way of supplies from Russia, which formed such a large part of the annual production in years gone by, other sources have met with a keen demand," according to the statement of L. W. Simms, President T. S. Simms & Co., St. Johns, N.B.

"The past year has seen some very sharp advances in the bristle market. There was more room for them here, in order to bring them up to a level with other prices, owing to the fact that these, as well as other brush supplies, lagged far behind the general advances in the years of the war.

Cheaper Fibres Ease Off.

"Some of the minor items in the way of the cheaper brush fibres have eased off a little of late, but, as prices of brushes have remained stationary for about six months, these slight reductions have not offset other increases in cost which have not been reflected in the prices.

"The labor supply has become much more plentiful in the last few weeks and, we believe, there is a decided improvement in efficiency as far as the will to work is concerned. Unfortunately, however, we are now beginning to pay up for the long period in which it was impossible to obtain junior employees who would endeavor to acquire a trade, and consequently, the dearth of skilled artisans is becoming more and more acutely felt, especially in those trades such as skilled wood-workers, where men alone can be used.

"Wages advanced decidedly and continuously for the first few months of the year, but remained pretty much stationary throughout the fall.

Broom Business.

"In the broom business there has been a decided falling off in trade all over the continent, largely due to the fact that brooms seem to be always a commodity in which the trade from the wholesaler to the consumer tends to speculate. That is, if the broom corn crop seems to hold out a probability of higher prices, everybody will stock up all they can afford to stock and the consumer is likely to buy two or three brooms. If, on the other hand, there seems to be any possibility of a decline in the broom corn market, the wholesaler will get down to the last dozen pretty near, likewise the retailer, and the consumer will wear his brooms down to the strings. The latter being the general idea of late, most of the factories, I understand, have been nearly, if not wholly, closed down. Fortunately we have been able to use any labor not wanted in this department in the brush end of the business, so that no labor has been laid off, both present and future orders in the brush business demanding the exertion of every effort in production. It is generally felt that, as stocks are universally low in the broom business, this industry will pick up materially during the first of the year.

"There seems to be little doubt that, just as soon as any activity is manifested in the broom business, the very real scarcity of anything like good or medium quality corn in the hands of the growers or the brokers will decidedly stimulate the price as soon as the manufacturers start buying. The price of brooms is now lower that is has been for some two or three years.

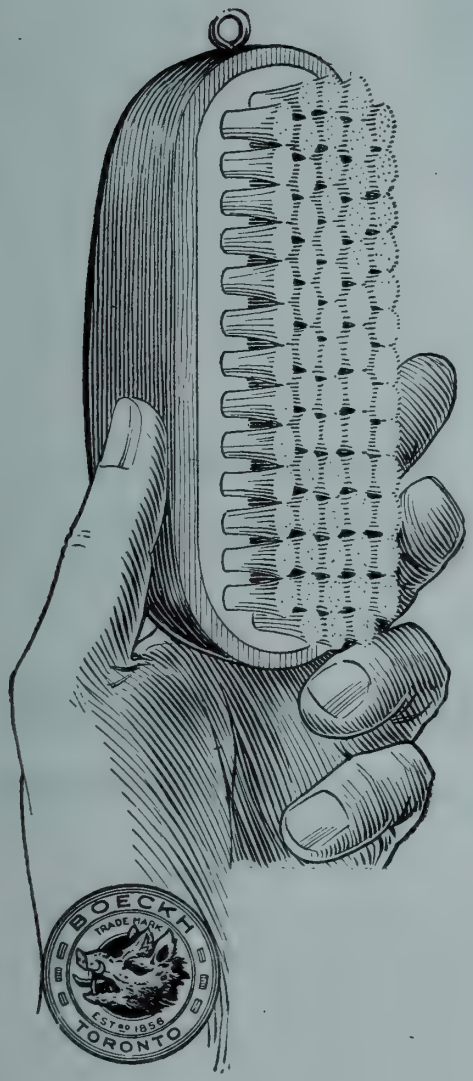
"It is difficult to forecast the prospects for many months in advance during these times, but if one may venture to do so for the period from now to early spring, appearances seem to indicate: first, in corn brooms—the weather conditions having been exceedingly bad during the harvesting of the crop in the Middle Western States, there probably will be a good deal off-colored and damaged corn available this year, which will make it possible to offer a cheap off-colored broom at low figures throughout the season. There seems to be no doubt, however, that a medium or good broom will not be any lower than it is at present and that there is every prospect that an advance in price will take place as soon as the activity following on the exhaustion of stocks, already very low, compels the manufacturers to start purchasing again.

Much Painting Carried Over Winter.

"Second—Brushes. The largest field in this line, especially in Canada, is probably in paint brushes. This is largely controlled by the amount of painting done. It is well known that there was more painting done last fall in most localities than has been the case for several years. Painters inform us that they have had to carry over the winter many orders for outside painting, which the owners had hoped to have done last fall. In spite of the increased activity along this line, the country is still in crying need of paint, much of the property having gone far beyond the point where economy demanded attention.

"In many industries, such as in the paint line, increased demand could be fairly rapidly met by increased production through mechanical means. In the brush industry, there still being a very large amount of skilled hand labor necessary, it has not been possible to meet increased demand by rapid increase in production; consequently, in spite of the fact that the industries in this field are all busy, there seems to be no sign of an over-supply anywhere, but on the contrary, we are no exception to the rule in that we have still several months' business on hand, which is a normal condition at this time of year in the brush business in anticipation of spring activity."

It would seem, therefore, that with the bristle market remaining firm, with activity everywhere manifested in the industry, and in view of the fact that the spring is always the keen time of demand, there is very little likelihood of any downward trend in prices, at least until next summer.



Demand continues good from the export field, although temporary financial uncertainty is a factor in the situation.

Pleasing Social Event

Quebec.—A very pleasing social event took place in the establishment of the Mechanics Supply Co., Limited, when Mr. and Mrs. W. H. Wiggs, assisted by Mrs. Guy H. Simpson, held an "at home" for all the staff. In welcoming those present Mr. Wiggs in a few well chosen remarks alluded to the hearty co-operation the directors had received during the past year and trusted that the same spirit of loyalty would be found among the employees during the coming year.

Mr. Wiggs recalled some old reminiscences with the founding of the business in the year 1889, when with one clerk and one storeman he had entered into the commercial life of this, his native, city, under the same name as the company now bears. He also alluded to the long and faithful services of two of the oldest members of the company, Messrs. Guy H. Simpson and Omer Carrier, who had been associated with him for over a quarter of a century.

PEN-DURA

Every Brush Guaranteed Perfect

Penetrating and Durable
Hand Brushes

Have you some fussy, particular customers? Customers who are looking, not for something cheap, but for something good?

This is the brush for them!

They'll want a Pen-dura Brush as soon as they see it, because Pen-dura excellence is apparent at once, beside being proved in service. This reliable brush is stiff, yet elastic; it cleans dirty, oily or grimy skin and nails far better than cheap, soft, spongy brushes, and requires less rubbing.

BOECKH'S

Pen-Dura — penetrating and durable — Hand Brushes have an aluminum facing that protects the base. The bristles are fastened to the waterproofed back. The backs are made of fine hardwood, finished in rich, weathered oak effect, and skillfully designed and shaped to fit the hand comfortably.

Your motor customers in your automotive accessory department will be interested in this efficient brush. Sell them three—one for the garage, one for the bathroom and one for the kitchen—they'll welcome this suggestion.

Homes, hospitals, factories, offices, hotels, clubs, garages are all good for more than single sales. Multiplied sales mean multiplied profits. Satisfaction brings customers back again.

Brandram-Henderson Announce Changes

W. G. Helliar, Maritime Manager for Brandram-Henderson, Ltd., Becomes General Production Manager at Head Office

MONTREAL. — Dealing with changes in the staff of Brandram-Henderson Ltd., George Henderson, president of the company, made the following statement to Hardware and Metal:

"Sidney W. Smith, at present manager in Toronto, has been appointed manager of the Maritime division, which is the oldest division in the company, and is being succeeded in Toronto, by J. K. Illsley, the change taking effect early in February."

"Mr. Illsley first became associated with Brandram-Henderson, Ltd., over fifteen years ago when a very young man, and has had a very wide experience as travelling representative in the Maritime provinces and South America. For some time past he has been assistant to the manager of the Maritime Division, and leaves that post to become acting manager at Toronto. It will be understood, therefore, that our Ontario customers will not be under any disadvantage in having as our acting manager a man who is not thoroughly conversant with the requirements of the paint business.

"The change has been brought about by the fact that W. Geo. Helliar, at present manager of the Maritime division, has been appointed general production manager at the head office, Montreal, and we feel sure," stated Mr. Henderson, "that our customers generally will not be discommoded in any way, but rather that the company will be able to afford still better service than heretofore."

SIDNEY W. SMITH

Toronto manager for Brandram-Henderson, Ltd., who has been appointed manager of the Maritime Division.

Changes in Staff of Ames-Holden McCready, Ltd.

Montreal.—R. W. Ashcroft, director of publicity for Ames-Holden-McCready, Limited, has been appointed assistant to the president. Mr. Ashcroft brings a unique experience to bear upon the conduct of his new duties, he having been for years director of publicity for the United States Rubber Company and the Canadian Consolidated Rubber Company.

W. Youngblud, lately tire sales manager of the Quebec division for the Dominion Rubber System, assumes the position of sales manager of the tire department for Ames-Holden-McCready, Limited.

How Hardwaremen Advertise Paints--No. 28

Emphasizing the fact that there is a demand for paint and varnish every month in the year, the advertising of Emerson & Fisher, Ltd., St. John, N.B., concentrates upon the elimination of the idea that painting is a seasonal activity. Herewith is a sample of some of this firm's advertising showing how they deal with this point. Encouraging readers to come to the store and discuss the particular use of the various paints, varnishes and specialties for their needs, is an important phase of such advertising.

EVERY MONTH

Brings a Need for Paint

Those who think painting is governed by seasons are far behind the times. True, some exterior painting must be done in the dry weather, but the bulk of interior painting and varnishing can be done any time—just when you have the time, or can get the painter.

There is a special paint or varnish for every job—our line is complete.

Emerson & Fisher, Ltd.

St. John, N.B.

The Luxeberry Painter Says:

"Beautiful homes are made from the inside out and not from the outside in. The outside of the house is the casket, the jewel is inside, and it is the painter who creates it with the aid of the right finishes. I always use Berry Brothers' Finishes because with them I can depend upon producing results that please me and satisfy my customer. I made a notable failure or two with other finishes, but it will never occur again."

The year-in-year-out uniform quality of Berry products has established a nation-wide demand for them that is always growing.

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

Weekly Paint Markets

Montreal

MONTREAL, Jan. 19.—Business continues quiet for the paint sections this week. Price reductions, which are noted on other hardware commodities, are not in evidence on turpentine, linseed oil, putty, white lead in oil or glass. The movements are expected to be more active as the winter months pass, however, for the next month business will no doubt, continue to be dull.

Paint and Varnish Sales Will Likely Improve

Montreal.

PREPARED PAINTS.—The dull season for prepared paints and varnishes is drawing to a close and greater activity is expected now that travellers are again on the road. The booking orders, up until the New Year, for spring deliveries being small compared with other years, is anticipated to bring extra business during the early spring months. When asked if any shortage would be liable to occur on any lines, a local manufacturer stated that although no shortage would be evident, deliveries would no doubt be delayed, as dealers placing their spring orders for immediate delivery could not all be supplied in a few days or weeks, but it will take more time to meet requirements of all.

Window Glass Is Quiet; Same Discount Quoted

Montreal.

GLASS.—Window glass remains seasonably quiet, and no new developments are reported. Business will no doubt continue dull for the next few weeks, as the spring building activity will be the next factor to create a larger demand. Discount of 30 per cent. off list is still quoted.

Putty Reported Slow and Unchanged

Montreal.

PUTTY.—Business continues to remain quiet on putty, this season of the year is really the off-season for this product, the fall and early winter period being over, and the spring demand not yet in evidence.

Quotations are as follows:

Commercial Putty	5 tons	1 ton	ton
Bulk barrels, 800 lbs.	$6 00	$6 25	$6 60
Bulk drums, 600 lbs.	7 00	7 25	7 60
Do., or tins, loose, 25 lbs.	7 25	7 50	7 85
Bulk tins, cased 25 lbs.....	8 00	8 25	8 60
Bulk drums or tins, loose 12½ lbs.	7 50	7 75	8 10
Bulk tins, cased 12½ lbs...	8 25	8 50	8 85
Bladder barrels, 400 lbs. ..	8 25	8 50	8 85
Do., cases, 100 lbs.	8 50	8 75	9 40
Tins, 1 lb.	10 60	10 85	11 20

Standard Putty, 10c per 100 lbs. advance over above prices.

Pure Linseed Oil Putty, $2.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

Turpentine Shows No Change

Montreal.

TURPENTINE. — Turpentine is reported with very few sales, the paint and varnish manufacturers are buying in small quantities to meet their present day requirements, but from the outside country business is very dull. The undertone is showing a little firmer if anything, the southern market which has been closed for some time past is reported to be again opened this week, and may show a tendency to slightly higher prices in the near future.

Quotations are as follows:

Turpentine—	Per Imp. Gal.
1 barrel lots	1 25
2 to 4 barrel lots	1 24
Broken lots	1 26

Linseed Oil Quiet; No Price Change

Montreal.

LINSEED OIL.—Prices for linseed oil remain unchanged for this week. Practically no movement is in evidence, sales being very small. The market on this product is very uncertain, as explained by one local crusher. The seed from the Winnipeg market, which is being crushed to-day, appeared to be at the rock bottom quotation. This year's outside crops, which would be in evidence not sooner than May 1, would have to be much lower than Winnipeg, enough so to induce the buyers to buy on the option market. This might determine a lower level on linseed oil in the future spring months, but was not considered probable as crushers had already withstood a big decline on seed in stock and would not be willing for any further lowerings.

Quotations for this week are as follows:

1 to 4 barrels	1 15	1 16
5 to 10 barrels	1 14	1 15

White Lead in Oil Held at Recent Decline

Montreal.

WHITE LEAD IN OIL.—There are no new developments to report on white lead in oil this week, prices remaining at the lower levels quoted last week. The demand still remains quiet, however an improvement is expected in the near future, the present dull period being only seasonable.

Present quotations are as follows: $16 per 100 lbs. in 5 ton lots, $16.50 in one ton lots, and $16.85 for less than ton lots.

Toronto

TORONTO, Jan. 20.—Prices are remaining steady in paint markets and few changes are reported. Accounts vary as to how business is shaping this month, but "fairly good" and "as well as we expected," are pretty general, and it is hopeful to see so much optimism in the trade. It seems pretty certain from reports that the amount of business to hand already is not equal to that of last year, but it is early yet and it is safe to say that practically everyone is looking for conditions to gradually improve, though some believe it will be delayed for a time and the next few weeks will show little change. Prices on the whole are unchanged, but the glass market is unsteady and it is reported that some lower prices are being quoted. Many look for a decline on window glass and some losses may have to be taken where stocks are large.

Paint and Varnish Booking Slowly

Toronto.

PAINT AND VARNISH.—Prepared paints and varnishes are beginning to move slowly, but while sorting up orders are reported to be fairly numerous, it is stated that spring bookings as yet are behind last year's business. This condition was rather anticipated and under the circumstances the volume of business is said to be up to expectations, and in some cases even better than had been looked for. No changes have occurred in prices.

No Further Change in White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—No further changes have been made in quotations of white lead in oil, and it is being held at recent change. Sales are reported light. Quotations are as per market pages.

For Spring Selling—
A Salable Household Enamel

The Consumer

Moore's Paints and Varnishes make satisfied customers and establish consumer confidence that builds lasting, permanent trade. You will never find it necessary to refund the purchase price to a "Moore" customer.

The Dealer

The Moore ironclad guarantee of absolute satisfaction or money refunded stands behind every can of Moore's Paint and Varnish. For better paint sales and bigger profits, **stock and push** Moore's Products.

That "Saves the Surface"

The housewife will soon commence her annual spring cleaning campaign. One of the many things she will need will be a good household enamel. Sell her Moore's High Gloss Enamel. All ready for use, this efficient product leaves a surface that stands up strongly under the wear and tear of daily use. Its hard wearing qualities delight housewives and bring repeat sales for the dealer. Moore's Products include: "Impervo" Porch and Deck, "Tile-Like," Mooramel, Auto Finish, "Muresco," "Impervo" Varnishes, Morelustre Enamel. Barn Paint, Moore's Floor Paint, Sani-Flat, High Gloss Enamel, Carriage Enamel, Wagon and Implement Paint, and Shingle Stain.

"Save the surface and you save all" *Paint & Varnish*

If interested tear out this page and place with letters to be answered.

Putty Prices Holding; Normal Activity

Toronto.

PUTTY.—Sales of this product are light at present, but a seasonable amount of activity is reported. Prices are unchanged and are as follows:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	8 05
Do., 25-lb. irons	8 30
Do., bladders in bbls.	9 30
Do., less quantities	9 55
Pure, in 100-lb. drums	10 55
Do., 25-lb. irons	10 80
Do., bladders in bbls.	11 80

Glass Is Quiet; Market Is Unsettled

Toronto.

WINDOW GLASS.—Business is reported to be very quiet in this line and the situation seems to be unsettled. The Belgian market is reported to be very weak and the tendency of prices is downwards. There is a general opinion that the opening of navigation in the St. Lawrence this spring will see a big increase in the shipments of Belgian glass into Montreal. Nominally quotations are unchanged, but reports are current that lower prices are being made, and 30 and 10 per cent. is being quoted in some cases. This would prove that there is price cutting, but does not reduce the market to the lower level. With business quiet it is regarded as unlikely that lower prices would result in much increase of sales, and many state that it would have the opposite effect.

Shellac Shows an Easier Tone

Toronto.

SHELLAC.—The undertone on shellac is easier and slightly lower quotations are being made. The demand is only light just now. Quotations on white shellac, $6.50 in gallon jugs and $6 per gallon by the barrel. Prices on orange are $6 in gallon jugs, and $5.50 by the barrel.

Linseed Oil Remains Quiet

Toronto.

LINSEED OIL.—Trade is very quiet in the linseed oil market and demand is limited. This month is usually regarded as a quiet one but an improvement is looked for in the next few weeks.

Prices remain unchanged and a slightly easier tone is reported in the flax seed market. All grain markets have been declining and flax followed suit, but prices for all Argentine crop will depend largely on the demand. The crop there has been good and if Argentine prices come down the oil market will be affected.

Following are present quotations:

1 to 2 barrels, gal	1 10	1 13
3 to 5 barrels, gal	1 09	1 12
6 to 9 barrels, gal	1 07	1 10

Turpentine Lower; Small Demand

Toronto.

TURPENTINE.—The demand for turpentine is reported light again this week and quotations are 5 cents per gallon under last week's prices.

A little more activity is noted on turpentine markets in southern States and it is believed to foreshadow a revival in demand and a firmer tone is in evidence there.

Quotations are as follows:

Turpentine—	Per Imp. Gal.
1 barrel lots	1 30
2 to 4 barrel lots	1 29
5 gal. lots	1 45

PITTSBURGH MARKETS

(Continued from page 57)

cancellations, but it is not of business that is being transferred to independents. On the other hand, some buyers who have not heretofore been customers of the Steel Corporation at all have been making an effort to get on the Steel Corporation's books, feeling that that will be a safe place, in view of the probability that steel will at some future time become scarce again, whereupon the experiences of 1920 may be repeated, though of course in milder form.

Prices Remain Steady

There is scarcely any actually new business developing, and as a result the independents have no business offered them of sufficient importance to justify their doing much price cutting. Prices are only cut, of course, when there is an incentive. Thus the finished steel market may be described as steady, being at the same time very far from active.

No doubt in some lines there is occasional price cutting, say by from $1 to $3 a ton, but each instance represents a separate case. A cut price sale does not reduce the market to the lower level. In a regularly declining market that is what occurs. A few sales are made at a certain cut, then to effect additional sales the mills have to make fresh cuts, and so on. There is no such process now. Eventually, no doubt, this will come, but there are two pre-requisites, a larger volume of new business offered, making price cutting worth while, and a reduction in costs.

Wages and Costs

The latest reports are that the Inland Steel Company and the Steel & Tube Company of America, both in the Chicago district, have cut wages 20 per cent., effective January 16. Previously, reductions had been announced by the Wheeling Steel Corporation, Bethlehem Steel Company, Midvale Steel & Ordnance Company and some minor steel interests. There have been no wage reductions of consequence in the immediate Pittsburgh district or in the Youngstown district. On the whole less than half the independent steel capacity has reduced wages, while the Steel Corporation does not seem to have considered the matter and it is not expected to make any reduction for a long time.

DECLINE IS GRADUAL

(Continued from page 43)

lery have likewise been larger in recent months of this year that in 1919. For the five-month period ending in August exports of these lines were approximately one million dollars higher than in the same period in 1919. Canadian hardware has been well received in foreign markets and the development of the Canadian Government Merchant Marine and other export facilities should encourage this branch of trade.

The price tendency was upward in hardware lines during the greater part of 1920, and it is only in the last three or four months that there has been any recession. Recent declines have included cotton goods, cordage, glass, linseed oil, naval stores, ingot metals and lead products, which generally are as low or lower than they were at the beginning of the year. Other lines such as leather belting, harness, rubber goods, bar iron and steel, sheets and plates, white lead, putty and paint declined but at the end of 1920 were as high or higher than they were a year ago.

In metal products the declines have been in the raw or semi-finished material and it has not affected the manufactured article to a great extent as yet. Declines have been most pronounced in non-ferrous metals. Iron and steel products have been and are still the slowest to show any change, the reason probably being the scarcity during the greater part of the year in plates, sheets and bars. Galvanized sheets have been particularly scarce and premiums above regular quotations were the rule up until recently. Wire products also were scarce; no prices are quoted even now on barbed wire. Pipe, too, has been hard to get and the smaller sizes of black and galvanized sheets are still rather scarce.

Coal oil and gasoline are 30 per cent. above last year's cost, and indications are for slight declines, it is thought. The majority of the lubricating oils have advanced from 50 to 100 per cent. and fuel oil has also doubled in price within the year.

It is a question how far Canadian markets will be affected by surplus stocks and lower priced goods from foreign markets, and to what extent lower exchange rates will assist importation. Reports indicate the American markets are feeling the effect of considerable quantities of German made aluminum ware, cutlery and hardware. German cutlery and skates, etc., are being displayed by Canadian stores at the present time.

Roofing Nails — American, large head, keg, $11; 25-lb. boxes, per F.o.b. Montreal, Toronto, Hamilton. 100 lbs., $12.

Tommy and Betsy Discover Vitralite Tints

They also discover countless things about the house that can be made more beautiful and serviceable by the use of this famous "*Long-Life Enamel*" — now made in five authoritative tints (not common colors) in addition to the White. Tommy and Betsy tell your customers in the February quality magazines how they remade the old chiffonier into an up-to-date dresser. You'll find their page in the Atlantic Monthly, Century, Country Life in America, Harper's, House Beautiful, Review of Reviews, Scribner's and World's Work.

Vitralite has the quality appeal — an appeal that every dealer will be glad to profit by this season. If the new Tints are not already on your shelves, you'll be interested in the special introductory proposition. Shall we send the details?

Beatty Bros. Limited Bulletin

with BT Dealers

Appreciates BT Quality

For several years Braithwaite Bros. of Huntingdon, Que., have been handling BT goods. When our photographer arrived, there happened to be a big display of BT Pumps, Churns, Ladders and Washers in the windows.

We have always regarded Mr. Braithwaite as one of our most successful dealers. When we asked him what led him to handle, and keep on handling, BT goods, he replied:

"Because they are first-class quality, right through."

And after all, that's the best of good reasons, isn't it? BT goods sell easily, meet all requirements, and *stay sold.* They are the kind all dealers want.

MR. BRAITHWAITE
Surviving Partner of the Firm of Braithwaite Bros., Huntingdon, Que.

Mr. Braithwaite and His Staff

BT Pumps

You will now be booking your supply of pumps for spring delivery.

You cannot do better than specify BT Pumps. The BT Ready-to-Ship Line of Well Pumps covers the complete well pump field, and was the greatest improvement ever made from a dealer's standpoint. He can handle a complete stock with a minimum of expenditure and storage space.

BT Cylinders and Pump Leathers are noted everywhere for their high quality. If you have not handled them in the past, do not fail to give them a trial. They are "Made in Canada" throughout by Canadian workmen.

Cistern Pumps of every kind, Syphon Pumps, Power Pumps, Tank Pumps, Pump Jacks—all these and many more are included in the BT Pump Line.

Our beautifully illustrated catalogue (carefully indexed for quick and easy reference) is yours for the asking. Our representative will soon be calling on you and will gladly give full details. Our claims for BT Quality are easily proved!

TINKER TOM'S TALKS.

No. 295

"Shivering on the Brink"

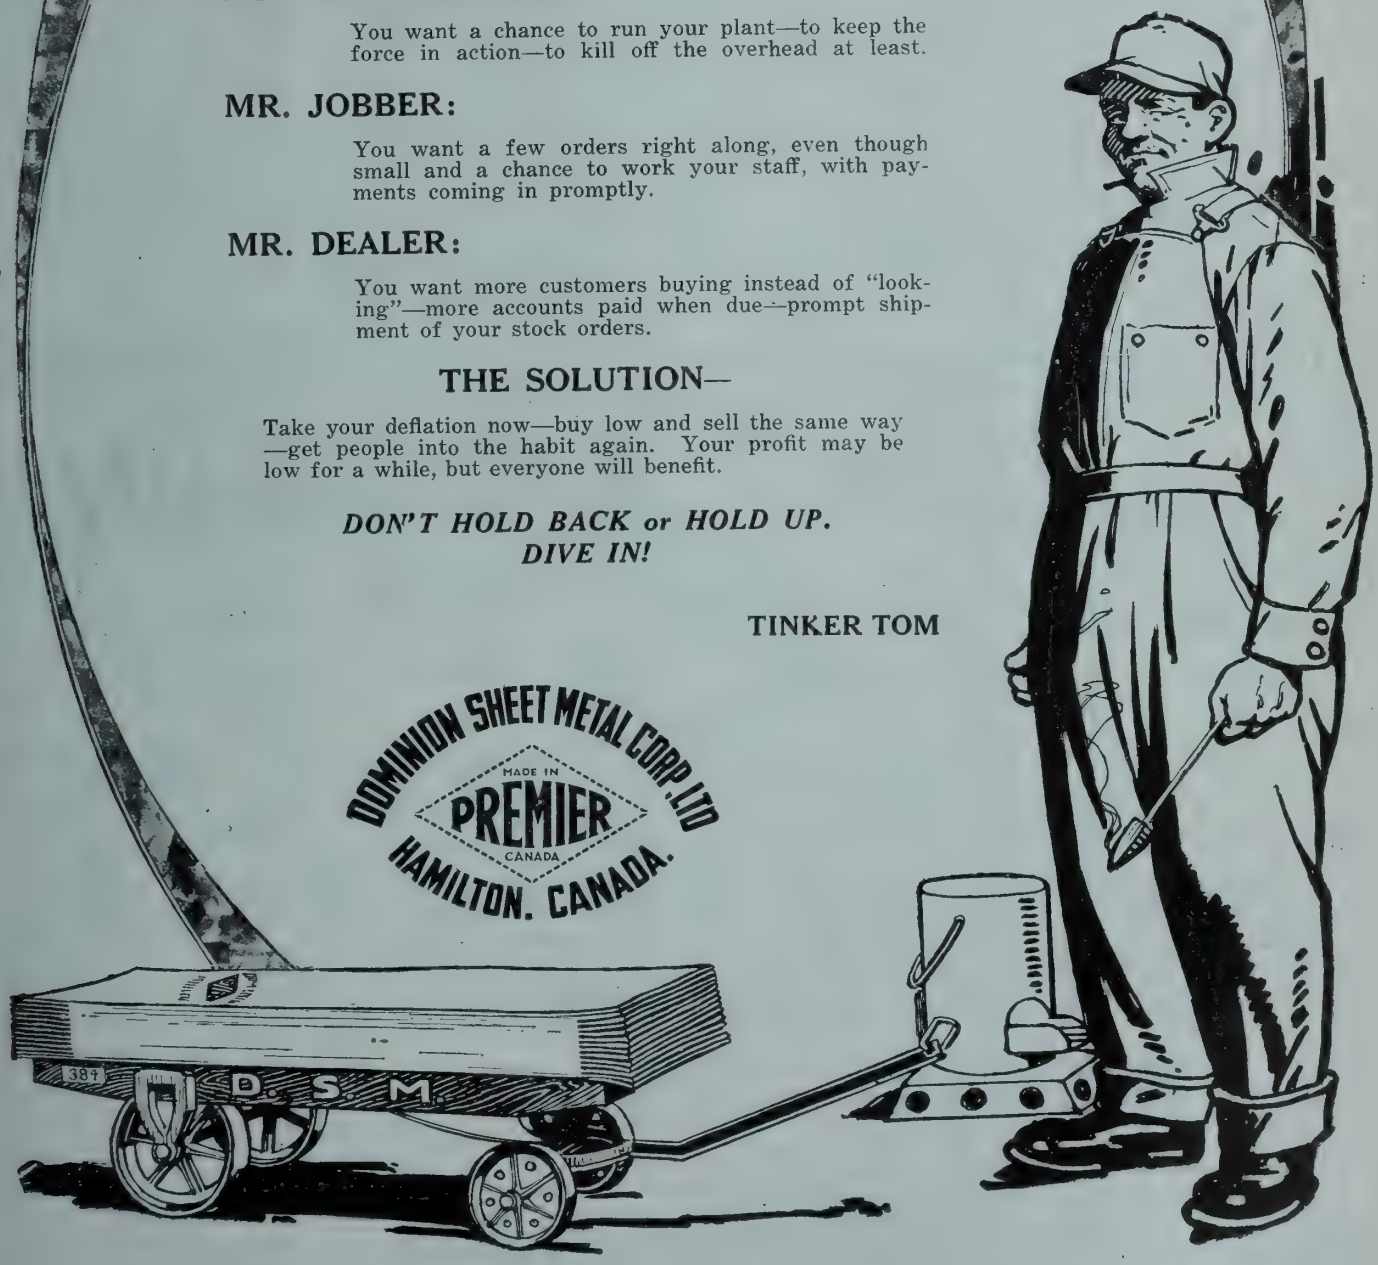
MR. MANUFACTURER:

You want a chance to run your plant—to keep the force in action—to kill off the overhead at least.

MR. JOBBER:

You want a few orders right along, even though small and a chance to work your staff, with payments coming in promptly.

MR. DEALER:



You want more customers buying instead of "looking"—more accounts paid when due—prompt shipment of your stock orders.

THE SOLUTION—

Take your deflation now—buy low and sell the same way—get people into the habit again. Your profit may be low for a while, but everyone will benefit.

DON'T HOLD BACK or HOLD UP.
DIVE IN!

TINKER TOM

If interested tear out this page and place with letters to be answered.

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G. & H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Silkstone fills the bill for the Canadian housewife. She has tried it and liked it and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller.

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers.

Silkstone is a tried and proven, steady salesmaker. It satisfies customers because it gives good results.

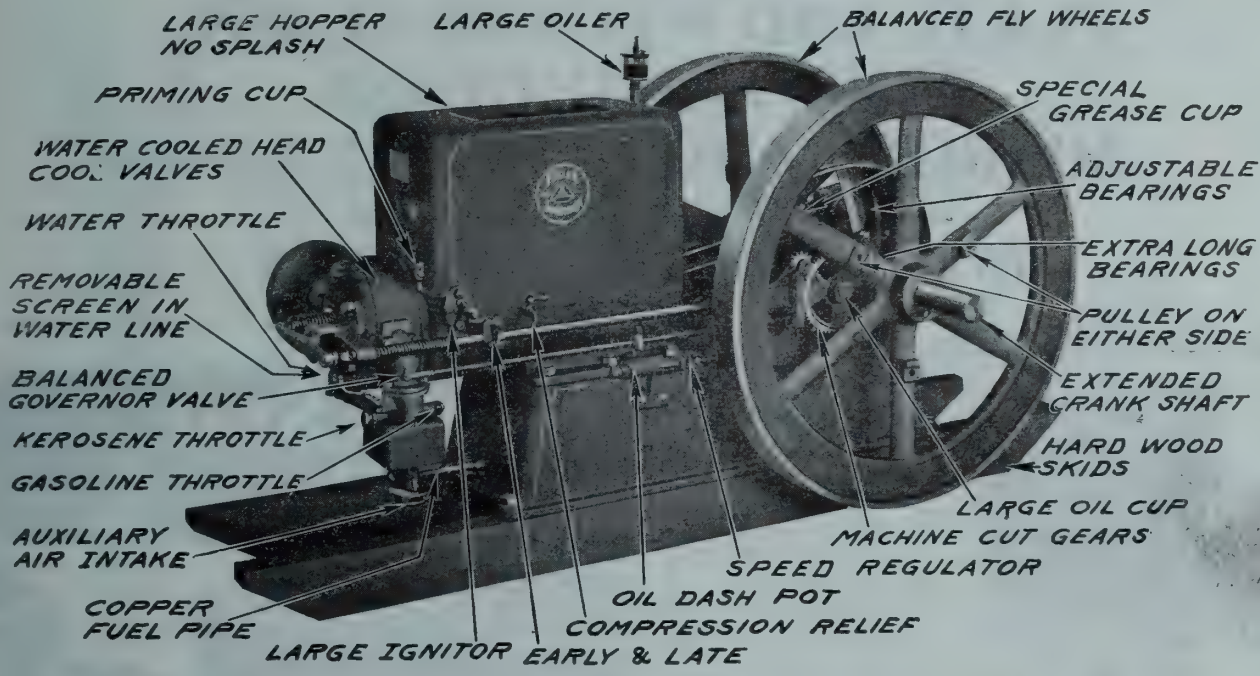
DIAMOND A BRAND — ASHDOWN'S GUARANTEE



The Largest Wholesale Hardware Dealers in Canada

FULLER & JOHNSON

MODEL "K" THROTTLING GOVERNOR

KEROSENE OIL ENGINES

All sizes, 3 to 25 H.P., Stationary and Portable

DEPENDABLE—QUALITY CONSTRUCTION—GUARANTEED

Fuller and Johnson Model "K" Throttling Governor Kerosene Engines embody all the latest improvements and developments in internal combustion engines. They are of the horizontal, hopper cooled, throttling governor type, regularly equipped with low tension, built-in magneto, and operate on the reliable 4-cycle principle.

NEVER MISSES AN EXPLOSION

RUNS SMOOTHLY and EVENLY under light load, full load or varying loads, with the fuel always used in proportion to the load.

MORE POWER, GALLON FOR GALLON, than you get in other engines from high-priced gasoline.

A PLEASURE TO HEAR IT RUN

"BONSPIEL" IS APPROACHING

CURLING STONE Headquarters

Mac's Special

Specially designed for us to suit our hard, keen ice. The weight is distributed in such a way as to give the running surface sufficient grip to hold whatever turn may be given, without any tendency to rock or roll.

Kay's Excelsior

Manufactured by Andrew Kay & Co., this stone has a world-wide reputation. An absolutely first-class stone that has given satisfaction wherever the game is played.

A·G·M·CO. VIKO ALUMINUM

No Gaps in the Viko Line

Because of its durability, light weight, and heat conductivity, aluminum is a superior metal for the making of cooking utensils. These three qualities insure long wear, economy, ease in handling, and fuel saving. They are the qualities that account for the rapid ascendance of aluminum wares.

VIKO, The Popular Aluminum, is an exceptionally rapid seller. Not only is it attractive in design and of excellent construction, but it has a special appeal in its popular price. There are no gaps in the Viko line. It contains every wanted kitchen utensil. If you are not handling Viko —

The Playtime

is a dolly-type washer which meets every demand for a combination hand and engine drive machine.

It especially appeals to up-to-date farmers who are not yet prepared to invest in the higher-priced "Seafoam" washing and wringing outfit.

Without alteration it can be belted to the flange fitted on fly-wheel. Should the power stop at any time it is ready for hand use.

The cover can be raised and lowered without removing the belt.

Tub is made of Cypress, corrugated and waterproofed inside, heavily hooped and durably finished. Its reputation has been established for some years.

Remarkably low in price.

Descriptive folder on request.

Advertising that reaches *your* customers

This year's advertising of the famous Barrett Products will cover Canada like a blanket.

35,000,000 Advertisements. Think of it!

And they will reach consumers of every class, all over the Dominion:

6,500,000 advertisements in leading farm papers going to the farmers of Central and Western Canada. (12 issues, 545,000 circulation each issue)

5,750,000 advertisements in weekly newspapers going to farms and small towns of Quebec and Maritime Provinces. (28 issues, 206,000 circulation each issue)

23,500,000 advertisements in Montreal daily newspapers, covering Montreal City and adjacent territory. (Twice a week, 251,000 circulation each issue)

250,000 advertisements in leading technical magazines reaching railroads, manufacturers, contractors and other large consumers. (12 issues, 20,500 circulation each issue)

These advertisements will be attractive in appearance and filled with strong selling arguments. They will tell why Barrett Products are superior to all others—why they give unfailing satisfaction and save money for the user.

They will bring a big volume of new business to every dealer who is ready to supply the demand.

This is an opportunity you can't afford to miss. If you have not already received a copy of our latest Price List, write for it today.

The well known Barrett Products which will be featured in our big consumer advertising campaign, include:

Everjet Elastic Carbon Paint
Everlastic "Rubber" Roofing
Everlastic Liquid Roofing Cement
Plastic Elastigum Patching Cement
Liquid Elastigum
Creonoid (Fly Oil) Cow Spray and Lice Destroyer

An Axe is as Strong as its Handle

STILL'S

—will give you a stronger working tool, for **STILL'S HANDLES** are made from the best of Canadian Woods.

The sale of

STILL'S HANDLES

far exceeds all other makes.

There's a reason.

Axe, Pick, Sledge and Hammer Handles, Cant Hook and Peavie Handles.

It pays to sell **STILL'S.**

Fig. 117

"McDougall" Well Pumps

A Standard in Every Community

This represents one of our best features in Well Pumps. The cog gear head is a distinct advantage over pump heads where links and friction guides are a necessity.

A minimum amount of labour for producing maximum results is a distinct selling advantage.

Manufactured by

The R. McDougall Co., Ltd.
Galt, Canada

We Point with Pride

"Gutta Percha" Tires

to the record made by "Gutta Percha" Tires in 1921. Probably no tire anywhere at any time ever reached a higher achievement. ENDURANCE seems so thoroughly impregnated into every atom of its composition, that it now stands out—distinct—as the **most enduring** tire **on the market.**

Dealers who know the advantage of selling an **entirely satisfactory** tire, will be glad to stock up strong on "Gutta Percha" lines this season.

"Go as far as you like on 'Gutta Percha' Tires"

8 3/4" to 9 5/8" $5.25
9 3/4" to 11 1/2" 6.75

Officially Approved by the Ontario Government, Passing Test With Very High Rating

January, 1921, will see the law against glaring headlights rigidly enforced. No motorist will be allowed to drive his car unless it is equipped with Government-approved lenses.

Legalite Lens have proven to be the most practicable, efficient and saleable lens on the market to-day.

DEALERS! Be Prepared for Big Business

Every passenger car, truck or commercial vehicle in Ontario will be compelled to carry legal, non-glare lens before the new licenses are issued.

Motorists will be asked whether their cars are equipped with approved lenses and what make. Think of the business possibilities the 150,000 motor-driven vehicles in Ontario offer you! Get your stock of Legalite Lenses at once and prepare for big business.

Don't Leave Them Behind

Brains and _Chains_ must be _used_ for the safe operation of automobiles.

PRACTICALLY every car in operation has *Weed Tire Chains* —in the garage. Even the novice knows there are times when he cannot drive safely without them. The trouble comes in making drivers *think* to always carry them in their cars and *think* to put them on the tires "at the first drop of rain."

Give your *Weed Tire Chains* a chance to perform their mission. Don't leave them in the garage. Carry them with you and put them on the tires *before* the elements whip the streets into black deadly skidways.

Only a moment of your time and their steel forged protection will be securely *chaining your car to safety.*

Weed Tire Chains

on your tires reflect your prudence and intelligence.

MR. DEALER: Write us for advertising material, also for names and addresses of nearest jobbers stocking Weed Tire Chains

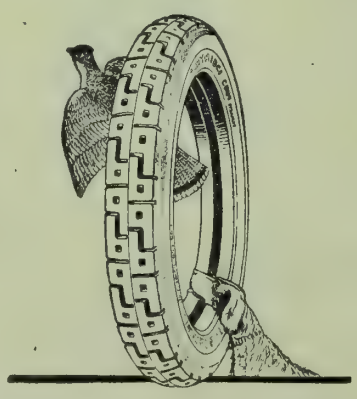
About Tires



To the Dealer—

All are agreed that the tire business is quiet—so quiet that many tire factories are either closed down or operating at minimum production. If this condition of affairs is permitted to continue, what will happen to the tire business of 1921?

Exactly this: Until you place your Spring orders, tire factories will continue to lag along, without the guidance of your specifications in their manufacturing. With an open Winter such as to date, and a reasonably early Spring, terrific inroads will have been made on present stocks of tires by late Spring. When the Summer rush of 1921 sets in, there is grave danger of a shortage of Tires, and much lost business will ensue, as a result. No manufacturer can handle more than so much eleventh hour business, and we urge that you protect yourself against a situation such as outlined.

Prices of tires to-day are less than one-half of one per cent. over pre-war figures: They cannot drop still lower, as the greatly increased cost of labor over pre-war days, combined with far higher overhead costs, will not permit this.

Partridge Tires and the Partridge Rubber Company are operating in your best interests — but we must know your requirements in time to serve you well.

Have You Had Trouble With Your Tires?

MOST tire troubles can be traced to either too little or too much air pressure. Keep the pressure at the exact point recommended by the tire-maker and your tires will give less trouble and more mileage—to say nothing of greater riding ease. The Schrader Universal Tire Pressure gauge enables you to test the pressure easily and quickly anywhere, anytime. It is one of the indispensables for every motorist.

Price $1.75 anywhere in Canada.

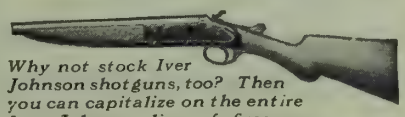
The Feature

that Sells Iver Johnson Safety Automatic Revolvers



The only way to discharge an Iver Johnson is to pull the trigger (1) all the way back; this action raises the lifter (2), which forces hammer (3) to cocking position. When lifter is at its highest point the hammer covers the firing-pin (4). At this position the hammer is released, striking the lifter, which in turn strikes the firing-pin, driving it into the cartridge.

No impact can force the hammer against the firing-pin—thus the world-famous slogan "Hammer the Hammer."

Stock the entire line—22, 32, 32 special and 38 calibers, Hammer and Hammerless models with Regular, Perfect Rubber and Western Walnut grips.

"The Safe Revolver to Sell"

Why not stock Iver Johnson shotguns, too? Then you can capitalize on the entire Iver Johnson line of firearms.

Write for firearms catalog and complete dealer information. Ask about Iver Johnson bicycles and motorcycles, too. A good line to stock complete

IVER JOHNSON'S ARMS & CYCLE WORKS, 330 River St., Fitchburg, Mass.
99 Chambers Street, New York **717 Market Street, San Francisco**

End This Extravagance, Says Mackenzie King in MACLEAN'S

"There is the greatest need for an end to extravagance, and for the exercise of the strictest economy in the administration of public affairs," says W. L. Mackenzie King in the January 15th issue of MACLEAN'S.

HE adds, further: "The first aim of the Liberal party in Canada to-day is to bring about such co-operation and co-ordination of effort among men and women of liberal aims"—(a small "l" please note)—"and aspirations as will ensure defeat of the combined forces of a reactionary Government, and make possible, in matters of Government, the re-assertion and ultimate triumph of liberal" — (still a small "l")—"principles and policies."

Is This a Message to Mr. Crerar?
Is This a Plea for Union of Farmers and Liberals?

Other Big Features in January 15th MACLEAN'S

There are fifteen other big feature articles, serials, short fiction and regular departments. These include:

"The Human Speedometer"
By Charles Christopher Jenkins.
The story of a Canadian who "times" race-horses as a profession.

"The Hat" By Frederick Niven.
A vivid word-picture of a feature of our West which strikes this war correspondent.

"My Flirtation Ends"
By Mrs. "Margot" Asquith.
Wife of former Premier of Great Britain tells how her eight years' dalliance with Peter ends.

"Our Lost Immigrants" By Miss Agnes C. Laut.
She tells some cold, hard facts, and explains why hundreds of thousands left Canada.

"Scarlet and Gold"
By Colonel George Ham.
Who gives here a few chapters from the romantic history of the Royal North West Mounted Police in earlier days.

"Paying the Doctor to Keep You Well"
By Ethel M. Chapman.
A worth-while and timely article, depicting the work of the Life Protective Association.

"A Canadian Child Poet"
A little bit about twelve-year-old Miss Rae Maltby Verrill, of British Columbia, whose work seems to show promising talent.

Interesting Fiction

"The Big Time Man"
By C. W. Stephens.
A bottling-business romance.

"The Act of God"
By Beatrice Heron-Maxwell.
A near-murderer's escape.

"Jane Ann's Rival, Mabel"
By Archie McKishnie.
A Lenix Ballister episode.

"The City of Peril"
By Arthur Stringer.
A romantic, Bolshevistic serial.

WANT ADS

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

OLD ESTABLISHED STOVE MANUFACTURing company requires capable stove salesman to call on the retail trade in Ontario. Young man preferred with experience. Must be real salesman. Apply stating experience and salary required. Applications strictly confidential. Apply Box 22, Hardware and Metal.

BUSINESS CHANCES

MACHINERY, HARDWARE, HARNESS AND farmers' supplies. Large store, can be bought or leased. Very moderate amount of capital required. A real money maker. Good town on provincial highway. Box 82, Hardware and Metal.

STOVE REPAIRS

Fire Brick, Iron Linings, Water Fronts for Supremes, Garlands, Pen Esthers, Pandoras, New Empress, Acmes, Souvenirs, Crown Hurons, Peninsulars, Favorites, Silver Kings, Sunlights, Climax, and all kinds of Ranges and Heaters. Write for complete list and prices to

CANNON OILERS

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

Set Higher Standards

Let the quality of the tools you sell reflect the high standard of your services.

Sell Pexto Tools—they have been accepted for generations as the highest standard of quality, durability and perfection and they are fully guaranteed by the maker.

There are numerous features built into a Samson Brace which good mechanics look for and demand, viz., "The ball bearing chuck, perfect adjustment of the forged steel alligator jaw, the ball bearing head, the concealed ratchet, the concealed brass friction washers, the full steel clad head and other Pexto features."

A Brace Display in your window or on your counter will attract attention, create interest, arouse desire and then the sale is practically made.

Less time and less effort reduce selling costs.

Pexto goods may be obtained from representative Canadian jobbers.

The Answer To A Need

No product ever "caught on" as Aladdin did, unless it fulfilled a real want on the part of the public.

The women of Canada wanted a Dye Soap that would be as easy to handle as ordinary soap and yet that would give results equivalent to those obtainable by professional dye experts.

We gave them just that—and the natural result is a sales response so immediate and so large that merchants are as enthusiastic in *selling* Aladdin as the women are in *using* it.

UNIVERSAL

"The Trade Mark Known In Every Home"

ALUMINUM WARE

Big Sales Grow Where Little Ones Sprout

WATCH a man peel an apple and you'll want a bite. Show any discerning woman Universal Aluminum Ware and you'll make instant appeal to her better judgment. She'll want it. She'll buy it. There are a dozen reasons why she will. And the first twelve are—QUALITY. Big sales grow where little ones sprout because Universal Aluminum Ware is not thin as tin and easily worn out.

Extra thickness without added weight. Curved surfaces,—rounded corners,—tightly-rolled, non-bending rims,—cool bails, doubly-braced handles—all the features that make for practical service and lasting quality are generously supplied.

Selling "Universal" isn't an adventure in darkness along disguised pitfalls. It is clean, sure, sound and profitable business.

An Old Friend of the Trade

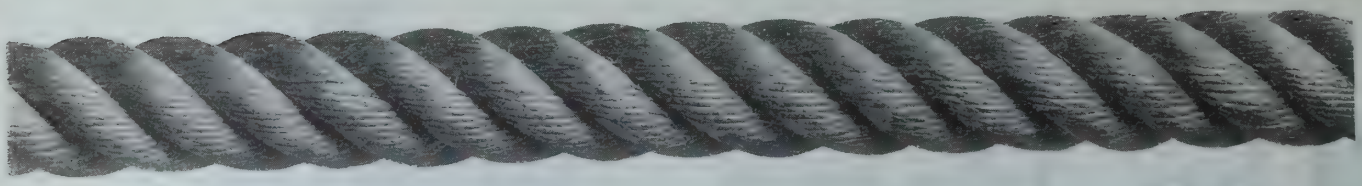
The Hatch

Trolley Hanger

Moderate Price — Quick Turnover

This perfect-action hanger sells extraordinarily well because it might be said to be "made to measure for the Canadian trade."

The Hatch Hanger is the result of a thorough investigation of the requirements of the hanger-users and the trade in general, and the hanger fills exactly the wants of the trade and consumers. This accounts for its splendid sales.



A s m o o t h, easy-running hanger with apron 6 inches long and 3 inches wide. It moves with perfect action on roller bearings. Packed for shipment one pair in a box complete with bolts and end caps for track; 12 pairs in a case. Weight, per dozen pairs, 85 lbs.

"If I Were to Use It Myself!"

The one safe guide in buying is the question, "If I were to use it myself, would I buy this?"

A man who buys on this basis usually keeps his old customers and attracts more.

Most hardware men who adopt this creed sell Plymouth--"The Rope You Can Trust."

Eliminate Snow and Ice Troubles

No. 1917 Hanger with
No. 1918 Track and Brackets

No. 1918 Flush Hanger
No. 1918 Track and Brackets

This is the only self-cleaning track on the market. It will not hold dust or water. As shown in the sectional view, the carriage is protected from weather—from snow and ice, and accumulations that might interfere with smooth-running of the hanger in its track.

No. 1917 Hangers are packed one half, or one dozen, pairs in wooden case. No. 1918 Hangers are packed one half dozen pairs in wooden case. No. 1918 Track is supplied in 3-foot lengths only. It is packed in 48-inch and 60-foot crates. A complete catalogue will show you many other good sellers in the S. & B. line.

Never Had To Sift Ashes

Gentlemen:—

My house is heated with a No. 520 "NEW IDEA" Furnace. It has been in use several years and is still giving me satisfaction. I have found it economical on fuel and the grates are so easy to operate. Being Duplex working on ball bearings, I have never had to sift the ashes or worry over the clinkers. It has not cost me a cent for repairs.

JAMES CHALMERS,
General Merchant,
Shelburne.

THE NEW IDEA
WARM AIR FURNACE

Fully Guaranteed **Burns Coal or Wood**

This Furnace is made with a one-piece, heavy flanged cast Fire Pot, which is guaranteed for five years, and ball-bearing duplex Grate. Will give more heat, with less Coal, than any other make of Furnace. You will have no difficulty selling The New Idea, as it has been giving **more** than satisfactory service for seventy-five years.

If you are interested in handling this Furnace in your town, write us at once for our attractive agency proposition.

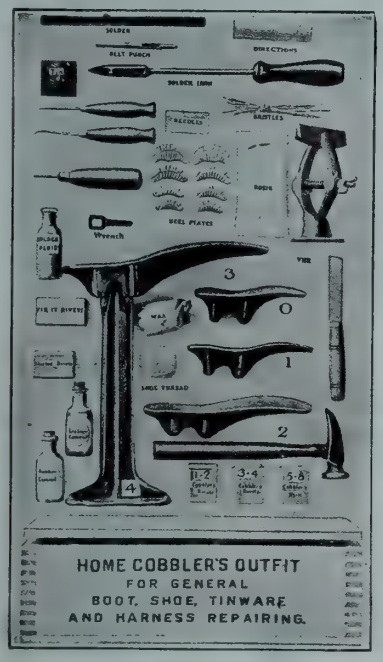
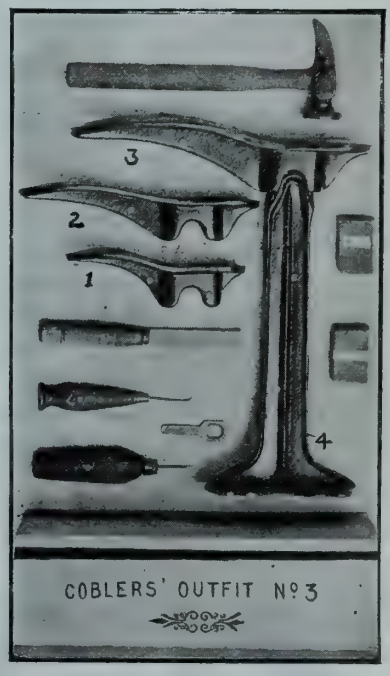
Canadian Lines that Reduce the High Cost of Living

Maxwell

The Products described and illustrated on this page compare more than favorably with imported lines, both as regards quality and price, independent of the saving in exchange and benefit of supporting a Canadian industry.



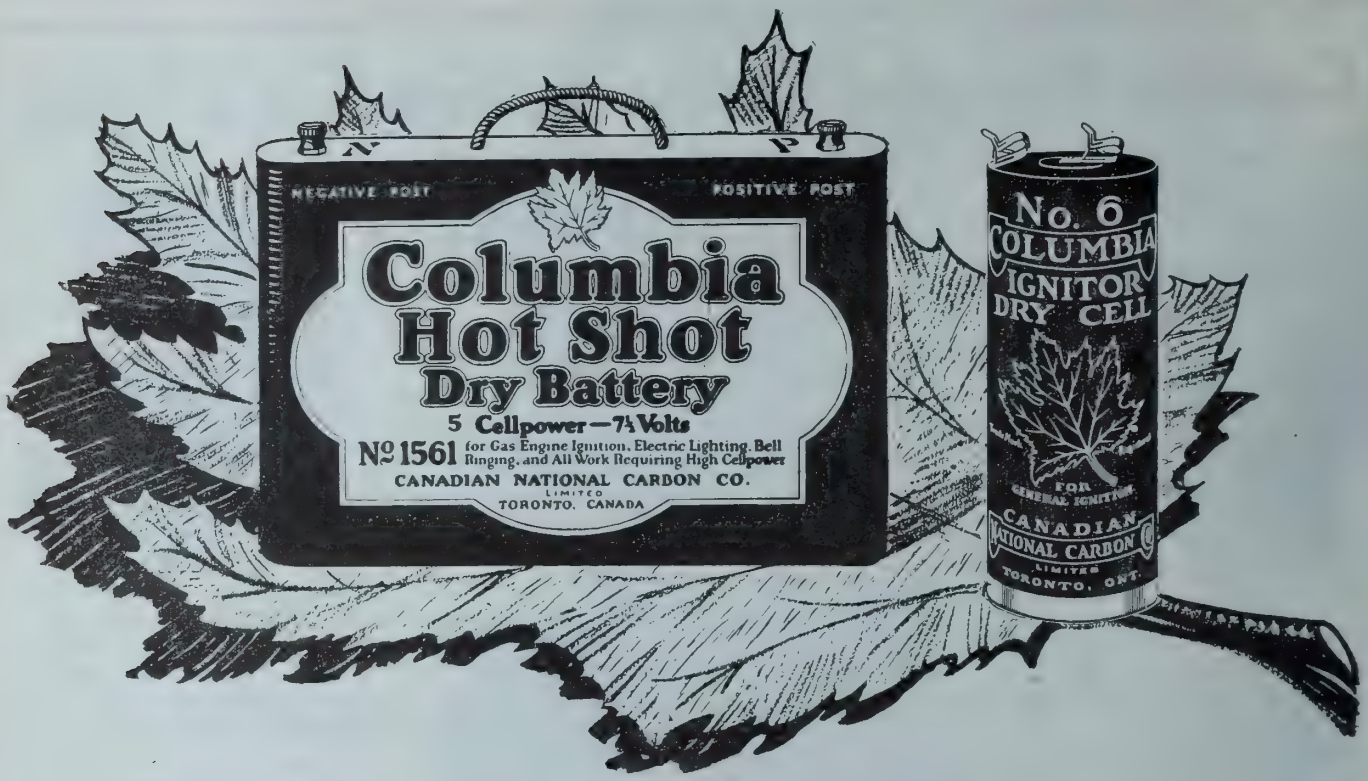
The value of a food chopper is only appreciated fully by users. It is reasonable to suppose every family without a chopper is a prospective buyer and with certain facts clearly told them many will buy one.



Cheaper meat cuts can be put through these machines and not only made as palatable but infinitely more nourishing than the expensive fancy cuts.

For grinding bread, chopping meat, fruits, vegetables, suet, etc., these machines are without equal. The assortment of cutting plates are well tempered steel and execute the work quickly and easily.

There is a Maxwell Chopper for the largest or smallest family requirements. One or two of these prominently placed in your store will return many enquiries and with your help close many a sale.



Have you ever considered the number of people in your district who could use a Cobbler's Outfit? The Home Set illustrated above consists of a complete set of tools for repairing tinware, boots, shoes and harness, right in the home. One or two small jobs a year and the outfit has paid for itself, besides saving trouble and inconvenience. The No. 3 set includes only the boot, shoe and harness repairing tools. A lively demand for these lines has been created by dealers showing them to customers. They are a profitable proposition for you.

TO ANY POINT, WE CAN MAKE IMMEDIATE SHIPMENT.

MAXWELLS LIMITED **ST. MARYS, ONT.**

Are You Getting Your Share?

FROST

FENCE

According to Government announcements, farmers are each year removing more and more of the old snake and stump fences and replacing them with fences of woven wire.

Are you getting your share of this wire fence business? Have you a type of wire fence in your store that you *know* will satisfy the needs of your farmer customers? Do you carry a line of Frost fences, or, if not, have you considered the advisability of handling the Frost Fence?

Frost Fences are the answer to the farmers' demand for a fence combining strength, appearance and economy. The wire is tough and strong, and the mesh is held together by the tight lock that grips as no other lock does. The stays are straight and evenly spaced, making a fence that is easy to stretch, and which stands straight as an arrow, and it is truly economical, for the wire used is full gauge No. 9—drawn in our own plant and heavily galvanized with high-grade spelter.

Hardwaremen realize the opportunities of expansion that come through handling a product of superior qualities.

Frost Steel and Wire Co., Ltd.

Hamilton, Ont.

Westinghouse

Reliable—

Most important of all, Westinghouse Appliances are reliable.

The Westinghouse Type H Iron uses little current and uses that little to best advantage, centralizing it on the ironing surface.

All Westinghouse Appliances sell readily, for the Westinghouse reputation for reliability is world wide.

SERVICE

Dependable Repair Work—and no other kind is tolerated by the cautious operator of electrical apparatus—is the natural result when performed by factory-trained experts, supported by the engineering skill and manufacturing knowledge associated with the name—

WESTINGHOUSE

Prompt Repair Service has been assured to users of Westinghouse aparatus, by establishing at convenient points repair shops operated by the Company's Service Department, where repair work is executed with all possible despatch, consistent with the care that is observed in the various processes entering into work of this character.

Repair shops are located at—

"GUTTA PERCHA" ACCESSORIES

"Gutta Percha" INNER TUBES

These tubes are made by the lamination process of the best material obtainable.

"Gutta Percha" BLOWOUT PATCHES

These patches have a smooth lining and the ends are feather edged to prevent the tube from being chafed or pinched.

"Gutta Percha" INTERLINERS

To strengthen weak spots in a worn casing. They add miles to the life of a tire and practically eliminate blowouts.

"Gutta Percha" LACE-ON BOOTS

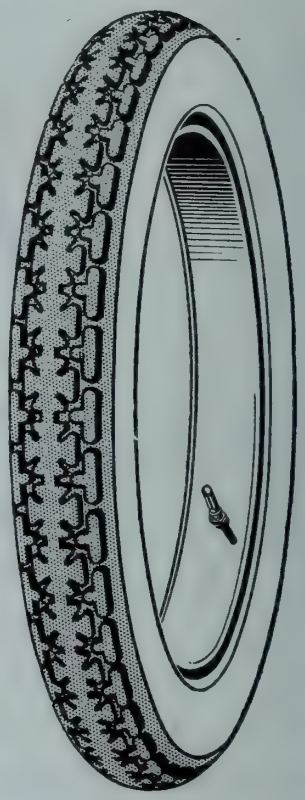
Prevent cuts and breaks from extending further until a permanent repair can be made.

"Gutta Percha" WELDACUT

For permanently sealing small cuts in tires which prevents moisture from rotting the fabric.

"Gutta Percha"

TALC POWDER



PEDAL RUBBERS

RADIATOR HOSE

CEMENTLESS PATCHES

RUNNING BOARD MATS

"GUTTA PERCHA" TIRES

"Gutta Percha" Cord and Fabric Tires, by reason of the extraordinary service they rendered in 1920, have gained the praise of the motoring public. Continued satisfactory service and the use of aggressive coast-to-coast advertising are creating an increased demand for these tires. They will ask **you** for these tires, Mr. Dealer. Have you ordered your stock yet?

"Gutta Percha" Tires and Accessories are well known for their quality. They require little selling effort and every sale will bring you the customer's good-will. There are liberal profits in our lines and we back the dealer with good advertising.

$1.50 Saved

on the Hanging of Every

The Old Way

The Lawson Way

Lawson Nu Jamb Spring Hinge

LAWSON Nu Jamb Spring Hinges are applied directly to door jambs *without hanging strips*. No strips to buy, finish or mortise. The saving on each hanging is at least $1.50. Dealers everywhere prefer them. A Western dealer recently said:

"Since I've been showing LAWSON'S hinges, customers won't buy others. The hinge that requires no strips outsells all the others put together."

Stock LAWSON hinges, compare sales with ordinary hinges, note how easily they sell once you explain the direct-application feature, and you too will prefer to handle LAWSON'S hereafter.

Write today for illustrated catalog describing in detail this and other styles of Lawson Spring Hinges, for residence, office and factory doors, gates, etc.

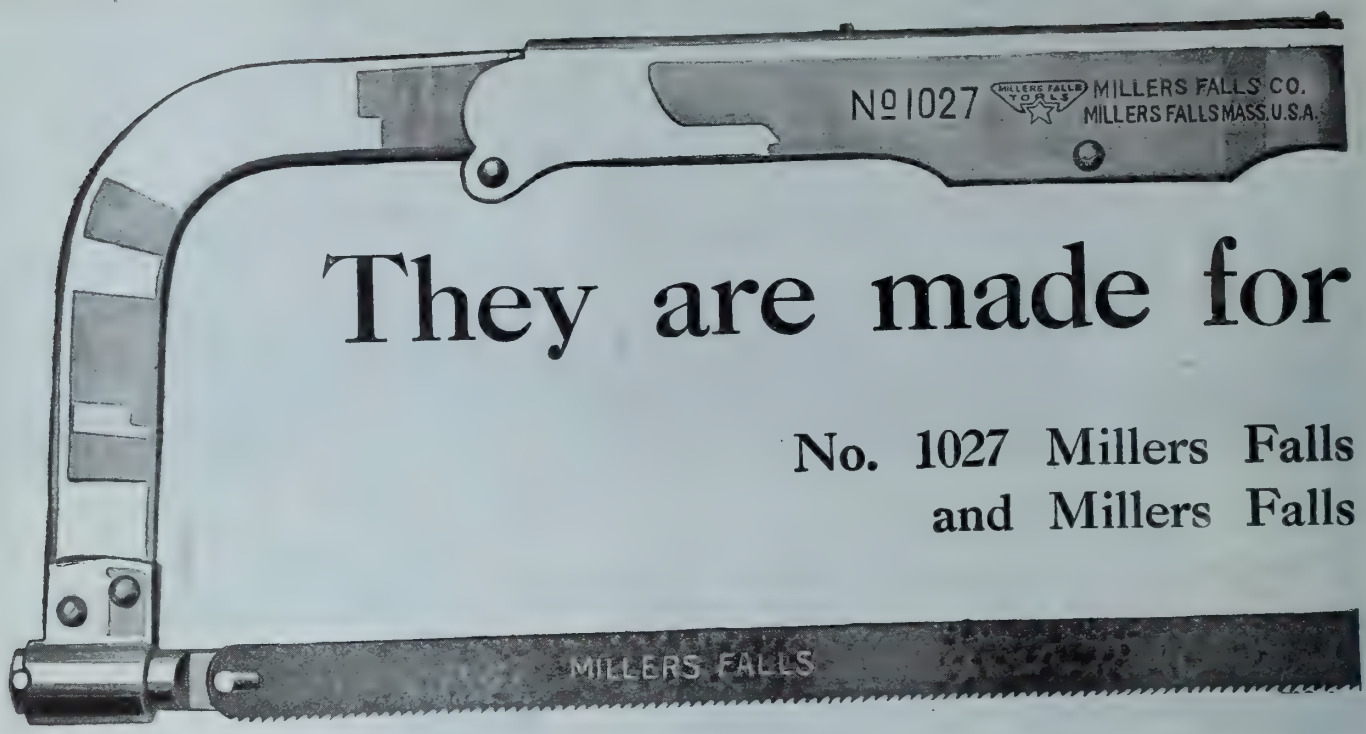
Story for Week Dated January 29th, 1921 Being No. 42 in the Series

A Paper Bag Big Enough To Hold An Automobile



THE illustration above shows one of the largest sorts of paper bags made by the E. B. Eddy Company at Hull. Inside this monstrous paper bag there is a Ford Automobile. Bags of this size are made in considerable quantities by the E. B. Eddy Company, for use by the automobile manufacturers. They are used when cars are exported, and for the protection of cars during railway transportation. A further and growing use for them is for putting over autos when the cars are laid away for the Winter. The protection provided by the strong impervious Eddy Paper, which keeps out dust and acts like a blanket against changes of temperature, cannot be surpassed. Though made of such apparently perishable material as paper, these giant bags last well, and are inexpensive. They are made by hand with sewn and strongly glued seams. Even at the Eddy plant—the home of giant machinery, there is not a machine huge enough to turn out these great paper bags at so many per minute.

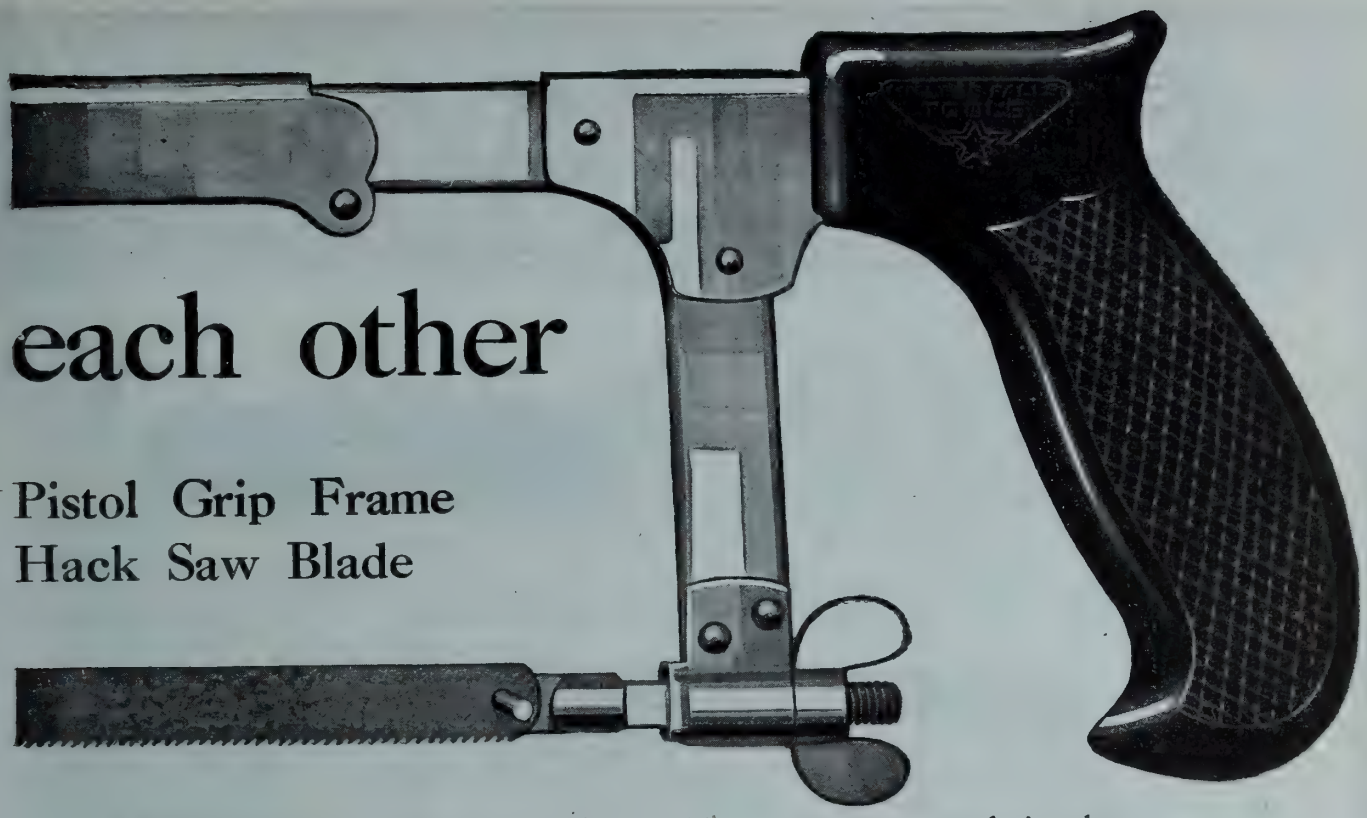
They are made for

No. 1027 Millers Falls and Millers Falls

MILLERS FALLS HACK SAW BLADES set new standards—are worthy companions to our No. 1027 Pistol Grip Hack Saw Frame. Together they make a working tool that for its purpose can't be beat.



Millers Falls Blades are even-tempered—every blade in the box is alike—none too soft, none too hard. Each tooth is accurately finished—no strain points at the ends of the blade—no binding, therefore less breakage. And they *stay sharp* a long time.

You can get behind Millers Falls Hack Saw Blades and push them, because they merit it and make satisfied customers. This is a Millers Falls product, and is backed by Millers Falls Company guarantee of quality.

The Berkshire Hills country —the home of Millers Falls Tools

If interested tear out this page and place with letters to be answered.

each other

Pistol Grip Frame Hack Saw Blade

THE mechanic who has tried the No. 1027 Pistol Grip Hack Saw Frame will tell you it is not only comfortable—easy on your hands—but saves blades, too. He does a better job in less time, has better control over the frame—a firm hold that resists wabble.

The Millers Falls No. 1027 Pistol Grip Frame is an easy seller. Just point out its many exclusive features: the steel rib securing the handle that extends almost the entire length, serving as a strong backbone; extra strength in the middle of the back, where the greatest strain comes; the thumb nut placed beneath the handle, never interfering with the stroke; the perfect "hang" of the tool. A man who knows tools will quickly see how it meets his needs. And you've made more than a sale—you've made a satisfied customer who will buy from you again.

The Millers Falls Mechanics' Handbook will be sent you for ten cents to cover postage.

Build Up a Profitable Fence Business!

If You Believe in Advertising This Will Interest You

It has always been the policy of our company to back up our dealers with advertising in a very generous way and 1921 will be no exception to the rule. In fact we have enlarged our program this year and are determined that every PEERLESS dealer will sell more fencing than his local competitor.

A PEERLESS advertisement will appear regularly in each of these papers:

Farmers' Advocate	Journal of Agriculture
Family Herald & Weekly Star	United Farmers' Guide
Farm Journal	Maritime Farmer
Farm & Dairy	Canadian Poultry Journal
Globe (Farm Edition)	Canadian Poultry Review
Canadian Countryman	Grain Growers' Guide
Canadian Farmer	Nor-West Farmer
Farmers' Sun	Canadian Power Farmer
Farmers' Magazine	Western Home Monthly
La Presse	**Farm & Ranch Review**

We haven't missed any of the good ones, have we?

Now, Mr. Dealer, it remains with you whether or not you will get the benefit of our campaign—all you have to do is to handle PEERLESS Fence, and our advertising department will see to it that you have an endless flow of customers to buy it.

In addition to our farm paper advertising, we carry on a very extensive mailing campaign which creates sales in your territory, and would be pleased to tell you more about it if you care to send us a card.

Not only does a PEERLESS dealer get advertising co-operation, but he also gets the name of handling a fence that has no equal for strength and durability—every strand of PEERLESS is put to the acid test before it leaves our factory and every rod is fully guaranteed—you simply can't go wrong when selling PEERLESS.

Catalogue No. 9, which will be off the press in a few days, fully describes and illustrates our many styles of farm, poultry and ornamental fencing—also farm gates and steel posts—write for it.

WILLIAMS' "AGRIPPA" TOOL HOLDERS

THE production of superior drop-forged tools is traditional in our works. For nearly half a century our entire energy, equipment and resources have been devoted, wholly and exclusively, to the manufacture of the highest grade of product made possible by the development of the drop-forging art.

Like all of our *standard* Machinists' Tools, Williams' "Agrippa" Tool Holders are built for service—severe service that tries stamina to the utmost. Drop-forged from a special grade of carefully selected steel—scientifically heat-treated and hardened—they are sturdy, dependable tools of proven strength and merit.

A wide range of sizes in standard patterns for all regular machining operations: Turning, Boring, Planing, Threading, Knurling, Cutting-off and Side Work.

1921—The Return to Normal

The holiday trade is over and buying has settled down steadily to its normal gait—a gait with which none of us have reason to be dissatisfied.

Judged by pre-war standards, business is running at a merry clip and that is all we can ask. It was the pre-war years that built businesses to stay.

Haphazard, irresponsible buying is finished. The year 1921 sees neither a slump nor the indications of one—merely the return to the normal.

Nothing is more in tune with the times than the

GILLETTE
Safety Razor

the steady, all-the-year-round seller that sold to the public for $5.00 before the war, through the war and remains the same to-day.

The Gillette Safety Razor is well advertised; it is more than half sold when your customer comes to you; it delivers service and satisfaction far beyond its price; it brings your customers back to you when new blades are needed; it affords you a generous profit without risk.

Canada's National Hardware Weekly

Hardware and Metal

Published Every Saturday Since 1888

Vol. XXXIII. TORONTO, JANUARY 29, 1921 No. 5

Gains $82—Jeopardizes Valuable Connection

One Hardware Merchant Gained This Added Profit on Sale of 200 Pounds of Sash Cord by Maintaining Prices on Basis of Cost—The Customer Compared Figures and in Future is More Likely to Deal With Another Merchant Who Bases Prices on Replacement Values and Takes Decreased Profits in Interests of Bigger Turnover.

THERE is some division of opinion among hardware merchants as to the policy to be followed in view of the price reductions now taking effect on many lines of hardware. While the declines in hardware prices have been much less extensive and much more gradual than in many other trades the same problem in a less acute form is presented and a definite policy followed by all merchants will undoubtedly be the best solution.

A policy of re-marking retail prices immediately on receipt of notice of a decline is followed by the retail department of Rice Lewis & Son, Toronto. Dealing with this point Mr. Gilverson, retail store manager, stated to Hardware and Metal that it was much in the interests of trade to follow this plan, that customers could only be encouraged to buy when all such concessions were passed on to them. He is of the opinion that it is merely a case of taking less profits on those lines so affected, the declines in practically every case being so minor that little if any loss would be sustained.

Even if a loss were necessary Mr. Gilverson pointed out that manufacturers and wholesalers were compelled to bear their share of such losses and that if retail hardware merchants do not follow out the plan, trade will remain slack and conditions rendered even more acute for the wholesaler and manufacturers who are endeavoring to stimulate business by reducing prices to the minimum. It was pointed out that when prices were advancing merchants took the additional profits accruing from stock on hand prior to the advance, and that now when conditions are reversed the customer should be given the benefit of any declines. This policy is being strictly applied by this company.

Replacement Values Higher on Some Lines

It was pointed out by Mr. Gilverson that on many lines, notably for Spring business, replacement values are to-day much higher than for last year's spring trade. He is a firm believer in the policy of carrying a stock adequate for local requirements and is of the opinion that if building is resumed on a big scale, as expected, the demand for many lines of hardware will be such as to quickly clean out the light stocks now held by many merchants and afterwards deprive them of business until manufacturing again gets into its regular swing. Word of a probable stiffening of prices in the spring on many lines of builders' hardware was said to have been received from manufacturers, who state that costs are very little lower than during the recent high levels.

Give Customer the Benefit

W. A. Walker, of W. Walker & Son, Toronto, pointed out to Hardware and Metal that his firm was following strictly a policy of immediately reducing retail prices where declines were noted by wholesalers. The advice being given to retail clients and which is also followed out in their own retail department is to take a loss of the amount of the decline noted and give the customer any benefit of lower prices. This plan is thought to be in the best interests of trade and the best plan to make a speedy readjustment to normal levels. Mr. Walker is of the opinion that the customer's confidence is required to-day in order to maintain trade at its normal pace, and that the best way to achieve this result is to have no misunderstanding over prices and to give the best quotations which could be secured at any hardware store being operated under similar conditions.

A Case in Point

An interesting case outlined to Hardware and Metal, as illustrating this point was as follows:—A contractor called the ——— hardware and asked for a price on 200 pounds of sash cord. A price of 68 cents a pound was used as the basis for making the quotation, this being the present price to the trade taking into consideration the several declines on all cotton goods since last fall. The contractor replied that he had merely wished to compare the price with that given by another hardware firm from whom he had already made his purchase. He had paid on the basis of a price of $1.09 a pound thereby paying approximately $82 more for his purchase than if he had bought from the former firm.

May Lose Valuable Connection

There is no one who will scoff at the latter firm for getting the long price, but the circumstances of the case were very unusual for the customer would ordinarily be lost without making even this purchase. The latter firm by follow-

"Cashing in" on the Present Crime Wave

Ontario Hardware Merchants Report Increase in Sales of Door and Window Locks, Safes, Revolvers and Ammunition — "Jimmy Proof" Lock Gets a Big Sale—Business Firms and Watchmen Chief Buyers of Guns

THE hardware trade these days is apparently flourishing on the misfortunes of others. Last week an increase in the sale of house paints and brushes was reported as a result of the unemployment and this week reports come from various parts of the country that the wave of crime sweeping the country and bringing many instances of robberies, hold-ups and other acts of violence is resulting in an increase in the sale of locks, door chains, safes, and other similar protection, revolvers and ammunition.

Rice Lewis & Son, Ltd., Toronto, are going after this business actively and the employment of such advertisements as are shown herewith have resulted in greatly stimulating sales of revolvers and ammunition. In view of the fact that permits must be held before a revolver can be purchased, the trade is naturally limited to those who can show good reason for the possession of such arms. The sales are chiefly to institutions and business firms where protection is required.

Door chains and locks are also selling well in this store, the former being a handy device to attach to the front door so that the housewife may be protected against a surprise attack when answering it.

Bankers and Trust Companies Good Prospects

The advertisement as shown herewith is chiefly directed to bankers, trust companies and paymasters and asks if adequate protection has been given offices and clerks against a surprise visit from gunmen. The ad points out that the criminal investigates to find out the weak point in defence and that he can be frustrated only by good preparation.

W. Walker & Son, Toronto, also state to Hardware and Metal that they have had a good sale for a new type of lock which is said to be "jimmy proof." It is a comparatively expensive type of lock but expense has been a minor factor in the sale of devices which will give real protection. Mr. Walker stated that a dozen of such locks had been sold to one customer who had had experience with burglars. The customer was putting one lock on his front door, one on the rear door, one on the garage, and others distributed at other vulnerable points. Retail clients of this firm in various parts of the province were also said to have had good success in the sale of such a lock.

A circular describing the construction of this and other locks, and pointing out their protective value against the depredations of robbers was enclosed with all invoices sent out by this firm in recent weeks, and much of the trade secured is attributed to this plan.

This firm has had numerous enquiries for revolvers but could, of course, only refer the enquirers to the police department for permits. A very small percentage of private individuals seeking these weapons were able to secure permits, the majority of sales being made to business firms and to watchmen on existing buildings and buildings under construction.

Another Toronto hardware store which has noted an increased demand for locks, bolts and other fasteners due to the cause outlined, recently used a window display with suitable window cards outlining the advantages of adequate protection on doors and windows. The display naturally caused much comment owing to its unusual character, for such lines do not usually form the basis of a window display. The value of making suggestions for such trade is evident from the fact that those firms which have used window displays, advertisements and other means as outlined have noted a much bigger increase in such business than those merchants who have paid no more than usual attention to these lines.

Scrutinize all Strangers

A report from London, Ont., in regard to this point is as follows:—

One of the immediate effects of the recent daring hold-ups in London and district has been to increase the sales of locks and fasteners for doors and windows. There have been quite a number of inquiries regarding permits for firearms but the police are issuing these only in cases where it is regarded as absolutely essential. Not only merchants but the public generally has been thoroughly aroused by the boldness of the hold-up men and strangers who come into stores are given an unusually close scrutiny. The arrest at London of the two men who have been identified as those who held up and murdered Ben Johnston at Woodstock has been hailed with satisfaction.

Making a "Setting" for the Electrical Buyers

Especially Where Women do The Buying Is It Important to Have a Good "Atmosphere"—This Attained by Separate Department For Display of "Electrics"

AS the woman of the house very often buys electrical fixtures and in some communities the larger portion of them, this fact suggested to Lacroix and Leger, Montreal, that they would profit by confining the display of such goods to one section of the store. As a matter of fact the arrangement made combines two departments, wallpaper and electrical goods. Here, away from the noise and confusion evident in other sections of the store, the quiet and careful choice of a given article can be completed.

"I know very little about electrical goods," said Mr. Leger to Hardware and Metal, "and I leave the department in the hands of one of our men who takes an interest in it and who knows a good deal about the line. This is best, as the man in charge can make his own plans and look after sales to better advantage. The only way to make a success of a department is to leave it in the care of a man who knows, and if the department is not a success, the responsibility can be placed on the right party."

A Right Combination

For a great many years the firm carried wallpaper. This and the electrical goods have been found to go well together. The housewife invariably buys the paper and there is usually a whole rack of stock from which to select, occupying one side of the store. The other side is available for other goods, and here, where the double tier of shelving is used, electrical fittings are carried.

For all kinds of fittings and fixtures used in connecting and installing lights, boxes are used in the shelving and these are sampled as on the builders' hardware side of the store. Ready access to any desired accessory or fixture is thus secured.

From the ceiling an array of electric lighting fixtures is suspended and these

WHERE CUSTOMER MAY SELECT ELECTRICAL GOODS AT LEISURE AND UNDISTURBED

A good "setting" for electrical buyers, as mentioned in the article herewith, is shown in this display of fixtures and appliances. This display is arranged in a separate room and the fixtures are effectively shown in conjunction with fireplace furnishings, mantels, and other lines which give a homelike appearance. The fixtures are wired so that they can be lighted in sections or all at once. Floor lamps, boudoir lamps, reading lamps are all shown in this manner. Price tickets are found on each fixture, and here the customer may take time to look over the whole stock and make selections at leisure. The quiet and seclusion of this department is a big help in dealing with customers.

A great many electrical lines are featured in these ads. by Western hardware merchants. Each is well illustrated, gives brief pointed descriptions of each line and quotes prices. In the ad. by Northern Hardware Co., Ltd., Edmonton, electric lamps, heaters, reading lamps, flashlights, irons, etc., are mentioned. A special note is made of electrical supplies for those doing their own repairing. A washing machine ad. by H. J. McLean, Grandview, Man., is headed: "A line of clothes your neighbor will envy," pointing out that this washer is not like the old tub and board that rubbed the goodness out of the clothes and the youth out of women. The washer illustrated is not electrically operated but the suggested form of the ad. could be used equally well for electric washers. It mentions the exact amount of time saved in a year by the use of such a machine. A wide variety of electrical appliances are illustrated in the ad. by "Ashdowns," Calgary, Alta., with a few apt remarks concerning each line.

are all connected in such a manner as to enable the salesman to switch them on at will. This is almost imperative, when a prospect desires to note the effect of a given light and shade. These fixtures are suspended from a long section of wood—really a plank two inches thick and six inches wide, and to which all are securely fastened, the connecting wires passing down from above and being hidden.

Throughout the store Lacroix and Leger follow the plan of doubling up their wall area by placing the first section of shelving far enough out from the wall proper to permit of a second tier of shelving or boxes being placed against the wall itself. Thus, the appearance of the store is in no wise impaired, but the accessibility of the second tier of shelving affords the firm ready supplies of other goods—notably such lines as are rather unsightly when displayed in the regular way. Bolts and pipe fittings, for instance, are kept in one part of the store—on the hardware side, and here they may be had as quickly as though they were right back of the counter. All that is necessary is to walk a few steps to the opening in the shelving, from which access is had to the second tier of shelving.

In explaining this idea to Hardware and Metal Mr. Leger stated that it kept the bolt rack from becoming unsightly, as well as the goods in order. For, with the drawers or sections neatly labelled or lettered with the name and size of the bolt or fitting, mistakes were improbable and well-nigh impossible.

"A little child will come in, having been sent for a certain fitting, and we fill the order. Pretty soon she comes back and says, 'No, this is not what daddy wants.' And we show her the different fittings, all displayed here in their proper place, and the right article is quickly secured."

Is Used Extensively

The plan is followed out on both sides of the store. Perhaps it would be more correct to say that on the opposite side of the store, where aluminum ware and other specialties are shown, the shelf arrangement there divides the store proper from another section where different goods are shown. But the same idea follows, and much additional space is secured through the adoption of the plan. It makes, in short, four walls to the store in place of two, as is the case ordinarily.

Immediately back of the hardware shelf boxes, all neatly arranged with samples of tools and builders' hardware, a fitting rack is placed. This contains all sizes and descriptions of pipe connections, from quarter inch upwards, and on the front of the bins all are lettered with black paint. This avoids confusion and error and the plan works out splendidly.

The second section of the plan is devoted to plumbers' fittings, taps, brass connections, cocks of various kinds, etc. Here, too, carriage and machine bolts are arranged in all sizes and the lettering plan is used the same as that already described. Previously, Mr. Leger states, heavy fittings were kept here. But a recent extension of the basement plan afforded the necessary accommodation there for soil pipe fittings and rubber goods, which do not possess any attractiveness when kept displayed in the store. The same plan of large bins for these heavy fittings is carried out in the basement.

Increasing the Sales of Furnace Supplies

Effective Displays are Possible—How to Arrange a Display Showing Stove Boards, Shovels, Sifters, Asbestos Sheeting, Etc.—Linking up Advertisements With Displays

IN planning to cash in extensively on sales of furnace supplies much depends on the manner in which display is made, and although it would seem at first sight that these goods do not lend themselves to interesting display, the fact remains that a little care on the part of the window-dresser will enable him to make a showing which is decidedly attractive and sales-provoking. Much depends on the pre-conceived plan, and a few minutes thought given to this will enable the man in charge of the windows to make an effective window trim.

Preparing a Background

One of the first things necessary is that of preparing a proper background.

Your Costly Coal Bill May Be Much Reduced

if you secure one of our

Ash Sifters

They are inexpensive
Do their work well
Will last several years

LET US SEND YOU ONE TODAY

It would be a justifiable expense to procure a few rolls of crepe paper of, say, a dark blue shade. Attaching these to the solid background of the window by using pins, stove mats and stove boards could be arranged either in the square or diamond-shaped effect. In between these boards, which have been fastened with small nails at each corner, japanned fire shovels, stove pipe rings, stove pipe wire, pokers, stove cover lifters, and two or three furnace scoops, could appear to good advantage. The same idea could be carried out at the one end of the window or at both sides should display be made in a central window with two solid sides.

This arrangement, once carried out, will make the dressing of the foreground a matter of perhaps half an hour. This is an important consideration where one's time is valuable.

The Foreground

The arrangement of the foreground will be simplified once the background is in place. Among the articles to be displayed of the larger sort will be ash sifters. Doubtless some of these will be of the large variety made of galvanized iron, while others will be of the small and old-fashioned type. These may be dispersed over the floor of the window, and to make the display rather out of the ordinary it would be a good plan to bring in one or two common apple barrels, over which an ordinary circular ash sifter could be placed. This would help to take away from the ordinary effect of the window and call the attention of passersby.

After these are placed it might be a good plan to bring in a roll of asbestos sheeting, standing it on end, and placing a card in front of it with a brief message as to its usefulness in covering pipes, that is from the furnace to the chimney and to save heat.

Another interesting feature might be that of placing one or two pyramids of furnace scoops, tied with cord, and standing upright here and there in the window.

There will be plenty of room left for showing fire shovels of various types and sizes, pokers, lifters, furnace lining and cement. In the center of the display on a raised easel or suspended from the ceiling, a sign lettered in black can call attention to the fact that these are furnace supplies which the householder will find good use for.

Linking Up

It would be a mistake to put in a window of this kind without first planning to run the weekly or daily advertising of the store in such a way as to call attention to this display. A suggestive advertisement could be as shown on this page.

The results available from showing these lines frequently should fully justify any expense or time spent on making good displays. They should be made frequently as suggestion plays a large part in the disposal of quantities of such goods.

GAINS $82; JEOPARDIZES VALUABLE CONNECTION

(Continued from page 35)

ing this policy runs the risk of losing valuable customers and good-will. Here is where the danger lies in following this practice. A more natural thing for the customer to have done would have been to call up both firms before making a purchase and place the order only after comparing prices.

The hardware firm which sold the order in question was later advised by the contractor that a much better price would have been quoted him elsewhere, whereupon they got in touch with the firm giving the lower price and asked why they did not maintain prices for at least thirty days after a decline and "give every dealer a chance to clear out stocks on hand."

BLACKSMITH IS A RETAILER BUT TINSMITH IS A MANUFACTURER

Another of the numerous anomalies of the Government's tax program has just come to light and has caused no little humorous comment even from the tinsmiths.

Collectors of inland revenue have been officially advised by the Department that blacksmiths are classed as retailers and therefore not required to obtain a sales tax license nor will they be held responsible for the collection of sales tax. On the other hand tinsmiths are held to be manufacturers and must operate under a sales tax license and collect sales tax upon the sale of their finished product (test case now being arranged).

On the face of it there appears to be little difference in the respective vocations. The blacksmith takes a bar of iron and molds anything from a horseshoe to a whiffletree hook. The tinsmith makes anything from a tin cup to a piece of eavestrough. With very little exception the products of either trade are for use on jobs in hand and the articles made are not for resale. Why then the difference?

As pointed out by Mr. Walker, this plan of having various prices for the same goods will soon become evident to customers and closer buying will result. Then the store that bases prices on replacement values will get the trade. It was further pointed out that the publicity given to price reductions through the press was putting buyers more on their guard against merchants seeking to hold prices up and that the trade in their own individual interests cannot afford to follow any other than the policy adopted by manufacturers, wholesalers and other retailers which gives the customer any benefit, in the interests of a bigger turnover and a quicker resumption of normal business.

A Bright Spot

IN surveying the future industrial development of this country one of the brighest spots is the wide field of potential business in electrical goods. Canada's waterways, when harnessed, will be capable of producing sufficient horsepower of electricity to bring labor-saving devices and home comforts within easy reach of the farm and rural dweller. Electric lines will be extended and thus assist in the development of our cities, and many other advantages will result from such development. There is a big future for the sale of electrical equipment. During the present year the hydro-electrical development plans for Ontario, Quebec and the Maritime Provinces will be such as to bring big business to the makers of equipment for such works. The newly-formed Power Commissions of Nova Scotia and New Brunswick have placed initial orders for equipment for the generation of electrical energy from the waterfalls of those provinces. The extension of the pulp, paper and other industries have made necessary large demands for electrical equipment. The high cost of coal in Canada has made it more than ever necessary to develop the country's natural resources and secure electrical energy to take the place of coal in operating machinery. This should not be a dull year for the makers of electrical equipment and such activity will undoubtedly be reflected not only in the electrical industry in itself but in all branches of business.

The Future Tax Program

WITH the abolition of the luxury taxes and reasonable assurance that the excess profits levies will be materially reduced or entirely discarded, a lot of interest is being displayed in trade and business circles in probable plans of the Minister of Finance to maintain revenue. The turnover tax is being discussed to a large degree. In the United States there is quite a strong movement in favor of some such tax. Otto H. Kahn in addressing the New York Board of Trade and Transportation recently, urged the imposition of a "turnover tax" which would produce revenue "on every scale through the various stages from the producer to the consumer." He said:

"I favor a turnover tax on commodities as against a tax on retail sales only. First, because it seems to me fairer; second, because it would be exceedingly difficult to establish a clear and workable regulation as to what constitutes a retail sale; and third, because I doubt whether a retail sales tax, even at the rate of four or five times as high as the 1/3 of 1% I suggest for a turnover tax, would be adequately productive."

At the same time Mr. Kahn issued some sound advice when he urged that business should not try to evade its share of the burdens of taxation. He said:

"Coming to the subject of tax revision, there is one general recommendation which I venture to make, namely, that the business community go slow in sponsoring any methods of taxation which may give valid ground for impression that, in their contribution to thought on tax revision, representatives of business are unduly concerned with conserving their own interests, and aiming to curtail their proper share of fiscal burden which the country must bear as legacy of war."

This is a point which should be well considered. Business men do not desire to evade their share of taxation. What they are asking is that the taxes be so arranged as to bear equitably on the community and not have the effect of curtailing production as the excess profits taxes and the luxury taxes have been doing.

Standardizing Electrical Equipment

STANDARDIZATION of equipment is one of the reforms most urgently sought by many branches of industry at the present time. It is doubtful if this reform is required anywhere else as much as in the field of electrical equipment. A writer on the subject of standardization recently wrote as follows in regard to the application of this reform to electrical equipment:—

"In the electrical industry, we have ever so many opportunities to simplify methods, but a single example will drive the thought home. At the present time practically all the electrical fixtures hanging from the ceiling or attached to the walls are fastened as solidly in their positions as are the radiators, doors and bathtubs in the house. No idea could be more absurd than that of soldering the joints and making a mess of the wires under the canopies of these fixtures.

"Why should we not standardize the fixture-hanging outlets? Then we could hang a fixture as we now hang a picture. Why not build houses with standardized quick-attachable ceiling and bracket outlets, so that the housewife will be able to change her electrical fixtures as often as she changes her tastes or her furniture? At the present time, when a tenant moves into a house he must be satisfied with the fixtures that are already there, no matter whether or not they harmonize with his furniture designs.

"When a single satisfactory fixture-hanging outlet is placed in all houses it will be possible for the housewife when she moves to take her favorite fixtures with her to the new house, along with the family beds and bureaus.

"This would take the lighting dealer's wares out of the class of fixtures and make of them what might be termed lighting furniture.

"If a standard outlet receptacle is a good thing in the baseboards of a house, to make portable lamps easy to connect, why is it not a good thing to have standard push-plug receptacles in the side walls and ceilings, so that lighting furniture can be put into place as easily and quickly as a picture is hung, and changed at will to harmonize with the rest of the furniture and decorations in the rooms? There is no more reason why a landlord should select his tenants' electrical fixtures than there is for his selecting a divan for the living room or a table for the library. Standardization saves, simplifies and satisfies."

Settle Question of Freight Charges on Shipments to or From U. S.

Surcharge Will Be Added to Freights to or From U. S. When Paid in Canada—60 P.C. of Exchange Rate

A TEMPORARY adjustment has been made of the basis for payment of freight charges on shipments destined to or coming from United States.

It will be recalled that shipments from Canada to the United States were required, effective March 1, 1920, to be forwarded with freight charges "collect," and in like manner, the American railroads required that shipments from the United States to Canada should be billed forward freight charges "prepaid," effective May 1, 1920. Endeavors have been made to arrive at some satisfactory settlement which would permit the payment of freight charges on the basis of Canadian money for the Canadian portion of the haul and American money for the American portion of the haul.

The Board of Railway Commissioners on the 14th of December directed the railway companies to settle this question at an early date. Early this month the railway companies submitted a plan which they thought would satisfactorily dispose of this question. A number of changes were accordingly suggested, which have been agreed to. The arrangement is effective from January 22, 1921.

The plan which takes effect is along the following lines:

1. The railway companies will publish a tariff naming a surcharge to be added to the freight charges on business to or from the United States when paid in Canada.

2. The surcharge will be an amount represented by 60 per cent. of the governing rate of exchange, fractions less than one-half being disregarded and fractions one-half and over being counted as 1 per cent.

3. Collection will be made at the rate governing on the date of shipment from Canada or on the date of arrival at Canadian destination.

4. The governing rate of exchange will be that quoted for New York funds by the Bank of Montreal at noon in Montreal on the 14th and last day of each month.

5. The governing rate on the 14th will apply inclusively from the 15th to the end of the month following, and the governing rate on the last day of the month will apply inclusively from the 1st to the 14th of the following month.

6. Should the governing date fall on a Sunday or Canadian or United States legal holiday, the quotation at noon for the preceding day will govern.

Exceptions:

This arrangement will not apply on:

(a) Shipments from the United States to Canada where the governing freight classification or tariff usually requires that freight charges be prepaid.

(b) Coal and coke from United States to Canada.

(c) Shipments imported or exported via Canadian ports destined to or moving from United States points.

A copy of the telegram sent by the railway companies to their agents advising the governing rate of exchange will be sent to the Board of Railway Commissioners and by it published in the Canadian newspapers all over the country.

It is felt that while this plan does not give exactly a division of the through rate at the border, it nevertheless is a considerable relief from the present conditions, and on the average at the present time somewhere nearly approximates the division at the border.

The Board of Railway Commissioners' decision covering this arrangement is General Order 326, dated Ottawa, January 14, 1921.

Freight charges on shipments from United States points must be forwarded "Collect" and freight charges on shipment to United States points must be "Prepaid."

TRUTH OF THE TURNOVER TAX

An association of wholesalers makes the following points regarding the turnover tax as it is suggested to apply it in the United States:

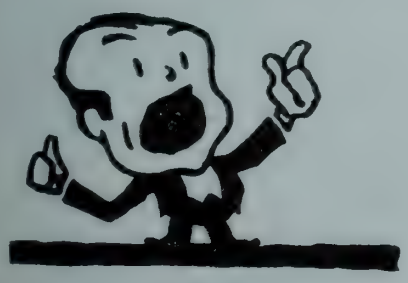
"The tax problem is the most important—the most vital of public questions.

"It is of direct concern to every business man and thinking person of our country.

"The present method of taxation penalizes thrift—the proposed plan of a turnover tax of one per cent. puts the load according to expenditures.

"A person who spends $1,000 a month will be paying ten times the amount in taxes that one of small means does, whose personal expenses are but $100 a month.

"Under the present order of affairs, people of moderate income are paying, as the result of pyramided taxes, many times what a general gross sales tax of one per cent. would amount to."



It is also pointed out that the turnover tax proposes to exempt from the income tax those of moderate means, thus relieving this form of taxation from the most serious objection made to it, namely, that of imposing a tax on those of limited means and the least able to pay.

Big Increase in Toronto Building 1921 May Beat Building Records

Toronto.—The City Architect reports an increase in the amount of building for which permits were issued during 1920. During the year 7,400 permits were issued, representing a value of $25,785,000, as against 7,544, with a value of $19,819,000 for 1919.

The increase in value is about $6,000,000, although the number of permits issued in 1919 was greater.

For the month of December the value of the work for which permits were issued was $1,117,485, the lowest for the 000, for 1919.

"Knowledge is Power"

Progressive hardware merchants realize the value of exchanging ideas and learning what is developing in the trade. Under prevailing conditions it is only by securing such knowledge that an intelligent course of merchandising can be pursued. There will be much of educational value at the Ontario Retail Hardware Convention in Hamilton and it will well repay you to spend the following dates in Hamilton:—

February 14-15-16-17-18

News of Western Canada

Pleads for Protective Fund to Protect Retailers Against Unjust Laws in Coming Years

EXTENDING 1921 greetings to retail merchants throughout Canada, J. A. Banfield, president of the Dominion Board of the Retail Merchants' Association of Canada, emphasizes in his message to the trade the necessity of safeguarding retail interests against unjust legislation. His message reads:

"I take great pleasure on behalf of the Dominion board and Dominion executive council to send their greetings to the members of the retail merchants throughout Canada for their loyal support to the good work of our association. The past year has been one of the most trying years to retail merchants at large. First, the Board of Commerce, with its dictatorial methods and assumed power to run our business which had to be watched at every turn, and which eventually had to be run to the ground owing to its ridiculous orders, and I trust that if it ever be resuscitated that it may be on constructive, not destructive lines, and we will welcome anything for the betterment of the trade in general and the upbuilding of Canada.

Passing of "Snap Laws"

"Then along comes our government with their system of sales and luxury tax, the latter being a cumbersome tax on the retailer, and not by any means accomplishing the purpose for which it was passed. This method of passing snap laws without consulting with the businesses affected should be relegated to the records of the past, and it is up to us to so thoroughly organize that no such legislation will again besmirch the laws of Canada. The power lies entirely in our own hands, and we should see that every merchant, however small, should now be enrolled in our association. Every merchant we have not enrolled into membership is counted against us. We must start a thorough organization campaign and for this purpose at the last meeting of the Dominion board it was decided to ask our members and all retail merchants to assist in the raising of a $100,000 fund to be used to protect us against unjust legislation such as we have had to fight in the past, and that, undoubtedly, will continue to crop up, and for special propaganda work and generally for the use of the association.

Age of Organization

"This is an age of organization, as can be seen by such large organizations as the manufacturers', farmers' and labor organizations that are collecting millions for their future protection. We must not be behind in our work. All we have is in our business, and we must see it is fully protected.

"We have signs of a readjustment of conditions, and we must be ever watchful and fully safeguard the interests of the country to which we are so closely linked. Don't think by paying your annual dues that you have done your share. Give assistance to our organizers, and see that the year 1921 will be a banner year in the enrolment of members, as the greater the membership the greater the service."

J. A. BANFIELD

of Winnipeg, president of the Dominion R.M.A., who asks for a fund of $100,000 as protection against unjust legislation.

Western Notes

Stalwart, Sask.—F. A. Mills has discontinued business.

* * *

Churchbridge, Sask.—J. G. Garbe has sold to J. Welk Salter & Arnold.

* * *

Major, Sask.—McCulloch & O'Keefe have sold to McKenzie Bros., Salter & Arnold.

* * *

Nanton, Alta. — Malloy's Hardware was entered by burglars. Several guns and revolvers were taken.

* * *

Humboldt, Sask.—An explosion occurred in Fletcher's hardware store, when one of the boys used gasoline when lighting a fire in a stove. The fire brigade was called out, but the blaze was extinguished without their assistance.

* * *

Hartney, Man.—Mr. Whitehorn, who has been connected with the H. Hunter Hardware for the past six months, will visit friends at various points in northern Manitoba, also at Melita, before leaving on a more extended tour of the British Dominions, plans for which have not been fully made. Mr. Whitehorn will return to Hartney about the end of the month.

Personal

Winnipeg. — T. L. Waldon, general manager, and A. L. Fitzgerald, of Marshall Wells, Ltd., Winnipeg, have just returned from a week's business trip to the Dominion Stove & Foundry Co., Penetang, Ont. A. L. Fitzgerald was formerly sales manager of Merrick-Anderson Co., Winnipeg.

Rough Handling of Freight Costs Large Sum

Winnipeg.—To devise means to overcome the great loss sustained each year by railways due to rough handling of shipments by employees, a conference of Western Canadian and United States claims agents is being held here. An extensive programme to educate railway employees to exercise more care in the handling of shipments is under consideration. During 1919 United States railways paid out $106,804,000 in payment of claims for goods damaged in shipment.

SIXTEENTH ANNUAL CONVENTION FEBRUARY 14-15-16-17-18 · HAMILTON, ONT.

MONDAY, FEBRUARY 14TH

At Royal Connaught Hotel

2.30 p.m.—Meeting of Executive.

4.00 p.m.—Registration and enrollment of members.

7.30 p.m.—Reception and Smoker. For Members, Exhibitors, Travellers and Visitors.
Moving Picture. Industrial.

Note—All further Sessions will be held in Lecture Hall at Armouries. Members are specially requested to be prompt in attendance at opening of sessions, in order to carry program through on schedule time.

TUESDAY, FEBRUARY 15TH

In Lecture Hall—Armouries Building, James St., N.

9.00 a.m.—Opening of Business Sessions.

9.30 a.m.—Greetings from Mayor, and from Representatives of Manufacturing and Wholesale Trade.

10.00 a.m.—President's Address—Mr. Ed. Wanless.
Secretary's Report—Mr. W. F. Macpherson
Treasurer's Report—John Caslor.
Auditors' Report—Messrs. Matthewson and Peacock.

Receiving and Disposal of Reports of Officers. Appointment of Resolution and Convention Committees.

11.00 a.m.—Visit New Warehouse of Wood, Alexander & James, who extend to all an invitation to inspect their New Warehouse.

Tuesday Afternoon.

1.30 to 6.00 p.m.

Visit Exhibits in Armouries.

For practical education in the lines of goods you sell, a close examination of the various excellent Exhibits, is easily one of the best features of the Convention. There you will meet the Travellers you know, Salesmanagers with whom a personal acquaintance is a decided advantage, General Managers and Company Presidents, all of them ready to discuss business affairs and brim full of practical pointers in sales promoting.

SPEND LOTS OF TIME WITH THE EXHIBITORS.

Tuesday Evening.

7.30 p.m.—Presentation of report of Executive Committee on Permanent Secretaryship.
A conception of the duties and scope of an Asso tion Secretary.—President Wanless.
What the Secretary owes to the members and what the members owe to the Secretary.—Secretary Macpherson.

8.00 p.m.—Notice of motion from 1920 Convention.
Discussion and disposal of report of Executive Committee.

8.15 p.m.—Nomination of Officers.

8.20 p.m.—A Game of Cards Every card headed. "What I want to know about the Hardware business." All questions to be answered first by the members, then by the President or Secretary.

9.15 p.m.—A film story of Plymouth Rope and Binder Twine. Produced by the Plymouth Cordage Company, North Plymouth, Mass., who have kindly consented to come and put on for our Association, and which will surely be appreciated by the members. Shown in nine parts:—
1—Growth and cultivation of Manila Fibre.
2—Production of Sisal Fibre.
3—Factory Panorama—arrival of hemp steamer, docking and unloading scenes.
4—Opening the fibre—its preparation and spinning. Tarring and putting up Lathyarn.
5—How Binder Twine is made. Spinning, testing for length and strength, balling, sacking, warehouse facilities for shipping. Harvest scenes.
6—Machine-made Rope.
7—General Factory scenes. Binding off coils, shipping, etc. End of the day.
8—Old-time method of hand spinning by a rope maker 90 years young.
9—Modern Rope-walk practice.

WEDNESDAY, FEBRUARY 16th.

Lecture Hall, The Armouries.

9.00 a.m.—Reports of Convention Committees.

9.30 a.m.—Business prespects for 1921.
"The Iron and Steel Market"—Robert Hobson, President the Steel Company of Canada.
"Manufactured Products"—John M. Taylor, President Taylor-Forbes Company; B. J. McCormick, General Sales Manager Canada Foundries & Forgings; Col. A. M. Hatch, Canada Steel Goods Co.
"Paint and Oil Trade"—W. J. Lotie, Toronto Manager Dominion Linseed Oil Co.; John Irwin, of McArthur-Irwin Co., of Montreal, representing the "Save the Surface" Campaign Committee.
"The Wholesale Trade"—Colonel Robert Starke, President Canadian Wholesale Hardware Assn.; S. H. Alexander, Wood, Alexander & James, Hamilton, Ont.
"The Retail Trade"—Nelson Mills, Vice-President O.R.H.A.; G. E. May, Toronto; F. B. Smith, Belleville, G. A. Binns, Newmarket; A. J. Wright, Hamilton.

11.30 a.m.—Mutual Fire Insurance as carried by Retail Associations—Mr. Norman S. Jones, Manager for Canada Northwest Mutual.

Wednesday Afternoon.

1.30 p.m. to 6 p.m.—Visit Exhibition in Armouries. Music by Orchestra.

7.30 p.m.—Complimentary Banquet tendered by Wood, Alexander & James, of Hamilton.

THURSDAY, FEBRUARY 17th.
Lecture Hall—The Armouries.

9.00 a.m.—Reports of Committees.

9.15 a.m.—Election of Officers.

9.30 a.m.—The Chain Store Proposition—F. A. Maycumber, Sales Manager Winchester Repeating Arms Co., New Haven, Conn.

10.00 a.m.—Co-operative Buying—Mr. William Hargreaves, Manager Drug Trading Company, Toronto.
Questions and discussion of addresses on chain stores and co-operative buying.

11.00 a.m.—Exhibitors' hour. Short, pithy addresses by Exhibitors and Salesmen on "Selling Points."

12.30 p.m.—Entertainment

Thursday Afternoon.

1.30 to 6 p.m.—Visit Exhibits in Armouries.

7.30 p.m.—A talk on advertising to bring results.

8.00 p.m.—Members' Session Question Box. Answers to cards on file.

Smoker and entertainment.

FRIDAY, FEBRUARY 18th.

9.30 a.m.—Visit to Factories. Hamilton is the centre of hardware manufacturing industries and a visit to the various factories is both instructive and enjoyable.

Events in the Trade

Business Changes

Renfrew, Ont.—Sterling & Scott, hardware, have dissolved partnership. Style now is Scott Hardware.

Personal

Ingersoll, Ont.—H. Swallow, Ingersoll File Co., has recently been indisposed.

* * *

Toronto.—Fred Moore, of Benjamin Moore, Toronto, has returned from a business trip to New York and the Brooklyn branch of the company.

* * *

Montreal. — A. G. Brown, of A. G. & A. L. Brown & Company, Montreal, is leaving on a trip to call on the jobbing trade in Kingston, Toronto, Hamilton, London and Collingwood.

* * *

Toronto.—R. Pinchin, vice-president and manager of the Ontario Oil & Turpentine Co., Toronto, is on a business trip to Vancouver and other points in British Columbia. Mr. Pinchin expects to be away for two or three weeks.

* * *

Hamilton, Ont.—H. M. Robbin has joined the staff of the Hamilton Stove & Heater Company and will represent this firm in eastern Ontario. Mr. Robbin takes to his new position an extensive knowledge of stoves, furnaces, etc.

* * *

Montreal.—S. M. Ward, sales manager Canada Paint Company, Ltd., has returned from a business trip to the Maritime Provinces. Mr. Ward states that trade is improving and in that section of the Dominion merchants are already looking forward to an active spring paint business.

* * *

Montreal. — Visitors calling on the local wholesale trade this week are: C. W. McKitrich, of Peck, Stow & Wilcox Co., Southington, Conn.; Mr. Scott, of Andrews Wire Works, Watford, Ont.; Mr. Nichols, of Ashton Mfg. Co., Newark, N.J.; W. P. Kearney, Dominion Chain Co., Niagara Falls, Ont.; Mr. Griffith, Griffith Mfg. Co., Stratford, Ont.; Mr. Hatch, Hatch Mfg. Co., Whitby, Ont.; Mr. Sager, S. Johnson & Son, Brantford, Ont.; H. A. West, Campbell, Morton & Co., Boston, Mass.

Word Contest Arranged

International Business Machines Co., Toronto, has arranged a word contest for merchants in Canada and Newfoundland only. Prizes ranging from $300 first to 200 prizes of $2.50 each are offered to the one making the most words out of the words "Dayton Scales."

Promotion of Gillette Safety Razor Co. Official

H. S. Beecher has been appointed sales and advertising manager for the Gillette Safety Razor Company of Canada, Limited. Three years ago, Mr. Beecher joined the Gillette organization. Though an experienced advertising man, he knew little of razors and their differences. To-day he is sales and advertising manager.

Freight Rate Probe Depends on Shippers

Ottawa.—"The date on which the general freight rates inquiry will commence depends upon when the parties interested in the matter are ready to pproceed," said Chief Commissioner Carvell of the Board of Railway Commissioners, when questioned about the matter. He added that the board was prepared to make its arrangements to hold sittings throughout the country at short notice when notified that the opposing interests were ready to proceed.

Give Preference to Canadian Made Goods

The Purchasing Commission of Canada supersedes the late War Purchasing Commission. Its duties are in part to supervise the purchase of all supplies for all departments of the government throughout Canada, and the policy is to purchase direct from the best source of supply.

Attention is drawn to the fact that the commission is strongly of the opinion that Canadian goods should be purchased in preference to foreign, which fact makes it all the more necessary that Canadian firms should realize their responsibility in this respect.

It is impressed on local firms that failure to co-operate (to tender) may make it difficult to carry out the above policy. In so far as possible all supplies demanded will be purchased by tender and the business given to the lowest tenderer for goods required.

The commission is of the opinion that supplies should be purchased in the districts where they are required, though this may have to be modified according to the kind and quantity of the goods required.

Western Ontario News

H. M. Merriam has been re-elected a member of the board of school trustees at Tara, Ont., by acclamation.

* * *

At the annual meeting of Clinton Lodge I.O.O.F. J. A. Sutter was installed as R.S.V.G. and T. Hawkins as R.S.N.G.

* * *

Don Gordon has been appointed manager of the plant of the Dominion Glass Co. at Wallaceburg and Harry Mitchell assistant manager.

* * *

At the annual meeting of the Oddfellows Lodge at Hensall, Ont., Bro. W. A. MacLaren, of the MacLaren Hardware, was elected L. N. G.

* * *

Captain G. C. Hay, of Stansell Motors, which is moving to London from Amherstburg, has resigned and will make his home at Erie, Pa.

* * *

R. A. Darrow, of the Darrow Iron Works, was elected a member of the board of managers at the annual meeting of the congregation of the Avondale Presbyterian Church.

* * *

Negotiations are under way at Wallaceburg, Ont., for the location there of the Canadian branch of a Detroit firm manufacturing tool and other steels.

* * *

Gordon Porter and Walter McLean, of the Wallaceburg Brass Works, have been appointed members of a special committee which is making a drive to double the membership of the board of trade.

* * *

At the Border Cities Poultry Show held in Windsor, H. L. Martinson, hardware merchant at Cottam, Ont., showed twenty-seven fine birds and won many prizes with his white, buff and black Leghorns and Barred Rocks.

* * *

E. Harris, hardware merchant at Birr, Ont., sustained a serious loss on Thursday, when an oil heater which had been left in his warehouse to keep an electric lighting system from freezing, burst. The warehouse with its stock, and a garage adjoining with two large cars was completely destroyed. The loss is fully covered by insurance.

Visited by Burglars

Belleville, Ont.—The Walker Hardware was entered by burglars.

Moves to New Premises

Toronto.—Prince & Co. hardware store is being moved to 527 Bloor St. W.

Change Warehouse Location

Toronto.—The Toronto stock of Bird & Son, Limited, has been removed from 83 Jarvis street to 48 Colborne street. Stevenson Bros., Limited, are the new warehouse agents for the City of Toronto and County of York, and their warehouse at 48 Colborne street provides accommodation for a much larger stock than previously carried of all "Neponset" products.

Toy Pistols Banned By Police

Toronto.—The Toronto police have discovered from information forwarded to Chief of Detectives Guthrie that a novelty firm in New York has been shipping pistols into this city through the mails. The detectives secured possession of one of the small revolvers and tested it. They claim it was found that the gun would fire small-calibre bullets. The gun would discharge only one shot.

The company responsible for shipping these guns into Canada claim they are "toy pistols," and can only be used for blank cartridges. They have been instructed to discontinue sending the guns into this country.

Good Hardware Business in Quebec

Montreal.—Reports from Quebec territory are very encouraging for the first trip of the travellers from the local hardware jobbing houses since the new year. Business is good from all sources and a general sorting trade is reported. At the various conventions held the latter part of last year or early in January, a note of optimism was sounded throughout the consultations, and confidence was felt by all that 1921 would be a good business year. Many firms are now realizing the first existence of this, and they feel confident that the year will be one of good business.

Hardware Clerks Hold Celebration

St. John Clerks' Organization Holds Ice Races, Speed Skating, Supper and Dance — Three Hundred Hardwaremen Attend.

St. John, N.B.—The St. John Hardware Clerks' Association held a big time at Lily Lake, Rockwood Park, on Saturday afternoon and evening. The affair opened at three o'clock, when about three hundred members of the staffs of the various hardware stores in the city had gathered on the ice.

The president, vice-president and secretary-treasurer, together with the managing committee, put in some hard work preparing a rink, and by four o'clock all was in readiness for the sports. The following program was carried out: One, boy's race, 1st. Stubbs, 2nd. Seeley. Two, open race, half mile, run off in three heats, 1st. Kirk, 2nd. Fisher. Three, ladies' race, open, won by Miss Fairweather. Four, relay race made up of five clerks from each hardware store. The Thorne clerks were the winners.

There was also an exhibition of speed skating by some local experts, and an unofficial race was run off for the prize of a pie, offered by G. Logue.

At five-thirty the members of the association adjourned to the Park Pavilion to enjoy a bean supper put up by Mr. Tebo, and full justice was done to the good spread. Dancing was started at seven o'clock, and continued until eight-thirty, when a break was made for an hour to try out the toboggan slide. This worked to capacity for a full hour, when the members again adjourned to the pavilion to finish up the night with dancing. Mr. Robert Carr and Mr. P. C. Johnson provided the music, and were tendered a vote of thanks. Mr. Tebo was also thanked for the efficient manner in which he had done his part towards making the affair a success. At ten-thirty everybody went home tired but satisfied. The members all voted the affair to have been the most successful ever carired out by the association.

Ask Hardware Clerks to Investigate Daylight Saving

St. John, N.B.—Since the formation of the St. John Hardware Clerks' Association, they have gained considerable prestige in the community. The local papers have on many occasions favorably commented on their activities. At the present time the City Council is considering the best method of ascertaining the feelings of the citizens on the daylight saving question, one or two of the members of the council suggesting a plebiscite. In an editorial, one of the evening papers suggested that the idea of putting a matter like the daylight saving question to a vote, causing considerable expense, was unnecessary, and suggested that the Hardware Clerks' Association be asked to take up the matter and ascertain the feeling of all other organizations. The Hardware Clerks were referred to as a "live organization" and well able to handle the situation.

New Hardware Firm

Toronto.—Stevenson Bros., Limited, have opened business at 48 Colborne street, Toronto, as manufacturers' agents, succeeding John F. Stevenson. The lines carried include Fry's (London) Limited, "Enox" hand and power hack saw blades; "Wotan" hand reamers; hack saw frames; also the products of the Godiva Tool Co., Coventry, England, pliers, wrenches and screw drivers. The new concern is also exclusive selling agent for Canada of the popular even-spread lawn sprinkler. Among other agencies secured by Stevenson Bros., Limited, is the Quebec Graphite Co., Limited, Buckingham, Que., miners and refiners of flake graphite, graphite pipe joint compound, etc.

Are You Basing Prices on Replacement Values?

The first article in this issue shows how one hardware merchant jeopardized a valuable connection by maintaining prices on the basis of cost instead of replacement value. This is one of the most important matters facing the trade to-day. Read the article and then

Send in Your Opinion

to the Editor ,Hardware and Metal. A full discussion will bring out all points involved and help form a definite policy.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

TENTS AND CAMPING GOODS

A copy of catalog No. 6 has been received from the Woods Mfg. Co., Ltd., Ottawa, Ont., and a review of this catalog shows that a full range of tents and party outfitting and camp supplies for railroaders, lumbering contractors, surveyors, miners, explorers and hunters are carried by this firm.

The materials used in the making of their tents are for the most part produced from the raw products in their own plants, it is stated, and Woods non-absorbent duck is made in the firm's own mills at Welland, Ont. Every tent made from this duck bears the trade mark and the makers guarantee.

A large variety of tents are cataloged and listed, from a small camper's tent to a marquee measuring 50x100 feet. Pack sacks, dunnage bags, coal bags, canvas hammocks, cotton provision bags, golf bags, canvas pails, etc., are among the many other lines manufactured and listed. Special attention is given to tarpaulins, horse and wagon covers.

Flags of all kinds are another line manufactured by the Woods Co., and other goods shown include mackinaw clothing, working men's shirts, underwear, mitts and gloves, mocassins and shanty blankets.

The Woods Mfg. Co., Ltd., have branches at Ottawa, Toronto, Montreal and Winnipeg.

* * *

MARTIN SENOUR CO. HOUSE ORGAN

The first edition of The Surface Saver, house organ of The Martin Senour Company, Montreal, has been published and deals in an interesting manner with various phases of the company's expansion and its products. The first booklet contains fourteen pages devoted to a number of features which are to be found in each monthly publication. To enable closer touch with the personnel of the company one of the first pages is to be used each month for a brief sketch of the business career of various members of the staff. The first issue tells how A. T. Black, General Manager, rose from a junior in the hardware store of A. Westman in London, Ont. Various products w[illegible] with in each issue illustrations in color similar to the labels being used. Illustrations of the advertising helps supplied to the trade are also shown, along with sample window displays of the company's products. The growth of the company from 1905 to 1920 is shown by illustrations and editorial data. There is a page for clerks and a feature of this issue is an article written by Mr. Black outlining some pointers in retail salesmanship.

What Newspapers Say

Excerpts from the newspapers showing their trend of thought concerning hardware interests.

DUTIES ON GLASS

The application to the Tariff Commission by a Hamilton sheet glass company for an increase in the rate of customs duty on glass brought out some interesting evidence from glass wholesalers and other dealers. Window glass is one of the commodities on which war conditions caused an enormous price increase. Before the war, most window glass used in Canada came from Belgium or Austria. The war cut off most of the cheap European supply, and even British glass makers could not freely supply this market. We had to depend on United States glass mainly, and apparently full advantage was taken by producers on this continent of their opportunity to hoist prices. Most widely used commodities during the war went up one, two or three times the pre-war value, but glass almost topped the list. Limited facilities for manufacturing it and an enormous demand gave the producers entire command of the market. But Belgium is again producing and British firms are seeking overseas markets. It is desirable that Canada have her own window glass manufactories.—Mail and Empire, Toronto.

GASOLINE AND KEROSENE DECLINES IN UNITED STATES

A reduction of two cents a gallon in the price of gasoline has been announced by the Standard Oil Company. It was also made clear that the reduction was not part of the general readjustment in the prices of all commodities, but may be attributed directly to greater production of crude oil. In addition to the cut in gasoline, prices of kerosene dropped from 18½ to 15½ cents a gallon.

The new price in gasoline is 27 cents at service stations and 25 cents from tank wagons. Other companies are expected to meet these prices, but it was stated that further reductions were not likely unless there should be a marked increase in production.

Trade Enquiries

Names and addresses of enquirers can be obtained only by those interested in such lines upon application to Hardware and Metal. Please quote reference number when requiring addresses.

2661. **Nails.**—Large Glasgow firm of wholesale hardware merchants, of excellent reputation, desire to obtain lowest prices and best terms for wire and other nails to the extent of over seventy tons. Following are the details:—

Round Head Wire Nails—

1½"×12.	13.	14.	1¾"×12.	13.	14.
5	5	5	5	5	5

2"×10.	11.	
5	5	tons.

2½"×10.	11.	3"×9.	10.	3½"×7.
5	5	5	5	2

8.	4"×6.	8.	
3	5	5	tons.

4½"×6.	5"×5.	6	6"×4.	8.	
5	5	5	5	5	tons.

Oval Wire Brads—

¾".	⅞".	1"	1¼".	1½".	1¾".
1	1	1	1	2	2

2".	2½".	3".	4".	5".	6".	
2	2	2	2	2	2	tons.

Wire Lath Nails, broad heads—

1"×14.	15.	1¼"×13.	14.	
2	2	2	2	tons.

Wire Slate Nails, large broad heads—

1¼"×10.	1½"×9.	10.	1¾"×9.	2"×8	
2	2	2	2	2	tons.

Wire Plate Nails, countersunk heads—

2½"×5-16".	3"×5-16".	
5	5	tons.

Countersunk Plate Nails, cone heads—

3"×5-16"	
5	tons.

Wire Plate Nails, broad heads—

¾"×12.	⅞"×12.	1"×11.	
5	5	5	tons.

2663. **Resistance Wire.**—A Birmingham company manufacturing electric appliances ask to be placed in correspondence with Canadian manufacturers of resistance wire suitable for heating purposes.

2664. **Toys.**—A London firm of toy importers seek the representation for Great Britain of a Canadian toy manufacturer.

2665. **Representation in Brussels.** — A commercial agent, with best references, having office, telephone, and commercial organization in central Brussels, desires to enter into relations with Canadian firms of good standing with a view to representation. Correspondence in English, French, German, Italian, Polish, and Russian.

2680. **Representation in the United Kingdom.**—A manufacturers' agent at present residing in Toronto, and who is returning to Scotland soon, desires to be placed in touch with a few Canadian firms who desire representation in the British Isles, particularly in hardware and woodenware.

2684. **Wire from nickel chrome alloys.**—A firm in Birmingham, England, desire to import from Canada special wire manufactured from nickel chrome alloys.

2685. **Agency in Balkan States.**—A firm of general agents in Salonika wish to be placed in touch with Canadian manufacturers with a view to acting as agents for the Balkan States. They are particularly interested in dairy machinery and supplies, and also desire representation of belt manufacturers and firms dealing in electrical machinery and supplies. They are also prepared to negotiate for the supply of iron, steel, brass, and copper in bars or sheets. Bank references will be given to interested parties.

2689. **Representation.**—A Vancouver concern having representation in Mexico, Japan, China, India, East Indies, Australia, and other countries bordering Pacific ocean, are anxious to get in touch with Canadian manufacturers wishing to extend their operations in that field. Particularly interested in iron and steel, wire, wire nails, nuts and bolts.

Steel Official Speaks of English Industry

T. R. Mason, a representative of Sheffield steel concern, who is visiting Canada to gain an intimate knowledge of trade conditions here, stated in an interview in Toronto that Great Britain was reassuming and recapturing trade which it had lost during the war and was even going into new fields in the face of strong competition. Business gloom is vanishing in England, he stated, and within five years England will be farther ahead than it ever was.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of February 2nd, 1901:

"A swift, hot and spirited old-time game of hockey was enjoyed by quite a crowd of spectators in the White Star Rink, Montreal, when teams from The Canada Paint Co. and The Canadian Rubber Co. crossed sticks. Briefly, the match was won by the Canada Paint Co's team by 4 to 1. Captain Munro, of the winning team, is to be congratulated. H. Brigger, the rubber captain, is also deserving of commendation. The feature of the match was a bold dash by Mr. Russell of the paint staff."

* * *

"Caverhill, Learmont & Co. are opening a branch office and sample room in Winnipeg, which will be under the management of Mr. Thos. L. Waldon. Norman J. Dinnen will cover the territory on the main line. John Burns, Jr. and Colin C. Brown will retain their present districts in British Columbia."

* * *

"John Irving, Montreal rolling mills representative in Toronto and the West, whose appointment as sales agent of The Nova Scotia Steel Co. was noted a couple of weeks ago, leaves for New Glasgow, N.S., where he will in future reside."

* * *

"The hardware trade suffered rather severely from the disastrous fire that raged in the wholesale section of Montreal a week ago last Wednesday night. A. C. Leslie & Co. lost everything in their office except the contents of the vault. Alex. McArthur & Co. lost their entire stock. Thos. Davidson Mfg. Co's salesroom was completely gutted. Seybold, Son & Co's large hardware establishment was one of the last buildings attacked but was completely gutted. Mr. Seybold was in the office and the books were just being balanced for the year when the fire broke out."

* * *

"On account of the many inquiries from the large consumers of files throughout the Dominion, the Globe File Mfg. Co., Port Hope, Ont., have been compelled to add a re-cutting department to their factory and are now prepared to receive old files for re-cutting."

Imported Burlaps Are Again Available.

MONTREAL.—One of the greatest difficulties which users of imported burlaps—the basis of which is jute canvas—had during the war was that of obtaining the required quantities.

Burlap is made of the inner fabric of jute, this being a product of the fields of British India. After a three months' growth, the natives separate the desired inner fabrics from the outer covering. This is done under water, great care being taken not to injure or break the long fibres. After proper treatment these fibres find their way in bales to Scotland, where they are woven in a manner which produces a very desirable and high-grade product.

For reasons incident to the war, the supplies of burlap were shut off. Now that shipping and other conditions have righted themselves, the needed stocks are coming forward.

Burlap is used in varied ways. It forms the base of linoleum, oilcloth, etc. It is also treated after being received from the mills, with special sizing, making it desirable and ideal as a wall covering. Usually the "oil coated" grades are employed. They are the most convenient to use, owing to thorough saturation with linseed oil and selected pigments of desired shades. These shades form a "ground" over which the decorator may secure desired effects, dull, glossy or varnished, the finished walls being very attractive and sanitary.

Hardware and Metal is informed that painted burlaps are already available in reasonable quantities and at reduced prices. The hardware trade may now obtain the supplies necessary to take care of the building requirements, which are expected to be large this year. There is doubtless a field here for development that many hardware merchants will wish to fully exploit, now that the material is to be had promptly.

Trying To Push British Goods in Canadian Market

THE Montreal branch of the Canadian Association of British Manufacturers recently held their annual meeting. Following the luncheon the business was opened by the address of the retiring president, H. W. Weller, who outlined the work accomplished during the past twelve months, emphasizing the better progress that had been made as a result of the closer co-operation of the two branches, and the added interest that had developed in all activities of the association. Through the personal efforts of G. T. Milne, H. M. Trade Commissioner during the early part of 1919, and the enthusiasm of the officers and members since that time, much has already been achieved by the organization for the furtherance of British trade in the Dominion of Canada. Considerations have been obtained from the Government at Ottawa, regarding the customs valuation of invoices, that has simplified the work of importers and exporters. Recognition has also been given to the request for tariff modifications and steamship concessions — conditions that have assisted materially in promoting British trade. It was stated that negotiations were under way with kindred associations in other British Dominions for a permanent representative in London, with an office for the use of the members of the different associations.

Brief addresses were given by G. A. Marshall, Capt. John Harris and W. E. Bunny, president, vice-president and secretary, respectively, of the Toronto branch of the association. Emphasis was laid upon the necessity of every member working in accord with each other, and also co-operation with the branch officers, and likewise between the two branches, so that the work of the entire organization would be co-ordinated and maximum efficiency and benefit attained.

Owing to the fact that, henceforth, the government of the association shall be vested in the Supreme Council, the constitution has been revised, and the proposed draft was read to the members for their criticism and approval. Without a dissenting voice the draft, as prepared by the committee in charge, met with the unanimous approval of those present, and its adoption was decided on, pending the favorable consideration of the members of the Toronto branch, the annual meeting of which will be held on January 28.

The Montreal branch, at present, has two well organized trade sections, that of textile and steel, and it is expected that other sections will shortly be formed to accelerate the interest in other branches of trade development. It was likewise proposed that regular monthly meetings be held, as it was felt that, in this way, greater progress could be made and a more friendly spirit amongst the members in general created.

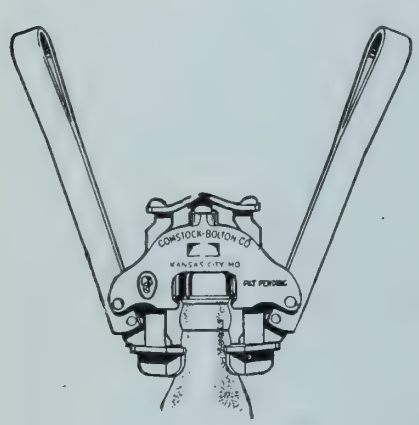
The local council for the ensuing year was elected at this meeting, and is as follows:

1st vice-president—F. I. Spielman.

2nd vice-president—J. E. Ritchie.

Executive Council—Allan S. Bain, St. Clair Tilley, Harold Brooke, W. T. Evans, H. W. Smythe, D. W. Clarke.

New Hardware Goods



OFFERED TO CANADIAN HARDWAREMEN

THE "C-B-CO." BOTTLE CAPPER

The Comstock-Bolton Co., 1925 East 15th street, Kansas City, Mo., are manufacturing a bottle capper, which they claim can be used on any make or shape of bottle, and no adjustments are necessary to make it fit on different sized bottles. This means that the housewife who wants to put up her own catsups, fruit juices, home beverages, etc., can use any empty bottles she has in the house without buying new ones.

The C-B-Co. bottle capper is made of cold rolled steel, nickel plated, and has no castings, springs, keys or set screws to get out of order, and requires no stands or blocks, and weighs only 22 ozs.

The operation of capping is said to be simple, and the fulcrum principle insures maximum leverage with least pressure.

C. B. Co. Bottle Capper

SATURN CAN OPENER

The principle of the Saturn can opener is stated to be new in can openers and to enable anyone, even a child, to open a can with ease and safety.

As shown by illustration the opener consists of a platform on which can to be opened is placed, an upright grooved section in which cutting knife works, and which is adjustable to suit cans of different heights, lever handle and screw clamp to fasten opener to table or bench.

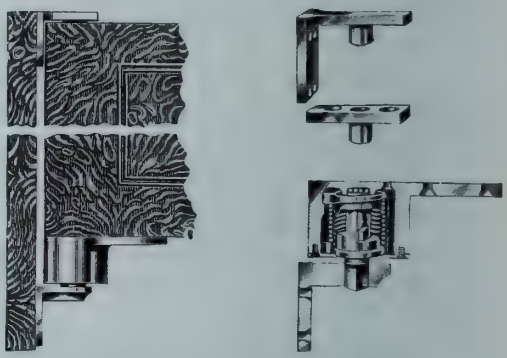
The method of opening can is described as follows: Place can on platform under the knife, adjust cutting blade to its top, work handle up and down, at the same time turning the can with the other hand. It is manufactured by the United Royalties Corporation, 1133 Broadway, New York City, U.S.A.

Saturn Can Opener

DAVIS NO. 1 BLASTER

The new Davis No. 1 blaster is a small light-weight blasting machine manufactured specially for the Giant Powder Co. and is said to be very powerful for its size, developing sufficient current to fire five 30 feet copper wire electric blasting caps or five 6 feet iron wire caps connected in single series. Its dimensions are 2 feet by 4 feet by 4½ feet and it weighs only 3¼ pounds.

The outer case of blaster is made of brass tube, nickeled, and top and bottom plates are aluminum. A removable leather strap is supplied for ease in carrying. The operating key is a separate part of the machine and can be kept by the firer of the shot. This is an important safety feature.



Davis No. 1 Blaster

The Davis blaster is handled by the Giant Powder Co., San Francisco, Cal., with Canadian offices at Vancouver, B.C., and Edmonton, Alta.

CHICAGO "SAGLESS" GATE SPRING HINGE

The Chicago Spring Butt Co., Chicago, Ill., are manufacturing a new spring hinge for use on swing gates in offices, etc., for which they claim the following special features. The hinge is of the pivot type and the weight of the gate is carried on ball bearings, thereby eliminating friction and wear and the pintle is rigidly attached to bottom bracket preventing gate from getting out of alignment. The spring is torsion type and hinge is double acting, is made of iron, brass or bronze and in various finishes, and is suitable for gates ⅞ to 2½ inches thick. No mortising is required as hinge and top socket can be applied to the surface of gate and post.

Chicago "Sagless" Gate Hinge

NEW THOR-75. AUTOMATIC ELECTRIC IRONER

The new Thor Electric Ironer is described by the manufacturer as representing an entirely new departure in home labor saving appliances. Two buttons on the control lever are shifted up and down according to the position in which the shoe is to be moved eliminating the exertion and time required to move the shoe by hand and leaving the latter free to guide the pieces being ironed.

Two speeds are given and a further feature is the direct shaft drive doing away with the need of belts or pulleys.

The manufacturers are the Hurley Machine Co., Chicago, Ill., with a Canadian branch at Yonge St., Toronto, Ont.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

PRICES on several lines in the steel market are lowered this week in local warehouses. Sheets have declined slightly in order to clear out present stocks. Buying is still restricted, however, and stocks are very light. Trade in the non-ferrous metals is quiet with tin declining and copper unchanged, but weak. Lead prices are erratic but are expected to firm up shortly. In the manufactured articles copper products have shown some decline though there is still a big spread between ingot and sheet prices.

Price changes this week are a little less numerous. Declines are noted in copper wash boilers, tea kettles, tea and coffee pots of copper, and rivets. Some lines of brass goods have also declined, including escutcheon pins, some lines of compression goods and valves, cotton waste, cotton and canvas goods, including gloves, mitts, twines and web straps. Fuel oil is reduced as well as sheets and plates, wire, wrenches, lace leather, wrapping paper, lead solders, linseed oil. Grindstones have advanced. Paints and varnish are moving better this week. Business in general is assuming a better tone with sorting up orders coming forward in fairly good volume. Orders for later delivery are still backward.

Montreal Markets

MONTREAL, Jan. 27.—Price reductions are not so numerous this week, although important changes are again shown on different lines of wire. This is the second decline on these products in the last month. Trimo wrenches, lace leather and escutcheon pins also have lower levels. Kraft paper is reduced again, it only being shown last week at a reduction. Copper goods are reduced practically 2 cents a pound throughout and compression goods also show a decline. Cotton waste shows a substantial reduction of from 3 to 5 cents a pound. In the lead products, solders, both wire and bar, are at lower prices. The one outstanding advance is on the price of grindstones.

An Advance on Grindstones

Montreal.

GRINDSTONES. — A slight advance is quoted in grindstones this week. Prices now being quoted are: group A., $4.00 per 100 lbs.; group B., $4.25; group C., $4.25; group D., $5.00.

Copper Rods, Sheets Reduced

Montreal.

COPPER.—A reduction of two cents is given on copper rods, sheets and tubes. Copper rods are now 32 cents base, sheets plain at 34 cents, tinned 38 cents, and polished and tinned at 42 cents. Tubes are now selling at 49 cents base.

Trimo Wrenches Reduced

Montreal.

TRIMO WRENCHES.—A decline of 10 per cent. is shown on Trimo wrenches, they are now quoted at 35 per cent. off list, former price being 25 per cent. off.

Reduction in Laces

Montreal.

LACE LEATHER.—A 10 per cent. decline is noted on lace leather, both cut and side leather being affected.

Escutcheon Pins Reduced

Montreal.

ESCUTCHEON PINS.—A reduction is shown on brass and steel escutcheon pins this week. Brass are now quoted at 20 per cent. off list and steel 30 per cent. off list.

Kraft Paper Again Reduced

Montreal.

KRAFT PAPER. — This commodity again figures in a price change this week. Last week it was quoted at 15 cents, and now a lower price of 14½ cents a pound is given.

Corrugated Sheets Seasonable

Montreal.

CORRUGATED SHEETS.— Business continues to remain dull in corrugated sheets but this is only considered seasonable. Small shipments are being made. Present prices are as follows:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Waste Materials Dull

Montreal.

SCRAP METALS.—The market for scrap metals continues dull. Although a slight firming up with a few more enquiries was noted last week, business continues very quiet. Local quotations are as follows:

DEALER'S BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 07
Red brass	0 12½
Light brass	4 50
Scrap zinc	0 05
Lead, heavy	4 00
Lead, tea	2 50
Light copper	9 00
Heavy copper	11 50
Wrought iron, R. Rd., No. 1, per gr. ton	13 00
Malleable scrap (ton)	15 00
Pipe scrap (ton)	9 00

Heavy melting steel	15 00
No. 2 busheling	5 00
Boiler plate	12 00
No. 1 machinery cast, per gr. ton	$25 00 $28 00

Compression Goods Lower

Montreal.

COMPRESSION GOODS. — Several lines of compression goods have been revised to lower levels, compression bath cocks show a decline of about 10 per cent. Standard flatway stop and waste also have the same reduction. Brass steam cocks are lowered, and radiator valves have the new prices. Quotations are:

Compression work, standard	Less 25%
Fuller work, standard	30%
Bath-cocks, compression	30/5%
Do., fuller	28-30%
Flatway stop and waste cocks, standard	35%

Add 17½%.

Pipe Sells on Same List

Montreal.

WROUGHT PIPE.—There is nothing new to report on wrought pipe. The new price lists, issued on the first of the month, are still used, these prices showing the difference in the freight rates. The demand for piping still continues fair, and deliveries continue better as the weeks pass.

Quotations will be found on current market pages.

Decline in Waste

Montreal.

WASTE.— The reduction in wastes, both colored and white, wool packing and Dominion wipers run from 3 to 5 cents. This decline was to have gone into effect on January 15th, but the new price lists have just been issued this week.

Sheets and Plates Quiet

Montreal.

SHEETS AND PLATES.—The volume of business is small on sheets and plates, only small sorting orders moving. The situation is rather unsettled at the present time and different prices are quoted by different jobbers. Stocks in local warehouses are said to be fairly heavy as long standing orders are now being filled. Lower prices may be expected on sheets when these stocks become more or less exhausted.

BLACK SHEETS—

22 gauge	11 80	10 90
18 and 20 gauge	11 10	10 75

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Iron and Steel Quiet

Montreal.

IRON AND STEEL.—The demand for these goods is very light at present, small sales are being made but they are of a sorting order. Prices remain as previously quoted.

IRON AND STEEL	
Common bar iron, 100 lbs.	4 55
Refined iron	6 05
Iron finish machinery steel	4 60
Mild steel	4 55
Band steel	4 55
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	4 55
Tire steel	4 75
Toe calk steel	5 45
Harrow tooth steel	4 70
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

NOTE—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.
Band steed in scroll bdles, 50c per 100 lbs. extra.

Barbed Wire Again Lower

Montreal.

BARB WIRE.—A reduction is again quoted on barb wire, this being the second reduction inside of a month. Prices now are, 2 x 5, $4.95 reel; 4 x 6, $5.30 reel; 4 x 4, $5.75 reel. These quotations are for 80 rod reels.

Galvanized Wires Lower

Montreal.

GALVANIZED WIRES.—New prices are again out on galvanized wires. Like barb wire, this is the second decline in recent weeks.

Plain twist galv. iron, $7.15 per 100 lbs.
Plain galvanized wire, No. 9, $5.95 per 100 lbs.; No. 12, $6.10 per 100 lbs.; No. 13, $6.25 per 100 lbs.

Galvanized coil spring wire, No. 9, $6 per 100 lbs.; No. 12, $6.15 per 100 lbs.

Nail Prices Firm

Montreal.

NAILS.—Prices are remaining quite firm on wire and cut nails, and quotations made some weeks ago are holding. The demand is seasonably light, although spring deliveries are expected in the near future. Quotations are $5.85 base on wire nails and $6.60 base on cut nails.

Reductions in Lead Products

Montreal.

LEAD PRODUCTS. — Solders, both wire and bar, show a decline this week. Wire solders are 1¼ cents lower and bars 1½ cents. It is probable the easing of the lead market has had some effect on these products. The demand is fair, and if a little quiet is considered seasonable.

Lead pipe	0 13½
Lead waste	0 14½

Slump in Metals Continues

Montreal.

INGOT METALS.—Although no reason can be given for the continued slump on the London market, affecting tin more particularly than other metals, it continues to be in evidence and tin alone has dropped £40 in the last ten days.

TIN.—As stated in the above, tin has dropped £40 in the last ten days on the London market. It is impossible to say whether price will continue to decline, but local price is now quoted at 39 cents.

COPPER.—Copper is much easier in London and slightly lower in New York. The demand seems to have quieted down considerably in the last week. Prices are 19 cents for electro and 18¾ cents for casting.

LEAD.—This metal has held fairly well, considering the weakness of other metals. At present there is no sign of any lower prices. Quotations are 7½ cents.

SPELTER— Has declined in London and U.S.A., touching the low point of 5¼ cents in the United States. Local price is 7¾ cents.

ANTIMONY.—The lessened imports of antimony has had a strengthening effect in the market. Quotations locally are 8½ cents.

ALUMINUM.—This metal can be stated as quiet and unchanged, this condition has existed for some weeks now. Price 34½ cents.

Toronto Markets

TORONTO, Jan. 27.—The price tendency continues downward and several reductions are noted this week in hardware lines. The lower value of copper has brought declines in copper wash boilers, tea kettles and tea and coffee pots made from this metal. Copper rivets are also reduced in price. Some lines of brass goods have also declined and lower quotations are made on brass escutcheon pins, some lines of compression goods and valves. New lower prices are announced on cotton waste, and other cotton and canvas goods such as gloves and mitts, twines and web straps are showing further declines. Fuel oil has been reduced again. Sheets and plates are showing further recessions, and black and galvanized sheets are again reduced. Wholesalers report that orders are showing an improvement since the beginning of the month, and though a certain backwardness is noticed in ordering for later delivery, good sorting up orders are being received.

Bar Iron and Steel Hold

Toronto.

BAR IRON AND STEEL.—Business continues quiet in iron and steel, and the demand is stated to be light without showing much change. Present prices are the following:

IRON AND STEEL	
Common bar steel, 3-16 in. dia. and lighter	$ 5 25
Common bar steel, ¼ in. and heavier	4 75
Common bar iron, 3-16 in. dia. and lighter	5 25
Common bar iron, ¼ in. and heavier	4 75
Angle base	4 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 25
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	28 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	6 00
Norway iron	15 00
Toe caulk iron	6 70
Hoop steel	6 00

Canvas and Cotton Gloves Down

Toronto.

CANVAS GLOVES.—A further reduction of about 20 per cent. has been made in the price of canvas and cotton gloves and mitts, and cotton gloves are now quoted at $1.50 per dozen

Fuel Oil Again Declines

Toronto.

FUEL OIL.—A decline has been made this week in the price of fuel oil, and it is being quoted at one cent per gallon below last week's prices. Quotations are 14.20 cents per gallon net for barrels, and 13.20 cents net for tank cars.

Gasoline and Kerosene Hold

Toronto.

COAL OIL AND GASOLINE.—Quotations are holding unchanged on coal oil and gasoline and Royalite is selling at 28 cents per gallon, and Palacine at 31 cents. Motor grade gasoline remains at 42 cents.

There have been declines reported in some parts of the States on these products. A reduction was made here in kerosene prices six weeks ago, but gasoline has held steady without a change since last September.

Escutcheon Pins Reduced Prices

Toronto.

STEEL AND BRASS ESCUTCHEON PINS.—A reduction has been made in the price of escutcheon pins, and the discount on steel pins is now 30 per cent. off list, and 17½ per cent. for brass.

Copper Wash Boilers Lower

Toronto.

COPPER WASH BOILERS.—A decline of about 20 per cent. has been made in the price of all copper wash boilers. These are now quoted at net list, instead of list plus 25 per cent. The tin boiler with copper bottom remains unaltered at 50 per cent. on.

Copper Ware Quotations Lower

Toronto.

N.P. COPPER WARE.—Reductions have been made in quotations on nickel plated copper ware, and copper kettles, tea pots and coffee pots are now list plus 30 per cent. in place of list plus 60 per cent., a reduction of about 20 per cent.

Manufacturers state that there is still too great a difference between the pig metal and the copper sheet.

No Further Change in Rope

Toronto.

ROPE.—Quotations on rope and cordage are holding at the declines announced last week. The demand for present requirements continues seasonably light, it is reported, but an improvement is noted in booked orders.

Prices are as per current market pages.

Some Compression Goods Down

Toronto.

VALVES AND BIBBS.—A few revisions have been made on some lines of compression goods and the tendency of these lines is lower as was forecast in recent issues of Hardware and Metal.

Sales are seasonably light at the present time, though a fair movement is noted on smaller sizes.

Brass steam cocks, standard, are now 10 per cent. off list in place of plus 10 per cent., and J.M.T. globe, angle and check valves are also quoted at 10 per cent. off in place of plus 10 per cent. J.M.T.C. valves are now quoted at 20 per cent. off, instead of net list, and gate or straightway valves at 7 and 10 per cent. off list. Emco J.D. valves and Emco check valves are now selling at 10 per cent. off list and Webber gate valves at 15 per cent. off.

Following are present quotations:

Compression work, standard	**25%**
Fuller work, standard	**30%**
Bath cocks, compression	**25%**
Do., Fuller	**28-30%**
Flatway stop and waste cocks, standard	**25%**
Roundaway stop and waste cocks, standard	**5%**
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J. M. T.	10%
J.M.T. C.	20%
Gate or straightway	7/10%
Jenkins Globe	10%
Radiator valves, standard	**23%**
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

F. O. B. factory, Toronto.

Copper Rivets Are Lower

Toronto.

COPPER RIVETS.—New lower prices have been made on copper rivets and for rivets without burrs prices are the following: No. 7, 44 cents per lb.; No. 8, 49 cents; No. 9, 51 cents; No. 10, 53 cents. For rivets with the usual assortment of burrs prices are: No. 8, 51 cents; No. 10, 54 cents. The quotations on burrs are as follows: No. 7, 66 cents; No. 8, 68 cents; No. 9, 73 cents; No. 10, 78 cents.

New Quotations on Roofings, Etc.

Toronto.

ROOFINGS AND SHEATHINGS.—New prices went into effect on roofing felts and sheathings at the new year and were announced in the January 1 issue of Hardware and Metal, and were approximately a reducton of from 11 to 17 per cent. on fibres and about 10 per cent. on ready roofings.

The new quotations on the Barrett line are as follows:

	Per 400-ft. roll
Dry Fibre, No. 1, Anchor	$1 65
Do., No. 2, Anchor	1 10
Tarred Fibre, No. 1, Anchor	1 70
Tarred Fibre, No. 2, Anchor	1 45
Stag Sheathing	1 15
	Per cwt.
Scythe brand, heavy dry straw	5 10
Spruce sheathing, 36 in. wide	9 75
Anchor brand carpet felt	6 50
Tarred felt, 7 oz., 10 oz. and 16 oz.	5 35
READY ROOFING.	Per square
Everlastic, 1 ply	2 10
Do., 2 ply	2 50
Do., 3 ply	2 95
Panamoid, 1 ply	1 90
Do., 2 ply	2 30
Do., 3 ply	2 75
Red Star, 2 ply	2 13
Do., 3 ply	2 55

Cotton Waste New Prices

Toronto.

COTTON WASTE.—The new prices on cotton waste show declines of from 1 to 4 cents per pound, according to quality. Trade is reported quiet in this commodity at present. Following are the new quotations:

COTTON WASTE—Cream, polishing, 22c. White, XXX, 21c; XX, 19½c; X, 17½c; XC, 16½c; XXX, 18½c; XX, grad., 17½c; XLCR, 16½c; X Pres., 13½c. Colored—No. 1, 14½c; No. 7, X Empire, 15c; X Pres., 13½c. Colored—No. 1, 14½c; No. 7, 13½c; No. 1A, 12½c; No. 1B, 11½c; fancy, 15c; Lion, 13½c; Standard, 12c; Popular, 10½c; Keen, 9c.

Above lines subject to trade discount for quantity.

Web Straps Are Lower

Toronto.

CANVAS STRAPS.—There has been a reduction in the price of web straps of about 30 per cent. In the smaller sizes there is a good demand for these as skate straps, and the larger sizes for strapping up parcels, grips, etc.

Brass Curtain Fixtures Reduced

Toronto.

CURTAIN POLE RINGS, SOCKETS, ETC.—A decline of about 10 per cent. has taken place in the price of curtain pole sockets, rings and fixtures made from brass.

Steel Gas Tubing Down

Toronto.

STEEL GAS TUBING.—A reduction has been made in the price of this and it is now quoted at 7 cents per foot, in place of 9 cents.

Aluminum Numbers Down in Price

Toronto.

ALUMINUM HOUSE NUMBERS.—There is usually a good demand for house numbers in the spring, and prices of aluminum numbers are lower by about 25 per cent. than old quotations.

Aluminum Wares Selling Well

Toronto.

ALUMINUM WARES.—There is a steadily growing demand for aluminum ware in cooking utensils, and in tea and coffee pots and percolators, etc., and wholesalers report satisfactory sales of these lines.

In United States markets there have been some reductions made in prices on aluminum ware, and it is reported that quantities of German made wares have been lately imported into the States.

Wrought Pipe Holds Unchanged

Toronto.

WROUGHT PIPE.—Prices are holding unchanged on wrought pipe, and sales are reported fairly good for the period of the year. Stocks of the smaller sizes are said to be below normal, but are getting better.

Quotations are as per list No. 48 and are on current market pages.

No Alteration in Nails

Toronto.

NAILS.—No changes are reported in nail prices, and wire nails are quoted at $5.75 per keg base. Stocks are stated to be fairly light and present demand is no more than is usual at this time.

New Fitting Prices Shown

Toronto.

PIPE FITTINGS.—Prices of fittings are holding at the recent declines noted. The demand while not heavy is reported to be fairly active considering that there is little new building being constructed at the present time. Supplies show an improvement. Quotations are the following:

Cast iron fittings	10%
Plugs	20%
Bushings	25%
Unions, ¼-in. to 2-in.	35%
Do., ⅛ in., 2½ to 4 in.	30%
Dart Unions, blk., ¼ in. to 2 in.	20%
Do., ⅛ in., 2½ to 4 in.	8%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B.	0 26	0 36
Class C.	0 17	0 26

Corrugated Sheets Are Quiet

Toronto.

CORRUGATED SHEETS. — Quotations are holding at the recent decline, and no further change is expected at present. Business is naturally quiet in this line and little improvement is anticipated for a few weeks. Quotations are the following:

Corrugated Sheets—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

50 cents per square extra for one inch corrugation.

Lead Products Fairly Active

Toronto.

LEAD AND ZINC PRODUCTS.—Little change is noted this week in lead or zinc products, and quotations remain unaltered. In solder wire the following is quoted, 40-60, 26½ to 28 cents per pound; 50-50, 29 to 31 cents. Calking lead is quoted at 9½ cents.

Many are of the opinion that the bottom has been reached in the pig lead market and that further declines in primary markets are unlikely. The demand at present is said to be fairly normal. Quotations are the following:

Lead pipe, list, per lb.	0 13½
Lead waste pipe, list, per lb.	0 14½
Do., over 8 in., list, per lb.	0 15½
Lead pipe is subject to a discount of 10%.	
Lead traps and bends	Net
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 10½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 36
Do., strictly, lb.	0 27
Do., commercial, lb.	0 24¼
Do., guaranteed, lb.	0 29
Do., wiping, lb.	0 25
Zinc sheets, per lb.	0 18

Sheets and Plates Are Lower

Toronto.

SHEETS AND PLATES.—Quotations show some recessions from figures given last week on plates, and also on black and galvanized sheets. Buying is light and sales are usually in smaller lots than ordinary, and though stocks appear ample for present requirements, a good buying movement it is stated might reveal a shortage in some of these goods.

Following are current quotations:

PLATES

10 gauge	6 20	....
12 gauge	6 25	....
14 gauge	6 30	....
16 gauge	6 40	....

U.S. 28	9 00	10 20
N.S. 26	8 75	9 95
22 and 24	8 55	9 70
18 and 20	8 40	9 55
16	8 40	9 55
12 and 14	8 25	9 40

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Waste Materials Keep Quiet

Toronto.

WASTE MATERIALS.—The waste material markets have been exceedingly slow, but inquiries are coming to hand in better volume and prospects seem stronger. In the scrap iron market prices have been unchanged and little purchasing interest has been shown. Dealers believe that an increase in demand will be felt in a few weeks. Conditions are believed to be on the mend with the worst of depression over, and business will come back very shortly.

The following average prices for large quantities are strictly nominal:

WASTE MATERIAL

No. 2 busheling		$13 00
Stove plate, per ton	19 00	20 00
Yellow brass	6 00	7 00
Red Brass		10 00
No. 1 machinery cast	24 00	25 00
Heavy melting steel	15 00	16 00
Heavy copper	10 50	11 50
Heavy copper	0 11½	0 12½
Scrap zinc	4 00	4 50
Light brass	4 25	4 75
R.Rd. wrought iron, No. 1, gr. ton	13 50	14 50
Scrap pipe	8 00	9 00
Heavy lead pipe	4 00	4 50
Old rubbers, boots and shoes	2 00	3 00
Overseas lumbermen's rubber boots	1 50	2 00
Bicycle tires	0 01	0 01½
Tea lead	2 00	2 25
Automobile tires	0 50	1 00

Ingots Dull; Tin Erratic

Toronto.

INGOT METALS.—Markets are reported as dull again in ingot metals and fluctuating from day to day. Tin especially has been erratic and after declines on London markets has rallied only to fall again. It is the only metal this week showing a change here and has dropped two cents since last week.

COPPER.—In outside markets this metal has had a lull and business is reported to be quieter again. Values are nominally unchanged but advices from New York indicate a cessation of the export demand. Quotations locally are unchanged from 19 cents for casting copper.

TIN.—Very erratic describes this metal and present quotations here are down two cents from last market report. Prices fell following weakness in London tin markets. Prices here are quoted at 45 cents.

LEAD.—This is stated to be dull and unchanged. Some outside markets are reported easier and others are a trifle firmer. It is anticipated that lead markets may have a bullish tendency as it is stated that American producers have greatly curtailed operations and a large number of the Broken Hill Mines have suspended operations. Quotations hold here at $7.00.

SPELTER. — The market is dull in spelter and shows no change from previous quotations at $7.50.

ANTIMONY.—Quotations are holding unchanged at 8 to 9 cents on antimony, and the metal is quiet.

ALUMINUM.—Prices are holding unchanged at 35 to 37 cents. Outside markets are reported easier in this metal.

London Markets

LONDON, Ont., Jan. 27.—Several price changes are noted this week, and among the principal ones are tee and strap hinges, shelf brackets, barrel bolts and hooks and staples, which are all lower. Turpentine declined again in price.

There is an improvement in business and orders coming in are showing an increase both in numbers and size. Merchants are very optimistic here and are expecting to see the improvement maintained and a good volume of business done this coming spring.

Turpentine Declines Five Cents

London, Ont.

TURPENTINE.—A new lower price is made this week on turpentine, and it is being quoted at 5 cents per gallon less. New prices are the following:

Turpentine—	Per Imp. Gal.
1 barrel lots	$1 30
2 to 4 barrel lots	1 29
5 gal. lots	1 45

Linseed Oil Prices Unchanged

London, Ont.

LINSEED OIL. — The quotations of last week are still in effect on linseed oil, and sales are small yet. Following are quotations:

	Raw.	Boiled.
1 to 2 bbls.	$1 10	$1 13
3 to 5 bbls.	1 09	1 12
6 to 9 bbls	1 07	1 10

Less barrels, add 15c per gallon.

Nails Show No Change

London, Ont.

NAILS.—The demand for nails is not heavy, but a fair sorting business is being done at present. Sales are made at $5.75 per keg base for wire nails, and $7.15 for cut nails.

Rodgers Cutlery Being Received

London, Ont.

JOSEPH RODGERS CUTLERY. — Supplies of this make of cutlery in pocket and in butcher knives have been very scarce for several months, and shipments have recently come to hand. Prices are holding firm and some of the better known lines are given below:

POCKET KNIVES — No. A32345 x 2¾ in., 2 blades, $10.56 doz.; 3 in., $11.52; 3¼ in., $12.96; 3½ in., $14.40; 3¾ in., $15.84. No. A32341 x 3 in., 1 blade, $8.16 doz.; 3¼ in., $8.60; 3½ in., $9.60. No. A32352, boys' 1 blads, $6.48 doz.

JOSEPH RODGERS' BUTCHER KNIVES — No. 1707 x 5½ in., $6.90 doz.; 6 in., $7.20; 6½ in, $7.80; 7 in., $9.00; 8 in., $10.80; 10 in., $15.45; 12 in, $24.60; 14 in., $37.50.

SKINNING KNIVES—No. 1707 x 5½ in., $7.20 doz.; 6 in., $7.50.

STICKING KNIVES—No. 1707 x 6 in, $7.95 doz; 6½ in., $8.55

Copper Boilers Are Reduced

London, Ont.

COPPER WASH BOILERS. — New lower prices are in effect on solid copper wash boilers, and constitute a reduction of about 20 per cent. These goods are now quoted at net list.

Lower Prices for Copper Kettles

London, Ont.

COPPER TEA KETTLES.—Approximately 20 per cent. reduction has been made in the price of nickel-plated tea kettles and the new discount is list plus 30 per cent. These have been selling at list plus 60 per cent.

Heavy Tees and Straps Reduced

London, Ont.

TEE AND STRAP HINGES.—A reduction has taken place in the price of heavy tee and strap hinges, and they are practically 15 per cent. lower.

The new quotation is 35 per cent. off list. Formerly this was 25 per cent.

Shelf Hardware Is Reduced

London, Ont.

SHELF HARDWARE. — Reductions of from 5 to 10 per cent. have been made in prices of several lines of shelf and builders' hardware, and plated butts, plain steel butts, barrel bolts, wrought staples, hooks and staples, and safety hasps are lower. New net prices will be available in the course of a few days.

McCloskey Wire Grips Lower

London, Ont.

McCLOSKEY WIRE GRIPS. — New lower prices are quoted for this wire fence grip or stretcher and they are now priced at 85 cents each.

Plumbers' Torches Are Down

London, Ont.

GASOLINE TORCHES. — Some new prices are in effect on plumbers' gasoline torches and are a reduction. Following are new quotations:

No 31, $9.25 each; No. 32, $9.60; No. 120, $8.25; No. 122, $7.20; No. 130, $7.25; No. 208, $9.60.

New Prices on Sap Spouts

London, Ont.

SAP SPOUTS.—The sap spouts made by the Sheet Metal Products are quoted this season at $38.00 per thousand.

Good Sales on Auto Lenses

London, Ont.

AUTO LENS.—There is a good sale at present for non-glare auto lens. Many different makes approved by the Government are being offered and prices range from $1.25 per pair to $5.00 per pair.

Rope Prices Are Held

London, Ont.

ROPE.—There is no change this week on the price of rope and sales are slow at present. Quotations are as follows:

Pure Manila, 26 cents lb. ball; Beaver Manila, 21 cents; Sisal, 19 cents; Lath Yarn, 19 cents.

Sash Weights Show Decline

London, Ont.

SASH WEIGHTS.—New lower prices are quoted here for sash weights, and the round solid weights, 3 pounds and heavier, are now $4.75 per 100 pounds. In the sectional weights prices are $5.25 per cwt. for one-pound size and $5.75 for half-pound weights.

Crushed Oyster Shell Lower

London, Ont.

OYSTER SHELLS.—A slight reduction has been made in the price of crushed oyster shell for poultry, and it is now quoted at $1.60 per 100 pounds.

Refrigerators Are Being Booked

London, Ont.

REFRIGERATORS.—Orders are now being booked for refrigerators and the household sizes of the Sanderson Harald make are quoted at 40 per cent. off list. The grocers' and hotel or restaurant lines are 35 per cent. off list. These are the same quotations that were made last fall.

American Roofing Nails Improve

London, Ont.

AMERICAN ROOFING NAILS. — Shipments are being received now and supplies are coming in from the mills faster of the large head American roofing nails, which last season were very scarce. The price at present is about $12.00 per 100 pounds.

National Planes Are Lower

London, Ont.

PLANES AND VISES.—The various makes of planes and vises manufactured by the National Manufacturing Company are reduced in price and are about 10 per cent. lower.

Good Booking For Netting

London, Ont.

POULTRY NETTING.—Booking orders for spring delivery are now being received in considerable quantity and the Canadian make of poultry netting is selling at list plus 10 per cent. in 1-inch and 2-inch mesh, standard gauge.

Screen Wire Cloth Prices

London, Ont.

SCREEN WIRE CLOTH.—The quotation for screen wire cloth for this

(Continued on page 61)

"Customers Appreciate High Grade Paint"

Says Montreal Merchant After Twenty Years of Paint Selling—Follows Policy of Educating Customers to Value of High Grade Product—Customer Blames Merchant if the Quality of Paint Sold is Not Right.

"OUR motto is, 'Goods With Character.' Never mind what price you will have to charge us for the goods, go ahead and make them right and we will sell them and get the price."

So spake Mr. Leger, of the hardware firm of Lacroix and Leger, Limited, 479 Mount Royal Avenue East, to Hardware and Metal. The question arose when a certain brand of paint was referred to by the writer as being a worthy one. Mr. Leger said that it was, and that they had proved, particularly in the past five years, that the customer will buy that on which he can depend. And this dependence is inspired by the confidence of the customer in the dealer from whom he customarily buys. If he cannot rest his confidence in that dealer then he will, sooner or later, go elsewhere. Such is the opinion of Mr. Leger.

"We used to be bothered, years ago, with this argument: 'Well, I can get that a cent cheaper down town.' It was really a task to meet that argument, for the customer made so much of it. But now it is different. If the customer thinks the article too high, then he will perhaps go into the next store, and he will find that there is little or no difference. Finally, he will either trade at one of the other stores he has compared our prices with, or will come back and deal here permanently."

Only One Sure Way

But, as a rule, Mr. Leger stated that customers now look more closely into the real worth of an article than at its price. If it is satisfactory to them from a quality standpoint, then they will buy. "Price is not the consideration it used to be some years ago, and the customer has the money to buy with," commented Mr. Leger. "Workers are still getting good wages and are able to pay for what they need, and they are paying it, even though they are not buying far ahead of their needs."

Here reference was made to the credit evil. The firm used to do an extensive credit business, but this is now much more closely confined. "They have to either pay cash or give references," Mr. Leger remarked. "A while ago a man came in and wanted to open an account for some paint, etc. We talked the matter over and I asked him if he had any references. He gave me one, and one of the firm immediately went out to investigate while I kept the man engaged in conversation. The investigator soon returned, and while the reference was correct the recommendation was not satisfactory, and we did not open the account."

This plan has saved the firm much uneasiness as well as money, and Mr. Leger said that he believed that when people were earning good money, they ought to pay the cash. As far as this firm is concerned they are making sure before a new account is opened.

The Right Way to Grow Up

Asked as to the source of his trade and whether definite plans were followed in the way of advertising, Mr. Leger said that they had depended largely upon making goodwill with every customer. This was reflected recently in a unique way, which well illustrates the value of holding down a location for many years.

"I was in a certain wholesale warehouse recently, when a young man stepped up to me and said: 'Oh, you are Mr. Leger; you have a store on Mount Royal Avenue. I used to live near your place.'

"I did not know this man, of course, and was surprised that he knew me. We get many orders by telephone, and these are often from people who know us for many years, and who are satisfied to give us their business. These custotmers who used to be boys or young men in our neighborhood, have now grown to manhood and have married. They are giving us their business because they have come to know that we will give them value."

This illustrates that the growing generation, after all, is more observant than they are sometimes credited with being. They have, in such instances as those referred to just now, been consciously or unconsciously deciding where they will buy when they have set up a home of their own.

The Way to Put Sales Across

Referring again to the plan of selling the better article, Mr. Leger said that they had found, by experience, that good paint, for instance, was the only paint to sell. His firm had stocked a paint at one time which they did not feel was the best procurable. Complaints came in, and these multiplied. People found fault every now and then with the results they obtained from the use of a certain specialty, and they were usually dissatisfied when the results were not as hoped for. The blame was attached to the dealer at such times, whereas, if the dealer had sold that specialty which he knew to be well adapted for the work in hand, there was little chance of a complaint.

"If the manufacturer will give us the quality in his products that is what we want. We will sell the goods, no matter if they are high-priced," he concluded.

GLIDDEN

EVERYWHERE ON EVERYTHING

Wearette Saves the Surface

A durable, waterproof household varnish, for reviving and renewing woodwork or furniture—that's Wearette, an unusually enduring and permanently attractive Glidden finish.

Like all Glidden products, Wearette enjoys the prestige that fifty years of successful manufacturing brings. The Glidden name represents known value the Dominion over; it's a familiar name to buyers generally and the products it represents find ready acceptance wherever offered.

Identify yourself with Glidden and profit by the popularity of the Glidden line. It's a mark of distinction to be known as the Glidden dealer in any locality. Write for dealer proposition.

Shellac Trade Is Depressed

Phonographic Interests Out of the Market—Competition in Shellac Prices More Evident—Primary Market Advance Not Thought To Be Permanent

WHILE a little better feeling has prevailed in the shellac market during the last week, the demand has been of a routine nature and largely of a jobbing character, though with price cutting by second hands competition has been forced more to the front, says the American Paint Journal. While price cutting is not being openly resorted to by the importers, the trade is meeting all competition when necessary.

Although the Calcutta market has recently shown quite a sharp advance, partly due to the advance in sterling exchange, it is still doubtful how permanent an improvement has developed. It is probable that considerable buying went on in Calcutta for the account of phonograph record makers at the recent low levels. The attractiveness of the London market also has resulted in some purchases in the March and May positions at what are believed to have been very low prices. At any rate importers are hopeful for the future.

While the fluctuations at Calcutta have an influence on the New York market in normal times the recent dull period which the market has been experiencing undoubtedly has had more influence on Calcutta than have the declines in this market.

The thing of chief interest appears to be the fact that the consumption of shellac here has been greatly curtailed, to a degree in striking contrast with a year ago when every package arriving had been sold even in advance of shipment.

The principal cause of the dullness appears to be laid at the doors of the phonograph record manufacturers, who in normal times consume at least 50 per cent. of the shellac imports and are usually stocked up well in advance of requirements. With these interests out of the market it is evident that the consumption of shellac must be considerably less than usual, though shellac consumers in other lines also have been following the trend of the times and holding off for lower prices.

But as far as the phonograph record business is concerned, it is quite apparent that the blame must be laid at the door of the ultimate consumer. The phonograph trade always has depended on a heavy volume of business in the Christmas holiday season. The usual preparations last year had been made for this expected trade and when it failed to materialize the result was somewhat embarrassing even to the largest companies.

Not only were the salesmen unable to make their normal sales as in recent years when the people were spending money freely, but they found that many reproducing machines were being returned because of non-payment of instalments, which also further reduced the sales of records.

W. H. Gerke to Enter Business for Himself

W. H. Gerke has resigned from the position of general manager of the Martin-Senour Company in the United States.

Mr. Gerke is well known in both the United States and Canada. His connection with the paint industry dates back more than thirty years, during all this time being connected with the Martin-Senour Company and having worked his way up from boyhood in that organization. In 1905 Mr. Gerke came to Canada to take charge of the Canadian business for the Martin-Senour Company, which was being started at that time. In 1916, the Canadian branch of the Martin-Senour Company was sold, shortly after which Mr. Gerke returned to Chicago as general manager of the Martin-Senour Company in the United States. He resigned from the Martin-Senour Company recently in order to engage in business for himself and will shortly announce his new connections.

Extending Electric Power

Lucknow.—After a year and three months in varying degrees of darkness, since the closing of the privately owned lighting plant, Lucknow is now enjoying the benefits of hydro from its own substation.

Pratt & Lambert Convention

Pratt & Lambert, Inc., held the annual sales convention of the staff in Canada and the United States in Buffalo.

In his opening address, "Our Convention," Monday afternoon, President J. H. McNulty said that "Progress" was the watchword for the coming year and the keynote of the convention.

Other officials of the company spoke on various subjects concerning the manufacture and sale of P. & L. products.

Among other staff changes announced at the convention was the appointment as general manager of A. D. Graves, who for the past three years has been manager of trade sales.

Farrar Assumes Management of Glidden Advertising

Frederick Arnold Farrar, for the past fourteen years advertising manager for the Adams & Elting Co., makers of Adel-ite paints and varnishes, and for the past year director of advertising for the Heath & Milligan Manufacturing Co., Chicago, has been recently appointed director of advertising for the Greater Glidden Company of Cleveland. Mr. Farrar is a man of rarely combined talents; he is not only a clever salesman, a versatile writer and artist, but a man of keen business acumen and above all an advertising man of the most efficient type.

Mr. Farrar is very enthusiastic about the future of the Glidden Company and its fast growing auxiliary organizations. Adrian D. Joyce, president of the Glidden Company, in announcing the addition of Mr. Farrar to his organization, spoke of the splendid work he had done for the Adam & Elting Company and the Heath & Milligan Manufacturing Company.

For years he has been very active in commercial and civic affairs in Chicago and the Central West and the best wishes of a host of friends and associates go with him in his new responsibilities. Mr. Farrar will make his temporary headquarters with the Adams & Elting Company, Chicago.

T. F. Helms Made Advertising Manager of Glidden Co.

T. F. Helms, who for some time has been in the advertising department of the Glidden Co. of Cleveland and has acted as assistant advertising manager, has been promoted. Mr. Helms was formerly with the National Carbon Co. of Cleveland and has a very thorough knowledge of advertising details and the requirements in a well organized department. Frederick Farrar, who has become director of advertising for the Greater Glidden Co., says he is very fortunate in having a young man of Mr. Helm's calibre.

New Milking Machine Company

Announcement is made of the incorporation of the Macartney-Somes Milking Machine Co., of Bloomfield, N.J., with the following officers: L. N. Somes, president and general manager; A. C. Macartney, vice-president, in charge of all development and production work; J. J. Clark, treasurer, and A. P. Jennings, secretary.

Mr. Somes was first a successful business farmer, for years he was associated with the Sharples Separator Co. For the last eight years he has been associated with the Empire Cream Separator Company, of Bloomfield, New Jersey. He held the position of general sales manager in charge of their sales activities over the entire United States and Canada.

HILLCREST REGISTERED
A GUARANTEE OF QUALITY

"HILLCREST"

(TRADE MARK REG'D)

Do You Know What It Means On a Can of Paint?

HILLCREST belongs to Sanderson Pearcy & Company, Ltd. We are manufacturers. We make an unusual line of paints, varnishes, enamels and kindred products. These are unusual because each represents a "plus" standard of manufacture. Research, experience, knowledge, skill, are concentrated on making products in this line as nearly perfect as humanly possible; such products are labeled "Hillcrest." We firmly believe it impossible to make a better article.

Welcome the Hillcrest salesman; he knows that your interests are his. He sees lots of retail problems; when you think he can help you, he'll cheerfully do it. Ask him about "Hillcrest" Bronzing Liquid; Colors in Oil; Colors in Distemper; Colors in Japan; Motor Car Enamel; Paste Filler; Crack Filler; Barn Red Paint; Outside Gloss White Paint; Inside Flat White; Aluminum Paint; Carriage Paint; California Gold Paint; Orange Shellac; White Shellac; Graphite Machine Paint Liquid; Oil Stain; Varnish Stain; Shingle Stain; Pure Lead; any of the Hillcrest Varnishes, or other product of interest to you.

The coming series of advertisements will make you better acquainted with "Hillcrest" and its value to you as a merchant.

Weekly Paint Markets

Montreal

MONTREAL, January 27th. — Paints and varnishes, with allied products are reported with a better movement this week. Many spring shipments are now being made, and although in smaller consignments than last year, business is considered quite normal. There is a very unsettled condition in the shellac and window glass market, with local jobbers quoting different lower prices. Linseed oil again registers a decline, while putty and turpentine remain unchanged.

Putty Remains Unchanged

Montreal.

PUTTY.—The same situation might apply to putty as to white lead in oil. Business offerings continue dull with prices unchanged, the between-seasons no doubt accounting for small sales to a great extent. Quotations are:

Commercial Putty	5 tons	1 ton	ton
Bulk barrels, 800 lbs.	$6 00	$6 25	$6 60
Bulk drums, 100 lbs.	7 00	7 25	7 60
Do., or tins, loose, 25 lbs.	7 25	7 50	7 85
Bulk tins, cased 25 lbs....	8 00	8 25	8 60
Bulk drums or tins, loose 12½ lbs.	7 50	7 75	8 10
Bulk tins, cased 12½ lbs...	8 25	8 50	8 85
Bladder barrels, 400 lbs. ..	8 25	8 50	8 85
Do., cases, 100 lbs.	8 50	8 75	9 40
Tins, 1 lb.	10 60	10 85	11 20

Standard Putty, 10c per 100 lbs. advance over above prices.

Pure Linseed Oil Putty, $2.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

Glass Also Unsettled

Montreal.

WINDOW GLASS.—The demand for window glass is very light at the present time, however, the situation is very unsettled and different prices are being quoted among the local jobbers. The market quotation is unchanged at 30 per cent. off the list, but some firms are offering 33 1-3 per cent. off list.

Shellac Unsettled

Montreal.

SHELLAC.—The situation on shellac is very unsettled and price cutting seems very prevalent. Prices range from $5.00 to $6.00 a gallon on orange shellac in barrels. It is very difficult to determine the prevailing market quotations, but the following prices seem to be the lowest available. Orange in barrels, $5.25; in one gallon jugs $5.50; white, in barrels or 5 gal. jugs, $5.75; in one gal. jugs, $6.00.

Paints and Varnishes Improved

Montreal.

PAINTS AND VARNISHES. — The movement of paints and varnishes generally has improved considerably during the past week. Spring shipments are now being shipped and although buying has been curtailed, and consignments not as heavy as last year, business is quite favorable.

Linseed Oil Again Declines

Montreal.

LINSEED OIL.—With the easing of the flax market come lower prices on linseed oil this week. The flax market is very uncertain at present, thus making it difficult to determine what further changes will take place in the near future in the oil products. The demand continues light and only small sales are being made. Local quotations differ from 3 to 4½ cents, however the lowest prices obtained are:

1 to 2 barrels	1 09	1 11½
5 to 10 barrels	1 04	1 06½

White Lead in Oil Firm

Montreal.

WHITE LEAD IN OIL.— Prices on white lead in oil remain as quoted last week. Business is still quiet, and it is the belief of one manufacturer that merchants are still holding off and not buying their spring requirements. Stocks in the hands of the dealers are reported light, and it is hoped that in the very near future the demand will become very much larger. It is the firm belief of the above manufacturer that the trend of market will be upward rather than any lower prices.

Local quotations are $16.00 per 100 lbs. in 5 ton lots, $16.50 in one ton lots and $16.85 less than ton lots.

No Change in Turpentine

Montreal.

TURPENTINE.—There is practically no change in the turpentine situation this week. Conditions in the south are unchanged with a little firmer tone than existed during the past winter months. Demands are still light, but quotations hold at previous prices.

Quotations are as follows:

Turpentine—	Per Imp. Gal
1 barrel lots	1 25
2 to 4 barrel lots	1 24
Broken lots	1 26

Toronto

TORONTO, Jan. 27.—Prices are holding unchanged in paints and varnishes and other paint products. Linseed oil shows a slight decline since the last report, but turpentine is unchanged. White lead in oil and putty are holding firm and unchanged.

Glass furnishes the only commodity in this market to show any striking change, and, as was noted in last week's issue of Hardware & Metal, the window glass market is very unsettled.

From a nominal discount of 30 per cent. quotations have widened so that in many cases as much as 60 per cent is being quoted off list prices. How much extra business the reductions are bringing in is doubtful, and some are of opinion that higher instead of lower prices would stimulate buying more. It is noted that these quotations apply only to Belgian glass in which the market is very weak.

Taken altogether a better volume of business is reported this week, and some fairly good orders are reported in different quarters.

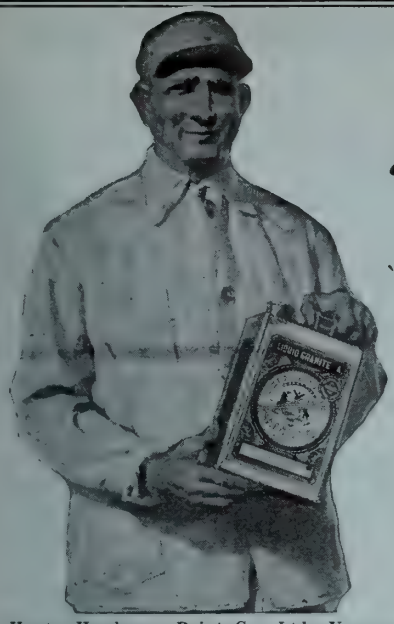
Paint and Varnish Hold

Toronto.

PAINT AND VARNISH.—No changes are made in prices of paint and varnish. Bookings, while slower and probably below last season at this time of the year, are reported to be improving and a very satisfactory volume of business has been received by paint manufacturers here during the past week or so.

If improvement is maintained from week to week as it has been since the travelers started out this season there will be very little to complain about, was the statement made to Hardware and Metal.

White Lead Holds Unchanged



Toronto.

WHITE LEAD IN OIL.— Prices are holding unchanged on white lead in oil. Business though light is reported to be as good as can be expected for the time of the year for present delivery, and bookings are showing a slight improvement. Quotations will be found on current market pages.

No Changes in Putty

Toronto.

PUTTY.—Sales are stated to be seasonably light on putty. Stocks are in fair shape and with the demand normal there should be no shortage this year. Quotations which are unchanged are given as follows:

The Luxeberry Painter Says:

"Beautiful homes are made from the inside out and not from the outside in. The outside of the house is the casket, the jewel is inside, and it is the painter who creates it with the aid of the right finishes. I always use Berry Brothers' Finishes because with them I can depend upon producing results that please me and satisfy my customer. I made a notable failure or two with other finishes, but it will never occur again."

The year-in-year-out uniform quality of Berry Brothers' products established a nation-wide demand for them that is always growing.

Lower Quotations on Glass

Toronto.

WINDOW GLASS.—Lower prices are in evidence on window glass, and quotations of 60 per cent. off list prices are pretty general. These quotations are understood to be on Belgian glass, and the market there has weakened considerably. The low exchange value of the franc has contributed to lower prices, but some wholesalers are of the opinion that the present low quotations are not justified even by the present state of the Belgian market, and expect to see prices stiffen again. Unless a corresponding decrease was made in Belgian quotations, any rise in the value of the franc would also tend towards higher prices.

Business is lighter than usual in window glass, and it is stated that these lower prices have not stimulated sales as some might expect.

Everjet Carbon Paint Prices

Toronto.

EVERJET CARBON PAINT.—A revision has been made in the quotation on one gallon cans of Everjet carbon paint and this is now quoted at $12.00 per case of one dozen gallon cans.

Creosote Oil Quotations

Toronto.

CREOSOTE OIL.—Some changes have been made in quotations on "Carbosota" grade 1, liquid creosote oil and new prices are the following:

CARBOSOTA—	
Barrels, per gal.	0 60
Half barrels, per gal.	0 65
Five gallon cans, per gal.	0 95
One gal. cans, per gal.	1 00
One gal. cans (case of 1 doz.)	9 50

Turpentine Shows no Change

Toronto.

TURPENTINE.—No change has been made this week in the price of turpentine, and quotations are as below.

Sales are light still and very little improvement in amount of business is expected for a while.

1 barrel lots	1 30
2 to 4 barrel lots	1 29
5 gal. lots	1 45

Slight Decline in Linseed Oil

Toronto.

LINSEED OIL.—A decline of three cents per gallon has been made in the prices of linseed oil here. Business is still quiet with only a limited demand and a hand to mouth buying. It is thought that an improvement will be manifest in inquiries and orders in the course of the next month.

The flax seed market is fluctuating from week to week and the trade appears to be waiting developments.

Following are new quotations.

	Raw.	Boiled.
1 to 2 barrels, gal.	1 07	1 10
3 to 5 barrels, gal.	1 06	1 09
6 to 9 barrels, gal.	1 04	1 07

Less quantities add 15 cents per gallon.

Better Outlook for Turpentine and Rosin

THERE is a feeling of more hopefulness as to the future of both commodities and a sentiment that as the supplies of rosins and turpentine which are pressing for sale are becoming lessened from day to day the situation is steadily improving and if official trading is deferred a bit longer the opening transactions when posting of sales is resumed may not be so unsatisfactory as seemed likely some time back, says the Naval Stores Review, Savannah, Ga. Not only the dealers in this section but those of the North and West are said to have been quietly feeling the way to gather in supplies before the markets respond to the effects of increased consumptive requirements, which are regarded as inevitable before spring sets in. The pressure to sell from the southwest is said to have considerably lessened and as the manufacturing industries into which rosins and turpentine enter are acknowledged in many instances to be almost bare of supplies of those commodities, and the country seems to be getting in readiness to shake off its lethargy and show the usual spirit of pushing activity, a number of glints of light may be said to have combined to penetrate the gloom and dispel it from the situation confronting dealers, factors and producers of naval stores.

A material aid to the cultivation of a better feeling in trade circles generally is the growing impression that the next crop is to be considerably lessened by sheer force of circumstances, even without organized efforts in that direction. All factors have impressed on the producers the vital necessity of lessening the next crop to enable the handling of the carry-over and the 1921 production at satisfactory profitable values and the salvation of the industry from a relapse into a period of low prices.

Business Is Certain To Expand and Industry Will Be Quickened

Readjustment in Prices and Profits Now Going on in the Business and Industrial World Furnishes No Justification for Pessimism

THE following extract from a general letter sent out to the sales force of a Canadian manufacturing concern, dealing with present conditions in Canada is interesting, illustrating an undivided faith in the future of Canada:—

"The readjustment in prices and profits now going on in the business and industrial world furnishes no justification for pessimism. There will be no prolonged depression. Just as soon as a stabilized basis is reached business is certain to expand and industry will be quickened. The great recession in prices and accompanying decrease in demand for goods is an inevitable aftermath of the war boom. The wonder is that it did not come sooner. Everybody knew it was coming. Some people prepared for it. Others went on as if the boom in business and the rise in prices would continue indefinitely.

Greater Than They Are

"The readjustment process has wiped out a good many hundred millions of 'paper profits' made in the war boom and has put merchants and producers in an uncomfortable position. The discomfort and distress, however, by contrast with the wild flights of war prices, seem greater than they are.

"There is no question that fundamental things in Canada are sound—in financing, in merchandising, in industry, in agriculture. The country is rich with accumulated war profits. The crops are abundant. The banks have been foresighted in avoiding the admission of doubtful securities to their assets. The factories are equipped better than ever before to meet the demands of the country. The average scale of living is higher than ever before, which means that potential demand for goods is enormous and the present lull in buying is only temporary.

Europe Coming Back

"Anyone who feels inclined to be discouraged over the present situation and disheartened over the future should compare this country's condition with Europe's. Canada accumulated a vast wealth in the war while Europe was exhausting its goods, its men and its financial resources; yet Europe is coming back marvellously, increasing its production, strengthening its finances, restoring its business stability. All the Canadian people have to do is to wait patiently for the completion of the readjustment and then be ready for the resumption of prosperity that is as certain to come as the succeeding seasons."

Rockhaven, Sask.—Robertson & Co.'s hardware has been succeeded by J. H. Cote.

The Floglaze Family

Seven of them—All ardent workers meeting the exact requirements of practically every surface.

Home and Farm Finish
For the protection of all Farm Implements

Home and Farm Finish
For the many surfaces in the Home and on the Farm

Velvet-Finish
A popular finish for interior or exterior surface. Especially suited to walls and ceilings.

Floor Finish
A tough, high-gloss finish especially prepared for Porch and Verandah Floors.

Much of the Sales Power of the Floglaze Family

Lies in the fact that it is by far the smallest Paint family (7 only) that is adapted for use on practically every surface.

This simply means that the "Floglaze" dealer is not burdened with dead paint stock through a host of special finishes, but is prepared to meet every requirement in either Paint, Enamel or Stain with the Seven Ranges of Floglaze shades. The result is a much quicker turnover on a less cash investment.

Floglaze Selling Helps are Business Getters for the Paint Department. Ask us about them.

Art-Shades
in the more delicate tints for decorating interior woodwork, furniture, plumbing, etc.

Lac-Shades
For renewing Interior Floors, Furniture, Oil Cloths and Linoleums.

Auto-Finish
For refinishing Automobiles, Auto-Trucks, Carriages, Buggies, Cutters, etc.

Exterior Finish
A high gloss finish with uncommon protective qualities for the numerous outdoor surfaces.

GENERAL MARKETS

(Continued from page 53)

season's delivery is $3.50 per 100 square feet, and orders are being received at this price.

Harvest Tools Booking Well

London, Ont.

HARVEST AND GARDEN TOOLS. Booked orders received for harvest and garden tools and for spades and shovels are very satisfactory. Quotations on harvest tools are 50 and 10 per cent. off list, and for spades and shovels 35 per cent. off list.

Screen Door Hinge Quotations

London, Ont.

SCREEN DOOR HINGES. — Quotations on spring hinges for screen doors are the following: No. 20 or No. 200, $2.50 per dozen, or $28.80 per gross pairs.

Booking Prices on Mowers

London, Ont.

LAWN MOWERS. — The following are the quotations here on Taylor-Forbes make of lawn mowers for spring delivery. Booked orders are being received in good volume.

Woodyatt and Star, 10 per cent. off list.

Daisy and Empress, 15 per cent. off list.

Spring Prices on Alabastine

London, Ont.

ALABASTINE. — Good sales are being made for spring delivery on alabastine, and quotations are 16 cents per pound less 40 per cent., and for half-size packages add 50 cents per case.

Winnipeg Markets

WINNIPEG, Jan. 27.—A few more reductions have been made this week on the price of hardware commodities. Various styles of butt hinges have been reduced, and lower prices have been made on crow bars, grub hoes, mattocks, railroad picks, thumb latches, copper rivets, annealed wire, bright and coppered spring wire. Wire rope shows a decline in price, and woven wire fencing is lower in price. Barrel churns, brooms and oakum have also been reduced in price. Turpentine is unchanged this week at the decline noted last issue. Lower quotations are expected on other lines of hardware, but there is an opinion that some prices will be firmer again, and that certain quotations are likely to advance again in a few weeks' time. Business is quiet but a good trade is looked for this coming spring.

Crow Bars Reduced in Price

Winnipeg.

CROW BARS.—The price has been reduced on crow bars and they are now quoted at 12 cents per pound. Claw bars are now 15½ cents per pound.

No Change in Turpentine

Winnipeg.

TURPENTINE.—Quotations on turpentine show no change this week and last report of $2.00 per gallon still prevails.

Linseed Oil Remains Firm

Winnipeg.

LINSEED OIL.—There is no change of price on linseed oil this week and orders are coming in more freely. Raw linseed oil is now priced at $1.27 per gallon with boiled at $1.30 per gallon for immediate shipment.

Mattocks Drop in Price

Winnipeg.

MATTOCKS.—The prices of grub and pick mattocks have dropped a little and they are now quoted at the following prices:

Grub mattocks, $14.25

Pick mattocks, $14.25.

Railroad Picks Costing Less

Winnipeg.

PICKS. — The prices have been reduced on picks and they are now quoted at the following prices:

Railroad picks — 5-6 lbs., $12.25 per doz.; 6-7, $13.25; 7-8, $14.25.

Ore or rock picks—6-7, $13.25 per doz.; 7-8, $14.25.

Butts Down in Price

Winnipeg.

BUTTS.—Different kinds of butts are marked down in price and following are the latest quotations:

No. 804—2 in. x 2 in., $1.13 per doz. pairs; 2½ x 2½, $1.35; 3 x 3, $1.87; 3½ x 3, $2.47; 3½ x 3½, $2.73; 4 x 4, $3.33; 4½ x 4½, $5.60.

No. 823—2½ x 2½, $2.67; 3 x 3, $3.20; 3½ x 3, $3.33; 3½ x 3½, $3.47; 4 x 4, $4.27; 4½ x 4½, $5.87; 5 x 5, $8.00.

No. 731—3 x 3, $3.33; 3½ x 3½, $3.60; 4 x 4, $4.27; 4½ x 4½, $6.33; 5 x 5, $8.67.

No. 241, Old Copper and Old Brass—2½ in. x 2½ in., 42c per pr.; 3 x 3, 43c; 3½ x 3½, 45c; 4 x 4, 56c; 4½ x 4½, 82c; 5 x 5, $1.40; 6 x 6, $2.45.

No. 241½, Old Copper and Old Brass—3 x 3, 85c; 3½ x 3½, 95c; 4 x 4, $1.03; 4½ x 4½, $1.35; 5 x 5, $1.93; 6 x 6, $3.22.

Wrought Staples Lower in Price

Winnipeg.

WROUGHT STAPLES. — The prices have been lowered on wrought iron staples and are as below:

1½ in., 65c per gross; 2 in., 90c; 2½ in., $1.25; 3 in, $1.70; 3½ in., $2; 4 in., $2.75.

Brass Screw and Cap Hooks Lower

Winnipeg.

BRASS SCREW AND CAP HOOKS. —The price on these has been revised this week and they are quoted at 50 per cent. off list, which is a reduction.

Copper Rivets and Burrs Reduced

Winnipeg.

COPPER RIVETS AND BURRS. — The price has been reduced a little on copper rivets and burrs and following are new prices:

Copper Rivets—8, 55c per lb.; 10, 59½c; 12, 64c.

Copper Burrs -8, 55c; 10, 59½c; 12, 64c.

Assorted Copper Rivets and Burrs—8, 61½c; 9, 64c; 10, 66c.

Wire Has Dropped in Price

Winnipeg.

WIRE. — The prices for annealed, bright market and coppered spring wire has been reduced and the following are the latest quotations:

Annealed—No. 0 to 8, $7.10 per 100 lbs.; 9, $7.20; 10, $7.25; 11, $7.35; 12, $7.40; 13, $7.60; 14, $7.70; 15, $7.95; 16, $8.40.

Bright Market—No. 0 to 8, $7.35; 9, $7.45; 10, $7.50; 11, $7.60; 12, $7.65; 13, $7.85; 14, $7.95; 15, $8.20; 16, $8.65.

Coppered Spring—No. 8, $10.96; 9, $10.08; 10, $11.20; 12, $11.30; 13, $11.51; 14, $11.63.

Oakum Reduced Again in Price

Winnipeg.

OAKUM.—The prices for spun oakum and plumbers' oakum have been marked down and are as below:

Spun oakum, $11.50 per bale; plumbers' oakum, $7.00.

Pittsburgh Markets

PITTSBURGH, Jan. 27.—The predictions that the steel market would show improvement during January have not been verified, and though there is a possibility that it may come in March, it is believed now that there will be no great improvement until after the summer.

PITTSBURGH, Jan. 27. — There are lacking even the rumors that usually spring up in a dull season that the steel market is improving, which shows that the situation is particularly unpromising. Of course, the prediction made in December, that there would be improvement immediately after the turn of the year, has gone by the boards, as anyone should have expected it would since it is not natural for the steel market to improve in January. March is a favorable month for that, and there is still a possibility that there will be improvement at that time, but this is no more than a possibility. The common prediction is that there will be no great improvement until after the summer is over, but the predictions are indefinite in that they do not assert that there really will be great improvement at that time.

It remains the common view that all that is wrong with business is that a general readjustment in commodity prices and wage rates has to be made, but if that is all that is requisite there ought to be improvement within a very few months since the deflation is already quite extensive. It is true that

Barrett Roofings, Cements Industrial Paints etc.

Everlastic "Rubber" Roofing

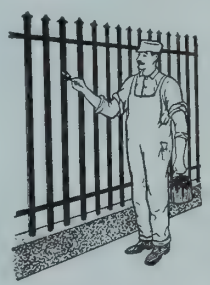
Plastic Elastigum Patching Cement

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

THE man who buys Barrett Products usually buys them through a dealer. The dealer carries them because he knows who makes them and what they *are*. He knows, also, that The Barrett Company's reputation throughout the Dominion is *his* reputation in his locality, and that it increases his sales, his profits, and his name for quality and fair prices.

Consumers are likely to judge you, Mr. Dealer, by the products you handle. Barrett Products on your counter will tell them that you are the man they want to do business with.

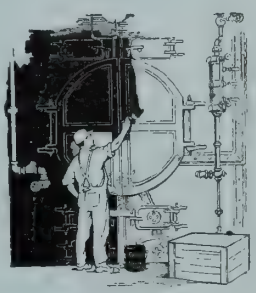
Farm impliments don't wear out—they rust out. Everjet prevents rust.



Everjet Elastic Carbon Paint

A black carbon paint for industrial purposes. No other paint on the Canadian market has ever enjoyed the same popularity and filled so many demands in the industrial world as Everjet, which was put on the market by our chemists less than ten years ago.

We manufacture no product which we can more thoroughly recommend. For use on all kinds of metal and wood, particularly on materials subject to severe conditions; for use on boilers, smokestacks, machinery, piping; in fact, metal work of all kinds. It is also used extensively for painting metal roofs. It successfully resists the corrosive action of acids, alkalies, fumes and vapors, and will wear stubbornly under the most adverse conditions.



It is being used extensively by big manufacturing concerns, railroads, etc., all over Canada, and has been endorsed by some of the most eminent engineers.

Put up in: 1-Gallon Cans, Lithographed (cases of one doz.), 5 Gallon Cans, ½-Barrels (about 20 gallons), Barrels (about 40 gallons).

Everjet Paint adds years to the life of outdoor metal work.

Everlastic Liquid Roofing Cement

FOR resurfacing old and worn-out "rubber" and prepared roofings, here's a winner!

Comes ready for use, is easy to apply and forms a smooth, tough, durable surface which stubbornly resists moisture, acids, alkalies and fumes. Adds years of service to a worn-out roof at small expense.

Everlastic Liquid Roofing Cement is in a class by itself among roof repair materials.

WINNIPEG VANCOUVER HALIFAX, N. S.

The Barrett Company LIMITED

MONTREAL TORONTO ST. JOHN, N. B.

thus far wage reductions have been exceptional rather than general, but it does not follow that extensive wage reductions will not be made within a couple of months. Many manufacturers, convinced that wages must be reduced, have simply been waiting until there has been a spell of idleness, in order to make wage reductions more acceptable. In the steel industry the latest reductions are those of the Inland Steel Company and the Steel & Tube Company of America, both in the Chicago district, the reductions amounting to about 20 per cent. The Pittsburgh and Youngstown districts have seen scarcely any reductions. The independent ore interests in the Lake Superior ore region are reducing wages 15 per cent. This, of course, is in anticipation of the expected reduction in Lake Superior iron ores for the season of 1921, the common guess being that there will be a decline of $1 a ton from the 1920 season prices. This would put ore prices back to the level of the 1919 season, making Mesabi non-Bessemer ore $5.55 at Lake Erie docks.

The Steel Corporation shows no signs of contemplating any wage reductions in any of its operations, and the trade believes that while the corporation will eventually reduce wages it will only do so after all the independents have taken action.

In some quarters a feeling is now arising that there may be something more wrong with the business than merely the need of price and wage readjustment. Increasing attention is being paid to the fact that many large business interests, supposedly in sound condition and believed to have made very large profits in the past few years, are borrowing money at high rates of interest, equivalent to between 7 and 8 per cent., on notes or on short term bonds, and the question is why this should be necessary if things are as they seem to be. There is satisfaction, of course, that there have been so few business failures. At the same time great credit is given to the operation of the Federal Reserve Act, and it is said that if this system had not been established there would have been many failures. However, the proper analysis of the facts seems to be that even though failures and a regular panic have been averted the fundamental conditions must be bad, more or less, or there would have been nothing to avert. It must be understood that when borrowings at high interest rates are mentioned the iron and steel industry is not referred to. This industry is perfectly sound financially and has no occasion to borrow money. It does a cash business and really got the profits it was making. Its inventories of raw and partly manufactured material are relatively low and it has no finished goods in stock.

Production
